Group strategic report for the year ended 31 December 2020

The directors present their strategic report on the Group for the year ended 31 December 2020.

Principal Group activities

The principal activity of The Peninsular and Oriental Steam Navigation Company ("P&O") and of its subsidiaries (referred to as "the Group") in the year was the operation and development of container terminals and related logistical operations worldwide ("Ports"). Our aim is to enhance the supply chain efficiency of our customers by effectively handling container, bulk and general cargo across our network.

Review of operations and results

The results of the Group are set out in detail on pages 20 to 25 and in the accompanying notes. The financial position of the Parent Company is set out in detail on page 76 and in the accompanying notes.

The Group's key financial and other performance indicators during the year were as follows:

	2020	2019	Change
Ports - Container throughput (TEUs'm)	35.4	35.5	(0.3%)
Profit from continuing operations before taxation (£'m)	233.5	265.0	(11.9%)
Profit for the year from continuing operations (£'m)	184.6	202.3	(8.7%)
Adjusted EBITDA (£'m)*	495.4	512.0	(3.2%)
Return on Capital Employed	7.7%	8.2%	-
Net Assets (£'m)	2,473.4	2,328.7	6.2%
Net Debt to equity ratio	51.0%	57.8%	-
Net cash inflow from operating activities (£'m)	297.9	318.7	(6.5%)
Net cash (outflow)/ inflow from investing activities (£'m)	(71.7)	29.5	(343.1%)
Net cash (outflow) from financing activities (£'m)	(167.9)	(312.3)	(46.2%)

*Earnings before separately disclosed items, interest, tax, depreciation and amortization ("Adjusted EBITDA").

Gross throughput of 35.4 million twenty-foot equivalent units (TEU's) was marginally down by 0.3% than last year mainly due to weaker performances across the Asia Pacific and India region.

Profit before taxation for the year ended 31 December 2020 was £233.5m, down by 11.9% from the prior year profit before taxation of £265.0m, mainly due to reversal of litigation provisions in Asia Pacific and India segment in the previous year.

Profit for the year was £184.6m down by 8.7% from the prior year profit of £202.3m, mainly due to reversal of provisions in Asia Pacific and India segment in the previous year.

Adjusted EBITDA for the year was £495.4m decreased by 3.3% from the prior year EBITDA of £512.0m, mainly due to weaker performance in Asia Pacific and India segment, partially offset by stronger performance in Europe, Africa and Middle East region.

Return on capital employed is 7.7% for the year ended 31 December 2020 as compared to 8.2% for the year ended 31 December 2019, due to decreased EBIT and increase in net assets during the year.

Net assets at 31 December 2020 of £2,473.4m were increased by 6.2% when compared to £2,328.7m at 31 December 2019, the movements are detailed in the consolidated statement of changes in equity.

Net debt to equity decreased to 51.0% at 31 December 2020 from 57.8% at 31 December 2019, mainly on account of increase in equity due to increased retained earnings.

Net cash inflow from operating activities was £297.9m lower by 6.5% from the prior year, mainly on account of decrease in EBITDA.

Net cash used in investing activities was £71.7m, lower by 343.1% from the prior year, mainly due to decrease in dividends received from equity accounted investees in Asia Pacific and India segment during the year and also proceeds from disposal of equity accounted investees recorded in prior year in Asia Pacific and India segment.

Net cash used in financing activities was £167.9m lower by 46.2% from the prior year, mainly on account of decrease in payment in relation to loans with group undertakings during the year.

Group strategic report for the year ended 31 December 2020 (continued)

On 29 April 2019, the Group has disposed-off its entire shareholding of 49% in PT Terminal Petikemas Surabaya for a consideration of £30.9 million.

Principal risks and uncertainties

During 2020, the Group continued to monitor and review the principal business performance risks that could materially affect the Group's business, financial condition and reputation. While other risks exist outside those listed, we have made a conscious effort to disclose those of greatest importance to our business. The Group's risk management process aims to provide reasonable assurance that we understand, monitor and manage the principal uncertainties. A summary of the Group's principal risks, the nature and management of these risks are further described below.

Macroeconomic instability

Risk Description and Impact: - Throughput correlates with GDP growth of the global economy. Market conditions in many of the geographies where we operate can be challenging due to macroeconomic or geopolitical issues, which can potentially impact our volume growth and profitability.

Trend: - According to the International Monetary Fund ("IMF"), in 2020 the global economy contracted by 4.4%. The outlook for 2021 remains uncertain with economies impacted by continued lockdowns due to COVID-19, unresolved trade wars and post-Brexit ambiguity. However, IMF is forecasting a GDP recovery of 5.1%.

Risk Management: -

- Our business remains focused on origin and destination cargo, which is less susceptible to economic instability. Although our focus on faster-growing emerging markets may result in volume volatility in the short term, we believe that the medium to long-term prospects remain robust. We aim to deliver high levels of service to meet our customers' expectations and continue to proactively manage costs. Despite the very challenging market conditions in 2020, container volumes remained flat year-on-year. Drewry expects that industry volumes to recover by 9% in 2021.
- Multiple sources of funding have been arranged through bank loans, revolving facilities, bonds and private placements to help ensure that the Group is able to meet short and long-term liquidity requirements, facilitating our growth/diversification aspirations.
- We have a well-diversified global portfolio of investments across a number of jurisdictions, spreading our concentration risk due to a geographical spread of our business activity. Increasingly, we are investing in port-related assets, which further diversify our risks.
- Cost control measures were introduced globally in 2020 to minimize the EBITDA impact of the global economic decline.

