Strategic report

The directors present their strategic report and the financial statements for the year ended 31 December 2020.

Review of the business and outlook

Hydro Building Systems UK Limited ("HBS") is a leader in the UK fenestration industry, offering architects, specifiers, developers, fabricators, installers and householders a wide range of innovative aluminium system solutions.

The company's key financial performance indicators during the year were as follows:

	2020 £000	2019 £000	Change %
Turnover	35,363	52,501	-32.6%
Loss after tax	(3,068)	(2,738)	-12.1%
Shareholder's funds	12,896	20,781	-37.9%

During the year under review turnover has decreased by £17,138,000. This was a direct result of the impact of the COVID19 pandemic. The reduction in revenue was a result of the various national and local lockdown restrictions that have been put in place during this period. The business was fully closed for a period of 3 weeks in April 2020. Since then the Company remained fully open for business to our customers. The reduction in turnover compared to 2019 was mainly driven by the lower volumes in Q2, and a much smaller decrease in Q3. The business responded well to the lockdown restrictions that were put in place. HBS did use the Job Retention Scheme during 2020 and the impact of this can be seen in note 4.

During the year under review it has been clear to the business that the UK construction market suffered a very significant decline during this period. Most construction sites were shut initially or operating under very limited capacity of people on site. For the home improvement market, restrictions were in place to stop tradespeople from attending private residences. Both of these factors resulted in the lower turnover for the year. The commercial segment of the business was the most impacted with the restrictions in place

Due to the restructuring programme undertaken in 2019 the impact of reduced turnover experienced in 2020 and the costs savings also undertaken in 2020 following the restrictions place on the business the loss after tax was only a very small increase on the 2019 loss. The business has responded well to the situation faced in 2020

Cash balances increased by £2.69m during the year to finish at £5.09m. As there is a cash pooling agreement in place, this is shown on the balance sheet within intercompany debtors. The increase in cash was achieved due to very stringent management of all aspects of working capital within the business.

Shareholders' funds have decreased in the year due to the losses suffered and the pension scheme valuation change in 2020. The loss for the year after taxation amounted to £3,068,000 (2019: loss £2,738,000).

The outlook for 2021/22 is challenging as the economic uncertainty persists as a result of the ongoing COVID-19 pandemic. This, coupled with the government restrictions and self-isolation rules resulted in a challenging start to 2021. The performance of the business in the first half of 2021 is stronger than the same period in 2020 both in terms of Sales and EBITDA. The directors view is that this will continue for the remaining part of 2021. The business fully expects turnover to increase from 2020 levels in the financial year to 31st December 2021, and whilst not back to 2019 levels, they will be increasing.

After the 31st December 2020 following the formal exit from the EU, and the change to an independent trade policy, there has been a requirement for all businesses to undertake a new and large amount of customers documentation. This therefore allows the smooth flow of both Import and Export goods and services between the UK and Europe. HBS has seen an increase in the costs associated with this movement of goods, following the change to import and export duty rates, the changes required to state the country of origin, commodity code changes, transportation costs and final customs clearance fees charged by the freight forward agents. HBS was in the position of being very well prepared for this change, due to the high level

of testing and checking with all applicable parties to ensure a swift and seamless move over to the new way of working.

This resulted is no interruption of supply to our customers, and paperwork being correctly completed on both the import and export aspects. The changes made in the ERP system facilitated this swift move. There are still some challenges to come in the coming period, but these will be met with the same swift and committed focus that we have previously shown on this topic.

Significant events during the year

In September 2020 the company undertook a minor restructuring programme, which unfortunately resulted in 7 employees leaving the business. The costs associated with the employee redundancy are shown within note 7.

Principal risks and uncertainties

The directors continually review and evaluate the risks that the company is facing. The company's operations expose it to a variety of financial risks that include the effects of changes in credit risk, liquidity risk and interest rate risk along with competitive risk and legislation risk.

The full business implications of Brexit remain uncertain, which will be the case for some time, and any risks arising will be a key focus area for management in the next financial year. Currency fluctuations, trading arrangements, employment issues and other risks that become apparent over time will be monitored by management and mitigation put in place where possible.

COVID 19

During the year, our prime focus has been on the safety of our employees, both at home and at work. During the year I am pleased to report that no work to work transfer of COVID occurred. For all the employees that we employed during the year we only encountered 1 positive case. That is a true testament to the Health and Safety consciousness of all our colleagues and how well they have handled this pandemic. The directors would personally like to thank all employees for this awareness and safety working practice during this period.

The business interruption plan that we already had in place was actioned during the start of the pandemic, and those action plans resulted in limited impacts to our supply chains during 2020.

During 2020 the business has had to adopt to a new way of working, social distancing is commonplace in all areas of the business, flexible working conditions where appropriate have been offered to all employees, along with the working from home requirements. We have also had to restrict visitors to the main sites, cancelled all training and social events and employee meetings have all been virtual. I am pleased to report that all employees have respond well to these changes. Those employees have shown a true determination to succeed to these new challenges.

HBS has offered all employees the option of obtaining an additional laptop or tablet during this period of time to help those employees with children who have been home schooled and do not have the IT equipment to enable the home schooling to be completed. I am pleased to report that several employees took up this offer.

The Directors have considered the potential impact of the COVID-19 for 2021 on the company's ability to continue as a going concern. The market, whilst uncertain, is still generating business and at a significant level for the Company to operate within. The Directors have reviewed the ongoing cash requirement of the business, taking into account any immediate and short-term impacts identified, and with the ongoing support from the immediate parent, and the ultimate parent company they have concluded that adequate resources and funding are available to Hydro Building Systems UK Limited should the business require these funds. The Directors have concluded that the going concern basis of accounting remains appropriate. Further details are given in note 1 to the accounts.

