Strategic Report

4

Review of business

Principal activities

The principal activities of BAE Systems Marine Limited (the "Company") are the design, development and construction of submarines.

Overview

Submarine activity is increasing with the Astute and Dreadnought Class submarines now both in production and major redevelopment of the Barrow, UK site to deliver the Dreadnought programme is under way.

The detailed arrangements for the Dreadnought Alliance, including the organisational, governance and commercial arrangements between the three parties: the Ministry of Defence, BAE Systems and Rolls-Royce, continue to be developed.

Key performance indicators

Key financial performance indicators are shown below:

		As restated
	2018	2017
	£'000	£'000
Order intake	2,416,848	814,693
Revenue	1,332,928	1,108,766
Profit before tax	123,218	127,458

Order intake represents the value of funded orders received from customers in the year. It is a measure of inyear performance and supports future years' sales performance.

Revenue represents the amounts derived from the provision of goods and services.

Profit before tax is used for internal performance analysis as a measure of operating profitability that is comparable over time.

^{*} Prior year comparatives have been restated upon the Company's adoption of International Financial Reporting Standard ("IFRS") 15, Revenue from Contracts with Customers. See note 20 for details regarding the restatement.

Strategic Report (continued)

Principal risks and uncertainties

The Company's principal risks are identified below:

UK public sector spending

The 2015 UK Strategic Defence and Security Review provided additional clarity regarding future Naval programmes and we believe that our advanced planning work with the UK Ministry of Defence will generate revenues that remain in line with the overall business plan.

Delivery risk

Undertaking work within our core competencies and skills built on many years' experience in this market reduces the overall execution risks. However, although most risks are negligible, the high technical requirements within our development contracts need careful management to minimise the inherent risks in that aspect of our work.

The Company is dependent on defence spending

The Company's core business is selling products and services directly to the UK Government. Defence spending by governments can fluctuate depending on political considerations, budgetary constraints and specific threats.

There have been constraints on Government expenditure in the UK.

The Company's largest customer is the UK Government

The Company has long-standing relationships and security arrangements with the Government of the UK and their agencies. It is important that these relationships and arrangements are maintained.

In the defence and security industries, governments can typically modify contracts or terminate them at short notice.

The Company's performance on its contracts is subject to financial audits and other reviews which can result in adjustments to prices and costs.

The Company is subject to risk from a failure to comply with laws and regulations

The Company operates in a highly-regulated environment and is subject, without limitation, to regulations relating to import-export controls, money laundering, false accounting, anti-bribery and anti-boycott provisions. It is important that the Company maintains a culture in which it focuses on embedding responsible business behaviours and that all employees act in accordance with the requirement of the Company's policies, including the Code of Conduct, at all times.

Export restrictions could become more stringent and political factors or changing international circumstances could result in the Company being unable to obtain necessary export licences.

The Company has many contracts, including a small number of large contracts and fixed-price contracts

A significant portion of the Company's revenue is derived from contracts on which it takes a degree of risk. Actual costs may exceed the projected costs on which the prices are agreed and, since these contracts can extend over many years, it can be difficult to predict the ultimate outturn costs.

It is important that the Company maintains a culture in which it delivers on its projects within tight tolerances of quality, time and cost performance in a reliable, predictable and repeatable manner.

BAE Systems Marine Limited Annual Report and Financial Statements 31 December 2018

Strategic Report (continued)

Principal risks and uncertainties (continued)

The defined benefit pension schemes in which the Company participates have aggregate funding deficits

In aggregate, there is an actuarial deficit between the value of the projected liabilities of BAE Systems' defined benefit pension schemes and the assets they hold.

The deficits may be adversely affected by changes in a number of factors, including investment returns, long-term interest rate and price inflation expectations, and anticipated members' longevity.

The Company could be negatively impacted by information technology security threats

The security threats faced by the Company include threats to its information technology infrastructure, unlawful attempts to gain access to its proprietary or classified information and the potential for business disruptions associated with information technology failures.

The Company's strategy is dependent on its ability to recruit and retain people with appropriate talent and skills. All employees are required to act in accordance with the Company's policies

Delivery of the Company's strategy and business plan is dependent on its ability to compete to recruit and retain people with appropriate talent and skills, including those with innovative technological capabilities.

Approved by the Board and signed on its behalf by:

J M Collard Director

Date:

Directors' Report

Company registration

BAE Systems Marine Limited (the "Company") is a private company, limited by shares and registered in England and Wales with the registered number 00229770.

Results and Dividends

The Company's profit for the financial year is £123,942k (2017 £119,223k profit restated). The directors do not propose a dividend for 2018 (2017: £nil).

Looking Forward

The Company expects to continue with its current contracts for the foreseeable future. Production under the Dreadnought programme continues to increase.

The terms of the UK's exit from the EU are currently uncertain, rendering it difficult for the Company to prepare for potential changes in the regulatory environment. In particular, a no-deal Brexit could have an impact on programmes which depend on the movement of goods between the UK and the EU but near-term impacts for the Company are likely to be limited.

Going Concern

The financial statements have been prepared on the going concern basis, notwithstanding net liabilities of £33,079k, which the directors believe to be appropriate for the following reasons. The Company is dependent for its working capital on funds provided to it by BAE Systems plc, the Company's ultimate parent. BAE Systems plc has indicated that for at least 12 months from the date of approval of these financial statements, it will continue to make available such funds as are needed by the Company. The directors consider that this should enable the Company to continue in operational existence for the foreseeable future by meeting its liabilities as they fall due for payment. As with any company placing reliance on other group entities for financial support, the directors acknowledge that there can be no certainty that this support will continue although, at the date of approval of these financial statements, they have no reason to believe that it will not do so.

Employees

The Company is committed to giving full and fair consideration to applications for employment from disabled people who meet the requirements for roles, and making available training opportunities and appropriate accommodation to disabled people employed by the Company.

Employee engagement enables our employees to contribute to improving business performance and helps us to gauge our performance in creating an environment in which everyone can fulfil their potential.

We keep employees informed about what is happening across the business, including Company results, major business decisions and other matters which affect them, using a variety of media, including our intranet and email, through podcasts, newsletters and leadership blogs, and also through team briefs and team meetings where we seek to listen to employees' views and opinions. Employees have the opportunity to provide feedback through our engagement surveys.

The Company welcomes employees becoming shareholders in BAE Systems plc and offers employee share plans to support this.

BAE Systems Marine Limited Annual Report and Financial Statements 31 December 2018

Directors' Report (continued)

Research and development

The Company is focused on technology innovation and engineering excellence and invests in next-generation research and technology programmes to improve the manufacturing and service of products, generating substantial intellectual property. Total research and development expenditure in the year was £258.4m (2017 £229.6m), of which £3.6m (2017 £3.3m) was funded by the Company.