Industry Capacity and Competition

Risk Description and Impact: - The utilization within our ports and terminals business is influenced by any available capacity to handle container volumes. In some jurisdictions, port authorities tender many projects simultaneously and create capacity beyond medium-term demand, which will lead to overcapacity in that market. An increase in capacity can lead to intensified competition between terminal operators, resulting in weak pricing power, loss of revenue and low return on investment.

Additionally, the Group may be subject to increasing competition as part of our strategy to develop port-centric logistics businesses to complement our core.

Trend: - COVID-19 has negatively affected port volumes in many geographies. While volume trends have recovered in 2020 across our businesses, the outlook remains uncertain, given the possibility of new lockdowns due to future COVID-19 waves.

Risk Management: -

- Barriers to entry are typically high in the container terminal industry due to the capital-intensive nature of the business. However, in many jurisdictions, where there are ramp-up risks associated with new capacity, we seek terms with the port authorities to restrict the granting of additional capacity until a reasonable level of ramp up has been achieved.
- We bring on capacity in line with demand with a view to avoiding overcapacity.
- Our portfolio continues to have a focus towards emerging markets that continue to show resilience and growth. We repurpose and refit our ports and terminals in line with market demand and use technology as much as possible to improve efficiency and drive new revenue streams, increasing the return on investment in our existing assets.

Group strategic report for the year ended 31 December 2020 (continued)

Industry Capacity and Competition (continued)

- We have global contractual agreements with customers to leverage the global footprint that we have, enabling improved efficiencies for both parties.
- Developing port-centric logistics by adding landside value to our customers.
- With diversification into logistics parks and economic zones, these investments complement container terminals and contribute lease revenue, which is part of our non-container revenue.
- Investments in digital assets that will deliver our vision to become a trade enabler by taking our customers operations online and reduce paper-based complexities involved in existing processes.
- We focus on high levels of customer service and develop sustainable, high-value and trusted customer relationships throughout our portfolio.
- We operate customer engagement projects to improve and extend supply chain relationships. Senior executive sponsors are in constant dialogue with our customers and we maintain a watching brief on all markets. We partner with customers to identify efficiencies and optimize costs wherever possible.

Major Projects – Development and planning

Risk Description and Impact: - Major capital construction projects and programmes of works contribute significantly to reshaping our portfolio and delivering our strategy. We are managing several high-value, long-term projects that can take months or years to complete. These programmes and projects, due to their nature, are exposed to geopolitical events, forces of nature, unforeseen site conditions, technology development, equipment delivery issues and other external factors, which can result in delays, quality issues or cost overruns. Failure to deliver these major programmes and projects can expose the Group to the risk of reduced profitability and potential losses.

Trend: - As a result of COVID-19, a number of construction projects were put on hold until the situation stabilized. For projects that were already in progress, the associated impact has been minimized, thanks to the strength of our contract documents, strong relationships with our supply chain and close monitoring and mitigation of any potential impacts.

Risk Management: -

- Our Group Procurement Policy supports in prequalifying our vendors, standardizing procurement activities (e.g. tendering, evaluation, awarding), standardizing and constantly updating the contractual documentation to cater for the Group's interest when procuring products or services from third-party vendors
- Project risks are periodically assessed, mitigated, managed and controlled during the project implementation stage.
- Several levels of approval are in place for large-scale contracts up to the level of our Board. Multi-discipline committees have been established to validate vendor selection and the awarding process for all large-scale projects.
- Our Group Planning and Project Policy ensures full oversight of all capital construction projects and programmes for all Group companies. Key stakeholders across the Group are regularly provided with status update reports on the progress of projects to ensure clear visibility and accountability.
- The Project Implementation Manual continues to be enhanced to reflect latest process, procedures, tools and techniques in project management.
- As the Group continues to diversify and add different companies under its umbrella, the Group Planning & Project Management department has expanded its competencies and expertise to be ready for any new project type (for products or services).

Geopolitical

Risk Description and Impact: - The Group seeks new opportunities and operates across a large number of jurisdictions, resulting in exposure to a broad spectrum of economies, political and social frameworks. Political instability, changes to the regulatory environment or taxation, international sanctions, expropriation of property, civil strife and acts of war can disrupt the Group's operations, increase costs, or negatively impact existing operations, service, revenues and volumes.

Trend: - This risk has increased due to the ongoing geopolitical tensions and escalations in the Middle East as well as civil unrest across Latin America and Asia. Increased protests have also been seen as a result of COVID-19 and how governments have responded.

Risk Management: -

- We have a well-diversified global portfolio of investments across a number of geographical jurisdictions, which spreads our risk. We also actively maintain a mix in investments between emerging markets and developed markets to balance our risk return profile.
- We are also increasingly investing in port-related assets across the wider supply chain, which further diversifies our potential risk exposure should undesired geopolitical events occur.
- Our focus on the more resilient origin and destination cargo also lowers the risk of volatility.

Group strategic report for the year ended 31 December 2020 (continued)

Geopolitical (continued)

- Our experienced business development team undertakes initial due diligence, and we analyse current and emerging issues.
- Business continuity plans are in place to respond to threats and safeguard our operations and assets.
- Authoritative and timely intervention is made at both national and international levels in response to legislative, fiscal and regulatory proposals that we feel are disproportionate and not in our interests.
- Ongoing security assessments and continuous monitoring of geopolitical developments, along with engagement with local authorities and joint venture partners, ensure we are well-positioned to respond to changes in political environments.

