EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) STRATEGIC REPORT

Year Ended 30 September 2021

The directors present their strategic report for the year ended 30 September 2021.

Principal activity

The principal activity of the company during the period remains the transaction of general insurance classified as Miscellaneous Financial Loss and General Lability. There have not been any significant changes in the company's principal activities in the year under review. The directors are not aware, at the date of this report, of any likely major changes in the company's activities in the next year. The company is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

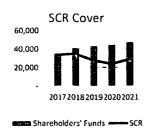

Strategy

Equine and Livestock Insurance Company (ELICO) vision is to provide its Distributors with high quality, innovative, consumer centric general insurance products and be recognised as a leading general insurer providing first class service to Distributors and direct claims service to policyholders. The Company aims to support this vision by utilising best practice and embracing technological change and maintain growth at a sustainable rate and make sufficient profit in order to provide the Shareholder with long-term investment value.

Strategic Review

The balance sheet on pages 15 and 16 of the financial statements shows that the company's shareholders' funds (on a UK GAAP basis) position at the year-end has increased by £2.054,000 to £47,479,000 (2020 - £45,425,000).

Shareholders' Funds are maintained above the Solvency Capital Requirement (SCR) at all times and are required to provide a buffer over and above the liabilities including notified claims and claims not yet advised. Shareholders' Funds are increased by retained earnings and additional share capital injections.

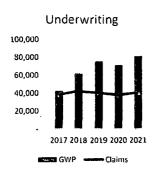

Year	2017	2018	2019	2020	2021
	€000	£000	£000	£000	0003
Share Capital	25,050	30.750	32,450	32,450	32,450.
Reserves	10,930	10,755	11,411	12,982	15,029

2021

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) STRATEGIC REPORT Year Ended 30 September 2021

Key Performance Indicators

The company uses the following Key Performance Indicators (KPI) to understand, monitor and develop the performance of the business against its core strategic objectives..

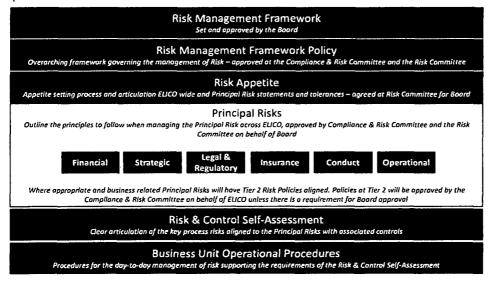

KPI	Me	trie	Commentary
ļ	2021	2020	
Claims Ratio	91%	90.6%	The Company experienced higher claims in the year to September 2021, specifically for equine classes of business, following the easing of lockdown restrictions during the year. The claims ratio, however, remained within the Board appetite of 92.5%.
Profit before Tax and Fair value movements on investments	£1,468,000	£1,963,000	Profit before tax and unrealised gains/(losses) on investments reduced compared to the prior year as a result of the claims experience noted above and additional staff expenditure as the Company continued to strengthen its IT and Governance functions. The year end result was within the budget expectations.
Return on Shareholders' Funds	3.1%	4.3%	The Company achieved its target return on capital of 3% during the year.
SCR Cover Ratio	162%	187%	The Company remains strongly capitalised with a solvency coverage ratio of 162%. This has reduced compared to the prior year due to the growth in GWP in the year. The Board reviews the SCR surplus on a continuous basis and, should the ratio drop below the target level of 147%, this would trigger management actions.

Going concern

As set out in the Directors' Responsibilities statement, the directors are required to prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business. The current economic conditions present increased risks for all businesses. In response to such uncertain conditions, the directors have carefully considered these risks and the extent to which they might affect the preparation of the financial statements on a going concern basis. In particular, the directors of the company have considered in detail the company's forecast performance, including its capital adequacy, forecast solvency position and the valuation of its investments. On this basis, the directors have a reasonable expectation that the company will maintain adequate solvency to continue in operational existence for the foreseeable future. Accordingly, the directors of the company have adopted the going concern basis in preparing these financial statements.

Principal risks and uncertainties

The board ensures that the risks the business faces are managed in a prudent manner via the Risk and Audit Committees. The company operates a risk management framework through which it identifies, monitors, reports and manages its principal risks within its risk appetite and ensures that sufficient capital is held.

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) STRATEGIC REPORT Year Ended 30 September 2021

Competitive pressure in the UK is a continuing risk for the company. The company manages this risk by focusing on customer needs and adapting the product offering to maintain leading coverage and pricing. Procedures are constantly updated to make application, renewal and claims processing as quick and streamlined as possible. Achieving the best customer outcomes remains a key aspect of the business strategy.

ELICO's risk profile is skewed towards insurance risk, arising from the provision of its range of Pet, Pleasure Horse and non-animal policies. The risk and governance framework has been strongly embedded in ELICO and is described in the governance manual.

Insurance Risk

Insurance Risk is the risk that an insured event may occur requiring the Insurer to pay a claim. It also covers the risk that an underwritten inaccurate assessment of associated risks or uncontrollable factors not included in the Policy's exclusion list may result in significant increase in ELICO's cost of claims settlement and exceed earned premiums.

Insurance Risk is monitored and managed with regular management information along with the use of reinsurance contracts.

Reinsurance

The company makes use of reinsurance contracts in order to mitigate the underwriting risk and has contracts in place covering Quota Share, Catastrophe Risk and Marine Excess of Loss.