Financial instruments

In order to protect itself against currency fluctuations, the Company's policy is to hedge all material firm transactional exposures.

Directors and their interests

The directors who served throughout the year and up to the date of this report, unless otherwise stated were as follows:

W J Blamey (resigned 8 January 2018)

G J Baverstock (resigned 26 January 2018)

C M Robson (appointed 8 January 2018)

G J Edwards (appointed 29 January 2018 and resigned 20 November 2018)

J M Collard (appointed 20 November 2018)

The Board is not aware of any contract of significance in relation to the Company in which any director has, or has had, a material interest.

Disclosure of information to auditor

The directors who held office at the date of approval of this Directors' Report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware; and each director has taken all the steps that they ought to have taken to make themselves aware of any relevant audit information and to establish that the Company's auditor is aware of that information. This confirmation is given and should be interpreted in accordance with the provisions of S418 of the Companies Act 2006.

Directors' Report (continued)

Auditor

Following a Group audit retender by the Company's ultimate parent company, BAE Systems plc, Deloitte LLP was appointed as auditor to the Company on 10 September 2018.

Deloitte LLP have indicated their willingness to be re-appointed as the Company's auditor and a resolution proposing their re-appointment will be put to the member(s).

BAE Systems Marine Limited Annual Report and Financial Statements 31 December 2018

Directors' Responsibilities Statement

The directors are responsible for preparing the strategic report, the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law), including Financial Reporting Standard 101 ("FRS 101"), Reduced Disclosure Framework. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Independent Auditor's Report to the Members of BAE Systems Marine Limited

Report on the audit of the financial statements.

Opinion

In our opinion the financial statements of BAE Systems Marine Limited (the "Company"):

- give a true and fair view of the state of the Company's affairs as at 31 December 2018 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 101, Reduced Disclosure Framework; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the Income Statement;
- the Statement of Comprehensive Income;
- the Balance Sheet;
- the Statement of Changes in Equity; and
- the related notes 1 to 23.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101, Reduced Disclosure Framework (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our Report.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the "FRC's") Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We are required by ISAs (UK) to report in respect of the following matters where:

- the directors' use of the going concern basis of accounting in preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may
 cast significant doubt about the Company's ability to continue to adopt the going concern basis of
 accounting for a period of at least twelve months from the date when the financial statements are
 authorised for issue.

We have nothing to report in respect of these matters.

Independent Auditor's Report to the Members of BAE Systems Marine Limited (continued)

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report, other than the financial statements and our Auditor's Report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our Report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in respect of these matters.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our Auditor's Report.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and the Directors' Report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Strategic Report or the Directors' Report.

Independent Auditor's Report to the Members of BAE Systems Marine Limited (continued)

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report in respect of the following matters if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made, or
- we have not received all the information and explanations we require for our audit; or
- the directors were not entitled to take advantage of the small companies' exemption in preparing the director's report and from the requirement to prepare a strategic report

We have nothing to report in respect of these matters.

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Christopher Robertson (Senior Statutory Auditor)

1. Accounting policies

BAE Systems Marine Limited (the "Company") is a private company, limited by shares, and registered in England and Wales and incorporated in the United Kingdom. Its ultimate controlling party is BAE Systems plc. The address of the Company's registered office is shown on page 6. The principal activity of the Company is set out in the Strategic Report on page 1.

1.1 Basis of preparation

These financial statements were prepared in accordance with FRS 101, Reduced Disclosure Framework issued in September 2015. The amendments to FRS 101 (2015/16 cycle) issued in July 2016 and FRS 101 (2016/17 cycle) issued in July 2017 have no impact on the Company.

In preparing these financial statements, the Company applies the recognition, measurement and disclosure requirements of International Financial Reporting Standards ("IFRS") as adopted by the EU ("EU-adopted IFRS"), but makes amendments where necessary in order to comply with the Companies Act 2006 and has set out below where advantage of the FRS 101 disclosure exemptions has been taken:

- the requirements of IFRS 7 Financial Instruments: Disclosures;
- the requirements of paragraphs 91 to 99 of IFRS 13 Fair Value Measurement;
- the requirements of the second sentence of paragraph 110 and paragraphs 113(a), 114, 115, 118, 119(a) to (c), 120 to 127 and 129 of IFRS 15 Revenue from Contracts with Customers;
- the requirement in paragraph 38 of International Accounting Standard ("IAS") 1 Presentation of Financial Statements, to present comparative information in respect of: paragraph 79(a)(iv) of IAS 1; paragraph 73(e) of IAS 16 Property, Plant and Equipment; paragraph 118(e) of IAS 38 Intangible Assets; and paragraphs 76 and 79(d) of IAS 40 Investment Property;
- the requirements of paragraphs 10(d), 10(f), 16, 38A, 38B, 38C, 38D, 40A, 40B, 40C, 40D, 111 and 134 to 136 of IAS 1 Presentation of Financial Statements:
- the requirements of IAS 7 Statement of Cash Flows;
- the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors;
- the requirements of paragraphs 17 and 18A of IAS 24 Related Party Disclosures;
- the requirements in IAS 24 Related Party Disclosures, to disclose related party transactions entered
 into between two or more members of a group, provided that any subsidiary which is a party to the
 transaction is wholly owned by such a member; and
- the requirements of paragraphs 130(f)(iii), 134(d) and 135(c) to 135(e) of IAS 36 Impairment of Assets

The Company intends to continue to prepare its financial statements in accordance with FRS 101.

1. Accounting policies (continued)

1.1 Basis of preparation (continued)

The Company is exempt under section 400 of the Companies Act 2006 from the requirement to prepare consolidated financial statements as it and its subsidiary undertakings are included by full consolidation in the consolidated financial statements of its ultimate parent, BAE Systems plc, a Company registered in England and Wales. Accordingly, these financial statements present information about the Company as an individual undertaking and not as a group.

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of relevant financial assets and financial liabilities (including derivative instruments). These financial statements have been prepared using the going concern basis of accounting.

Critical accounting policies

Certain of the Company's significant accounting policies are considered by the directors to be critical because of the level of complexity, judgement or estimation involved in their application and their impact on the financial statements. The critical accounting policies are listed below:

Critical accounting policy	Description
Revenue and profit recognition	The Company accounts for revenue in accordance with IFRS 15 Revenue from Contracts with Customers. For most of the Company's contracts, revenue and associated margin are recognised progressively over time as costs are incurred, and as risks have been mitigated or retired. The ultimate profitability of contracts is based on estimates of revenue and costs, including allowances for technical and other risks, which are reliant on the knowledge and experience of the Company's project managers, engineers, and finance and commercial professionals. Material changes in these estimates could affect the profitability of individual contracts. Revenue and cost estimates are reviewed and updated at least quarterly, and more frequently as determined by events or circumstances. See note 1.2.
Valuation of retirement benefit obligations	Defined benefit pension scheme accounting valuations are prepared by independent actuaries. The liabilities of the pension schemes are valued based on a number of actuarial assumptions. For each of the actuarial assumptions used there is a range of possible values and management estimates the point within that range that most appropriately reflects the Company's circumstances. Small changes in these assumptions can have a significant impact on the size of the deficit. See note 16.

