Notes to the accounts

1. Accounting policies

The following principal accounting policies have been applied consistently throughout the year, dealing with items which are considered material to the company's financial statements.

Basis of preparation
The financial statements have been prepared in accordance with applicable accounting standards and under the historical cost accounting rules.

The company's finance leases (as lessee and lessor) in respect of the vessel, the Stena Explorer, were terminated on 30 November 2009. As the directors intend to liquidate the company, these financial statements have not been prepared on a going concern basis. No adjustments were necessary to the amounts at which the remaining net assets are reported in these financial statements.

Under FRS 1 the Company is exempt from the requirement to prepare a cash flow statement on the grounds that a parent undertaking includes the Company in its own published consolidated financial statements, which are publicly available from the address given in note 11.

Interest payable and interest receivable
Net interest payable on funding from group undertakings and other financing is regarded as an operating cost and is included in operating profit in the profit and loss account.

Taxation
The taxation charge for the year is based on the profit or loss for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes.

Except as otherwise provided by accounting standards, deferred taxation is provided on the full provision method on those timing differences that have originated but not reversed by the balance sheet date. Deferred tax is not recognised on permanent timing differences.

Deferred tax assets are recognised only to the extent that it is considered more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Foreign exchange
Transactions denominated in foreign currencies are recorded at actual exchange rates as of the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the year end are reported at the rate of exchange prevailing at that date. Any gain or loss arising from a change in exchange rates subsequent to the date of a transaction is included as an exchange gain or loss in the profit and loss account.

Dividends
Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividends are approved for payment.