IT Systems, Infrastructure Failure and Cyber Threat

Risk Description and Impact: - We focus on utilizing technologies and data to give us a competitive advantage. It helps us drive efficiencies by ensuring that we understand and operate all our assets to their maximum potential, automating key processes and activities where possible.

As we continue to embed greater digitalisation into our strategy, we continue to realise significant advantages with regard to customer experience, revenue, and cost. This will enable P&OSNCo to achieve growth targets in an evolving landscape. However, this, coupled with the increased use of mobile devices, Internet of Things, cloud applications, social media and the evolving sophistication of cyber threats, lead to corporations being targets for malicious and unauthorized attempts to access their IT systems for information and intelligence. Our Group could be compromised by an incident that breaches our IT security. This could result in business disruption, liabilities, claims, loss of revenue, litigation and harm to the Group's reputation.

Trend: - The sophistication and frequency at which cyber attacks and information security incidents are occurring within global organisations continues to increase. Hackers are exploiting COVID-19, targeting unsuspecting staff in phishing attacks. Since working from home has become a popular way of working, we could see different and more sophisticated methods of attacks. As such, this requires us to remain constantly vigilant and prepared.

Risk Management: -

- We have developed IT strategies that are aligned with business objectives.
- Our Group IT Governance Framework is based on COBIT5, ISO 27001, TOGAF, PMI and ITIL.
- Our information security policies, procedures and frameworks are frequently reviewed to mitigate risks and ensure compliance. These are based on international industry standards, such as ISO27001, NIST and CIS.
- We regularly review, update and evaluate all software, applications, systems, infrastructure and security. This includes regular vulnerability assessment and penetration testing.
- All software and systems are upgraded or patched regularly to ensure that we minimise our vulnerabilities.
- Strong authentication mechanisms are implemented to maintain confidentiality, integrity and availability.
- Our security approach protects confidentiality, integrity and availability of information in all layers of IT infrastructure.
- Our principle is to follow 'Zero Trust Model' before granting access and use least privileged access.
- Data back-up practices are in place across business units to ensure data availability during unforeseen events.
- Each of our business units have IT disaster recovery plans to support business continuity.
- Our IT infrastructure is regularly updated or refreshed to keep pace with changing and growing threats and support business applications.
- We have online training and awareness courses for our employees to ensure they remain aware of proper use of our computer systems and on cyber security.

Safety Risks

Risk Description and Impact: - The industry we operate in has a considerable interaction between people and heavy equipment/loads and falls from heights, which expose us to a range of health and safety hazards. In addition to this, COVID-19 has posed a real threat to the health and wellbeing of our people. The potential impacts could include harm to our people, regulatory action, legal liability, increased costs and damage to our reputation. Our ultimate goal is zero harm to our employees, third parties and communities near our operations.

These impacts are compounded in emerging markets where fundamental safety cultures may not exist or where regulations are not consistently enforced.

In addition, we see the further acquisitions of existing businesses that do not have the same level of standards and culture that Group requires.

Trend:- As we continue to diversify and grow our business, this risk will increase and as such requires a high amount of prioritisation and focus to achieve our 'zero harm' target. COVID-19 increased the threat of health concerns for our employees that needed careful treatment and monitoring.

Group strategic report for the year ended 31 December 2020 (continued)

Safety Risks (continued)

Risk Management: -

- Our Board of Directors is fully committed to creating a safety culture throughout the Group. We regularly monitor the implementation of our safety strategy within our business units, which includes employee training, regular audits and management objectives in relation to the safety of our people.
- Extensive work took place across our businesses to protect our people from the threat of COVID-19, including PPE, temperature checks, close monitoring of staffing levels, quarantining, increased social distancing, new working practices to minimise contact and ongoing awareness.
- We maintain up-to-date HSE standards, guidelines and targeted field-based risk programmes, along with extensive safety promotion activities.
- We have in place a comprehensive five-year HSE strategy backed by robust annual plans for all levels of the organisation.
- We continue to record and report on all safety impacts within our businesses to the Board and senior management. This includes collecting, analysing, reporting and monitoring data on a monthly basis in order to measure the safety performance of our business units.
- We investigate all incidents and have a working group in place to highlight trends, reduce risk factors and identify and implement measures aimed at eliminating future incidents.
- Business unit management is responsible for local terminal safety risks and is supported by safety guides, operational manuals, procedures and oversight from our local, regional and global safety teams, which coordinate consistent approaches to safety risks.
- A Vendor Code of Conduct has been established to ensure contractor selection criteria is aligned with our safety policies prior to commencing work at our business units.

Legal and Regulatory

Risk Description and Impact: - Our Group is subject to local, regional and global laws and regulations across different jurisdictions. These laws and regulations are becoming more complex, increasingly stringent and, as such, we are subject to various legal and regulatory obligations. We are expanding geographically and therefore, we are exposed to an increasing number of laws and regulations when operating our businesses. New legislation and other evolving practices (e.g. data protection, competition law and merger control rules) could impact our operations and increase the cost of compliance.

We must ensure that we fully comply with all these rules, both within our existing operations as well as in our business development opportunities. This is even more critical in our industry that has few players, competitors and customers. Regulators across the world exchange data and scrutinise companies on a global level. Failure to comply with legislation could lead to substantial financial penalties, disruption to business, personal and corporate liability and loss of reputation.