1. Accounting policies (continued)

1.1 Basis of preparation (continued)

Chester street provision

The company holds a provision for asbestos related illness claims, valuations are prepared by independent actuaries. The liabilities valued based on a number of actuarial assumptions. For each of the actuarial assumptions used there is a range of possible values and management estimates the point within that range that most appropriately reflects the Company's circumstances. Small changes in these assumptions can have a significant impact on the size of the provision. See note 17.

Judgements made in applying accounting policies

In the course of preparing the financial statements, no judgements have been made in the process of applying the Company's accounting policies, other than those involving estimates, that have had a significant effect on the amounts recognised in the financial statements.

Sources of estimation uncertainty

The application of the Company's accounting policies requires the use of estimates. In the event that these estimates prove to be incorrect, there may be an adjustment to the carrying amounts of assets and liabilities within the next financial year. The significant estimates in relation to the Company's critical accounting policies are set out above.

Changes in accounting policies

IFRS 9 Financial instruments and IFRS 15 Revenue from Contracts with Customers became effective on 1 January 2018. The impact of adoption is set out in note 20.

Several other standards, interpretations and amendments to existing standards became effective on 1 January 2018, none of which had a material impact on the Company.

IFRS 16 Leases is effective from 1 January 2019. The standard replaces IAS 17 Leases. Whilst lessor accounting under IFRS 16 is similar to IAS 17, lessee accounting is significantly different. Under IFRS 16, the Company will recognise within the Balance Sheet a right-of-use asset and a lease liability for future lease payments in respect of all leases, unless the underlying assets are of low value or the lease term is 12 months or less. Within the Income Statement, rental expense on the impacted leases will be replaced with depreciation on the right-of-use asset and interest on the lease liability.

Significant accounting policies

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been applied consistently to all the years presented, unless otherwise stated. The directors believe that the financial statements reflect appropriate judgements and estimates, and provide a true and fair view of the Company's financial performance and position.

1. Accounting policies (continued)

1.2 Revenue and profit recognition

Revenue represents income derived from contracts for the provision of goods and services, over time or at a point in time, by the Company to customers in exchange for consideration in the ordinary course of the Company's activities.

Performance obligations

Upon approval by the parties to a contract, the contract is assessed to identify each promise to transfer either a distinct good or service or a series of distinct goods or services that are substantially the same and have the same pattern of transfer to the customer. Goods and services are distinct and accounted for as separate performance obligations in the contract if the customer can benefit from them either on their own or together with other resources that are readily available to the customer and they are separately identifiable in the contract. The Company provides warranties to its customers to give them assurance that its products and services will function in line with agreed-upon specifications. Warranties are not provided separately and, therefore, do not represent separate performance obligations.

Transaction price

At the start of the contract, the total transaction price is estimated as the amount of consideration to which the Company expects to be entitled in exchange for transferring the promised goods and services to the customer, excluding sales taxes. Variable consideration, such as price escalation, is included based on the expected value or most likely amount only to the extent that it is highly probable that there will not be a reversal in the amount of cumulative revenue recognised. The transaction price does not include estimates of consideration resulting from contract modifications, such as change orders, until they have been approved by the parties to the contract. The total transaction price is allocated to the performance obligations identified in the contract in proportion to their relative stand-alone selling prices. Given the bespoke nature of many of the Company's products and services, which are designed and/or manufactured under contract to the customer's individual specifications, there are typically no observable stand-alone selling prices. Instead, stand-alone selling prices are typically estimated based on expected costs plus contract margin consistent with the Company's pricing principles. Whilst payment terms vary from contract to contract, on many of the Company's contracts, an element of the transaction price is received in advance of delivery. The Company therefore has significant contract liabilities. The Company's contracts are not considered to include significant financing components on the basis that there is no difference between the consideration and the cash selling price as a result of UK Ministry of Defence contracting rules which prohibit the inclusion of financing in the sales price.

Revenue and profit recognition

Revenue is recognised as performance obligations are satisfied as control of the goods and services is transferred to the customer. For each performance obligation within a contract, the Company determines whether it is satisfied over time or at a point in time. Performance obligations are satisfied over time if one of the following criteria is satisfied:

- the customer simultaneously receives and consumes the benefits provided by the Company's performance as it performs;
- the Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- the Company's performance does not create an asset with an alternative use to the Company and it
 has an enforceable right to payment for performance completed to date.

The Company has determined that most of its contracts satisfy the over-time criteria, either because the customer simultaneously receives and consumes the benefits provided by the Company's performance as it performs (typically services or support contracts) or the Company's performance does not create an asset with an alternative use to the Company and it has an enforceable right to payment for performance

1. Accounting policies (continued)

1.2 Revenue and profit recognition (continued)

completed to date (typically development or production contracts).

For each performance obligation to be recognised over time, the Company recognises revenue using an input method, based on costs incurred in the period. Revenue and attributable margin are calculated by reference to reliable estimates of transaction price and total expected costs, after making suitable allowances for technical and other risks. Revenue and associated margin are therefore recognised progressively as costs are incurred, and as risks have been mitigated or retired. The Company has determined that this method faithfully depicts the Company's performance in transferring control of the goods and services to the customer.

If the over-time criteria for revenue recognition are not met, revenue is recognised at the point in time that control is transferred to the customer, which is usually when legal title passes to the customer and the business has the right to payment, for example, on delivery.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised immediately as an expense.

Contract modifications

The Company's contracts are often amended for changes in customers' requirements and specifications. A contract modification exists when the parties to the contract approve a modification that either changes existing or creates new enforceable rights and obligations. The effect of a contract modification on the transaction price and the Company's measure of progress towards the satisfaction of the performance obligation to which it relates is recognised in one of the following ways:

- 1. prospectively, as an additional, separate contract; or
- 2. prospectively, as a termination of the existing contract and creation of a new contract; or
- 3. as part of the original contract using a cumulative catch-up.

The majority of the Company's contract modifications are treated under either 1 (for example, the requirement for additional distinct goods or services) or 3 (for example, a change in the specification of the distinct goods or services for a partially completed contract), although the facts and circumstances of any contract modification are considered individually as the types of modifications will vary contract-by-contract and may result in different accounting outcomes.

Costs to obtain a contract

The Company expenses pre-contract bidding costs which are incurred regardless of whether a contract is awarded. The Company does not typically incur costs to obtain contracts that it would not have incurred had the contracts not been awarded, such as sales commission.

Costs to fulfil a contract

Contract fulfillment costs in respect of over-time contracts are expensed as incurred. Contract fulfillment costs in respect of point in time contracts are accounted for under IAS 2 Inventories.