However, the Directors recognise the rapidly evolving nature of the pandemic and continue to monitor the situation as it develops.

Climate change and environmental risks

Hydro is exposed to physical climate-related risks, risks related to the transition to a low-carbon economy and other environmental risks. Climate-driven changes in consumer behaviour, such as substitution of aluminium by other materials is also a risk to Hydro.

Hydro is constantly improving and obtaining new ISO to complement our already achieved 9001, 14001 and 18001, along with the Investors in People award.

Increased concern over climate change may lead to changes in consumer behaviour, increased demand for low-emission products or substitution of aluminium by other materials. In order to reduce the risks for our operations and potential consequences related to climate change, Hydro performs extensive risk assessments of both physical and transition risks. Based on this, we have developed a new climate strategy towards 2030, focusing on greener sourcing, greener production and greener products.

A similar approach is also taken for identifying other environmental risks related to our operations, through Environmental Impact Assessments and continuous review of monitoring procedures, control systems and the application of appropriate management procedures.

Hydro continues to strengthen its recycling position and has expanded the production capacity of the CIRCAL greener product brand.

Hydro's new certified low-carbon product brands CIRCAL and REDUXA were launched in 2020, setting a new standard for low-carbon and recycled aluminium, to commercialize the company's sustainability position. The initial customer feedback and subsequent orders have underlined the potential for these types of products that represent exciting opportunities moving forward.

The inherent properties of aluminium make recycling attractive. It can be recycled infinitely without degradation in quality, and recycling requires 95% less energy than primary aluminium production. We remelt process scrap from our own production.

Exposure to price, credit, liquidity and cashflow risk

The company has implemented policies that require appropriate credit checks on potential customers before sales are made and monitoring of current customers. The amount of exposure to any individual counterparty is subject to a limit, which is reviewed periodically.

The company has in place a risk management programme that seeks to limit the adverse effects on the financial performance of the company by monitoring levels of debt finance and the related finance costs. The company does not use derivative financial instruments to manage interest costs.

Given the size of the company, the directors have not delegated the responsibility of monitoring financial risk management to a sub-committee of the board. The policies set by the board of directors are implemented by the company's finance department. The department has a policy and procedures manual that sets out specific guidelines to manage interest rate risk, credit risk and circumstances where it would be appropriate to use financial instruments to manage interest rate costs.

Aluminium pricing in the global market is the principal continuing risk for the company. Sales to customers outside the UK are made in Euro and conversion to Sterling is made in the month of transaction with a further exchange gain/loss upon transfer of monies to the UK. The sourcing of certain items is from European suppliers, and these items are purchased in Euro.

Competitive risks

The company is exposed to commodity price risk and exchange rate fluctuations. Exposures to these risks are monitored, reported and mitigated according to policies and procedures set by Norsk Hydro ASA, our parent undertaking.

Legislative risks

The company is exposed to several legislative risks. The company complies with the Health & Safety at Work Act 1974 to cover the health and safety of all employees, Regulatory Reform (Fire Safety) Order 2005, Environment Act 1995, The Waste (England and Wales) Regulations along with all subsequent amendments. There are further acts that the company complies with in relation to the operation within the UK.

Data risks

Hydro's global data protection procedure constitutes the company's binding corporate rules for data protection and ensures compliance with the EU General Data Protection Regulation (GDPR). It was approved by the relevant EU data protection authorities in May 2018. In 2020, we have continued to strengthen Hydro's data protection work, with a specific emphasis on clarifying roles and responsibilities. Designated data privacy coordinators appointed by and for the respective business areas and staff functions forms part of the data privacy network chaired by the head of data privacy. A special emphasis was given to data privacy as in the compliance training provided by Group Compliance and Legal in 2020.

Code of Conduct

Hydro's Code of Conduct creates the foundation that supports our efforts to do the right things and to always act with integrity throughout our global organization wherever we operate and conduct business on behalf of Hydro. It requires adherence to laws and regulations as well as internal constituting documents and global directives and is systematically implemented and followed up through our compliance system.

In 2020, the Hydro group reviewed the content and implemented a new system for all internal global directives to make them easier accessible for our employees and to ensure efficient governance.

Hydro's compliance system is based on a clear governance structure defining roles and responsibilities regarding compliance and all compliance-related activities undertaken throughout the company.

An integrity culture index was introduced in Hydro's employee engagement survey in 2020. The index benchmarked the employee perception of our integrity culture, measuring the tone from the top, within their department, their leaders, the comfort of speaking up and organizational justice, i.e. perception of fairness. The overall score of the index was within the first quartile of the defined external benchmark. The results, which identified strengths and weaknesses, provide us with a good basis for specific and tailored compliance activities going forward.

Political contributions

In line with our Code of Conduct, Hydro does not make financial contributions to political parties.

Corporate responsibility

As part of a global aluminium company, ensuring responsible conduct in relation to society at large is important throughout Hydro's activities. We consider our impact on society, from construction to divestment and closure activity, as well as the exposure to corruption and human rights violations, both within our own operations, the communities we are part of, and in the supply chain.

Our compliance system ensures that all persons acting on behalf of Hydro comply with applicable laws and regulations and with the requirements adopted by Hydro.

Hydro's Code of Conduct creates the foundation that supports our efforts to do the right things and to always act with integrity throughout our global organization, wherever we operate and conduct business on behalf of Hydro.

We are committed to building a culture of trust where employees are comfortable to ask questions, seek guidance, raise concerns, and report suspected violations. Normally, concerns and complaints should be raised with the employee's superior.