Trend: - This risk has remained stable as we continue to monitor and comply with our legal and regulatory requirements in the countries that we operate.

Risk Management: -

- The Group monitors changes to regulations across its portfolio to ensure that the effect of any changes is minimised, and compliance is continually managed.
- Comprehensive policies, procedures and training are in place to promote legal and regulatory compliance.
- Our legal team has ongoing dialogue with external lawyers to maintain knowledge of relevant legal developments in the markets where we operate.
- There are regular discussions with regions and businesses to proactively be aware of changes in the legal and regulatory environment and be in a position to advise accordingly.
- A Group compliance function has been established to further consolidate compliance with laws and regulations.

Compliance

Risk Description and Impact: - The Group demonstrates high standards of business integrity and ensures compliance with applicable laws and regulations, including but not limited to, anti-bribery and corruption, fraud, data privacy, trade sanctions and anti-trust.

As our business spreads geographically, we are increasingly operating in countries identified as having a higher risk of exposure to these areas of regulation. Failure to comply with these regulations could result in substantial penalties, prosecution and significant damage to our reputation.

This could, in turn, impact our future revenue and cash flow. Allegations of corruption or bribery, or violation of sanctions regulations, could also lead to reputation and brand damage with investors, regulators and customers.

Group strategic report for the year ended 31 December 2020 (continued)

Compliance (continued)

Trend: - As we grow our operations and expand into new areas, we have continued to enforce our high standards of business integrity. Our compliance framework remains robust and aligned with the growth and development of the Group's operations globally, ensuring that we effectively manage our compliance risks.

Risk Management: -

- The Group has a Code of Ethics and dedicated policies and procedures in place to address bribery, modern slavery and human rights, and adopts a zero-tolerance approach to these areas of risk. Online training and fraud risk awareness workshops have been rolled out across the Group to raise awareness and promote compliance.
- We have an Anti-Fraud Policy and framework in place for preventing, detecting and responding to fraud to meet the stringent requirements of the UK Bribery Act. This is particularly focused on higher-risk regions to ensure the Group's policies are understood and enforced.
- We provide new starters and existing employees with training on anti-bribery and corruption as part of the induction process.
- Our Group compliance function focuses on ensuring that we understand and comply with the applicable laws and regulations.
- We have a Vendor Code of Conduct to ensure vendors comply with our ethical standards and values. We will only engage vendors who agree to adopt and adhere to the Code.
- All business units submit an annual self-assessment to confirm compliance to global policies. Policy compliance is independently assessed by Internal Audit during planned business audits undertaken as part of a risk based approach.

Leadership and Talent

Risk Description and Impact: - The leadership and talent risk are inherent to all businesses and failure to effectively attract, develop and retain talent in key areas could impact our ability to achieve growth ambitions and operate effectively. To achieve our goal in becoming a data-driven logistics solutions provider, it is essential we have the right leadership and capabilities in place, across all levels and businesses within the Group.

DP World's People strategy strives to mitigate these risks by creating an environment where people can thrive and grow as part of a dynamic business.

Trend: - This risk continues to remain stable due to the continued efforts and focus that we place on developing our people

Risk Management: -

- Attraction and retention strategies are in place for identified scarce skills.
- We promote a safe working environment for our employees and operate a global health and wellbeing programme.
- We continuously monitor and benchmark our remuneration packages in order to attract and retain employees of a suitable calibre and skill set.
- The DP World Hub develops and delivers training programmes across all levels, focused on improving operational and managerial competencies.
- We partner with some of the most reputable learning institutions, such as London Business School, Harvard, Erasmus and MIT for the development of our leaders.
- We have entered into agreements with leading global recruitment and executive search firms to support us when needed and are currently enhancing our social media sourcing channels.
- Effective performance management remains a high priority. Our global approach and tools are evolving to drive optimal performance, from aligning strategic goals to recognizing and developing our talent.
- We have in place a succession planning strategy for critical roles in the business, which forms part of our talent management process.

Group strategic report for the year ended 31 December 2020 (continued)

Labour Unrest

Risk Description and Impact: - Labour strikes and unrest, or other industrial disputes, pose a risk to our operational and financial results. In 2020, COVID-19 could have caused significant unrest within our workforce if we didn't quickly respond and manage the situation carefully.

Unions are now communicating trans-nationally and co-ordinating actions against multi-national companies. The Group may not be able to renegotiate agreements satisfactorily when they expire and may face industrial action. In addition, labour agreements may not be able to prevent a strike or work stoppage, and labour disputes may arise even in circumstances where the Group's employees are not represented by labour unions.

Trend: - Despite the associated threats and impacts on our workforce from COVID-19, due to our quick response in protecting our employees, this risk has remained stable. The positive relationships that we maintain with unions and employees has minimised the threat of disruptions.

Risk Management:

- We have an engagement strategy with unions and employees in those areas most affected by disputes. This includes multi-year agreements and clearly assigned responsibilities for maintaining close relationships with unions locally, nationally, and internationally
- We are proactive and timely in our responses to the needs of the unions. A senior management representative holds a membership role on the European Works Council, which provides a forum to interact directly with union representatives on a timely and continuous basis.
- COVID-19-specific HSE measures were quickly introduced at the start of the pandemic to support in mitigating the threat of labour unrest and disruption.
- We continue to monitor operational downtime arising from local disputes.
- We conduct employee engagement surveys with a formal process for following up on employee concerns.
- We continue to develop a response capability to address and offset the impact of work stoppages as a result of labour disputes within the local regulatory and legal framework we operate under.

