NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 MAY 2014

1. Accounting policies

1.1 Basis of preparation of financial statements

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention as modified by the revaluation of freehold property and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

1.2 Going concern

After making inquiries, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence and meet its liabilities as they fall due for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the financial statements.

1.3 Turnover

Turnover comprises rent receivable, net of Value Added Tax. Rental income is recognised on an accruals basis in the period in which it is earned, in accordance with the terms of the lease.

1.4 Investment properties

Investment properties are included in the balance sheet at their open market value in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008) and are not depreciated. This treatment is contrary to the Companies Act 2006 which states that fixed assets should be depreciated but is, in the opinion of the directors, necessary in order to give a true and fair view of the financial position of the company.

1.5 Deferred taxation

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation except that deferred tax is not provided on timing differences arising from the revaluation of fixed assets in the financial statements unless by the balance sheet date the company had entered into a binding agreement to sell the revalued asset.

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax assets and liabilities are calculated using the tax rates enacted or substantively enacted by the balance sheet date and which are expected to apply in the periods in which the timing differences are expected to reverse.

Deferred tax assets and liabilities are not discounted.

1.6 Financial instruments

Financial liabilities are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