However, if the employee is uncomfortable with that, he or she may raise the issue with human resources, HSE (health, safety and environment), a union/safety representative, compliance, legal or internal audit.

The employee can also use Hydro's whistle-blower channel, AlertLine, where concerns can be reported anonymously. All employees and on-site contractors can use the AlertLine in their own language at all times via toll-free phone numbers, Hydro's intranet or through a dedicated address on the internet.

Section 172 Statement

In line with the Companies Act requirement for periods commencing on or after 1 January 2020, the Directors set out below their key considerations and steps taken with regard to the "enlightened shareholder value" requirements of \$172 in performing their duties.

The Directors feel that they have acted in good faith and in a manner that would be most likely to promote the success of the company for the benefit of its stakeholders.

In particular the delivery of our approved 5-year plan (2021-2025) will deliver a long-term beneficial impact to the company and the specific stakeholders as follows:

- To our employees we aim to be a responsible employer in providing ongoing training and development opportunities which support the business needs as well offering a completive remuneration package. We will further develop our safety systems to maintain a safe working environment.
- To our customers we aim to build on our existing relationships to offer greener products in higher volumes through ongoing collaborations, quality improvements and process efficiencies.
- To our suppliers we aim to ensure you receive prompt payment for your invoices, foster good working relationships and work together on areas of mutual interest.
- To our local community and the environment we aim to further increase our volume of Circal, a product containing a minimum of 75% recycled aluminium and having a reduced Carbon footprint.
- Acting fairly between members of the Company The Hydro values which underpin the day-today
 working environment in which the company operates, include "Care", "Collaboration" and
 "Courage". There is an expectation that all employees, at all levels in the Group, "live" these
 values.

By delivering on these aims the directors believe they will contribute to enhancing the Norsk Hydro's Groups Global reputation in a positive way and deliver an improved financial return to our shareholders. Being 100% owned subsidiary of the Norsk Hydro Group, the decisions the directors make will have due regard to the needs of the Group as well as the Company. At all times the Directors will strive to make informed decisions, in a responsible way with due regard to the various stakeholder interests in a fair and reasonable way.

Strategy

The company objective is to achieve growth and returns in line with the expectations of its shareholders. This is to be achieved by a combination of continuous investment in product ranges which are customer and project focused, ongoing investment in new equipment and technology to reduce costs, continued investment in our workforce through training and job development and new strategic initiatives.

This report was approved by the board on 4th November 2021 and signed on its behalf by:

6 Viner

S. Viner Secretary Date 4th November 2021

Registered No. 01029071

Directors' report

The directors present their report and financial statements for the year ended 31 December 2020.

Directors

The current directors are shown on page 1. The directors who served the company during the year and to the date of this report were as follows:

S Helsen

S Viner

H Gomez

Results and dividends

The loss for the year after taxation amounted to £3,068,000 (2019 – Loss £2,738,000). The directors do not recommend a final dividend (2019 – £nil).

Research and development

The company continues to invest in research and development and thereby launch and update new systems which are evidence of the company's commitment to maintaining its position as a key innovator in the industry. A large R&D team is also situated within various other Hydro Building Systems entities worldwide.

Future developments

The continuing investment and launch of new advanced products for the commercial and residential sectors continues to underpin sales. Consequently, the directors believe that the future developments of the business remain strong with increased brand support.

The COVID-19 Pandemic remains an ongoing issue after the balance sheet date, and further details are included within the directors' report and the going concern disclosures.

Going concern

The directors' assessment of going concern is provided in Note 1.

Disabled employees

It is the company's aim to ensure that when considering recruitment, training or career development within the business, no employee or job applicant is discriminated against, either directly or indirectly, on the grounds of a disability. Should an employee become disabled during their employment with the company the company will try to offer continuity of employment and to provide career and training opportunities commensurate with their abilities. We are continuously adjusting working conditions so that all employees or potential new employees have the same opportunities in their workplace.

Equal Opportunities

The Hydro Code of Conduct, addresses compliance with laws and other matters such as handling of conflicts of interest and a commitment to equal opportunities for all employees. Our defined programs contribute to compliance with anti-corruption and basic human rights.

Employee involvement & internal communication

The success of the company depends largely on its employees and the company continues to keep them informed on matters affecting them. Investment in on-the-job training and all aspects of health and safety is key. We undertake monthly Town Hall meetings with all employees, which provide a two-way communication flow and result in greater understanding for all employees regarding the aims and goals of the company. Regular staff appraisals are performed and the company retains its 'Investors in People' award.

Directors' report (continued)

During the current COVID-19 situation these communication methods have been adapted, using online video platforms, so that all employees working from home still have access to company communications and can ask questions, which helps to ensure that all employees remain fully engaged.

Matters covered in the company strategic report

The Directors have chosen to disclose information on the company's principal activity, review of business, future developments of the business and principal risks and uncertainties, required by the Companies Act 2006 to be included within the Directors' Report, within the Strategic Report.

Health and safety at work Act 1974

It is the company's policy that all possible steps will be taken at all times to ensure the health and safety of persons and to prevent damage to the company's property. In accordance with the Act, a comprehensive policy statement together with health and safety rules has been issued within the company to all its employees. Regular Health and Safety committee meetings, including both employee and company representatives, ensure the development and implementation of health and safety standards.

Disclosure of information to the auditors

The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the company's auditor is unaware; and each director has taken all the steps that he/ she ought to have taken as a director to make himself/ herself aware of any relevant audit information and to establish that the company's auditor is aware of that information.