Environmental

Risk Description and Impact: - There is a growing portfolio of legislation and government regulations aimed at tackling climate change, which could have consequences on our operations at national or regional level. New legislation and other evolving practices could impact our operations and increase the cost of compliance. A breach in any of these regulations may result in the Group facing regulatory action and legal liability, including considerable financial penalties, disruption to business, personal and corporate liability and damage to our reputation.

Environmental assessments required by external parties now commonly require the business to meet international standards that exceed local requirements, particularly in emerging markets. Similarly, any spillage or release of a harmful substance may have devastating consequences on the environment and numerous implications for our business. Major incidents related to oil or chemical release may result in the Group being held liable to financial compensation, clean-up costs and potentially have our corporate image permanently damaged.

Trend: - This risk has remained stable in 2020 as we continue to focus on reducing our carbon footprint

Risk Management: -

- We have a dedicated team responsible for continually reviewing environmental regulatory risks, which actively engages with policymakers and governments to assist in managing and mitigating any risks associated with regulatory changes.
- We are constantly reviewing and updating our standards to ensure leading and best practices are applied.
- We have short-term and long-term carbon and environmental management strategies.
- Operational terminals, executives, managers and technical leaders play an important role in developing strategies and actions to combat the adverse potential effects of climate change through planning, modification of infrastructure and retrofitting, etc.
- We continue to monitor and report our carbon emissions to the Board, senior management, and globally to stakeholders.
- DP World purchasing procedures for new equipment is geared to eco-friendly equipment. All new RTGs purchased are eco-RTG and all terminal tractors are energy efficient.
- We review the cargo and chemicals that we handle prior to their arrival and take appropriate action and care when handling dangerous materials to prevent incidents.
- We have developed targeted controls, guidance and training to prepare our terminals for response to any release, large or small, should an incident occur.
- We investigate all environmental incidents and have a working group in place to highlight trends, reduce risk factors and identify and implement measures aimed at eliminating future incidents.

Group strategic report for the year ended 31 December 2020 (continued)

Corporate responsibility, safety and the environment

There are Group policies for health, safety, welfare, environment and social responsibility which are communicated to all staff. Each operating company is required to produce its own policies and management systems to reflect Group policies and best industry practice in its sector of business. The Company also encourages the adoption of similar policies by its significant joint ventures and associates.

Promoting the success of the Group

The Directors of the Group must act in a way, as defined in section 172 of the Companies Act 2006. This requires Directors to act in way which would promote the success of the Group and consider the following matters:

- a) the likely long-term consequences of decisions;
- b) the need to foster the Group's business relationships with suppliers, customers and others;
- c) the impact of the Group's operations on the community and the environment;
- d) the desirability of the Group maintaining a reputation for high standards of business conduct;
- e) the need to act fairly; and
- f) the interests of the company's employees.

As part of their induction to the Group, a Director is made aware of their duties by the Company Secretary.

Long-term decisions - The Directors systematically review and monitor a Group risk register with respect to regulatory, legislative, financial and political risk and act accordingly to mitigate any long-term risks. Details of the principal risks and uncertainties can be found within this report.

Business Relationships – the Group's strategy is to grow and develop business relationships. The Directors do this by maintaining strong relationships with both suppliers and customers, through the executive management team.

Community and Environment – the operations of the Group may have impacts on the environment and the Directors consider this when making decisions including reviewing the cargo and chemicals that the Group handles prior to their arrival and take appropriate action and care when handling dangerous materials to prevent incidents before they happen.

Maintaining a reputation for high standards of business conduct and to act fairly - the Directors periodically consider changes in health and safety legislation, anti-bribery and modern slavery legislative within the Group.

Interests of the Company's employees - the Directors promote a safe working environment for our employees and operate a global health and wellbeing programme.

By order of the Board

Mohammad Alhashimy

Secretary
30 June 2021
Company Number Z73

Streamlined Energy and Carbon Reporting (SECR)

Climate Change

From the scale of energy required to make and move goods to the resource intensity of logistics, we focus on measuring and managing our direct environmental impacts. Our aim is to proactively contribute to the pressing issue of global climate change.

Limiting industry reliance on high-carbon fossil fuels is a priority. To play our part, we have been putting in place a low-carbon transition plan. These efforts tie in with our focus on promoting the use of renewable energy. From implementing green technology solutions to zero-waste solutions, recycling initiatives and low-carbon innovation, we are closing the loop on logistics. Our business units continue to reduce their energy consumption, conserve energy and maximise energy efficiency by:

- buying eco-equipment;
- eliminating wastage (e.g. idling machinery unnecessarily or lighting areas that are not being worked);
- improving green energy procurement (e.g. zero emission electricity); and
- purchasing and/or retrofitting equipment with lower-carbon technologies.

We have focused on reducing the energy output per unit of movement across our operations. We have achieved this by increasing efficiency and promoting clean energy. Our goal is to create a zero-emission supply chain across our networks. This will help the communities we serve and create a cleaner society.

Our long-term commitment is to continue our efforts to reduce our carbon emission and energy use through new programmes and initiatives. These will include developing renewable energy strategies, such as on-site renewable energy projects and green energy procurement. We continually review our regulatory risks and engage with policymakers and governments to help manage and mitigate any risks associated with regulatory changes.