1. Accounting policies (continued)

1.3 Leases

Lease income under operating leases is recognised in the Income Statement on a straight-line basis over the lease term.

Lease payments made under operating leases, including incentives granted, are recognised in the Income Statement on a straight-line basis over the lease term.

1.4 Research and development

The Company undertakes research and development activities either on its own behalf or on behalf of customers.

Company-funded expenditure on research, and on development activities not meeting the conditions for capitalisation, is written off as incurred and charged to the Income Statement.

Where the research and development activity is performed on behalf of customers, the revenue arising is recognised in the Income Statement in accordance with the Company's revenue recognition policy.

1.5 Intangible assets

Intangible assets are carried at cost or valuation, less accumulated amortisation and impairment losses.

Software

Software includes:

- Computer software licences acquired for use within the Company which are capitalised as an intangible asset on the basis of the costs incurred to acquire and bring to use the specific software;
- Software development costs that are directly associated with the production of identifiable and
 unique software products controlled by the Company, and that will probably generate economic
 benefits exceeding costs beyond one year, which are recognised as intangible assets. Companyfunded expenditure associated with enhancing or maintaining computer software programs for sale
 is recognised as an expense as incurred.

Amortisation

Amortisation of intangible assets, is charged to the Income Statement on a straight-line basis over their estimated useful lives.

The estimated useful lives are as follows:

Software

- 2 to 5 years

1. Accounting policies (continued)

1.6 Property, plant and equipment

Cost

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. The cost of self-constructed assets includes the cost of materials, direct labour and an appropriate proportion of production overheads. The cost of demonstration assets is written off as incurred.

Assets held for leasing out under operating leases are included in property, plant and equipment at cost less accumulated depreciation and impairment losses.

Depreciation

Depreciation is provided, normally using the straight-line method, to write off the cost of property, plant and equipment over their estimated useful lives to any estimated residual value, using the following rates:

Buildings

- up to 50 years, or the lease term if shorter

Computing equipment and

- 4 to 5 years

motor vehicles Other equipment

- 10 to 20 years, or project life if shorter years

No depreciation is provided on freehold land and assets in the course of construction.

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each Balance Sheet date.

Impairment

The carrying amounts of the Company's property, plant and equipment are reviewed at each Balance Sheet date to determine whether there is any indication of impairment.

1. Accounting policies (continued)

1.7 Impairment

The carrying amounts of the Company's intangible assets are reviewed at each Balance Sheet date to determine whether there is any indication of impairment as required by IAS 36 Impairment of Assets. If any such indication exists, the asset's recoverable amount is estimated. For intangible assets that are not yet available for use, impairment testing is performed annually.

An impairment loss is recognised whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

The recoverable amount is the greater of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using an appropriate pre-tax discount rate. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Impairment losses are recognised in the Income Statement.

An impairment loss in respect of intangible assets or property, plant and equipment is reversed if the subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised or if there has been a change in the estimate used to determine the recoverable amount.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

1.8 Inventories

Inventories are stated at the lower of cost, including all relevant overhead expenditure, and net realisable value.

1.9 Trade, other and contract receivables

Trade and other receivables are stated at amortised cost including a provision for expected credit losses. The Company measures the provision at an amount equal to lifetime expected credit losses, estimated by reference to past experience and relevant forward-looking factors.

Contract receivables represent amounts for which the Company has an unconditional right to consideration in respect of unbilled revenue recognised at the Balance Sheet date and comprise costs incurred plus attributable margin.

BAE Systems Marine Limited Annual Report and Financial Statements 31 December 2018

Notes to the Financial Statements

1. Accounting policies (continued)

1.10 Trade and other payables

Trade and other payables are stated at their amortised cost.

1.11 Provisions for liabilities

A provision is recognised in the Balance Sheet when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and the amount has been reliably estimated. If the effect is material, provisions are determined by discounting the expected future cash flows at an appropriate pre-tax discount rate.

Legal, contractual and environmental

The Company holds provisions for expected legal, contractual and environmental costs that it expects to incur over an extended period. Management exercises judgement to determine the amount of these provisions. Provision is made for known issues based on past experience of similar items and other known factors. Each provision is considered separately and the amount provided reflects the best estimate of the most likely amount, being the single most likely amount in a range of possible outcomes.

Other

The provision relates to amounts provided in respect of uninsured liabilities to former employees arising from asbestos exposure. The liabilities are expected to unwind over a period of approximately 50 years.

1. Accounting policies (continued)

1.12 Retirement benefit obligations

Defined contribution pension schemes

A defined contribution pension scheme is a post-employment benefit plan under which the Company pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts.

Obligations for contributions are recognised as an expense in the Income Statement as incurred.

Defined benefit pension schemes

The cost of providing benefits is determined periodically by independent actuaries and charged to the Income Statement in the period in which those benefits are earned by the employees. Remeasurements, including actuarial gains and losses, are recognised in the Statement of Comprehensive Income in the period in which they occur. Past service costs resulting from a plan amendment or curtailment are recognised immediately in the Income Statement.

The retirement benefit surpluses and obligations recognised in the Company's Balance Sheet represents the fair value of scheme assets, less the present value of the defined benefit obligations calculated using a number of actuarial assumptions as set out on page 44. The bid values of scheme assets are not intended to be realised in the short term and may be subject to significant change before they are realised. The present values of scheme liabilities are derived from cash flow projections over long periods and are, therefore, inherently uncertain.

IAS 19 Employee Benefits, limits the measurement of a defined benefit surplus to the lower of the surplus in the defined benefit scheme and the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the scheme or reductions in future contributions to the scheme. International Financial Reporting Interpretations Committee ("IFRIC") 14, IAS 19 The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction, issued in 2007, provides an interpretation of the requirements of IAS 19 clarifying that a refund is available if the entity has an unconditional right to a refund in certain circumstances. The Company has applied IFRIC 14 and has determined that there is no limit on the recognition of the surpluses in its defined benefit pension schemes as at 31 December 2018.

The Company participates in a number of group and multi-employer schemes administered by its ultimate parent Company, BAE Systems plc. A share of the IAS 19 Employee Benefits, pension deficit has been allocated to all participating employers. This allocation is based on the relative payroll contributions of active members which is consistent with prior years.

Whilst this methodology is intended to reflect a reasonable estimate of the share of the deficit, it may not accurately reflect the obligations of the participating employers. Gains and losses resulting from changes to the relative payroll contributions of active members year on year are included within actual return on assets and actuarial gains and losses for the disclosures in respect of changes in the fair value of scheme assets and changes in the present value of defined benefit obligations, respectively.

In the event that an employer who participates in BAE Systems plc's pension schemes fails or cannot be compelled to fulfil its obligations as a participating employer, the remaining participating employers are obliged to collectively take on its obligations. The Company considers the likelihood of this event arising as remote.

