YEAR ENDED 3 APRIL 2011

1. Accounting policies

Basis of accounting

The financial statements have been prepared under the historical cost convention, and in accordance with applicable accounting standards

Cash flow statement

The directors have taken advantage of the exemption in Financial Reporting Standard No 1 (revised) from including a cash flow statement in the financial statements on the grounds that it is a small company

Depreciation

Deferred taxation

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements

Deferred tax is measured at the average tax rates that are expected to apply in the years in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis

Financial liabilities and equity

Financial liabilities and equity are classified according to the substance of the financial instrument's contractual obligations, rather than the financial instrument's legal form

2 Turnover

The turnover and profit before tax are attributable to the one principal activity of the company. All turnover arises within the United Kingdom