Innovation and developing advanced technologies are central to our strategy. Cleaner, more efficient technologies will be crucial as we explore and develop resources in ever more challenging environments. In line with this, investment in new terminals based on low-carbon emission technology was our most substantial business decision. Investing in technology is central to our dynamic and innovative approach to global business.

We established and issued Group Environmental Management Standards. They are based on, and benchmarked to, the principles of ISO 14001: Environmental Management Systems, referring to our highest environmental risks. The standards clearly describe the key tasks, measures and actions that our teams in business units and facilities are required to implement in relation to environmental management.

P&OSNCo Group – Carbon Emissions

POSNCo Group carbon dioxide equivalent emissions in tonnes by scope:

Emission Scope	2018	2019	2020
Scope 1	173,802	149,331	137,050
Scope 2	84,933	81,300	84,418
Biodiesel	235	11,962	18,111
Total Emissions	258,970	242,593	239,579

Following is the summary of Group's UK based subsidiaries' carbon dioxide equivalent emissions in tonnes by scope:

Emission Scope	2018	2019	2020
Scope 1	20,910	19,573	20,399
Scope 2	24,111	21,481	20,411
Biodiesel	-	-	-

Report of the directors

The directors present their report and accounts for the year ended 31 December 2020.

Directors

The directors of the Company who held office during the year and to the date of this report were as follows:

Mohammad Alhashimy
R.A. Al Qahtani
Mantraraj Dipak Budhdev

Dividends

The Company did not pay any dividend during 2020 (2019: nil).

Employees

The Company is committed to keeping employees throughout the Group informed of performance, development and progress through its established system of briefings by management, and widely distributed news and information bulletins.

There is a European Works Council, known as the European Council, the purpose of which is to inform and consult with employee representatives on transnational issues. Members are elected in the UK and Ireland and either elected or appointed, in accordance with national laws, in other countries. The Council meets twice a year.

The Company's aim is to meet the objectives of the code of good practice on the employment of disabled people. Full and fair consideration is given to disabled applicants for employment and training, and career development is encouraged on the basis of aptitude and abilities. It remains Company policy to retain employees who become disabled whilst in its service and to provide specialised training where appropriate.

Employees are able to share in the Group's results through performance related bonus schemes which are widely applied in the Group.

Going concern

The Group's business activities, together with factors likely to affect its future development, performance and position are set out in the Strategic Report. In addition, note 6 to the consolidated financial statement sets out the Group's objectives, policies and processes for managing the Group's financial risk, including capital management, and note 30 provides details of the Group's exposure to credit risk, liquidity risk and interest rate risk arising from financial instruments.

The Group has within current assets an amount of £1,256.9m (2019: £1,225.7m) due from its intermediate parent companies and fellow subsidiaries and believe these to be recoverable.

The board of directors remain satisfied with the Group's funding and liquidity position. At 31 December 2020, the Group had net debt of £1,262.3m (2019: £1,345.3m) and the undrawn committed borrowing facilities of £16m (2019: nil).

At the start of the pandemic, the world suffered a production shock in China, followed by a demand shock in Europe and North America. After an initial significant dip in volumes, traffic recovered at Group's port in China. The Group's early investment in digital technology and automation ensured the Group faced minimal disruption at its locations. The Group's response to the pandemic was rapid and resolute in continuing to provide our services, maintain operations and protect customers, employees and host communities without compromising on safety. Around the world, the Group has established dedicated teams to monitor, implement, educate and communicate control measures. The Group also monitors, and acts on, every health measure laid down by local government regulations and the WHO, whilst ensuring vital trade continues to flow so that societies have what they need to face the crisis.

As part of Group's strategy to participate across the supply chain to reduce inefficiencies and connect directly with owners of cargo, the Group continued to invest in Logistics and Maritime sector during the year. By integrating the new acquisitions and investing in innovation and technology, the Group continued to assist customers who were struggling with logistics amid the COVID-19 pandemic.

The Group is monitoring all capex closely, has implemented expansive cost control initiatives across all units, is seeking all possible revenue opportunities throughout the business to promote cash preservation and keeping a close watch on receivables. The Group has not observed any significant changes to debtor days as compared to the previous year.

Based on the above and having made enquiries, the Directors consider that the Company and the Group have adequate resources to continue in operational existence for the foreseeable future and therefore they consider it appropriate to adopt the going concern basis in preparing the accounts.

Report of the directors (continued)

Directors Indemnity Insurance

All directors are entitled to indemnification from the Company to the extent permitted by law against claims and legal expenses incurred in the course of their duties.

Such qualifying third-party indemnity insurance is provided and remains in force as at the date of approving the directors' report.

Disclosure of information to the auditor

The directors who held office at the date of approval of this Directors' Report confirm that, so far as they are aware, there is no relevant audit information of which the Company's auditor is unaware and each Director has taken all the steps that he ought to have taken as a director to make himself aware of any relevant audit information and to establish that the Company's auditor's are aware of that information.

Auditor

Pursuant to Section 487 of the Companies Act 2006, the auditor will be deemed to be reappointed and KPMG LLP will therefore continue in office.