1. Accounting policies (continued)

1.13 Share-based payments

BAE Systems plc, the Company's ultimate parent company, issues equity-settled share options to employees of the Company. In accordance with the requirements of IFRS 2 Share-based Payment, the Company has recognised a charge for the equity-settled share options issued to its employees.

Equity-settled share options and long-term incentive plan arrangements are measured at fair value at the date of grant using an option pricing model.

The fair value is expensed on a straight-line basis over the vesting period, based on the Company's estimate of the number of shares that will actually vest.

1.14 Tax

Tax expense comprises current and deferred tax. Current and deferred tax is recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or other comprehensive income.

Current tax

Current tax is the expected tax payable or receivable on the taxable profit or loss for the year, using tax rates enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for temporary differences:

- on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- related to investments in subsidiaries and equity accounted investments to the extent that it is probable that they will not reverse in the foreseeable future; and
- arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefit will be realised.

The most significant recognised deferred tax assets relate to the deficits on the Company's pension/retirement benefit schemes. This is because retirement benefit costs are deducted in determining accounting profit as service is provided by employees, but deducted in determining taxable profit either when the contributions are paid to the pension/retirement benefit schemes or when retirement benefits are paid. In reviewing the probability that taxable profits will be available in the future against which such contributions/payments can be deducted, account has been taken of the deficit recovery plans agreed with the trustees of the relevant schemes under which the deficits are expected to be cleared between 2021 and 2026.

1. Accounting policies (continued)

1.14 Tax (continued)

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to corporate income taxes levied by the same tax authority and they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

2. Segmental analysis

The remuneration of the auditor for the year ended 31 December 2018 for auditing of the financial statements was £0.1m (2017 £0.2m) and nil (2017 nil) in respect of non-audit work. Total research and development expenditure was £258.4m (2017 £229.6m), of which £3.6m (2017 £3.3m) was funded by the Company. As noted in the Directors' Report, Deloitte LLP was appointed as statutory auditor for 2018, replacing KPMG LLP, who resigned following the 2017 audit. Accordingly, references related to 2018 relate to Deloitte LLP and 2017 to KPMG LLP.

6. Employees

The weekly average number of Company employees was 8,749 (2017 7,472). The aggregate staff costs of Company employees were as follows:

	2018 £'000	2017 £'000
Wages and salaries	343,707	311,248
Social security costs	34,296	31,468
Cost of defined benefit schemes (note 16)	51,800	39,500
Cost of defined contribution schemes (note 16)	16,180	13,019
Share-based payments (note 19)	6,915	6,584
	452,898	401,819

The disclosures below represent an allocation of the emoluments received by the directors to reflect their qualifying services to the Company.

6.	Employees (continued)	•	
	Directors' remuneration	2018 £'000 686	2017 £'000 567
	Company contributions to defined benefit pension schemes	164	70
	Compensation for loss of office	268	-
		1,118	637
	Retirement benefits are accruing to the following number of directors under:		
	Defined benefit schemes	2018 Number of directors 2	2017 Number of directors 3
	The number of directors who exercised share options	2018 Number of directors	2017 Number of directors
	The number of directors in respect of whose qualifying services were received or receivable under long-term incentive schemes	2	1

6. Employees (continued)

Amounts paid in respect of the highest paid director were as follows:

Remuneration and amounts receivable under long-term incentive plans	2018 £'000 459	2017 £'000 285
Company contributions to defined benefit pension schemes	125	-
	584	285

The highest paid director's benefit accrued pension and accrued lump sum at 31 December 2017 was £156k (2017 £38k) and £nil (2017 £nil).

During the year, the highest paid director received shares under a long-term incentive scheme.

7. Tax

16. Retirement benefit obligations

Background

BAE Systems plc operates pension schemes for qualifying employees in the UK, US and other countries. The principal schemes in the UK are funded defined benefit schemes and the assets are held in separate trustee-administered funds.

At 31 December 2018, the weighted average durations of the UK defined benefit pension obligations were 17 years (2017 18 years).

The Company participates in the following BAE Systems plc schemes: BAE Systems Pension Scheme (Main Scheme), BAE Systems 2000 Pension Plan (2000 Plan), BAE Systems Executive Pension Scheme, Royal Ordnance Pension Scheme, Alvis Pension Scheme and Shipbuilding Industries Pension Scheme (SIPS).

The split of the defined benefit pension liability on a funding basis between active, deferred and pensioner members for the most significant schemes (based on the size of the closing net deficit/surplus) is set out below:

	Active	Deferred %	Pensioner %
Main Scheme ¹	35	20	45
BAE Systems (VSEL) Section of SIPS ²	38	23	39

- 1. Source: Main Scheme actuarial valuation report as at 31 March 2017.
- 2. Source: BAE Systems (VSEL) Section of SIPS actuarial valuation 31 March 2017.

Regulatory framework

The funded UK schemes are registered and subject to the statutory scheme-specific funding requirements outlined in UK legislation, including the payment of levies to the Pension Protection Fund as set out in the Pension Act 2004. These schemes were established under trust and the responsibility for their governance lies jointly with the trustees and BAE Systems plc.

Benefits

The UK defined benefit schemes provide benefits to members in the form of a set level of pension payable for life based on members' final salaries. The benefits attract inflation-related increases both in deferment and payment. All UK defined benefit schemes are closed to new entrants, with benefits for new employees being provided through a defined contribution scheme. The Normal Retirement Age for active members of the Main Scheme and 2000 Plan is 65. Specific benefits applicable to members differ between schemes. Further details on the benefits provided by each scheme are provided on the BAE Systems Pensions website: www.baesystemspensions.com.

A UK High Court judgment was delivered on 26 October 2018 concerning gender equalisation for the effect of Guaranteed Minimum Pensions (GMPs) for occupational pension schemes. It is expected that the total impact of GMP equalisation for all Group subsidiaries will be in the region of £121m based on an estimate as at 26 October 2018 for the UK schemes that were contracted out of the State Earnings Related Pension Scheme between 1990 and 1997. This has been treated for IAS 19 purposes as a plan amendment and resulted in an increase in the pension deficit in the Balance Sheet and a corresponding past service cost in the Income Statement. The Company has been allocated a share of the past service cost based on the relative payroll contributions of active members. The Company's share of the £121m is £22.9m.

16. Retirement benefit obligations (continued)

Funding

Introduction

Disclosures in respect of pension funding provided below reflect the pension schemes as a whole. Disclosures in respect of pension accounting under IAS 19 are provided on pages 45 to 50.

The majority of the UK defined benefit pension schemes are funded by BAE Systems plc's subsidiaries and equity accounted investments. The individual pension schemes' funding requirements are based on actuarial measurement frameworks set out in their funding policies.