Directors' report (continued)

Streamlined Energy and Carbon Reporting

The directors have shown below the Statement of Carbon Emissions. This covers Scope 1 to 3. The reporting period for the compliance is the same as the financial year 1 January to 31 December 2020.

The total amount of CO2e emissions were 835.9 in the financial year. The company has chosen tonnes per tonnes of aluminium sold as an appropriate ratio.

The total kWh used in Scope 1 & 2 emissions was 3,308,067 kWh.

Type of activity	Scope	kWh `	FY20
Truck fuel	Scope 1	2,014,899	535.1
Electricity	Scope 2	737,343	170.4
Gas	Scope 1	416,519	76.4
Propane	Scope 1	139,306	30.6
Air Travel	Scope 3		16.5
Scrap	Scope 3		3.2
Waste	Scope 3		1.9
Hotel Stays	Scope 3		1.1
Train Travel	Scope 3		0.5
Water	Scope 3		0.2
Total Gross CO2e (tonnes)		3,308,067	835.9
Carbon Emissions per tonnes of aluminium sold			4.7

Efficiency Measures Taken

The company has introduced a number of energy efficient measures during the year, a selection of those are shown below:-

- Reduced business travel, thereby reducing the needs to overnight stay or flights.
- Introducing a working from home policy to safe of visit to the office if not required.
- Replacing old and inefficient lights fittings with LED on a replacement basis in the warehouse, offices and outdoor lighting facilities
- Increasing the amount of waste recycled compared to 2019.
- Replaced old and inefficient IT equipment with more energy efficient items, such as Ipad's and laptops
- Introduced a Hybrid or Electric fleet policy for company cars drivers, along with a restriction on company car CO2 to be below 120
- Installing electrical vehicle charging points at all office facilities
- Contributing to the cost of home electrical charging points for company car drivers
- Put in place new software to enable all employees to use digital and virtual media platforms to
 employees to hold meetings, and for customers events.
- Video conferencing facilities also in place for large scale corporate events

Methodology used

The company has used the UK Government's GHG Conversion factors for reporting 2020 to calculate its carbon emissions. Included within the data above are Scope 1, 2 & 3 emissions.

Directors' report (continued)

Auditor

Pursuant to Section 487 of the Companies Act 2006, the auditor will be deemed to be reappointed and KPMG LLP will therefore continue in office.

This report was approved by the board of directors on 4th November 2021 and was signed on its behalf by

6 Viner

S. Viner Secretary

Date 4th November 2021

Statement of directors' responsibilities in respect of the Strategic Report, the Directors' report and the Financial Statements

The directors are responsible for preparing the Strategic Report, the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK accounting standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 101 Reduced Disclosure Framework.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern;
- use the going concern basis of accounting unless they either intend to liquidate the company or to cease
 operations, or have no realistic alternative but to do so.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HYDRO BUILDING SYSTEMS UK LIMITED

Opinion

We have audited the financial statements of Hydro Building System UK Limited ("the company") for the year ended 31 December 2020 which comprise the Income Statement, Statement of Comprehensive Income, Statement of Changes in Equity, Statement of Financial Position Sheet, and related notes, including the accounting policies in note 1.

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2020 and of its loss for the year then ended;
- have been properly prepared in accordance with UK accounting standards, including FRS 101 Reduced Disclosure Framework; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the company in accordance with, UK ethical requirements including the FRC Ethical Standard. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Going concern

The directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the company or to cease its operations, and as they have concluded that the company's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over its ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the directors' conclusions, we considered the inherent risks to the company's business model and analysed how those risks might affect the company's financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate;
- we have not identified, and concur with the directors' assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the company will continue in operation.

Fraud and breaches of laws and regulations - ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of directors as to the Company's high-level policies and procedures to prevent and detect
 fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Reading Board meeting minutes.
- Considering remuneration incentive schemes and performance targets for directors and management.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HYDRO BUILDING SYSTEMS UK LIMITED (continued)

Using analytical procedures to identify any unusual or unexpected relationships.

We communicated identified fraud risks throughout the audit team and remained alert to any indications of fraud throughout the audit.

As required by auditing standards, and taking account of possible pressures to meet profit targets, we perform procedures to address the risk of management override of controls and the risk of fraudulent revenue recognition, in particular the risk that revenue is recorded in the wrong period and the risk that management may be in a position to make inappropriate accounting entries.

We did not identify any additional fraud risks.

In determining the audit procedures we took into account the results of our evaluation and testing of the operating effectiveness of some of the Company-wide fraud risk management controls.

We also performed procedures including:

- Identifying journal entries to test based on risk criteria and comparing the identified entries to supporting documentation. These included those posted to revenue with an unexpected corresponding journal entry.
- Selecting a sample of sales occurring in December 2020 and January 2021 (which we deemed to be the timeframe of highest risk of revenue recognition misstatements) and vouched the transactions to underlying evidence to support the timing of revenue recognition.

Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the directors and other management (as required by auditing standards), and discussed with the directors and other management the policies and procedures regarding compliance with laws and regulations.

We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation, taxation legislation and pension legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: health and safety, and employment law recognising the nature of the Company's activities. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. Therefore if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

Context of the ability of the audit to detect fraud or beaches of law and regulation

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HYDRO BUILDING SYSTEMS UK LIMITED (continued)

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

Strategic report and directors' report

The directors are responsible for the strategic report and the directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the strategic report and the directors' report;
- in our opinion the information given in those reports for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

Directors' responsibilities

As explained more fully in their statement set out on page 12, the directors are responsible for: the preparation of the financial statements and for being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF HYDRO BUILDING SYSTEMS UK LIMITED (continued)

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Director

Date 4th November 2021

at 31 December 2020

1. Authorisation of financial statements and statement of compliance with FRS 101

The financial statements of Hydro Building Systems UK Limited (the "Company") for the year ended 31 December 2020 were authorised for issue by the board of directors on 4th November 2021 and the statement of financial position was signed on the board's behalf by S Viner.