Market, Credit & Counterparty Risk

Is the risk of loss as a result of the value of financial assets or liabilities (including credit exposure and off balance sheet instruments) being adversely affected by significant changes in underlying market values and the risk that a counterparty fails to meet its contractual financial obligations

Market, Credit & Counterparty risk is monitored and managed through the company's Finance Committee to ensure a diverse mix of low risk assets and ongoing review of applicable credit ratings (e.g. Banks)

Operational Risk

Operational Risk is the loss resulting from inadequate or failed internal processes, people, systems and/or external events.

ELICO has a system of internal controls to manage these operational risks, and to reduce the potential exposure, but accepts that a residual risk of loss remains.

Operational risk is recorded on the risk registers, and day-to day-processes are closely managed by all directors which will identify shortcomings in operational risks.

Conduct Risk

The risk of conducting business, including ELCIO's behaviours, operating model and culture, in a way that leads to customer detriment or untain outcomes.

The company has developed a proportionate framework and balanced training to mitigate Conduct Risk which includes tolerance reporting and product fair value reviews.

Financial Risk

The risk that ELICO may not be able to meet with its financial and capital requirements and ensure financial reporting requirements are timely and to the required standard.

COVID -19

The Company, with its well- established business resilience and crisis management procedures, was well positioned to respond to the COVID-19 situation. Senior management invoked the Crisis Incident Management Team (CIMT) in March 2020 to ensure a swift and organised transition from work in the office to work from home. During the period March to October senior management continued to have active oversight of productivity and employee well-being through the CIMT, which has continued post October through continued senior manager oversight and awareness. Continued oversight of the operational and economic risks caused by the pandemic have been effectively managed as a result.

While the impact of COVID-19 has continued to impact the world- wide economy, ELICO has continued to trade strongly through the period and its commercial activities and operations have not been materially impacted. The Board continues to monitor the situation closely so it can quickly identify and react to any potential market changes as well as ensuring the continued safety and well-being of its staff.

During the year the Company took advantage of the Coronavirus Job Retention Scheme for 2 employees. Total amounts received were £15,546 which is shown within other technical income in the pofit and loss.

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) STRATEGIC REPORT Year Ended 30 September 2021

Future Developments

In the coming year we aim to grow premiums written at a steady rate, whilst maintaining control of the claims ratio. We will continue to enhance our relationships with distributors and invest in the development of our staff to ensure we continue to offer high-quality, innovative and consumer-centric general insurance products.

In addition, the Company will focus on several key emerging risks identified below.

Macro-Economic Environment

Potential impacts of the UK's transition from the EU (31st December 2020) continue to be monitored and appropriate actions taken where impacts are being seen in relation to customer experience and profitability. Specific management awareness over vet fees and potential supply chain issues with medicines is ongoing. The Finance and Risk & Compliance functions continue to monitor the Macro Economic environment with regular discussions at the Finance Committee – specific focus on pricing, cost and capital adequacy.

Operational Resilience and Cyber Security

Ongoing development and understanding of ELICO's Operational Resilience requirements as set out within the FCA and PRA regulatory publications which were finalised March 2021. Risks continue to be assessed and proportionally managed in relation to technical debt / legacy IT, ensuring effective 3rd Party Management and Outsourcing arrangements are in place, improvements to Cyber Security controls and awareness and the ongoing assessment and evolution of Business Continuity Management. ELICO remains on track to meet its regulatory deadlines in 2022, and thereafter as required.

Cyber and Information Security remain a high priority for ELICO with the acceleration of key activity in upgrading the IT infrastructure, including the provision of new Storage area network and a review of Security information and event management and Security operations centre providers. Reporting to the Executive and the Board remain a priority for 2022.

Climate Change Risk

Risk associated with climate change are becoming of increasing importance to the Company, its regulators and customers. The Company's insurance risks and asset portfolio have relatively short durations so the exposure to climate change is limited. The increase in the frequency and severity of extreme weather events will be the main risk the Company is exposed to from climate change through is household lines of business. This is mitigated through the purchase of catastrophe reinsurance and the regular review of pricing assumptions. The impact of climate change is reviewed through the Company's risk management framework and forms part of the development of its overall Environmental, Social and Governance strategy.

Further details of the Company's energy usage are included within the Directors' Report on page 6.

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) STRATEGIC REPORT

Year Ended 30 September 2021

Section 172(1) Companies Act 2006 Statement

This statement sets out how the Directors have had regard to the matters set out in section 172(1) of the Companies Act 2006 when performing their duties. The Directors consider they have acted in a way that, in good faith, would be most likely to promote the success of the Company and the interests of stakeholders and in doing so have regards to:

- the likely consequences of any decision in the long term
- the interests of the company's employees
- the need to foster the company's business relationships with suppliers, customers and others
- the impact of the company's operations on the community and the environment
- the desirability of the company maintaining a reputation for high standards of business conduct, and
- the need to act fairly.

Key decisions relating to Section 172 made in the year are set out below:

Significant	Key Section 172	Actions and Impact
even/decision	matter affected	
Policyholder Outcomes	Customers, Regulators & environment	The Company's goal is to provide up-to-date and consistent products for policyholders, which respect consumer appetite and treat customers fairly. These are distributed by the company's Appointed Representatives. During the year the Board considered the pricing strategy to ensure fair pricing practices are in place. The Company worked with its Distributors to ensure the consistency of the product offering across its brands and make the customer journey as efficient as possible. This included the development of the Policyholder portal in order to reduce customer contact time and reduce the volume of paper communication. The company is also evaluating various automation and Artificial Intelligence solutions to bring efficiencies in operations.
Governance	Business Conduct	The company continues to enhance its governance, and with the appointment of a dedicated Head of Risk & Compliance and Head of Actuarial during the year, was able to split the Chief Risk (SMF4), Compliance Oversight (SMF16), and Chief Actuary (SMF20) regulatory functions to reduce the burden on existing members of the governing body. The company has also undertaken considerable work to develop and implement a robust risk management and operational resilience framework.
Staff	Employees	During the year the company completed a significant refurbishment of its offices to improve the working environment for employees and ensure their on-going safety following the lifting of lockdown restrictions. In addition, the company introduced flexible working from home arrangements with staff well-being of integral importance to the operation of the business.
Strong Sustainable business		To ensure the business remains profitable and sustainable, in order to maximise long-term value for the shareholder, actions have been taken in the year to improve the oversight and training of claims handlers to ensure the correct payment of claims and the effectiveness of internal controls and fraud detection measures. This is being done through additional claims file auditing and an enhanced training programme. In addition, through the use of an improved data analytics tools, underwriting performance is being monitored at a greater level of detail to assess the effectiveness of pricing strategies.

The Company's Board meets quarterly, supported by various sub-committees which are attended by Executive Directors, Non-Executive Directors and senior Heads of Departments within the business. These meetings consider matters in relation to the Company's strategy and operations, including consideration of the interest of stakeholders which comprise its shareholder, customers, suppliers, regulators and employees. Stakeholders, their interests and the manner in which the Company engages with them is integral to how the Company conducts business.

Methodology	Kyoto protocol blends R410A conversion factor

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) DIRECTORS' REPORT

Year Ended 30 September 2021

Energy Efficiency Action

Energy and Carbon

Climate change continues to receive increasing coverage with concerns in respect to the level of damage that humans are inflicting on the planet. Along with all organisations, Equine and Livestock Insurance Company has a duty to take seriously its impact on the environment and has taken steps to reduce its carbon footprint, manage wate and use less energy.

Waste

The impact on the environment of office waste is managed by a Veolia a waste management business who sort and recycle as much as possible and have a commitment to reduce the impact on the environment. Staff are encouraged to reduce the amount of printing and instead use electronic files in order to reduce unnecessary waste. Customer documentation is sent out where possible in an electronic format reducing the need to print and deliver large quantities of paperwork and we have managed to reduce paper documents including cheque payments significantly over the last 5 years. We also encourage customers to submit claim forms and queries electronically or via our on-line portal, again reducing paper and the energy usage of the postal service, the claims forms are then processed entirely electronically. We use the services of Restore Datashred who manage the confidential waste, recycle 100% of all paper received and have a zero landfill policy.

Water

All water is drawn from boreholes on the site and treated before use, using less energy than mains water which is healthier for the environment. As an office based business the use of water is limited, however we have installed hot water boilers in order to enable a more efficient way of heating water for hot drinks and are installing instant hot water taps to improve efficiency further.

Greenhouse Gas

We continue to look for more energy efficient ways of enabling our staff to perform their duties, which includes software to ensure that all PC's are turned off overnight, installation of LED lighting in the offices and the installation of meters to enable better management of energy usage. Our l'T servers have been outsourced to a third party hosting service, who are able to benefit from energy efficiencies due to the scale of their operation. We have seen a reduction in energy consumption per capita during the year as economies of scale have been achieved following the growth in staff numbers, along with more homeworking due to COVID19. We are in the process of redesigning the office space in order to improve the working environment and enable more desk space for the growing workforce, this is done with the objective of avoiding the need to extend or build new offices which would be much more damaging to the environment. In addition we have introduced a home working solution which removes cars from the road along with reducing the need for larger office spaces and during COVID19 all staff have worked from home since March 2020, which has been widely reported as having a beneficial impact on the environment.

Independent Auditors

During the year Watson Buckle Limited resigned as auditors of the Company. Effective 12th July 2021, BDO LLP were appointed as the auditors of the Company.

Disclosure of information to the auditors

Each director has taken steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of that information. The directors confirm that there is no relevant information that they know of and which they know the auditors are unaware of.

Approved by the Board on 25 January 2022 and signed on its behalf by:

F D Martin

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) STATEMENT OF DIRECTORS' RESPONSIBILITIES Year Ended 30 September 2021

Directors' responsibilities

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements the directors are required to:

- select suitable accounting policies and apply them consistently;
- make judgements and estimates which are reasonable and prudent;
- state whether applicable United Kingdom Accounting Standards have been followed; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Opinion on the financial statements

In our opinion, the Company's financial statements:

- give a true and fair view of the state of the Company's affairs as at 30 September 2021 and of the Company's profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of the Equine and Livestock Insurance Company Limited(The) ("the Company") for the year ended 30 September 2021 which comprise the Profit and Loss Account: Technical Account – General Business, the Profit and Loss Account: Non Technical Account – General Business, the Balance sheet, the Statement of changes in Equity, the Statement of Cash Flows, and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and Financial Reporting Standard 103 Insurance Contracts (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion. Our opinion is consistent with the additional report to the audit committee.

Independence

Following the recommendation of the Audit Committee, we were appointed by the Board of Directors on 15 April 2021 to audit the financial statements for the year ending 30 September 2021.

