Strategic report for the year ended 31 March 2022

Review of business

The results for the year show a 5% increase in turnover to £60.8 million (2021: £57.8million) and a 55% decrease in profit before taxation to £9.2 million (2021: £20.4 million). Included in the previous year's profit before taxation was a gain of £13.4 million relating to closure of the company's defined benefit scheme, and other income of £1.9 million relating to Coronavirus job retention scheme receipts.

If the £13.4 million gain resulting from closure of the defined benefit scheme is excluded, the previous year's profit before taxation would have been £7.0 million. The current year's profit before tax of £9.2 million represents an increase of 31% on the previous year's comparable figure of £7.0 million. The profit margin for the year was 15% compared to the previous year's comparable figure of 12%.

Company activity continued to be affected by the Coronavirus pandemic, but to a lesser extent than in the previous year. There was no need to furlough staff and therefore no need to make any further claims under the Coronavirus job retention scheme.

The Board closed the defined benefit pension scheme to future accrual with effect from 31 March 2021. As referred to above, closure of the scheme resulted in a large gain reported in profit for the previous financial year, but this gain was offset by actuarial losses reported in the statement of comprehensive income.

The pension scheme surplus, as measured on the basis required by Accounting Standard FRS102, has increased from £10.0 million to £23.8 million. The FRS102 surplus is calculated assuming that the company will continue to support and manage the pension scheme in its present form until all liabilities have been settled. No allowance is made for the risk that events do not turn out as expected, or for the company not being able to support the scheme in the future. Although the company is required to follow the Accounting Standard when reporting its results, the Directors consider that it is more likely that the company will transfer some of the risk associated with the scheme to an insurance company. This transfer of risk is known as "buy-in". If all risk were to be transferred, there would be an estimated deficit of £37.4 million, rather than the asset of £23.8 million reported in the financial statements. Further details are provided in note 23.

Although the Trade and Cooperation Agreement that was negotiated with the EU at the end of 2020 was better than expected, Brexit has still resulted in an increase in the cost and complexity of doing business with the EU. The company's supply of goods to the EU after the end of the transition period was disrupted because carriers were not properly prepared for the new regime, but this situation has improved over time. Longer term, Brexit may encourage the company's European customers to give preference to suppliers located in the EU.

Total equity amounts to £114.8 million (2021: £105.1 million) and net cash from operating activities (before taxation) was £5.1 million (2021: £7.9 million).

Cash flow from operating activities before taxation was £5.1 million (2021: £7.9 million). The principal reasons for the decrease compared to the previous year were higher pension deficit reduction contributions (£5.0 million, compared to £2.5 million) and a £4.4 million increase in inventories. The increase in inventories was due mainly to automotive stocks, which were abnormally low in the previous year, because of exceptionally strong demand at that time. Capital expenditure was £4.0 million compared to £3.0 million in the previous year.

Future outlook

With the exception of lockdowns in China, the immediate effects of the Coronavirus pandemic are largely behind us. The after effects are, however, still being felt, with imbalances between supply and demand and excessive monetary stimulus leading to supply chain issues and rising inflation. These factors have been further exacerbated by the war in Ukraine, particularly in relation to energy and food price inflation. Although demand for the company's products has held up well, rising inflation is likely to reduce profit margins. There is also the risk that supply chain issues could affect the availability of raw materials.

Strategic report for the year ended 31 March 2022 (continued)

Having had a pronounced dip in the autumn of 2021, sales to the automotive sector have returned to more normal levels and we expect to see continued growth in the near term. Sales to the power generation sector continue to perform well, but it is currently difficult to see how this sector will evolve. Although not yet back to pre-pandemic levels, the aerospace sector continues to improve and there is a clear pent-up demand for air travel, which will be supportive in the short to medium term.

The principal long-term risk facing the business continues to be the global shift away from the use of fossil fuels and the increased use of renewable energy for power generation and transportation. Although the extent and pace of change is uncertain, we expect the automotive and power generation markets to be affected first. We think that it will be much harder to de-carbonise the aerospace sector, particularly for long-haul travel and larger aircraft. Further comment is provided in the principal risks and uncertainties section below.

Despite the negative long-term outlook, our automotive customers are still actively developing new products for existing markets and expecting moderate growth in the medium term. The company is actively exploring new markets for its technology whilst also looking to exploit existing markets to their fullest extent.

Key performance indicators

The principal performance indicators used by the Board are as follows:

| | 2022 | 2021 |
|---|------|-------|
| Increase/(decrease) in turnover | 5% | (15)% |
| Pre-tax profit margin (2021 - before pension gain of £13.4 million) | 15% | 12% |

Please refer to Review of business for comments on key performance indicators.