Hydro Building Systems UK Limited is a private company limited by shares incorporated and domiciled in England and Wales. The address of the registered office is 5300 Severn Drive, Tewkesbury, Gloucestershire, GL20 8SF. The nature of the company's operations and its principal activities are set out in the strategic report on pages 2 and 3.

The company's financial statements are presented in sterling, which is also the company's functional currency, and all values rounded to the nearest thousand pounds (£'000) except when otherwise indicated.

These financial statements were prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101). In preparing these financial statements, the Company applies the recognition, measurement and disclosure requirements in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006 ("Adopted IFRSs") and has set out below where advantage of the FRS 101 disclosure exemptions has been taken. The financial statements are prepared under the historical cost convention.

2. Accounting policies

Going concern

The Company had net current assets of £9,974,000 as at 31 December 2020 and a loss for the year of £3,068,000. The financial statements have been prepared on a going concern basis which the Directors consider to be appropriate for the following reasons noted below.

The Directors have prepared cash flow forecasts through to 31 December 2022 which indicate that in the base case scenario, the company will have sufficient funds to meet its liabilities as they fall due. In a severe but plausible scenario, taking account of the potential short-term impacts of COVID-19 and consumer demand, the company will still have sufficient funds to meet its liabilities as they fall due for due for at least 12 months from the date of approval of the financial statements.

The Company is a subsidiary of Hydro Norsk ASA ("the Group"). The company has no internal or external debt. The company is part of the Group's cash pooling arrangement, administered by the Group's corporate finance department. At the end of each day, any cash held by the company is transferred to the Group and if the company is in an overdraft position it receives money from the group, so that the balance in the company's bank account at the end of each day is nil and they have a receivable or payable from the Group. At 31st December 2020 the company had a debtor balance due from the Group of £5 million and remains in a debtor position at the time of signing these financial statements. Whilst the cash generated by the company is held by Group and shown as an intercompany debtor in the balance sheet, the Group has indicated that they will give the company unrestricted access to these funds as required. The Directors have assessed the viability of the Group and are satisfied in Group's ability to continue operations even in severe but plausible downside scenarios. As with any company placing reliance on other group entities for financial support, the directors acknowledge that there can be no certainty that this support will continue although, at the date of approval of these financial statements, they have no reason to believe that it will not do so.

Based on the above, the Directors are confident that the Company will have sufficient funds to continue to meet its liabilities as they fall due for at least 12 months from the date of approval of the financial statements and therefore have prepared the financial statements on a going concern basis.

at 31 December 2020

2. Accounting policies (continued)

2.1 Basis of preparation

The accounting policies which follow set out those policies which apply in preparing the financial statements for the year ended 31 December 2020.

The company has taken advantage of the following disclosure exemptions under FRS 101.

- (a) The requirement of IFRS 7 Financial Instruments: Disclosures
- (b) The requirement of paragraph 91-99 of IFRS 13 Fair Value Measurement
- (c) The requirement in paragraph 38 of IAS 1 'Presentation of Financial Statements' to present comparative information in respect of: Paragraph 79 (a)(iv) of IAS 1;
- (d) The requirements of paragraph 10 (d), 10 (f), 39 (c) and 134 136 of IAS 1 Presentation of Financial Statements
- (e) The requirements of IAS 7 Statement of Cash Flows. The company is exempt from preparing cash flow statement as a group cash flow statement is prepared by its parent company, Sapa AS.
- (f) The requirements of paragraph 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting estimates and errors
- (g) The requirement of paragraph 17 of IAS 24 Relates Party Disclosures
- (h) The requirements in IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is party to the transaction is wholly owned by such a member, and
- (i) The requirement of paragraphs 134(d) 134(f) and 135(c) 135(e) of IAS 36 Impairment of Assets
- (j) The requirement of IFRS 15 Revenue from Contracts with Customers of the second sentence of paragraph 110 and paragraphs 113(a), 114, 115, 118, 119(a) to (c), 120 to 127 and 129 of IFRS 15.

2.2 Judgments and key sources of estimation uncertainty

The preparation of financial statements require management to make judgments, estimates and assumptions that affect the amounts reported for assets and liabilities as at the statement of financial position date and the amounts reported for revenues and expenses during the year. However, the nature of estimation means that actual outcomes could differ from those estimates.

The following estimates are dependent upon assumptions which could change in the next financial year and have a material effect on the carrying amount of assets and liabilities recognised at the statement of financial position date:

Pension and other post-employment benefits

The defined benefit pension plan obligation and the associated insured annuity asset are determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, future salary increases, mortality rates and future pension increases. Due to the complexity of the valuation, the underlying assumptions and the long-term nature of these plans, such estimates are subject to significant uncertainty. The company engages suitably qualified actuaries to complete this valuation.

at 31 December 2020

2. Accounting policies (continued)

2.3 Significant accounting policies

a) Turnover

Turnover is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding trade discounts, rebates, value added tax and other sales taxes.

Turnover from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on dispatch of the goods.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 requires us to, for each contract with a customer, identify the performance obligations, determine the transaction price, allocate the transaction price to performance obligations to the extent the contract covers more than one performance obligation, determine whether revenue should be recognized over time or at a point in time, and, finally, recognize revenue when or as performance obligations are satisfied.

b) Tangible fixed assets

Tangible fixed assets under the cost model are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Repairs and maintenance are charged to the income statement during the period in which they are incurred.

