Credit to profit in the year	(261,000)	(1,413,000)
At 31 January 2013	2,193,000	2,454,000

Property provisions are in respect of lease contracts which are considered onerous on the basis that the stores to which they relate are expected to generate net cash outflows over their remaining lease term An assessment of future cash outflow is made on the following bases

- the discounted value of future cash flows to the end of the lease using a risk free discounted rate of 5 6%,
- the discounted value of annual rental payments to the end of the lease using a risk free discounted rate of 5 6%, and
- the estimated cost to be incurred in order to exit the lease prior to its expiry

The amount of the provision is calculated as the lowest of the three bases In circumstances where the provision would be based on the exit cost but it is considered unlikely that the lease could be terminated for a one-off payment, the provision is based on the next highest discounted cash flow outcome

In determining the appropriate amount of these provisions the directors have estimated the future cash flows expected from each relevant leased property They have also made assumptions about the ability of the group to sublet or surrender leases, and the potential payments to be made to exit the lease The provisions are highly sensitive to these assumptions

The provisions are mostly expected to be utilised over the next four years The discounting of the provision remaining at the end of 2013 is not considered to have a material impact to the level of the provision