We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We do not provide non-audit services to the Company.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the Directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting included:

 Review and challenge of the Company's current plans and budget forecasts, challenging growth assertions and checking that movements were in line with justifiable assumptions and movements;

- Checked the basis of solvency projections for the next 12 months, considering whether an appropriate mechanism for calculating solvency had been applied; and
- Challenge and discussion around the latest Own Risk and Solvency Assessment to check the Company has sufficient capital to meet its solvency requirements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Overviews

Key audit matters	Valuation of gross and reinsurers share of claims outstanding technical provisions Valuation of land and buildings carried at fair value	2021
Materiality	Financial Statements as a whole £1,200,000 based on 1.5% of Gross	s Written Premium

An overview of the scope of our audit

Our audit was scoped by obtaining an understanding of the Company and its environment, including the Company's system of internal control, and assessing the risks of material misstatement in the financial statements. We also addressed the risk of management override of internal controls, including assessing whether there was evidence of bias by the Directors that may have represented a risk of material misstatement.

All audit work was performed by the audit engagement team.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. This matter was addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on this matter.

Description of Key Audit Matter

Valuation of gross claims outstanding and reinsurers share of gross claims outstanding Refer to the accounting policy in note 2 and the further information in notes 3 and 18.

The financial statements include technical provisions for the estimated cost of settling claims associated with insurance contracts written by the company. The financial include statements also provision for reinsurers share of the technical provisions.

The gross claims outstanding technical provision as at the year end of £8.314m (2019: £6.716m) includes estimation of the outstanding cost of settling all claims that have been incurred before the year end date. corresponding reinsurers share the claims outstanding technical provision at the year end is £3.742m (2020: £3.004m).

The gross claims outstanding technical provision includes an estimate for claims that have been reported by 30 September 2021 as well provisions for those claims that have been incurred but not reported ('IBNR').

The valuation of the technical provisions is dependent on a number of assumptions including the number of claims that will ultimately be received and how much these claims will settle for.

The valuation of the reinsurance reserves is dependent on the amount of the gross insurance reserves.

We have determined this area as being one where there is a significant risk of material misstatement due to the inherent uncertainty and subjectivity associated with the

Recedures performed to address this tak

In assessing the valuation of the technical provisions, we performed the following procedures:

- We used internal independent actuarial experts to consider the appropriateness of the methodology and assumptions underpinning the calculation of the provision and the accuracy of the calculation itself;
- We have checked and agreed the independence and relevant expertise of our actuarial experts;
- We have obtained and reviewed the actuarial reports prepared by the Company and used our actuarial experts to check that judgements and estimates in the Company's calculation are reasonable and in line with acceptable parameters, based on our actuarial experts assessment. Meetings were held between management and our actuarial experts appropriately challenge assumptions and methodology in the formation of our opinion;
- We have reviewed and assessed changes to the assumptions used in the technical provisions compared to previous years to check these are reasonable and in line with acceptable parameters based on our actuarial expert's assessment;
- We have reconciled and agreed a sample of the source data used by management and provided to our actuarial experts to the underlying policy data to check that calculations are based on accurate information;
- We have agreed a sample of case estimates to supporting documentation to check that any adjustments were accounted for in the correct period;
- We have recalculated the reinsurance recoveries to assess whether the reinsurers' share of claims have been correctly recognised;
- We have reviewed the outturn of prior years' estimates against the previous year's Claims Outstanding to assess the accuracy of previous estimates and

	application of judgment and estimation techniques implicit in the valuations performed	the appropriateness of the methodology; and • We have tested claim adjustments and payments after year end that are greater than performance materiality through agreement to supporting documentation to check that these adjustments and payments were accounted for in the correct period. Key observations: • Based on the procedures performed we consider the gross and reinsurers share of technical provisions liability
		recognised by the Company within its financial statements and the assumptions and methodology used to calculate this at 30 September 2021 to be reasonable.
Valuation of land and buildings carried at fair value. Refer to the accounting policy in note 2 and the further information in note 10.	The financial statements include investment property and an owner-occupied property classified as land and buildings held at valuation of £8.540m (2020: £7.197m). Management have engaged an independent property expert to assist them in the valuation process, including the reviewing and selection of applicable assumptions. We have determined this area as being one where there is a significant risk of material misstatement due to the inherent uncertainty and subjectivity associated with the application of judgment and estimation techniques implicit in the valuations performed.	In assessing the valuation of the Land and Buildings we performed the following procedures: • We evaluated the competence, capability and objectivity of management's expert and reviewed valuation reports to ensure that the valuations were based on fair value. • We obtained and reviewed the valuation report prepared by Management Expert on 25 March 2015 • We contacted Management's Expert to discuss and challenge the assumptions and methodology used in the preparation of their report. • We challenged Management on their approach to identifying any events occurring between 25 March 2021 and 30 September 2021 that could have impacted the fair value of the Land and Buildings • We specifically considered, using internal real estate expertise, the appropriateness of the property valuation assumptions and approach used by Management's Expert
		Key observations:

	•	•	Based on the procedures performed we consider the property carried at fair value in the financial statements and the methodology used to calculate this to be reasonable.
Į			

Our application of materiality

We apply the concept of materiality both in planning and performing our audit, and in evaluating the effect of misstatements. We consider materiality to be the magnitude by which misstatements, including omissions, could influence the economic decisions of reasonable users that are taken on the basis of the financial statements. In order to reduce to an appropriately low level the probability that any misstatements exceed materiality, we use a lower materiality level, performance materiality, to determine the extent of testing needed. Importantly, misstatements below these levels will not necessarily be evaluated as immaterial as we also take account of the nature of identified misstatements, and the particular circumstances of their occurrence, when evaluating their effect on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements as a whole and performance materiality as follows:

	Company financial statements
	2021
	£000's
Materiality	1,200.0
Basis for	1.5% of Gross Written Premium
determining	
materiality	
Performance	780.0
materiality	
Basis for	
determining	65% of Materiality
performance	
materiality	·
Rationale for the	Gross Written Premium is considered to
benchmarks	be the most appropriate measure for a
applied	privately owned insurer, reflecting the
	ability of the Company to pay claims and
	settle its expenses.
	Performance materiality has been set at
	65% of financial statement materiality,
	reflecting the low inherent risk associated
	with the aggregation of misstatements
	within the financial statements.