For funding valuation purposes, pension scheme assets are included at market value at the valuation date, whilst the liabilities are measured on an actuarial funding basis using the projected unit credit method and discounted to their present value based on prudent assumptions set by the trustees following consultation with scheme actuaries.

The funding valuations are performed by professional qualified independent actuaries and include assumptions which differ from the actuarial assumptions used for IAS 19 accounting purposes shown on page 45. The purpose of the funding valuations is to design funding plans which ensure that the schemes have sufficient funds available to meet future benefit payments.

Valuations

Funding valuations of the UK defined benefit schemes are performed every three years. The latest valuations were performed as at 31 March 2017. The next funding valuations will have an effective date of no later than 31 March 2020.

In November 2017, the triennial funding valuations and, where necessary, deficit recovery plans were agreed with the trustees and certified by the scheme actuaries after consultation with the UK Pensions Regulator.

The results of the most recent triennial valuations at 31 March 2017 are shown below:

	Main Scheme £bn	BAE Systems (VSEL) Section of SIPS £bn	Other schemes £bn	Total £bn
Market value of assets	12.8	1.8	7.0	21.6
Present value of liabilities	(14.4)	(2.0)	(7.3)	(23.7)
Funding (deficit)/surplus	(1.6)	(0.2)	(0.3)	(2.1)
Percentage of accrued benefits covered by the assets at the valuation date	89%	90%	96%	91%

The valuations were determined using the following mortality assumptions:

	2017
Life expectancy of a male currently aged 65 (years)	86 – 89
Life expectancy of a female currently aged 65 (years)	88 – 90
Life expectancy of a male currently aged 45 (years)	88 – 92
Life expectancy of a female currently aged 45 (years)	91 – 93

16. Retirement benefit obligations (continued)

The discount rate assumptions used in the 2017 valuations were directly based on prudent levels of expected returns for the assets held by the schemes, reflecting the planned investment strategies and maturity profiles of each scheme. The discount rates are curves which provide a different rate for each year into the future.

The inflation assumptions are derived using data from the Bank of England which is based on the difference between the yields on index-linked and fixed interest long-term government bonds. The inflation assumption is a curve which provides a different rate for each year into the future.

In aggregate, the total net funding deficit across the UK schemes at 31 March 2017, prior to allocation to other participating employers, was £2.1bn. The funding valuations resulted in a significantly lower deficit than under IAS 19, largely due to lower liabilities reflecting the higher discount rate assumption. Under IAS 19, the discount rate for accounting purposes is based on third-party AA corporate bond yields whereas, for funding valuation purposes, the discount rate is based on a prudent level of expected returns from the broader and mixed types of investments reflected in the schemes' investment strategies, which are expected to yield higher returns than bonds.

The agreements reached are underpinned by contingency plans, which include a commitment by BAE Systems plc to a further £50m of deficit funding into the largest scheme prior to the next triennial valuation in the event that the scheme funding level was to fall below pre-determined parameters. In addition, BAE Systems plc would be required to pay £187m across its schemes with deficits at the valuation date if the funding levels for those schemes were to fall significantly and were to remain at or below those levels for nine months.

There have been no changes to the contributions or benefits, as set out in the rules of the schemes, for pension scheme members as a result of the new funding valuations.

The results of future triennial valuations and associated funding requirements will be impacted by a number of factors, including the future performance of investment markets and anticipated members' longevity.

Contributions

Under the terms of the trust deeds of the UK schemes, BAE Systems plc is required to have a funding plan determined at the conclusion of the triennial funding valuations.

The total Company contributions made to the defined benefit schemes in the year ended 31 December 2018 were £54.41m (2017 £44.4m).

Deficit contributions will further increase in line with any percentage growth in dividend payments made by BAE Systems plc. Under the deficit recovery plans, these annual payments would subsequently fall by £50m in 2022 as the deficits on certain schemes are expected to be cleared. The annual payments are expected to end in 2026 when all deficits are projected to be cleared. Under the last agreement made in 2014, all scheme deficits were projected to be cleared in 2026. Deficit recovery payments are allocated to all participating employers based on the relative payroll contributions of active members.

In 2019, the Company expects that contributions to its pension schemes will be broadly in line with 2018.

16. Retirement benefit obligations (continued)

Risk management

The defined benefit pension schemes expose the Company to actuarial risks, including market (investment) risk, interest rate risk, inflation risk and longevity risk.

Risk	Mitigation
Market (investment) risk	
Asset returns may not move in line with the liabilities and may be subject to volatility.	The investment portfolios are highly diversified, investing in a wide range of assets, in order to reduce the exposure of the total portfolio to a materially adverse impact from a single security or type of security. To reduce volatility, certain assets are held in a matching portfolio, which largely consists of index-linked bonds, gilts and swaps, designed to mirror movements in corresponding liabilities. Some 47% (2017 51%) of the UK pension scheme assets are held in equities and pooled investment vehicles due to the higher expected level of return over the long term. Some of the pension schemes use derivative financial instruments as part of their investment strategy to manage the level of market risk. The Main Scheme and BAE Systems Executive Pension scheme jointly have an equity option strategy protecting £1.8bn of assets against a significant fall in equity markets. In February 2019 this protection was extended to cover £2.6bn of assets.
Interest rate risk	
Liabilities are sensitive to movements in interest rates, with lower interest rates leading to an increase in the valuation of liabilities.	In addition to investing in bonds as part of the matching portfolio, some of the UK schemes invest in interest rate swaps to reduce the exposure to movements in interest rates. The swaps are held with several banks to reduce counterparty risk. The discount rate assumptions set as part of the 2017 UK funding valuations more directly reflect the expected returns on assets held by the schemes and, therefore, the liabilities are less sensitive to interest rate risk than they were in the 2014 funding valuation. Accordingly, the 2017 approach provides a more natural hedge against interest rate risk. The planned investment strategy, which is reflected in the discount rate and liability calculation, is for the schemes to increase their investments in bonds or other assets which match the liabilities as the schemes mature. Under the 2017 UK funding valuation, the Company expects the schemes to be fully hedged against interest rate movements following a five-year transition period to the planned investment strategy.
Inflation risk	
Liabilities are sensitive to movements in inflation, with higher inflation leading to an increase in the valuation of liabilities.	In addition to investing in index-linked bonds as part of the matching portfolio, the principal UK schemes invest in long-term inflation swaps to reduce the exposure to movements in inflation. The swaps are held with several banks to reduce counterparty risk. The approach to the 2017 UK funding valuation provides a more natural hedge against inflation movements and, therefore, the liabilities are less sensitive to inflation risk than they were in the 2014 funding valuation. Under the 2017 UK funding valuation approach, the Company is already fully hedged against inflation movements and, under the planned investment strategy, aims to maintain a fully hedged position. In 2014, the Main Scheme implemented a pension increase exchange to allow retired members to elect for a higher current pension in exchange for foregoing certain rights to future pension increases.
Longevity risk	
Liabilities are sensitive to life expectancy, with increases in life expectancies leading to an increase in the valuation of liabilities.	Longevity adjustment factors are used in the majority of the UK pension schemes in order to adjust the pension benefits payable so as to share the cost of people living longer with employees. In 2013, with the agreement of BAE Systems plc, the trustees of the 2000 Plan, Royal Ordnance Pension Scheme and Shipbuilding Industries Pension Scheme entered into arrangements with Legal & General to insure against longevity risk for the current pensioner population, covering a total of £4.4bn of pension scheme liabilities. These arrangements reduce the funding volatility relating to increasing life expectancy.

