Accounting period

The balance sheets for 2011 and 2010 have been drawn up at 25 December 2011 and 26 December 2010 respectively

Classification of shares as debt or equity

An equity instrument is a contract that evidences a residual interest in the assets of an entity after deducting all its liabilities. Accordingly, a financial instrument is treated as equity if there is no contractual obligation to deliver cash or other financial assets or to exchange financial assets or liabilities in terms that may be unfavourable.

When shares are issued, any component that creates a financial liability of the company or group is presented as a liability in the balance sheet measured initially at fair value net of transaction costs and thereafter at amortised cost until extinguished on conversion or redemption. The corresponding dividends relating to the liability component are charged as interest expense in the income statement.