Reporting threshold

We agreed with the Board of Directors that we would report to them any misstatements in excess of £24,000 that we identified through the course of our audit, together with any qualitative matters that warrant reporting.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report and financial statements, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Other Companies Act 2006 reporting

Based on the responsibilities described below and our work performed during the course of the audit, we are required by the Companies Act 2006 and ISAs (UK) to report on certain opinions and matters as described below.

Strategic report and Directors' report	 In our opinion, based on the work undertaken in the course of the audit: the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and the Strategic report and the Directors' report have been prepared in accordance with applicable legal requirements. In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the Directors' report.
Matters on which we are required to report by exception	 We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion: adequate accounting records have not been kept by the Company, or returns adequate for our audit have not been received from branches not visited by us; or the Company's financial statements are not in agreement with the accounting records and returns; or certain disclosures of Directors' remuneration specified by law are not made; or we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities set out on page 9 the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Extent to which the audit was capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

- Obtaining an understanding of the legal and regulatory frameworks that the Company operates in, focusing on those laws and regulations that had a direct effect on the financial statements or that had a fundamental effect on the operations of the group. We considered the significant laws and regulations to be the applicable accounting standards, Prudential Regulatory Authority ('PRA'), Financial Conduct Authority ('FCA'), Company Law and the Bribery Act 2010;
- Agreement of the financial statement disclosures to underlying supporting documentation;
- Assessing the susceptibility of the financial statement to material misstatement including fraud and identified the fraud risk areas to be the valuation of technical provisions (Refer to the Key Audit Matters section above) and management override of controls:
- In response to the risk of management override of controls, assessed the appropriateness of journal entries which met specific risk criteria by agreeing them to appropriate supporting documentation:
- Enquiring of management, the audit committee and Those Charged With Governance, including obtaining and reviewing supporting documentation, concerning the Company's policies and procedures relating to:
 - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance; and
 - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud.

- Review of minutes of board meetings throughout the period; and
- Review of correspondence with the PRA and FCA.

Our audit procedures were designed to respond to risks of material misstatement in the financial statements, recognising that the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery, misrepresentations or through collusion. There are inherent limitations in the audit procedures performed and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we are to become aware of it.

A further description of our responsibilities is available on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) NOTES TO THE FINANCIAL STATEMENTS

Year Ended 30 September 2021

1. General information

The company is a private company limited by share capital, incorporated in England & Wales.

The address of the registered office is: Thorpe Underwood Hall Thorpe Underwood York YO26 9SZ

2. Accounting policies

Summary of significant accounting policies and key accounting estimates

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Statement of compliance

These financial statements have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", Financial Reporting Standard 103, "Insurance Contracts", the Companies Act 2006 and the Large and Medium-sized Companies and Groups (Accounts and Reports) Regulations relating to insurance companies.

Basis of preparation

These financial statements have been prepared using the historical cost convention except that as disclosed in the accounting policies certain items are shown at fair value.

The company's functional and presentation currency is pound sterling.

Going Concern

The directors of the company have considered in detail the company's forecast performance, including its capital adequacy, forecast solvency position and the valuation of its investments. On this basis, the directors have a reasonable expectation that the company will maintain adequate solvency to continue in operational existence for the foreseeable future. Accordingly, the directors of the company have adopted the going concern basis in preparing these financial statements.

Judgements and key sources of estimation uncertainty

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities as at the balance sheet date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates. The following judgements (apart from those involving estimates) have had the most significant effect on amounts recognised in the financial statements.

Significant judgements in applying accounting policies

Shared expenses

All shared expenses are allocated across related companies via recharges. Recharge split percentages are calculated on an appropriate allocation basis, such as turnover, staff numbers and building usage, according to expense type.

Key sources of estimation uncertainty

Insurance contracts

Significant sources of estimation uncertainty in the claims outstanding provision are detailed in the Insurance contracts

Fair value of land and buildings

The valuation of the company's property portfolio is inherently subjective due to, among other factors, the individual nature of each property, its location and the expected future rental revenues from that particular property. As a result, the valuations, performed by professionally qualified valuers, are subject to a degree of uncertainty and are made on the basis of assumptions which may not prove to be accurate, particularly in periods of volatility or low transaction flow in the property market. The carrying value at year end is £8,540,000 (2020: £7,197,000).

2. Accounting policies (continued)

Insurance contracts

Classification of insurance contracts

The company issues contracts that transfer insurance risk

Insurance contracts are those contracts that transfer significant insurance risk. All of the company's insurance products are classified as insurance contracts.

The results are determined on an annual basis whereby the incurred cost of claims, commission and related expenses are charged against the earned proportion of premiums, net of reinsurance as follows:

Premiums written

Written premiums comprise total premium receivable for the whole period of cover provided by contracts incepted during the financial period, together with adjustments arising in the financial period to such premiums receivable in respect of business written in previous financial years. Where premiums are earned through brokens they are shown gross of commission payable, and are exclusive of taxes and duties levied on premiums. Where premiums are earned on policies sold to intermediaries on a wholesale basis, and where the intermediary is responsible for setting the final amount payable by the insured, the written premium comprises the element receivable by the company, and is exclusive of taxes and duties levied on premiums. The annual basis of accounting has been applied to all classes of business, all of which are continuing.