By order of the Board

Mohammad Alhashimy

Secretary
30 June 2021

Statement of Directors' responsibilities in respect of the Annual Report, Strategic Report, the Directors' Report and the financial statements

The directors are responsible for preparing the Annual Report, Strategic Report, the Directors' Report and the group and parent company financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare group and parent company financial statements for each financial year. Under that law they have elected to prepare the group financial statements in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006 and applicable law and have elected to prepare the parent company financial statements in accordance with UK accounting standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 101 Reduced Disclosure Framework.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the group and parent company and of the group's profit or loss for that period. In preparing each of the group and parent company financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable, relevant, reliable and prudent;
- for the group financial statements, state whether they have been prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006;
- for the parent company financial statements, state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the group or the parent company or to cease operations or have no realistic alternative but to do so.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the parent company's transactions and disclose with reasonable accuracy at any time the financial position of the parent company and enable them to ensure that its financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the group and to prevent and detect fraud and other irregularities.

Corporate Governance

Overview

Good governance and risk management are core to our business achieving its objectives. Our business model integrates best practice in these areas and is the blueprint to achieving our vision as a Group to lead the future of world trade. The Corporate Governance Report has been structured to align with the principles set out in the Corporate Governance Best Practice Standards as detailed in The Companies (Miscellaneous Reporting) Regulations 2018 (the Regulations). It sets out the actions that we have taken in 2020 to implement these practices

Corporate governance framework

The Group adopts the corporate governance framework of the Parent Company (DP World Limited). A detailed Corporate Governance Report of DP World Limited as reported in its 2020 Annual Report can be accessed at <https://www.dpworld.com/investors/financials-and-Presentations/financial-reports/annual-reports>.

At POSNCo level, the Board is at the center of our Corporate Governance Framework. It works closely with and is aligned with each of the committees formed by the Group's ultimate Parent Company, DP World Limited. The principal DP World Limited Committees include the Remuneration, Audit and Risk, and Nominations and Governance Committees, with formally delegated duties and responsibilities and written terms of reference. From time to time, the Board may set up additional committees to consider specific issues when the need arises. Reports on the activities of the principal DP World Limited Committees and their terms of reference are available on the DP World Limited website, www.dpworld.com. The Deputy Group General Counsel & Company Secretary provides support as the secretary for the principal DP World Limited Committees. The Board considers that the Corporate Governance Framework, which is aligned with that of its ultimate Parent Company, DP World Limited, promotes the prudent and sound management of the Company in the long-term interest of the Company and its shareholders and is effective in promoting compliance with the Corporate Governance principles.

The Group's compliance with six principles enshrined in Wates Corporate Governance Principles is described as below: -

1. Purpose and Leadership

A balanced Board with the necessary skills, knowledge and industry experience to lead our Group is key to achieving our strategic objectives and long-term goals. The Board remains committed to effectively leading the Company, ensuring that our business is managed prudently and soundly to drive sustained long-term value for our shareholders. The balance of skills and expertise on our Board will allow us to continue creating value as we expand our horizons and lead the future of world trade.

2. Board composition

The directors of the Company who held office during the year and to the date of this report were as follows:

Mohammad Alhashimy
R.A. Al Qahtani
Mantraraj Dipak Budhdev

3. Director's responsibilities

The Board is responsible for overseeing the management of the Company and approves all its major decisions. Subject to the provisions of the Companies Act 2006, the Articles of Association (the 'Articles') and to directions given by special resolution of the Company, the Board may exercise all the powers of the Company, whether relating to the management of the business or not. The Board meets regularly, on an ad hoc basis but at least four times each year and is instrumental in planning the medium- and long-term strategy of the Company. Board resolutions are passed by a simple majority of Directors present at a meeting or unanimously in writing.

Matters reserved for consideration by the Board are key matters which include setting the strategic objectives of the Group, declaring dividends, approving major transactions, setting the annual budget for the Group, approving safety and environment policies, insurance, risk management and internal controls.

Corporate Governance (continued)

3. Director's responsibilities (continued)

Meeting attendance

The Board held a total of ten meetings during 2020.

The table below shows the number of meetings individual Directors could have attended in 2020, and their actual attendance.

Name of the Director	Attendance	No. of Meetings
Mohammad Alhashimy	10	10
R.A. Al Qahtani	0	10
Mantraraj Dipak Budhdev	10	10

4. Opportunities and risk

As the Board, we are ultimately responsible for aligning with the Group's risk appetite and its willingness to accept certain risks in pursuit of achieving the Group's strategic objectives. The Board is also responsible for maintaining appropriate risk management and internal control systems. The Audit and Risk Committee at the Group's Parent Company level assists the DP World Limited Board in discharging its responsibilities with regards to financial reporting, external and internal audits, internal controls and risk management, which in turn forms the basis on which the Board discharges its own duties. Audit and Risk Committee is supported by Enterprise Risk Management Committee, which assists the DP World Limited Board in fulfilling its oversight responsibilities in relation to the Principal Risks faced by the group.

During 2020, we continued to ensure POSNCo's alignment with the Group's principal risks that could have material effects on our business, financial condition and reputation. The principal risks and our approach to managing them are discussed on pages 2 to 9 of the Strategic Report.

5. Remuneration

The Remuneration Committee formed at parent company level assists the DP World Limited Board in determining the framework and broad policy for the remuneration of the executive directors and other members of senior management. The Board is then responsible for ensuring that this framework is adopted as necessary by POSNCo.