16. Retirement benefit obligations (continued)

IAS 19 Accounting

The disclosures below relate to pension schemes in the UK which are accounted for as defined benefit schemes in accordance with IAS 19.

Principal actuarial assumptions

The assumptions used are estimates chosen from a range of possible actuarial assumptions which, due to the long-term nature of the obligation covered, may not necessarily occur in practice.

	2018	2017	2016
Financial assumptions			
Discount rate – past service (%)	2.9	2.6	2.7
Discount rate – future service (%)	3.0	2.7	2.7
Retail Prices Index (RPI) inflation (%)	3.1	3.1	3.2
Rate of increase in salaries (%)	3.1	3.1	3.2
Rate of increase in deferred pensions (%)	2.1/3.1	2.1/3.1	2.2/3.2
Rate of increase in pensions in payment (%)	1.6 - 3.7	1.6 - 3.7	1.7 - 3.7
Demographic assumptions			
Life expectancy of a male currently aged 65 (years)	86 – 88	86 – 88	86 – 89
Life expectancy of a female currently aged 65 (years)	88 – 90	88 – 90	89 – 90
Life expectancy of a male currently aged 45 (years)	88 – 90	88 – 90	88 – 91
Life expectancy of a female currently aged 45 (years)	90 – 91	90 – 92	91 – 92

Discount rate

The discount rate assumptions are derived through discounting the projected benefit payments of the principal schemes using a third-party AA corporate bond yield curve to produce a single equivalent discount rate. This inherently captures the maturity profile of the expected benefit payments. The discount rate used for future service differs from that used for past service as it only uses the cash flows relating to active members, which have a different duration. Further information on the duration of the schemes is detailed on page 41.

Retail Prices Index (RPI) inflation

The inflation assumptions are derived by reference to the difference between the yields on index-linked and fixed-interest long-term government bonds, or advice from the local actuary depending on the available information.

Rate of increase in salaries

The rate of increase in salaries for the UK schemes is assumed to be RPI inflation of 3.1% (2017 RPI inflation of 3.1%), plus a promotional scale.

Rate of increase in deferred pensions

The rate of increase in deferred pensions for the UK schemes is based on Consumer Prices Index (CPI) inflation of 2.1% (2017 CPI inflation of 2.1%), with the exception of the 2000 Plan, which is based on RPI inflation of 3.1% (2017 RPI inflation of 3.1%). The rate of increase in deferred pensions is subject to inflation caps.

Rate of increase in pensions in payment

The rate of increase in pensions in payment differs between UK schemes. Different tranches of the schemes increase at rates based on either RPI or CPI inflation, and some are subject to an inflation cap. With the exception of two smaller schemes, the rate of increase in pensions in payment is based on RPI inflation.

16. Retirement benefit obligations (continued)

Life expectancy

The Company has used the Self-Administered Pension Schemes S2 mortality tables based on year of birth (as published by the Institute of Actuaries) for both pensioner and non-pensioner members in conjunction with the results of an investigation into the actual mortality experience of scheme members and information on the demographic profile of the scheme's membership. In addition, to allow for future improvements in longevity, the Continuous Mortality Investigation 2017 tables (published by the Institute of Actuaries) have been used (in 2017, the Continuous Mortality Investigation 2016 tables were used), with an assumed long-term rate of future annual mortality improvements of 1.25% (2017 1.25%), for both pensioner and non-pensioner members.

The disclosures below are in respect of the Company's share of the IAS 19 deficit using the allocation methodology outlined on page 25.

Summary of movements in retirement benefit obligations

Sensitivity analysis

The sensitivity information has been derived using scenario analysis from the actuarial assumptions as at 31 December 2018 and keeping all other assumptions as set out on page 45.

16. Retirement benefit obligations (continued)

Financial assumptions

The estimated impact of changes in the discount rate and inflation assumptions on the defined benefit pension obligation, together with the estimated impact on scheme assets after allocation to other participating employers, is shown in the table below. The estimated impact on scheme assets takes into account the risk management activities in respect of interest rate and inflation risk. The sensitivity analysis on the defined benefit obligation is measured on an IAS 19 accounting basis and, therefore, does not reflect the natural hedging in the discount rate used for funding valuation purposes.

	(Increase)/ decrease in pension obligation £'000	(decrease) in scheme assets £'000
Discount rate:		
0.1 percentage point increase	54,000	(22,000)
0.1 percentage point decrease	(55,000)	23,000
Inflation:		
0.1 percentage point increase	(55,000)	22,000
0.1 percentage point decrease	54,000	(21,000)

The sensitivity of the valuation of the liabilities to changes in the inflation assumption presented above assumes that a 0.1 percentage point change to expectations of future inflation results in a 0.1 percentage point change to all inflation-related assumptions (rate of increase in salaries, rate of increase in deferred pensions and rate of increase in pensions in payment) used to value the liabilities. [However, upper and lower limits exist on the majority of inflation-related benefits such that a change in expectations of future inflation may not have the same impact on the inflation-related benefits, and hence will result in a smaller change to the valuation of the liabilities. Accordingly, extrapolation of the above results beyond the specific sensitivity figures shown may not be appropriate. To illustrate this, the (increase)/decrease in the defined benefit pension obligation resulting from larger changes in the inflation assumption would be as follows:

	(Increase)/ decrease in pension obligation £'000
Inflation:	
0.5 percentage point increase	(146,000)
0.5 percentage point decrease	152,000
1.0 percentage point increase	(314,000)
1.0 percentage point decrease	282,000

Demographic assumptions

Changes in the life expectancy assumption, including the benefit of longevity swap arrangements, would have the following effect on the net IAS 19 deficit:

	(Increase)/ decrease in net deficit £'000
Life expectancy:	
One-year increase	(113,000)
One-year decrease	111,000

17.	Provisions			
		Contract loss** £'000	Other £'000	Total £'000
	Non-current	482	20,857	21,339

	At 31 December 2018	40	25,779	25,819
	Represented by:			
	Non-current	· -	21,244	21,244
	Current	40	4,535	4,575
		40	25,779	25,819

Contract loss

The Company holds provisions for expected contractual costs that it expects to incur over an extended period.