Unearned premiums

This represents the proportion of general business premiums written in the period which relates to cover provided for a future year. The reserve for unearned premium has been calculated on the 24th method after which an appropriate deduction for reinsurance costs associated with the premium including commissions has been deducted. No provision has been provided for any future year on the company's monthly policies.

Acquisition costs

Acquisition costs comprise all direct costs of acquiring new business and renewal of existing business. Deferred acquisition costs are determined by applying average acquisition costs for each category of business written to the unearned element of premiums.

Claims incurred

Claims incurred comprise claims and related expenses paid in the year and changes in the provisions for outstanding claims, including provisions for claims incurred but not reported and related expenses, together with any other adjustments to claims from previous years.

Claims provisions and related reinsurance recoveries

These are assessed on an individual case basis for the estimated cost of claims notified but not settled by the balance sheet date after taking into account handling and settlement costs. A provision for claims incurred but not reported is established on a consistent statistical basis. Any difference between provisions and subsequent settlements are dealt with in the technical accounts of later years. Claims provisions are not discounted. The company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original tiability established.

The estimation of claims incurred but not reported ("IBNR") is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the company, where more information about the claim event is generally available. Classes of business where the IBNR proportion of the total reserve is high will typically display greater variations between initial estimates and final outcomes because of the greater degree of difficulty of estimating these reserves. Classes of business where claims are typically reported relatively quickly after the claim event tend to display lower levels of volatility. In calculating the estimated cost of unpaid claims the company uses a variety of estimation techniques, generally based upon statistical analysis of historical experience, which assumes that the development pattern of the current claims will be consistent with past experience.

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) NOTES TO THE FINANCIAL STATEMENTS

Year Ended 30 September 2021

2. Accounting policies (continued)

Allowance is made, however, for changes or uncertainties which may create distortions in the underlying statistics or which might cause the cost of unsettled claims to increase or reduce when compared with the cost of previously settled claims including:

- changes in company processes which might accelerate or slow down the development and/or recording of paid or incurred claims compared with the statistics from previous periods;
- changes in the legal environment;
- the effects of inflation;
- changes in the mix of business;
- the impact of large losses; and
- movements in industry benchmarks.

A component of these estimation techniques is usually the estimation of the cost of notified but not paid claims. In estimating the cost of these, the company has regard to the claim circumstance as reported, any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods.

Where possible, the company adopts multiple techniques to estimate the required level of provisions. This assists in giving greater understanding of the trends inherent in the data being projected. The projections given by the various methodologies also assist in setting the range of possible outcomes. The most appropriate estimation technique is selected taking into account the characteristics of the business class and the extent of the development of each accident year.

Provisions are calculated gross of any reinsurance recoveries.

Reinsurance

Contracts entered into by the company with reinsurers, under which the company is compensated for losses on one or more contracts issued by the company and that meet the classification requirements for insurance contracts are classified as reinsurance contracts. Insurance contracts entered into by the company under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts, provided there is significant transfer of insurance risk

The reinsurers' share of claims incurred, in the profit and loss account, reflects the amounts received or receivable from reinsurers in respect of those claims incurred during the period.

Reinsurance liabilities represent premiums payable for reinsurance contracts and are recognised in the profit and loss account as 'Outward reinsurance premiums'. In addition, under the quota share reinsurance arrangement, the Company has the right to a commission equal to the profits on the business covered under the contract and this is recognised in the profit and loss account within net operating expenses and disclosed in note 5 to the financial statements. The commission is deferred to the extent of the reinsurers share of the provision for unearned premiums and reinsurers share of claims outstanding.

Tax

The tax expense for the period comprises current tax. Tax is recognised in profit or loss, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

The current corporation tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the company operates and generates taxable income.

Deferred tax is recognised in respect of all temporary differences between taxable profits and profits reported in the financial statements.

Unrelieved tax losses and other deferred tax assets are recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference, except for revalued land and investment property where the tax rate that applies to the sale of the asset is used.

EQUINE AND LIVESTOCK INSURANCE COMPANY LIMITED (THE) NOTES TO THE FINANCIAL STATEMENTS

Year Ended 30 September 2021

2. Accounting policies (continued)

Tangible assets

Tangible assets are stated in the statement of financial position at cost, less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

The cost of tangible assets includes directly attributable incremental costs incurred in their acquisition and installation.

Depreciation is charged so as to write off the cost of assets, other than land and properties under construction over their estimated useful lives, as follows:

Fixtures and fittings Plant and machinery

10% straight line basis

10% straight line basis

Land and buildings

Investment property is carried at fair value, derived from the current market prices for comparable real estate determined annually. The valuers use observable market prices, adjusted if necessary for any difference in the nature, location or condition of the specific asset. Changes in fair value are recognised in profit or loss.

Short leasehold land and buildings are held under the revaluation model where the fair value can be measured reliably. They are carried at a revalued amount, being its fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity to ensure that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Depreciation

Depreciation is charged so as to write off the cost of assets, other than land and properties under construction over their estimated useful lives, as follows:

Owner occupied short leasehold land and buildings 4% straight line basis

Provisions

Provisions are recognised when the company has an obligation at the reporting date as a result of a past event, it is probable that the company will be required to settle that obligation and a reliable estimate can be made of the amount of the obligation.

Share capital

Ordinary shares are classified as equity. Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments. If payment is deferred and the time value of money is material, the initial measurement is on a present value basis.