Principal risks and uncertainties

Climate change

There is an ever-increasing focus on the need to reduce greenhouse gas emissions by reducing the use of fossil fuels. This represents a significant challenge to the company as most of its products are related to fossil-fuel technology. Governments around the world have announced ambitious targets to reduce greenhouse gas emissions and this will result in the automotive sector moving away from fossil fuels and towards electric and hydrogen-powered vehicles. Similarly, the power generation sector will increase its use of renewable energy and the aerospace sector is looking towards alternative fuels and battery-powered transport. The company is actively exploring new markets for its technology whilst also looking to exploit existing markets to their fullest extent. Although change is inevitable, the pace of change is uncertain and the fact that the company's products are used to increase the efficiency of existing technology may help to mitigate the impact.

Pandemics

The Coronavirus pandemic had a significant effect on demand for the company's products due to: society-wide restrictions on activity reducing demand; and supply chain disruption causing bottlenecks which prevented our customers from increasing output when demand returned. In addition, production was made more difficult, because of the need to observe social distancing and hygiene restrictions. Although government assistance in the form of the Coronavirus job retention scheme provided very welcome support, this may not be available in the event of future pandemics. The company has a strong balance sheet and good levels of liquidity, which help it weather and adapt to this type of risk.

Political risk, including war

Russia's attack on Ukraine has had far-reaching effects, with a dramatic effect on energy and food prices and disruption to supply chains. Increased energy costs will reduce the company's profitability, partly through direct impacts, such as the cost of heat treatment processes, but also indirectly, through increased raw material costs. Although there does not appear to have been a direct impact on demand for the company's products so far, this remains a distinct possibility.

Strategic report for the year ended 31 March 2022 (continued)

Inflation

Inflation rates around the world have increased dramatically, due to excessive monetary easing during the coronavirus pandemic, supply chain disruption and the war in Ukraine. This will increase the company's costs and reduce margins. Cost increases are likely to be most severe in relation to wages, energy, and materials. The ability of the company to pass on cost increases is restricted by the long-term nature of many of its contracts and customer resistance to price increases.

Supply chain disruption

The seismic changes brought about by the coronavirus pandemic and the war in Ukraine have highlighted the fragility of global supply chains. Another example, not directly connected to these two events, is the global shortage in semiconductors, which restricted automotive production worldwide, even when there was strong demand for vehicles. Supply chain disruption can affect the company in two ways: by limiting the ability of the company to produce parts; and by limiting demand for the company's products. The company ensures that it maintains appropriate levels of stock to limit the effect of disruption from its suppliers.

Exchange rate movements

A substantial part of the company's income is in currencies other than sterling. A sustained shift in exchange rates could have a significant impact on profitability. Where possible, we negotiate risk-sharing arrangements with significant customers. In addition, we enter into forward contracts for the sale of future currency receipts. Forward contracts typically cover about 60% of the next year's expected receipts and 20% of the following year's receipts. Where forward contracts meet the relevant requirements, they are accounted for as cash flow hedges.

Information systems

In common with most businesses, the company is increasingly reliant on its information technology systems. This increased reliance, coupled with an increase in threats, including cyber-attacks, is a key risk to the business, as it would be unable to operate if its systems were unavailable or compromised. There is a continual process of improving the company's resilience in this area and this topic is given a high priority by the Board.

Defined benefit pension scheme

The cost of running the defined benefit pension scheme is subject to significant uncertainties, such as investment returns, price inflation, and pensioner mortality. The defined benefit pension scheme has now closed to future accrual, and this has had the effect of improving funding and reducing cost and risk. The trustees use suitably qualified actuaries and investment managers to monitor and manage the scheme's funding.

Brexit

Although the Trade and Cooperation Agreement has effectively removed the threat of customs duties when importing and exporting goods to and from Europe, Brexit has resulted in an increase in the cost and complexity of doing business with Europe. The supply of goods to the EU was initially disrupted but this situation has improved over time. Longer term, Brexit may encourage our European customers to give preference to suppliers located in the EU. In addition, difficulties associated with implementing the Northern Ireland Protocol may have a knock-on impact on the Trade and Cooperative Agreement.

Competition

The loss of business to other companies, especially those based in low-wage economies, is a significant threat to the company. We are always looking for ways to improve efficiency and are alert to the threats posed by actual and potential competitors.

Technology

There is a risk that certain of our products may become obsolete at some time in the future, or that manufacturing methods or materials could be superseded. We therefore research and develop new products and techniques and also work closely with our customers' engineers to ensure that we remain at the forefront of developments.

Strategic report for the year ended 31 March 2022 (continued)

Quality

Failure to maintain the required level of quality for our products and processes could have significant financial repercussions and also damage our reputation. The company has always prided itself on its quality standards. These standards are monitored through internal, customer and third-party quality audits.

Delivery

Failure to deliver goods when required by our customers can result in financial penalties, damage the company's reputation and ultimately result in the loss of business. The company actively monitors future orders, recruiting additional staff and investing in machinery and buildings as appropriate. Stocks of specialised raw materials are also held because of the very long lead times associated with the purchase of these materials.

On behalf of the board

Musy A. Cross

R A Cross Chairman

6 July 2022

Directors' report for the year ended 31 March 2022

The Directors present their report and the audited financial statements of the company for the year ended 31 March 2022.

Registered number

The Company's registered number is 342798.