Under IAS 17, the Company had leases which were classified as finance leases as the Company had assumed substantially all the risks and rewards of ownership of the leased asset. Where land and buildings were held under leases the accounting treatment of the land was considered separately from that of the buildings. Prior to 1 January 2020, these leased assets acquired by way of finance lease were stated at an amount equal to the lower of their fair value and the present value of the minimum lease payments at inception of the lease, less accumulated depreciation and less accumulated impairment losses. The accounting treatment for these leases subsequent to transition to IFRS 16, and for leases entered into after 1 January 2020 are described below in accounting policy 2.3.c.

All tangible fixed assets are depreciated on a straight-line basis over their estimated useful lives at the following rates:

Leasehold property – over the life of the lease

Plant and equipment – 10% - 50% Office equipment and fittings – 20% - 50%

Right of Use assets – over the life of the lease

The carrying values of tangible fixed assets are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within other operating income in the income statement.

c) Leases

At the inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. IFRS 16.

As a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability

at 31 December 2020

2 Accounting policies (continued)

adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that the Company is reasonably certain to exercise,
- lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and
- penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, to the extent that the right-of-use asset is reduced to nil, with any further adjustment required from the remeasurement being recorded in profit or loss.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

Short-term leases and leases of low-value assets

The Company has elected not to recognise right-of-use assets and lease liabilities for lease of low-value assets and short-term leases. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

d) Intangible assets

Intangible assets include Licences and IT Systems. Intangible assets are amortised over a period of three to five years which is accounted for using the cost model.

e) Stocks

Stocks are stated at the lower of cost and estimated net realisable value. Cost includes all direct expenditure and production overheads based on the normal level of activity. Where necessary, provision is made for obsolete, slow moving and defective stocks.

at 31 December 2020

2 Accounting policies (continued)

f) Income taxes

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted by the statement of financial position date.

Deferred income tax is recognised on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements, with the following exceptions:

- (i) When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- (ii) Deferred income tax assets are recognised only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, carried forward tax credits or tax losses can be utilised.

Deferred income tax assets and liabilities are measured on an undiscounted basis at the tax rates that are expected to apply when the related asset is realised or liability is settled, based on tax rates and laws enacted or substantively enacted at the statement of financial position date.

The carrying amount of deferred income tax assets is reviewed at each statement of financial position date. Deferred income tax assets and liabilities are offset, only if a legally enforcement right exists to set off current tax assets against current tax liabilities, the deferred income taxes relate to the same taxation authority and that authority permits the company to make a single net payment.

Income tax is charged or credited to other comprehensive income if it relates to items that are charged or credited to other comprehensive income. Similarly, income tax is charged or credited directly to equity if it relates to items that are credited or charged directly to equity. Otherwise income tax is recognised in the income statement.

g) Foreign currencies

Transactions in foreign currencies are translated to the Company's functional currencies at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are retranslated to the functional currency at the foreign exchange rate ruling at that date. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Foreign exchange differences arising on translation are recognised in the profit and loss account.

. h) Research and development

Research and development expenditure is written off as incurred, except that development expenditure incurred on an individual project is carried forward when its future recoverability can reasonably be regarded as assured. Any expenditure carried forward is amortised in line with the expected future sales from the related project.

i) Provisions for liabilities

Provisions are recognised when the Company has a present obligation as a result of a past event which it is probable will result in an outflow of economic benefit that can be reasonably estimated.

j) Pensions

(i) Defined benefit pension scheme

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit pension plans is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any plan assets (at bid price) are deducted. The Company determines the net interest on the net defined benefit liability/(asset) for the period

at 31 December 2020

2 Accounting policies (continued)

(i) Defined benefit pension scheme (continued)

by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the net defined benefit liability/(asset).

The company participates in the Sapa Holdings Limited Pension and Life Assurance Scheme, a funded defined benefit pension scheme under which contributions are made to a separately administered trust fund. As required by FRS101 the scheme is accounted for in these financial statements in line with IAS 19 'Employee Benefits'.

The liability/asset recognised in the Statement of financial position in respect of the defined benefit plan is the present value of the defined benefit obligation at the end of the Statement of financial position date less the fair value of plan assets at the Statement of financial position date (if any) out of which the obligations are to be settled.

The defined benefit obligation is calculated using the projected unit credit method. Annually the company engages independent qualified actuaries to calculate the obligation. The present value is determined by discounting the estimated future payments using market yields on high quality corporate bonds that are denominated in sterling and that have terms approximating to the estimated period of the future payments ('discount rate').

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income. These amounts together with the return on plan assets, less amounts included in net interest, are disclosed as 'Remeasurement of net defined benefit liability'.

The cost of the defined benefit plan, recognised in the income statement employee costs, except where included in the cost of an asset, comprises:

- a) the increase in net pension benefit liability arising from employee service during the period; and
- b) the cost of plan introductions, benefit changes, curtailments and settlements.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is recognised in the income statement as a 'finance cost'.

(ii) Defined contribution pension scheme

The Company operates a defined contribution plan for its employees. A defined contribution plan is a pension plan under which the Company pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts.

The contributions for contributions to defined contribution plans are recognised as an expense in the income statement in the periods during which services are rendered by employees. Amounts not paid are shown in accruals as a liability in the balance sheet. The assets of the plan are held separately from the Company in independently administered funds.

(k) IFRS 9 Financial Instruments

IFRS 9 requires an entity to recognise a financial asset or a financial liability in its statement of financial position when it becomes party to the contractual provisions of the instrument. At initial recognition, an entity measures a financial asset or a financial liability at its fair value plus or minus, in the case of a financial asset or a financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or the financial liability.