Defined contribution pension obligation

A defined contribution plan is a pension plan under which fixed contributions are paid into a pension fund and the company has no legal or constructive obligation to pay further contributions even if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

Contributions to defined contribution plans are recognised as employee benefit expense when they are due. If contribution payments exceed the contribution due for service, the excess is recognised as a prepayment.

Financial instruments

The company has chosen to adopt Sections 11 and 12 of FRS 102 in respect of financial instruments.

Financial assets

Basic financial assets, including trade and other receivables, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest for a similar asset. Such assets are subsequently carried at amortised cost using the effective interest method.

At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss and any subsequent reversal is recognised in profit or loss.

2. Accounting policies (continued)

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans, loans from fellow group companies and preference shares that are classified as debt, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest for a similar debt instrument.

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires.

Financial investments

Other financial investments are measured at fair value through profit and loss (FVTPL). The fair values of these financial investments are based on quoted prices as at the balance sheet date. Unrealised gains or losses represent the difference between the fair value at the balances sheet date and their purchase price during the financial year or their fair value at the previous financial year-end.

Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held on call with bank and other highly liquid investments with maturities of three months or less.

Operating Leases: the Company as lessee

Rentals paid under operating leases are charged to the profit and loss on a straight line basis over the lease term.

3. Management of insurance and financial risk

The company issues contracts that transfer insurance risk. The company is also exposed to a range of financial risks through its financial assets, financial liabilities and policy holder liabilities. This section summarises the way the company manages them.

Insurance Risk

Insurance risk can be broken down into several elements.

- Underwriting risk refers to the risk of loss, or of adverse change in the value of insurance liabilities, due to inadequate pricing and reserving assumptions.
 - Reserving risk includes the fluctuations in the timing, frequency and severity of insured events, relative to the expectations of the undertaking at the time of underwriting. This risk can also refer to fluctuations in the timing and amount of claims settlements.
- Concentration risk means all risk exposures with a loss potential which is large enough to threaten the solvency or the financial position of undertakings.

Risk Mitigation

The company manages its exposure to downside insurance risk by controlling pricing, underwriting and reserving assumptions and through the effective use of reinsurance. The Underwriting strategy is designed to ensure risks are diversified in terms of type and amount of risk and the geographical spread. The Company uses both proportional and excess of loss catastrophe cover to manage its insurance exposures. The reinsurance strategy is annually reviewed by the Board to ensure it meets the needs f the Company.

Concentration of Risk

The core class of business written by the Company is Miscellaneous financial loss. This includes cover for pet (76% of GWP for 2021), equine (22% of GWP for 2021) and household (3% of GWP for 2021). Household cover includes caravan, wedding, cycle and marine cover. Policies for these lines also include general liability cover. The Company monitors the concentration of premiums to each type of business to ensure it remains within appetite.

3. Management of insurance and financial risk (continued)

Claims Incurred by type of business

Pet and equine cover mainly compensates policyholders for the cost of vet's fees in the event of illness or injury. Claims are typically short-tailed in nature and claims payment, on average, occurs within three months of the event that gives rise to the claim. The company has identified a major animal epidemic as the biggest risk under this line of business. This risk is mitigated as all DEFRA notifiable diseases are covered by the insurance policies underwritten by the Company as statutory compensation arrangements would apply. It is also a policy condition that all animals are vaccinated.

Household classes of cover mainly compensate policyholders for damage suffered to property or the value of property lost. There can be variability in the nature, number and size of claims made in each period. The number of claims can be affected by weather events, changes in climate, economic environment and crime rates. This risk is mitigated through the purchase of catastrophe reinsurance and monthly monitoring of concentration exposure to, for example, a single caravan site or individual wedding venue.

The Company has a documented reserving policy setting out the basis on which all liabilities are to be determined using actuarial experience. The year end claims outstanding include an Incurred but not reported provision of £3,133,000 (2020: £3;525,000)

The company recognises that the future is subject to uncertainty and has therefore considered key stresses and scenarios which may impact upon its plans and expectations. This testing includes the exposure to a major underwriting loss event such as a major animal epidemic which could put the company in breach of the Solvency II SCR. The company has also considered scenarios whereby claims increase faster than premium growth, thereby eroding the profit margin. Such testing includes projected profit, loss and solvency position for these events.

Sensitivity analysis

The following tables present the sensitivity of the value of insurance liabilities disclosed in this note to movements in the assumptions used in the estimation of insurance liabilities. The sensitivities to economic movements relate solely to business in the LIK

Management consider these sensitivities to be a reasonably possible scenario based on past experience for the business.

	Claims inflation		Claims handling		IBNR Claims	
	0.5% £'000	(0.5)% £'000	10.0% £'000	(10.0)% £'000	5.0% £'000	(5.0)% · £'000

Claims development

The tables below present changes in the historical provision for losses since 2012 and the provision for losses arising in each subsequent accident year. The top section of the tables illustrate how the estimate of total claims outstanding for each accident year has developed over time. The bottom section of the table reconciles the cumulative claims to the amounts appearing in the statement of financial position date.

3. Management of insurance and financial risk (continued)

Market Risk

Market risk is the risk of losses arising from fluctuations in market prices. The company is not exposed to significant market risk, linked only to falls in property values and/or interest rates. Market risk is managed within the company's portfolio guidelines.

The company has invested in commercial property with long term profitable tenants where the receipt of the rent is not a major risk. The company undertakes stress testing for the adverse change in property values (by 10% and 20% of the value) and continues to monitor property values closely.

Liquidity risk

Liquidity risk refers to the risk that the company would be unable to meet its financial obligations when they fall due. The company has a low appetite for liquidity risk, and it carries out cash-flow matching projections to ensure that sufficient liquid funds are available to meet liabilities as they fall due.