Principal activities

The principal activity of the company is the design, development and manufacture of engineering components.

Future developments

See details of future developments within the Strategic Report.

Financial risk management

In addition to the risks outlined in the section headed "Principal risks and uncertainties" in the Strategic Report above, the company addresses other financial risks as set out below.

Credit risk

Cash deposits are only placed with financial institutions having an investment grade credit rating. The company's banks currently have the following Standard & Poor's long term credit ratings:

| National Westminster Bank Plc | Α |
|-------------------------------|------------|
| Lloyds Bank Plc | A + |

Credit checks are carried out where appropriate for new and existing customers, and for suppliers to whom payments on account are made.

Liquidity risk

The company takes account of cash flow requirements when determining the period of time for which funds are placed on deposit with financial institutions.

Cash flow risk

The Board monitors the level of funds held within the business to ensure that there are sufficient funds available for working capital requirements, capital expenditure, funding of the defined benefit pension scheme, and the payment of tax liabilities and dividends. Consideration is also given to the impact of potential downturns in the level of business. Please see note 3 of the financial statements for further comments on cash flow risk in the context of going concern.

Results and dividends

Profit for the financial year amounted to £5.9 million (2021: £16.5 million, including the £13.4 million gain on closure of the defined benefit scheme to future accrual) and total comprehensive income was £12.0 million (2021: £4.3 million).

Given the improvement in underlying profitability, the Directors recommend a final dividend of £7.85 per share. This will result in the total dividend for the year of £14.30 per share, an increase of 11.7% on the previous year.

Directors' report for the year ended 31 March 2022 (continued)

Results and dividends (continued)

The Directors' recommendation is summarised below:

| | Increase | 2022 | 2021 | 2022 | 2021 |
|--|----------|---------|---------|-------|-------|
| Dividend | | £/share | £/share | £'000 | £'000 |
| Interim - Paid 11 April 2022 / 12 April 2021 | 29.0% | 6.45 | 5.00 | 1,175 | 911 |
| Final - Proposed 4 November 2022 / 5 November 2021 | 0.6 % | 7.85 | 7.80 | 1,429 | 1,420 |
| Total for the year | 11.7% | 14.30 | 12.80 | 2,604 | 2,331 |

The final dividend, if approved, will be paid on 4 November 2022 to all members registered as members of the Company on 1 October 2022.

Directors' insurance

The company maintains Directors' and Officers' liability insurance policies on behalf of the Directors. These policies meet the Companies Act 2006 definition of a qualifying third-party indemnity provision.

The qualifying third-party indemnity provision was in force during the financial year and at the date of approval of the financial statements.

Directors of the company

The Directors of the company who were in office during the year and up to the date of signing are shown on page 1.

The Directors retiring by rotation, Messrs ML James and DJ Squire, being eligible, offer themselves for reelection.

Directors' report for the year ended 31 March 2022 (continued)

Section 172(1) statement The Board's approach to section 172(1) and decision-making

The duty of the Board is to promote the success of the company for the benefit of its members as a whole, whilst having regard to

- the likely consequences of any decision in the long term;
- the interests of the company's employees;
- the need to foster the company's business relationships with suppliers, customers and others;
- the impact of the company's operations on the community and the environment;
- the desirability of the company maintaining a reputation for high standards of business conduct; and
- the need to act fairly as between members of the company.

The duty to promote the success of the company and to act fairly as between the members of the company is fully understood by the Board and underpins all decisions. Cross Manufacturing is a private company, with a stable shareholder and customer base. The company's long-term ethos is evidenced by its track record of decisions. In addition, the market sectors it supplies demand continuity and a long-term approach.

The interests of employees have always been part of the Board's thinking, particularly in relation to health and safety, pay and benefits. This is demonstrated by an excellent safety record, very low staff turnover and a substantial number of staff with long service. The Board is committed to equal opportunities in employment, including for disabled people.

The need to foster good relationships with customers is a high priority and is evidenced by good customer retention rates. Due to the nature of the industries in which the company operates, there is very regular contact with customers and continual monitoring by them of our delivery and quality performance. This is further reinforced by regular audits carried out by customers and other bodies, to ensure compliance with customer and industry standards. Good relations with suppliers are also needed due to the specialised nature of materials purchased and the impact of any supplier quality or delivery failures on the company's business. The selection of suppliers and monitoring of their performance is built into the company's quality systems. We also ensure that our suppliers are paid promptly, and in line with best practice.

The company actively engages with the local community, and this includes hosting visits to our factories and museum. We also support a number of local charities. The Bath factory is in a residential area and the company has always consulted with neighbours when making changes that could affect them.

The company has held the environmental accreditation ISO 14001 for a number of years and is actively working to reduce its energy usage and environmental impact.

The industries served by us demand high standards of business conduct and these are reflected in the company's policies on ethics, confidentiality and anti-bribery and corruption.

Engagement with employees

The company provides employees with information on matters of concern to them as employees via:

- regular meetings with managers and supervisors who communicate with their teams and who feed back any concerns from staff;
- regular newsletters from the Board updating staff on the company's progress, including the financial and economic factors affecting the company; and
- a relatively flat management structure, which encourages open and direct communication.