Other

The provision relates to amounts provided in respect of uninsured liabilities to former employees arising from asbestos exposure. The liabilities are expected to unwind over a period of approximately 50 years.

- * An adjustment has been made to split the 2017 provisions into current and non-current as these were incorrectly reported as wholly non-current.
- **Prior year comparatives relating to contract loss provisions have been restated upon the Company's adoption of IFRS 15, Revenue from Contracts with Customers. See note 20 for details regarding the restatement.

18.	Share capital		
		£1 Ordinary shares '000	Nominal value £'000
	Authorised, issued and fully paid		
	At 1 January and 31 December 2018	136,764 ————————————————————————————————————	136,764
-	Other reserves		
			Hedging reserve £'000
	At 1 January 2017		-
	Amounts charged to hedging reserve		169
	Tax on other comprehensive income		(29)
	At 31 December 2017		140
	Amounts charged to hedging reserve		276
	Tax on other comprehensive income		(47)
	At 31 December 2018		369

Hedging reserve

The hedging reserve comprises the effective portion of the cumulative net change in fair value of cash flow hedging instruments related to hedged transactions that have not yet occurred.

19. Share-based payments

Share-based payment awards in respect of shares in the ultimate parent company, BAE Systems plc, have been granted to employees of the Company under various plans. Details of the terms and conditions of each share-based payment plan are given in the Annual Remuneration Report of the BAE Systems plc Annual Report.

For options outstanding at the end of the year:

		2018		2017
	2018 Range	Weighted	2017 Range	Weighted
	of exercise	average	of exercise	average
	price of	remaining	price of	remaining
	outstanding	contracted	outstanding	contracted
	options (£)	life (years)	options (£)	life (years)
Executive Share Option Plan	4.99-6.49	. 8	4.12-6.49	8
Performance Share Plan	-	5	-	6

The average share price of BAE Systems plc in the year was £5.89 (2017 £6.11).

20. Change in accounting policies

This note explains the impact of the adoption of IFRS 9 Financial Instruments, and IFRS 15 Revenue from Contracts with Customers, on the Company's financial statements.

Impact on financial statements

As a result of changes in the Company's accounting policies, prior year comparative information has been restated for the adoption of IFRS 15 Revenue from Contracts with Customers. As explained below, IFRS 9 was adopted without restating comparative information. The following tables show the adjustments recognised for each individual line item. Line items that are not affected by the changes have not been included. As a result, the sub-totals and totals disclosed cannot be recalculated from the numbers provided.

IFRS 9 Financial instruments - impact of adoption

IFRS 9 replaces the provisions of IAS 39 that relate to recognition, classification and measurement of financial assets and financial liabilities, de-recognition of financial instruments, impairment of financial assets and hedge accounting. The adoption of IFRS 9 Financial Instruments from 1 January 2018 resulted in changes in accounting policies; however, no adjustments were required to the amounts recognised in the financial statements in previous periods. The accounting policies applied from 1 January 2018 are set out in note 1.

Classification and measurement

On 1 January 2018, the Company has classified its financial instruments in the appropriate IFRS 9 categories.

The derivative financial instruments designated as cash flow hedges under IAS 39 at 31 December 2017 continue to qualify for hedge accounting under IFRS 9 at 1 January 2018 and are therefore treated as continuing hedges.

Financial assets previously classified in the "loans and receivables" category and measured at amortised cost under IAS 39 (being trade receivables, amounts owed by BAE Systems plc equity accounted investments and amounts owed by BAE Systems plc and its subsidiaries) continue to be classified in the "amortised cost" category under IFRS 9 as they are held within a business model to collect contractual cash flows and these cash flows consist solely of payments of principal and interest.

Impairment of financial assets

The Company has four types of financial assets that are subject to IFRS 9's new expected credit loss model:

- trade receivables;
- contract receivables:
- amounts owed by BAE Systems plc and its subsidiaries; and
- cash and cash equivalents.

Trade receivables and contract receivables do not contain a significant financing element and therefore expected credit losses are measured using the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from the initial recognition of the receivables.

20. Change in accounting policies (continued)

The Company has assessed credit risk in relation to defence-related sales to government customers or sub-contractors to governments and believes it to be extremely low as the possibility of default is insignificant; therefore the provision for expected credit losses is immaterial in respect of receivables from these customers.

While amounts owed by BAE Systems plc and its subsidiaries, and cash and cash equivalents are also subject to the impairment requirements of IFRS 9 the identified impairment loss was immaterial.

There was no IFRS 9 impact on retained earnings at 1 January 2018.

IFRS 15 Revenue from Contracts with Customers – impact of adoption
The Company has adopted IFRS 15 fully retrospectively in accordance with paragraph C3(a).
Comparatives for the year ended 31 December 2017 have been restated. The following expedients have been used in accordance with paragraph C5:

- revenue in respect of completed contracts that begin and end in the same accounting period has not been restated:
- revenue in respect of completed contracts with variable consideration reflects the transaction price at the date the contracts were completed; and
- the transaction price allocated to unsatisfied and partially unsatisfied performance obligations as at 31 December 2017 is not disclosed.

The accounting policy in respect of revenue applied from 1 January 2018 is set out in note 1.

The impact of adoption on the Company's comparative Income Statement, Balance Sheet and Statement of Comprehensive Income is shown above.

The impact of adoption on the Company's retained earnings at 31 December 2017 and December 2016 was as follows:

Retained deficit - extract

·	2017 £'000	2016 £'000
Retained deficit - as previously reported	(353,987)	(615,825)
Recognition of revenue for over-time contracts based on costs incurred and including attributable margin	(12,286)	-
Tax on recognition of revenue for over-time contracts based on costs incurred and including attributable margin	2,334	-
Adjustment to retained earnings on adoption of IFRS 15	35,503	35,503
Tax on adjustment to retained earnings on adoption of IFRS 15	(6,746)	(6,746)
	(335,182)	(587,068)

21. Capital commitments

Contracted for

At 31 December 2018 the Company had capital commitments as follows:

	2018 £'000	2017 £'000
but not provided in these financial statements	119,889	196,255

22. Commitments under operating leases

At 31 December 2018 the Company had future minimum lease payments under non-cancellable operating leases as follows:

	2018 £'000	2017 £'000
Not later than 1 year	3,664	1,401
Later than 1 year and not later than 5 years	2,085	2,663
Later than 5 years	2,040	893
	7,789	4,957

23. Controlling parties

The immediate parent company is BAE Systems Marine (Holdings) Limited and the ultimate controlling party is BAE Systems plc, which is both the smallest and largest parent company preparing group financial statements. Both companies are incorporated in the United Kingdom and registered in England and Wales.

The consolidated financial statements of BAE Systems plc are available to the public and may be obtained from its registered address:

6 Carlton Gardens London SW1Y 5AD