Predominately for Hydro Building Systems UK Ltd the main financial asset that this accounting standard applies to is trade debtors. This is therefore measured at amortised cost based on the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

at 31 December 2020

3. Turnover

Turnover is attributable to one continuing activity: the marketing and manufacture of aluminium systems for the home improvement and commercial markets.

An analysis of turnover by geographical market is given below:

•	2020	2019
	. £000	£000
United Kingdom	34,098	49,621
Europe	. 813	2,415
Rest of World	452	15
	35,363	52,051

4. Other Operating Income

In response to the COVID-19 coronavirus pandemic, in March 2020 the government of the UK introduced a wage subsidy programme for companies that had to shut their operations and furlough staff. Under the programme, an eligible company could apply for the subsidy in an amount of up to 80% of each employee's salary, subject to a maximum of £2,500 per employee, to continue paying monthly salaries to its furloughed employees. Hydro Buildings Systems was entitled to the wage subsidy on a monthly basis conditional on the employees continuing to be on furlough and the company continuing paying their salary. The company benefited from the programme from March to November 2020. As HBS also had Irish employees we were able to apply through our payroll provider to the Irish Revenue for government assistance for COVID-19 Wage Subsidy Scheme. This was applied for each month covering the periods May to August 2020. The company received a wage subsidy of £508,000 in total under this programme.

This is presented under Other operating income in the income statement.

	2020	2019

Movement in un-provided deferred tax	0	(15)
Adjustment to tax charge in respect of previous years	(14)	48_
Total tax (credit) reported in the income statement	(556)	(528)

at 31 December 2020

(c) Deferred tax

The deferred tax asset / (liability) is as follows:

	2020	2019
	£000	£000
Accelerated capital allowances	309	267
Short term timing differences	117	40
Employee Benefits	(415)	(1427)
Tax Losses	421	
,	432	(1,120)

Movements in the deferred tax account are as follows:

	2020	2019
	£000	£000
At I January	(1,120)	(1,650)
Credited to income statement in the current year	564	70
Adjustment to tax charge in respect of previous years	(142)	(177)
Deferred tax on pension scheme (debited)/credited to other comprehensive	1,130	637
At 31 December 2020	432	(1.120)
At 31 December 2020	7.72	.(1,120)

The March 2020 Budget announced that a rate of 19% would continue to apply with effect from 1 April 2020, and this change was substantively enacted on 17 March 2020. This deferred tax balance at 31st December 2020 is therefore calculated at this rate.

In the 3rd March 2021 Budget it was announced that the UK tax rate will increase to 25% from 1 April 2023. This will have a consequential effect on the Group's future tax charge. If this rate change had been substantively enacted at the current balance sheet date the deferred tax asset would have increased by £131,059.

2020

19. Pensions

On 1 January 2016 Hydro Building Systems UK Limited became the principal employer of the final salary defined benefit pension scheme, Sapa Holdings Limited Pension & Life Assurance scheme, under which contributions are made to a separately administered trust fund, and the auto enrolment compliant scheme, a defined contribution scheme. The Sapa Holdings Limited Pension & Life Assurance Scheme was closed to new members on 1 July 1997.

The contributions paid into the defined benefit scheme during the year were as follows:

	_	2020 £000	2019 £000
Defined Benefit Scheme - Contributions		147	239

The pension scheme assets are held in a separate Trustee administered fund to meet long term pension liabilities to past and present employees. The trustees of the fund are required to act in the best interest of the fund's beneficiaries. The appointment of trustees to the fund is determined by the scheme's trust documentation.

2019

at 31 December 2020

19. Pensions (continued)

A full actuarial valuation was carried out as at 6 April 2018 by a qualified actuary. Full actual valuations are carried out every three years.

The updated valuation showed the market value of the scheme assets amounted to £94,490,000 (2015 - £92,190,000) and the actuarial value was sufficient to cover 113% (2015- 92%) of the benefit that had accrued to members after allowing for the effects of assumed future salary increases.

In 2020 a surplus of £2,184,000 (2019 – £8,393,000) has been recognised in respect of the defined benefit pension plan.

The assets and liabilities of the scheme at 31 December are:

	2020	2019
	£'000	£'000
Scheme assets at fair value		
UK equities	3,764	4,521
Overseas equities	11,409	12,611
Emerging market equities	3,735	7,317
Infrastructure	9,000	-
Corporate bonds	-	1,078
Index linked gilts	-	14,532
Liability Driven Investments	9,810	, <u>-</u>
Trustees bank balance	3,791	1,326
Multi-asset credit	9,164	9,053
Value of insured annuities	45,873	43,561
Fair value of scheme assets	96,546	93,999
Present value of scheme liabilities	(94,362)	(85,606)
Defined benefit pension plan surplus	2,184	8,393

The pension scheme has not invested in any of the Company's own financial instruments nor in properties or other assets used by the Company.

The Scheme also completed the final stages of the Flexible Retirement Offer (FRO) exercise that started in 2017. The offer window closed 31st December 2017. All transfers which had been formally approved by the Company prior to 31st December 2017 had been accounted for in the 2017 valuation. Those valuations which were not approved by 31st December 2017 were carried over into 2018 and are included in the valuation. Under the exercise members were given the opportunity to transfer their benefits out of the Scheme. The difference between the liability removed from the Scheme and the enhanced transfer value has been accounted for as a settlement in the valuation.