Employees participate in the company's performance through an annual bonus arrangement.

During the Coronavirus pandemic, the company followed all government guidelines and implemented social distancing and hygiene measures, which resulted in a low incidence of cases at work.

Directors' report for the year ended 31 March 2022 (continued)

Engagement with suppliers, customers and others in a business relationship with the company

As stated above, the company's long-term success is very dependent on fostering good business relationships with suppliers, customers and others. The company adopts an open and collaborative approach, and this is evidenced by the stability of its customer, supplier and advisor base.

Other than decisions taken in the normal course of business, the principal matter where the directors have needed to have regard to the interests of suppliers, customers or other parties who have business relationships with the company was in relation to the impact of the Coronavirus pandemic. We have maintained good communications with third parties throughout the pandemic, issuing regular updates via our website and through individual contacts. We have adapted our production to align with customer requirements and have honoured our commitments to all suppliers.

Statement of directors' responsibilities

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable United Kingdom Accounting Standards, comprising FRS 102, have been followed, subject to any material departures disclosed and explained in the financial statements:
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006.

Disclosure of information to auditors

Each of the persons who is a director at the date of approval of this report confirms that:

So far as each director is aware, there is no relevant audit information of which the company's auditors are unaware. Relevant information is defined as "information needed by the company's auditors in connection with preparing their report".

Each director has taken all the steps (such as making enquiries of other directors and the auditors and any other steps required by the director's duty to exercise due care, skill and diligence) that he ought to have taken in his duty as a director in order to make himself aware of any relevant audit information and to establish that the company's auditors are aware of that information.

Directors' report for the year ended 31 March 2022 (continued)

Policy and practice on payment of creditors

It is company policy to comply with the terms of payment agreed with a supplier. Where payment terms are not negotiated, the company endeavours to adhere to the supplier's standard terms. The company pays creditors in accordance with agreed payment terms on receipt of valid invoices. At the end of the year, trade creditors represented the equivalent of 19 days' purchases (2021: 25 days).

Employees

The company is committed to the principle of equal opportunity in employment. The company recognises its responsibilities to disabled people and endeavours to assist them to make their full contribution at work. Applications for employment by disabled persons are always fully considered, bearing in mind the respective aptitudes and abilities of the applicant concerned. Should employees become disabled, it is the company's policy to continue their employment where possible with appropriate training and redeployment where necessary. Training and career development programmes are designed on an individual basis for all employees so that the particular need and aptitudes of each person can be best met and developed.

Health and safety

Health and safety continues to receive major attention, not merely to conform to legal requirements, but positively to develop and maintain high standards.

Environment

Company environmental performance is continuously monitored. Annual performance objectives are set, alongside a range of activities that support the ISO14001 accreditation held. These include the monitoring and control of utility usage, waste streams and emissions to air and water.

Streamlined Energy and Carbon Reporting ("SECR")

The Companies Act 2006 (Strategic Report and Directors' Report) Regulation 2018 requires the company to disclose annual UK energy consumption and Greenhouse Gas ("GHG") emissions from SECR regulated sources. Energy and GHG emissions have been independently calculated by Envantage Ltd for the 12-month period ending 31st March 2022.

Reported energy and GHG emissions data is compliant with SECR requirements and has been calculated in accordance with the GHG Protocol and SECR guidelines. Energy and GHG emissions are reported from buildings and transport where operational control is held – this includes electricity, gaseous fuels such as natural gas and business travel in company-owned vehicles and grey fleet. The table below details the SECR-regulated energy and GHG emission sources from the current and previous reporting periods.

| | % change | 2022 | 2021 |
|--------------------|----------|------------|------------|
| Energy (kWh) | | | |
| Natural Gas | -2.5% | 4,413,425 | 4,526,398 |
| Company Vehicles | 24.8% | 19,573 | 15,687 |
| Electricity | 8.2% | 10,588,794 | 9,789,979 |
| Grey Fleet | 72.4% | 4,067 | 2,359 |
| Total Energy (kWh) | 4.8% | 15,025,859 | 14,334,423 |

Directors' report for the year ended 31 March 2022 (continued)

Streamlined Energy and Carbon Reporting ("SECR") (continued)

| | % change | 2022 | 2021 |
|---|----------|---------|---------|
| Emissions (tCO2e) | | | |
| Natural Gas | -2.9% | 808.4 | 832.3 |
| Company Vehicles | -5.3% | 3.6 | 3.8 |
| Electricity | -1.5% | 2,248.3 | 2,282.4 |
| Grey Fleet | 66.7% | 1.0 | 0.6 |
| Total SECR emission | -1.9% | 3,061.3 | 3,119.1 |
| Emission intensity ratio | | | |
| Emissions intensity (tCO2e/£m turnover) | -6.3% | 50.4 | 53.8 |

The company is committed to reducing its environmental impact and has continued with its commitment to 'Net Zero Carbon emissions by 2050'. To assist this, a specific, formal objective 'to reduce our carbon footprint' has been included in the company's ISO 14001-certified Environmental Management System (EMS). Measures to reduce the company's carbon footprint, in the reporting period, have included compressed air use efficiency surveys, further LED lighting upgrades as well as workforce environmental training and Net Zero Carbon and energy switch off awareness campaigns. The company has continued to investigate the appropriateness of further solar installations on its premises to support production. The company continues to review the feasibility and suitability of decarbonisation and energy efficiency projects as part of our environmental management system.