Liquidity risk is controlled through the company's bank holdings which is intended to provide sufficient liquidity for the short to medium term needs. No change to holdings is made without Board approval as agreed by the Board.

Total cash held with credit institutions of £27,342,000 (2020: £24,923,000) is held with two counterparties. £16,308,000 of the cash balances held have a maturity less than or equal to one month and are available immediately. The balance of £11,034,000 is held in a 32 day Notice account. The Company is exposed to liquidity risks in meeting operating costs and in meeting policyholder claims, represented in the statement of financial position by the technical provision balances. Both of these exposures will predominately due within 12 months of the balance sheet date, and in particular the majority of claims represented by the technical provisions will generally be settled within 3 months.

The Company mitigates liquidity risk by holding cash reserves which at any one time are sufficient to settle the value of outstanding claims liabilities.

Credit Risk

Credit risk refers to the risk of loss or of adverse change in the financial position resulting, directly or indirectly, from fluctuations in the credit standing of issuers of securities, counterparties and any debtors to which undertakings are exposed, in the form of counterparty default risk, or spread risk, or market risk concentrations. The company's two key credit risk exposures are reinsurer failure and counterparty failure. Credit risk within the company's investment portfolio is controlled through application of the investment guidelines, which cannot be changed without Board approval.

To mitigate the risk the company performs appropriate levels of due diligence over its counterparties and the use of credit rating agencies. The following table provides details of the credit exposure for financial assets with external credit ratings:

	Cash Holdings	Reinsurer share of claims outstanding	Other investments
	£'000	£'000	£'000
As at 30th September 2021			
AA	-	-	1,996

BBB	1,613	-	-
Below BBB		3,742	
	27,342	3,742	1,996
As at 30th September 2020			
AA	-	-	2,000
A	23,310	-	-
BBB	1,613	-	-
Below BBB	-	3,004	
	24,923	3,004	2,000

Debtors arising from direct insurance operations and other debtors relate to non-listed un-rated entities.

The company stress tests adverse changes in bank credit ratings; falls to BBB and BB have been tested.

3. Management of insurance and financial risk (continued)

Capital management

The Company's primary objectives when managing capital are to comply with all regulatory requirements and to safeguard the Company's ability to meet shareholders expectations in line with its strategic plan.

The Company is required to comply with the rules issued by the Financial Conduct Authority (FCA) and the Prudential Regulation Authority (PRA). The PRA expects a firm, at all times, to hold Solvency II Own Funds in excess of its calculated Solvency Capital Requirement (SCR). As at 30th September 2021, the Company held £18.1m (2020:£20.7m) of surplus Own Funds above the SCR requirement. The SCR Risk Appetite, which is set by the Board of Directors, sets out the target capital coverage rations and actions to be taken when managing Own Funds. The Company aims to maintain an appropriate buffer of capital resources over regulatory requirements. The Company exceeded its targeted capital coverage ratio at all times during the financial year.

Included in the above is £nil (2020: £21,634,000) due in over 1 year. The amounts receivable from the shareholder comprise of two loans. The first loan is for £15,139,000 (2020: £15,139,000) for a term of three years with a maturity of 31st December 2021. Interest is charged at the rate of 1.5% plus the Bank of England base rate and is repaid annually. Accrued interest at year end is £181,000 (2020: £201,000). The second loan is for £6,286,000 (2020: £6,286,000) for a term of three years with a maturity of 31st August 2022. Interest is charged at the rate of 1.5% plus the Bank of England base rate is repaid annually. Accrued interest at year end is £8,000 (2020: £8,000). The loans are secured with collateral by way of residential and commercial property.

13. Financial Investments

Financial Investments at fair value through profit and loss	. 2021 £'000	2020 £'000
Government Bonds	1,996 1,996	2,000

The investments are traded actively on the London Stock Exchange and the fair value has been determined by using relevant open market rates.

Fair value hierarchy

Fair value is the price that would be received to sell an asset in an orderly transaction between market participants on the measurement date.

FRS 102 fair value measurement establishes a fair value hierarchy that categories into three levels the inputs to valuation techniques used to measure fair value. The levels are defined as follows:

Level 1 - quoted prices in active markets for identical assets

Level 2 - inputs other than quoted process (per level 1) the are observable for the assets

Level 3 - valuation technique based on an arm's length pricing for the asset.

All Financial investments held by the Company are classified as Level one as at the balance sheet date.

Key management personnel

Key management personnel represented by the members of the Board are listed on page 6. Director remuneration is disclosed in note 7.

23. Investments in subsidiaries

Details of undertaking

Details of the following investments which the company holds 20% or more of the nominal value of any class of share capital are as follows:

Undertaking	Holding	Proportion of voting rights and shares held
Insurance Emporium Limited	Ordinary	2021 2020 100% 100%

The registered address for the undertaking is Thorpe Underwood Hall, Great Ouseburn, York, United Kingdom, YO26

The entity continued to remain dormant throughout the year with a value of £100 (2020:£100), representing the share capital of the Company.

In accordance with Section 405(2) of the Companies Act, the subsidiary is excluded from consolidation as its inclusion is not material for the purpose of giving a true and fair view of the financial statements.

Therefore, based on the CA section 402, Equine takes advantage of CA section 405, and is therefore exempt from the requirement to prepare group accounts, as Insurance Emporium Ltd is its only subsidiary and it is domant.

24. Ultimate controlling party

Foxlow Limited is considered to be the ultimate controlling party by virtue of the fact that the entity owns all of the company's share capital.