The Scheme also undertook a Pension Increase Exchange Exercise (PIE) during 2017. Under this exercise the members were given the option to exchange some of their increasing pension for a higher non-increasing pension. The offer window closed in December 2017 with the higher pension due to be put into payment in February 2018. The difference in accounting reserve for members before and after the offer has been allowed for as a past service credit in the valuation.

at 31 December 2020

19. Pensions (continued)

The movements in the schemes assets and liabilities recognised in the statement of financial position were:

	2020	2019
	£'000	£'000
Net asset at 1 January	8,393	11,484
Employer contributions received	147	239
Expense recognised in the income statement	(409)	25
Re-measurement (loss) in OCI	(5,947)	(3,355)
Net asset at 31 December	2,184	8,393

The amounts recognised in the Income Statement and in the Statement of Comprehensive Income for the year are analysed as follows:

	2020	2019
	£,000	£'000
Recognised in the income statement		
Current service cost	179	296
Past service cost	402	-
Net interest on defined benefit surplus	(172)	(321)
Total (income)/expense recognised in the statement of comprehensive income	409	(25)
Taken to the statement of comprehensive income		
Return on plan assets (excluding amounts included in net interest expense)	5,923	4,305
Actuarial (loss) arising from changes in financial assumptions	(12,554)	(8,457)
Actuarial gain arising from changes in demographic assumptions	354	640
Actuarial gain arising from changes from scheme experience	. 330	157
(Loss)/Gain recognised in the statement of comprehensive income	(5,947)	(3,355)

Changes in the present value of the defined benefit pension obligations are analysed as follows:

Defined benefit obligation at 31 December	94,362	85,606
Benefits paid	(5,398)	(4,129)
Actuarial (loss) arising from changes from scheme experience	(330)	(157)
Actuarial (loss) arising from changes in demographic assumptions	(354)	(640)
Actuarial loss arising from changes in financial assumptions	12,554	8,457
Contributions by scheme participants	18	29
Interest cost	1,685	2,154
Past service cost	402	
Current service cost	179	296
As at 1 January	85,606	79,596
•	£'000	£'000
	2020	2019

at 31 December 2020

19. Pensions (continued)

Changes in the fair value of plan assets are analysed as follow:

	2020	2019
	£'000	£'000
As at 1 January	93,999	91,080
Interest income on plan assets	1,857	2,475
Return on scheme assets excluding interest income	5,923	4,305
Contributions by employer	147	239
Contributions by employee	18	29
Benefits paid	(5,398)	(4,129)
Fair value of plan assets at 31 December	96,546	93,999

Pension contributions are determined with the advice of independent qualified actuaries, on the basis of annual valuations using the projected unit credit method. The projected unit credit method is an accrued benefits valuation method in which the scheme liabilities make allowance for future earnings. Scheme assets are stated at their market values at the respective statement of financial position dates.

	2020	2019
Main assumptions:	%	%
RPI inflation	2.95	3.00
Discount rate	1.20	2.00
Future salary increases	2.95	3.00
Statutory revaluation (CPI inflation)	2.15	1.90
Future pension increases (RPI min 3% p.a., max 5% p.a.)	3.50	3.55
Future pension increases (RPI max 5% p.a.)	2.90	2.95
Mortality before and after retirement – base table	80% S2PMA for Males,	
•	90% S2PFA for Female	

Mortality before and after retirement - future improvements Year of birth projections with CMI 2019

Year of birth projections with CMI 2019 improvements from 2016 with 1.25% p.a. long-term trend rate

Sensitivity Analysis

Based on the assumptions set out above, the impact on the defined obligation of changing the following individual assumptions (with all other assumptions remaining unchanged) is set out below:

	£'000	
	•	
Value of defined benefit obligation at 31 December 2020	94,362	
Discount rate reduced by 0.5% p.a	103,363	
Discount rate increased by 0.5% p.a	86,402	
Inflation reduced by 0.5% p.a	88,201	
Inflation increased by 0.5% p.a	99,993	

The above analyses assumption changes if they occur in isolation, except in the case of inflation where any change is assumed to have a corresponding impact on salary increases and inflation linked pension increases. In practice, some assumptions are likely to be correlated.

The most recently completed actuarial valuation of the company's main retirement benefits scheme was carried out as at 6 April 2019. As a result of that valuation in April 2015 employer contributions were raised from 39.1% to 41.1% with employee contributions remaining at 5%.

at 31 December 2020

19. Pensions (continued)

The company contributions to the defined contribution pension scheme are charged to the income statement in the year they become payable, 2020: £318,000, (2019: £386,000). Amounts not paid are shown in accruals as a liability in the balance sheet. The assets of the plan are held separately from the Company in independently administered funds.

20. Financial liabilities

At 31 December 2020, the company had obligations under leases as set out below:

•	2020	2019
	£000	£000
Present value of lease liabilities	1,343	2,790
Repayable by instalments:		
in two to five years	1,048	2,423
in more than five years	295	367
·	1,343	2,790

The total cash outflows for leases for 2020 was £1,207,113.

The liability is measured at present value of the remaining lease payments discounted at the following rates:

Lease Term	Rate %
1-3 Years	1.79
3-7 Years	2.21
7+ Years	2.78

21. Ultimate parent undertaking and controlling party

The company is a wholly owned subsidiary of Hydro Holdings UK Limited. The ultimate controlling party is Norsk Hydro ASA, a company being incorporated in Norway.

The parent undertaking of the smallest and largest group of undertakings for which group financial statements are drawn up and of which the company is a member is Norsk Hydro ASA.

Copies of financial statements for both Norsk Hydro ASA can be obtained from the registered office address, Drammensveien 264, N-0283 Oslo, Norway.