Methodology

Electricity and natural gas disclosures have been calculated using metered kWh consumption taken from supplier fiscal invoices where available. Where fiscal invoices were not available, energy consumption has either been interpolated from meter readings or estimated based on average daily consumption.

GHG emissions associated with Scope 2 purchased electricity have been reported using both market-based and location-based methodologies. Where fuel mix disclosures were not available, such as for landlord supplies, the emissions factor for the residual fuel mix of the UK was instead adopted. Only emissions calculated using the location-based methodology have been carried into the total emissions figure – market-based emissions have been included for comparison only.

Transport emissions have been calculated using purchased fuel where available. The fiscal value of fuel purchased was converted to volumes of fuel using monthly average fuel prices across the UK, as published by UK government. Where fuel volumes were not available, data for mileage claims has been provided. Average UK split between petrol and diesel was used to determine the fuel split in the fleet. Mileage was converted into energy consumption and GHG emissions using the most recent emissions factors published by BEIS in 2021.

On behalf of the board

druy A Cross.

R A Cross Chairman 6 July 2022

Independent auditors' report to the members of Cross Manufacturing Company (1938) Limited

Report on the audit of the financial statements

Opinion

In our opinion, Cross Manufacturing Company (1938) Limited's financial statements:

- give a true and fair view of the state of the company's affairs as at 31 March 2022 and of its profit
 and cash flows for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland", and applicable law); and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report, which comprise: balance sheet as at 31 March 2022; the profit and loss account, the statement of comprehensive income, the statement of cash flows, the statement of changes in equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information.

Independent auditors' report to the members of Cross Manufacturing Company (1938) Limited (continued)

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic report and Directors' report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on our work undertaken in the course of the audit, the Companies Act 2006 requires us also to report certain opinions and matters as described below.

Strategic report and Directors' report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic report and Directors' report for the year ended 31 March 2022 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic report and Directors' report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the company and industry, we identified that the principal risks of non-compliance with laws and regulations related to employment legislation, health and safety regulation and tax legislation, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the financial statements such as the Companies Act 2006. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue, and management bias in accounting estimates. Audit procedures performed by the engagement team included:

Independent auditors' report to the members of Cross Manufacturing Company (1938) Limited (continued)

- Discussions with management and the Directors, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant minutes of director board meetings;
- Evaluation of management's controls designed to prevent and detect irregularities, in particular the whistleblowing policy and employee code of conduct;
- Challenging assumptions and judgements made by management in their significant accounting estimates, in particular in relation to the useful economic lives of tangible assets, the actuarial assumptions used in determining the defined benefit obligation and inventory provision; and
- Identifying and testing journal entries, in particular any entries posted with unusual account combinations.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

Notes to the financial statements for the year ended 31 March 2022

1 General Information

Cross Manufacturing Company (1938) Limited (the 'company') is a private company limited by shares and is incorporated in the United Kingdom. The address of its registered office is Midford Road, Combe Down, Bath BA2 5RR.

2 Statement of compliance

The individual financial statements of the company have been prepared in compliance with United Kingdom Accounting Standards, including Financial Reporting Standard 102, 'The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland' ('FRS 102') and the Companies Act 2006.

3 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of Preparation

These financial statements are prepared on a going concern basis, under the historical cost convention, as modified by the revaluation of certain financial assets and liabilities measured at fair value.

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 4.

Going Concern

The company meets its day-to-day working capital requirements through its cash reserves. The company's forecasts and projections, taking account of reasonably possible changes in trading performance, show that the company should be able to operate within the level of its current cash reserves. After making enquiries, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. The company therefore continues to adopt the going concern basis in preparing its financial statements.

Foreign currency

The company's functional and presentation currency is the pound sterling.

Foreign currency transactions are translated into the functional currency using the spot exchange rate at the date of the transaction.

At each period end foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction.

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss account except when deferred in other comprehensive income as qualifying cash flow hedges.

Notes to the financial statements for the year ended 31 March 2022 (continued)

3 Summary of significant accounting policies (continued)

Revenue recognition

Turnover is measured at the fair value of the consideration received or receivable and represents the amount receivable for goods supplied or services rendered, net of any returns, discounts or rebates allowed by the company and net of value added taxes.

The company recognises turnover when (a) the significant risks and rewards of ownership have been transferred to the buyer; (b) the company retains no continuing involvement or control over the goods; (c) the amount of turnover can be measured reliably; and (d) it is probable that future economic benefits will flow to the entity. These conditions are usually satisfied when delivery has taken place as defined in the contract with the customer.

Interest income is recognised on an accruals basis.

Employee pensions

For certain employees, the company makes defined contribution pension payments into individual pension plans which are managed by a separate entity. Once the contributions have been paid the company has no further payment obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet.

The company operates a defined benefit plan for certain employees. A defined benefit plan defines the pension benefit that the employee will receive on retirement, usually dependent upon several factors including age, length of service and remuneration. A defined benefit plan is a pension plan that is not a defined contribution plan.

The defined benefit plan closed to future accrual with effect from 31 March 2021 and eligible members were transferred to the company's defined contribution pension arrangement.

The asset recognised in the balance sheet in respect of the defined benefit plan is the fair value of the plan assets less the present value of the defined benefit obligation at the reporting date.

The defined benefit obligation is calculated using the projected unit credit method. The present value is determined by discounting the estimated future payments using market yields on high quality corporate bonds that are denominated in sterling and that have terms approximating the estimated period of the future payments ('discount rate').

Defined benefit plan assets are measured at market value.

The cost of the defined benefit plan, recognised in profit or loss as employee costs, comprises the increase in pension benefit liability arising from employee service during the period and the operating expenses of running the scheme.

The net interest income is calculated by applying the discount rate to the fair value of plan assets less the net balance of the defined benefit obligation. This is recognised in profit or loss as 'Interest receivable and similar income'.

Gains arising on curtailment are recognised in the profit and loss account.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income. These amounts, together with the return on plan assets, less amounts included in net interest, are disclosed as 'Remeasurement of net defined benefit liability'.

Notes to the financial statements for the year ended 31 March 2022 (continued)

3 Summary of significant accounting policies (continued)

Government grants

The Coronavirus Job Retention Scheme was utilised in the prior year and was accounted for as a government grant. This was included in the 'other income' line item. There are no unfulfilled conditions or other contingencies attaching to these grants. The company did not benefit directly from any other forms of government assistance.

Taxation

Taxation expense for the period comprises current and deferred tax. Tax is recognised in the profit and loss account, other comprehensive income or directly in equity in accordance with where the related transaction is recognised.

Tax is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the period

Current or deferred taxation assets and liabilities are not discounted.

Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years.

Deferred tax arises from timing differences that are differences between taxable profits and total comprehensive income as stated in the financial statements. These timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements.

Deferred tax is recognised on all timing differences at the reporting date except for deferred tax assets, which are only recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Intangible assets

Computer software is stated at cost less accumulated amortisation and any accumulated impairment losses. Software is amortised over its estimated useful life, of between three and five years, on a straight line basis.

Tangible assets

Tangible assets are stated at cost less accumulated depreciation and any accumulated impairment losses. Cost includes the original purchase price and costs directly attributable to bringing the asset to its working condition for its intended use.

Land is not depreciated. Depreciation on other assets is calculated, using the straight-line method, to allocate the cost, less residual value, over the estimated useful lives as follows:

Freehold buildings

- up to 50 years

Plant and machinery

· 3 to 10 years

Repairs, maintenance and minor inspection costs are expensed as incurred.

Assets in the course of construction are not depreciated until they are available for use.

Impairment of non-financial assets

At each balance sheet date, non-financial assets are assessed to determine whether there is an indication that the asset (or asset's cash generating unit) may be impaired. If there is such an indication the carrying amount of the asset (or asset's cash generating unit) is reduced to its recoverable amount. Any impairment loss is recognised in the profit and loss account.

The recoverable amount of the asset (or asset's cash generating unit) is the higher of: the fair value less costs to sell; and value in use.

Notes to the financial statements for the year ended 31 March 2022 (continued)

3 Summary of significant accounting policies (continued)

Investments

Investments comprise term deposits with original maturities of between 3 and 12 months.

Inventories

Inventories are stated at the lower of cost and net realisable value (estimated selling price less costs to complete and sell). Inventories are recognised as an expense in the period in which the related revenue is recognised.

Cost is determined at an individual batch level. The cost of manufactured products and work in progress includes raw materials, subcontract processes, direct labour and related production overheads (based on normal operating capacity).

At the end of each reporting period inventories are assessed for impairment. If an item of inventory is impaired, the identified inventory is reduced to its selling price less costs to complete and sell and an impairment charge is recognised in the profit and loss account.

Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less.

Provisions and contingencies

Provisions are recognised when: the company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount of the obligation can be estimated reliably. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole.

Contingent liabilities arise as a result of past events when: it is not probable that there will be an outflow of resources or that the amount cannot be reliably measured at the reporting date; or when the existence will be confirmed by the occurrence or non-occurrence of uncertain future events not wholly within the company's control.

Contingent liabilities are not recognised. Contingent liabilities are disclosed in the financial statements unless the probability of an outflow of resources is remote.

Contingent assets are not recognised. Contingent assets are disclosed in the financial statements when an inflow of economic benefits is probable.

Financial instruments

The company has chosen to adopt Sections 11 and 12 of FRS 102 in respect of financial instruments.

Basic financial assets, including trade and other receivables, bank balances and deposits are initially recognised at transaction price and subsequently at amortised cost and are derecognised when: the contractual right to the cash flows from the asset expire or are settled; or when ownership or control of the asset has been transferred to a third party.

At the end of each reporting period basic financial assets are assessed for evidence of impairment. Any impairment loss is recognised in profit or loss.

Basic financial liabilities, including trade and other payables, are initially recognised at transaction price and subsequently at amortised cost and are derecognised when the liability is extinguished.

Derivatives, comprising forward foreign exchange contracts, are not basic financial instruments. Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Changes in the fair value of derivatives are recognised in profit or loss except where the company has chosen to adopt hedge accounting. Where the company has chosen to account for forward foreign exchange contracts as cash flow hedges, changes in the fair value of such hedges are recognised directly in equity until the hedge relationship ends or the hedge becomes ineffective, at which time the cumulative change in fair value of the hedge is recognised in profit or loss.

Notes to the financial statements for the year ended 31 March 2022 (continued)

3 Summary of significant accounting policies (continued)

Share capital

Ordinary shares are classified as equity.

Distributions to equity holders

Dividends and other distributions to the company's shareholders are recognised as a liability in the financial statements in the period in which the dividends and other distributions are approved by the company's shareholders. These amounts are recognised in the statement of changes in equity.

Directors can propose final dividends to be approved by members. Dividends become a legally binding liability when approved by members in a general meeting, regardless of the date on which it is to be paid. A proposed unapproved final dividend is not a legal obligation to shareholders at the balance sheet date.

4 Critical accounting judgements and estimation uncertainty

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

Useful economic lives of tangible assets

The annual depreciation charge for tangible assets is sensitive to changes in the estimated useful economic lives and residual values of the assets. The useful economic lives and residual values are re-assessed annually.

They are amended when necessary to reflect current estimates. See note 15 for the carrying amount of the property plant and equipment and note 3 for the useful economic lives for each class of assets.

Inventory provisioning

The company holds inventories of raw materials, components and finished goods in excess of customer requirements. As a result it is necessary to consider the recoverability of the cost of inventory and the associated provisioning required. When calculating the inventory provision, management considers the nature and condition of the inventory, as well as applying assumptions around anticipated saleability of finished goods and future usage of raw materials. The impact of the Coronavirus pandemic on future sales and usage of raw materials was assessed and this resulted in an additional provision of £2.1m for the year ended 31 March 2020. No further Coronavirus-specific provisions were required for the year ended 31 March 2021 or 31 March 2022. Similarly, the impact of the war in Ukraine has been assessed, but no additional provisions have been made in this regard.

Defined benefit pension scheme

The company has an obligation to pay pension benefits to certain employees. The cost of these benefits and the present value of the obligation depend on a number of factors, including; life expectancy, revaluation factors, asset valuations and the discount rate on corporate bonds. Management estimates these factors in determining the net pension asset in the balance sheet. The assumptions reflect historical experience and current trends. See note 23 for the disclosures relating to the defined benefit pension scheme.

Notes to the financial statements for the year ended 31 March 2022 (continued)

5 Turnover

Turnover is derived from substantially the same class of business, namely the design, development and manufacture of engineering components.

12 Tax on profit (continued)

(b) Tax expense/(income) included in other comprehensive income/(expense)

| | 2022 | 2021 |
|---|-------|---------|
| | £'000 | £'000 |
| Deferred tax | | |
| Origination and reversal of timing differences | 1,463 | (2,874) |
| Impact of change in tax rate | 132 | - |
| Total deferred tax | 1,595 | (2,874) |
| Tax expense/(income) included in other comprehensive income/(expense) | 1,595 | (2,874) |

(c) Reconciliation of tax charge

The tax assessed in each year varies from the standard rate of corporation tax in the UK in the relevant years. The differences are explained below:

| | 2022 | 2021 |
|--|-------|--------|
| | £'000 | £,000 |
| | | |
| Profit before tax | 9,201 | 20,376 |
| Profit before tax multiplied by standard rate of UK corporation tax of 19% (2021: 19%) | 1,748 | 3,871 |
| Permanent differences | (39) | (1) |
| Capital allowance super-deduction | (118) | - |
| Adjustment in respect of prior year | (7) | - |
| Change in tax rates or laws | 1,723 | - |
| Total tax charge for the year | 3,307 | 3,870 |

Factors that may affect future tax charges

In the Spring Budget 2021, the Government announced that from 1 April 2023 the corporation tax rate would increase to 25%. This change in the corporation tax rate was substantively enacted on 24 May 2021.

Deferred tax balances have been measured in the closing position at 31 March 2022 at this higher tax rate of 25%, on the basis that all temporary differences will materially unwind after the rate change, creating a current year deferred tax charge to the profit & loss account of £1,723,000 and a deferred tax charge of £132,000 to the statement of other comprehensive income.

Notes to the financial statements for the year ended 31 March 2022 (continued)

13 Dividends

| | 2022 | 2021 |
|--|-------|-------|
| | £'000 | £'000 |

| | 3,065 | 2,183 |
| Financial liabilities measured at fair value through profit or loss | | |
| Derivative financial instruments | 75 | - |
| | 75 | - |

Derivative financial instruments

The company enters into forward foreign currency contracts to mitigate exchange rate risk for certain foreign currency receivables. At 31 March 2022 the company had entered into forward exchange contracts to sell \$10.2 million (2021: \$9.7 million) and €15.7 million (2021: €17.2 million) at various times in the future up to February 2024.

The forward currency contracts are measured at fair value, which is determined using valuation techniques that utilise observable inputs. The key assumptions used in valuing the derivatives are the forward exchange rates for GBP: USD and GBP: EUR.

Notes to the financial statements for the year ended 31 March 2022 (continued)

23 Post-employment benefits

The company operates two pension schemes for its employees.

The amounts recognised in the profit and loss account are as follows:

| | 2022 | 2021 |
|---|-------|----------|
| | £'000 | £'000 |
| Defined benefit scheme – current service cost | - | 1,917 |
| Administration expenses | 210 | - |
| Gain on plan curtailment | - | (13,415) |
| GMP equalisation – past service cost | - | 31 |
| Defined contribution scheme | 2,289 | 1,598 |
| Total charge/(credit) in operating profit | 2,499 | (9,869) |
| Defined benefit scheme net interest income | (264) | (230) |
| Total charge/(credit) | 2,235 | (10,099) |

The defined benefit scheme was closed to new entrants with effect from 1 July 2006 and closed to future accrual with effect from 31 March 2021. A defined contribution scheme was set up for all employees joining the company after 1 July 2006.

Defined benefit scheme

The company operates a contributory pension scheme providing benefits based on final pensionable pay which closed to future accrual from 31 March 2021. A full actuarial valuation was carried out as at 1 July 2019 and updated to 31 March 2022.

The decision to close the pension scheme to future accrual resulted in an accounting gain of £13.4 million, which was included in profit for the financial year ended 31 March 2021. This gain was due to the removal of the link to future salary increases. Offsetting this gain, however, were changes in actuarial assumptions which resulted in a loss of £15.9 million. This loss was included in "remeasurements of net defined benefit asset" in the statement of comprehensive income for the financial year ended 31 March 2021, rather than in profit for the financial year. A large part of this loss was due to market conditions returning to more normal levels compared to the position when the Coronavirus pandemic started.

Future service contributions for the defined benefit pension scheme were made at a rate of 34.6% of active employees' pensionable earnings for the year ended 31 March 2021. Closure of the scheme to future accrual meant that future service contributions ceased with effect from 1 April 2021 but the company is required to make contributions of £0.2 million per annum in respect of the cost of administering the pension scheme. In addition, the schedule of contributions requires the company to make deficit repair contributions of £2.5 million per annum. Those employees that were members of the defined benefit scheme are now enrolled in the company's defined contribution scheme, to which the company contributes an average of 11% of employee earnings.

The defined benefit pension asset, as measured on the FRS102 accounting basis and disclosed in these financial statements, was £23.8 million as at 31 March 2022 (2021: £10.0 million). The £13.8 million increase in the pension asset is principally due to changes in assumptions of £11.6 million and deficit repair contributions of £5.0 million, offset by a lower-than-expected return on scheme assets of £3.3 million.

Notes to the financial statements for the year ended 31 March 2022 (continued)

23 Post-employment benefits (continued)

The Trustees value the liabilities of the pension scheme on a self-sufficiency basis, which is different from the basis which the FRS102 accounting standard requires to be used in these financial statements. The self-sufficiency basis assumes that, once the scheme is 100% funded, it can adopt a low-risk investment strategy and pay members' benefits with less need to call on the company for additional funding. The actuarial valuation, on a self-sufficiency basis, showed a deficit of £4.2 million as at 31 March 2022 (2021: deficit of £4.4 million).

The Trustees are reviewing the scheme's funding position with a view to reducing risk and volatility and, in the long term, moving to a basis where some of the scheme's liabilities are covered by insurance (commonly referred to as a "buy-in"). This review will take place during the current financial year, as part of the triennial actuarial valuation. If all risk were to be transferred to an insurance company, the deficit would be £37.4 million as at 31 March 2022 (2021: deficit of £46.5 million). Although accounting standard FRS102 requires the asset of £23.8 million to be recognised in the balance sheet, the company believes that the deficit of £37.4 million to be more appropriate, as this is the cost of transferring all pension liabilities and risks to a third party.

The financial assumptions used by the actuary were as follows:

| The financial assumptions used by the actuary were as follows. | 2022 | 2021 |
|--|-------|-------|
| Discount rate | 2.7% | 2.1% |
| Inflation | 3.8% | 3.4% |
| Pension increases (Post 1995 accrual) | 3.90% | 3.65% |
| Pension increases (Post 2017 accrual) | 2.40% | 2.35% |