The reward policy for Executive Directors and senior management (Executive Committee and other experienced managers) is guided by the following key principles:

- Business strategy support: aligned with our business strategy with focus on both short-term goals and the creation of long-term value ensuring alignment to shareholders' interests;
- Competitive pay: ensures competitiveness against our target market;
- Fair pay: ensures consistent, equitable and fair treatment within the organisation; and
- Performance-related pay: linked to performance targets via short- and long-term incentive plans and the pay review process.

6. Stakeholders relationship and engagement

At POSNCo, we are committed to conducting our business in the ways which are responsible and sustainable, in economic, social and environmental terms. Consistent delivery on this commitment demands effective policies and processes of engagement with the full range of stakeholders who influence, and are impacted by, our business operations. By 'engagement' we mean the two-way dialogue which enables us to listen and respond to stakeholder views and concerns on issues which are important to them. The central goal of our stakeholder engagement strategy and related activities is to generate and maintain a positive climate of stakeholder opinion and interaction, based on a sense of involvement and a shared belief in mutually beneficial outcomes.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY

Opinion

We have audited the financial statements of The Peninsular and Oriental Steam Navigation Company ("the company") for the year ended 31 December 2020 which comprise the Group and Parent Company Balance Sheet, the Group Statement of Income, the Group Statement of Comprehensive Income, the Group Statement of Cash Flows, the Group and Parent Company Statement of Changes in Equity and related notes, including the accounting policies in Notes 3 and 4.

In our opinion:

- the financial statements give a true and fair view of the state of the group's and of the parent company's affairs as at 31 December 2020 and of the group's profit for the year then ended;
- the group financial statements have been properly prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006;
- the parent company financial statements have been properly prepared in accordance with UK accounting standards, including FRS 101 Reduced Disclosure Framework; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the group in accordance with, UK ethical requirements including the FRC Ethical Standard. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

Going concern

The directors have prepared the financial statements on the going concern basis as they do not intend to liquidate the group or the company or to cease their operations, and as they have concluded that the group and the company's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over their ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the directors' conclusions, we considered the inherent risks to the group's business model and analysed how those risks might affect the group and company's financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate;
- we have not identified, and concur with the directors' assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the group or the company's ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the group or the company will continue in operation.

Fraud and breaches of laws and regulations – ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of directors and inspection of policy documentation as to the Group's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.

Fraud and breaches of laws and regulations – ability to detect (*continued*)

Identifying and responding to risks of material misstatement due to fraud (continued)

- Reading Board meeting minutes.
- Considering remuneration incentive schemes and performance targets for management/ directors.
- Using analytical procedures to identify any unusual or unexpected relationships.

We communicated identified fraud risks throughout the audit team and remained alert to any indications of fraud throughout the audit. This included communication from the group to full scope component audit teams of relevant fraud risks identified at the Group level and request to full scope component audit teams to report to the Group audit team any instances of fraud that could give rise to a material misstatement at group.

As required by auditing standards, and our overall knowledge of the control environment, we perform procedures to address the risk of management override of controls and the risk of fraudulent revenue recognition and the risk that Group and component management may be in a position to make inappropriate accounting entries and the risk of bias in accounting estimates and judgements such as potential asset impairment and defined benefit pension scheme assumptions.

We did not identify any additional fraud risks.

In determining the audit procedures, we took into account the results of our evaluation and testing of the operating effectiveness of some of the Group-wide fraud risk management controls.

We also performed procedures including:

- Identifying journal entries and other adjustments to test based on risk criteria and comparing the identified entries to supporting documentation.
- Evaluated the business purpose of significant unusual transactions.
- Assessing significant accounting estimates for bias.

Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience, through discussion with the directors and other management (as required by auditing standards), and from inspection of the Group's regulatory and legal correspondence and discussed with the directors and other management the policies and procedures regarding compliance with laws and regulations.

We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit. This included communication from the group to component audit teams of relevant laws and regulations identified at the Group level, and a request for component auditors to report to the group team any instances of non-compliance with laws and regulations that could give rise to a material misstatement at group.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Group is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Group is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation or the loss of the Company's license to operate. We identified the following areas as those most likely to have such an effect: health and safety, anti-bribery, employment law, regulatory capital and liquidity and certain aspects of company legislation. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the directors and other management and inspection of regulatory and legal correspondence, if any. Therefore, if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

Fraud and breaches of laws and regulations – ability to detect (*continued*)

Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

Strategic report and directors' report

The directors are responsible for the strategic report and the directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the strategic report and the directors' report;
- in our opinion the information given in those reports for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

Matters on which we are required to report by exception

Under the Companies Act 2006, we are required to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

Directors' responsibilities

As explained more fully in their statement set out on page 11, the directors are responsible for: the preparation of the financial statements and for being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the group and parent company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so.

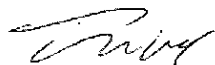

Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Consolidated statement of cash flows

For the year ended 31 December 2020

	Note	2020	2019
Operating activities			
Profit after taxation		104.6	202.3
Adjustments to reconcile profit before taxation to net cash provided by operating activities			
Share of profits of equity accounted investees	15	(92.6)	(106.5)
Loss on sale and termination of business		(1.0)	(16.3)
Gain on sale of other investments		-	23.8
Impairment loss	9	8.0	2.5
Net finance expense	10	98.4	83.8
Taxation expense	11	48.9	62.7
Non-cash employee benefit expense		-	3.1
Depreciation and amortisation charges		147.3	151.2
Gross cash flows from operations		393.6	406.6
Movement in working capital:			
Change in inventories		(3.1)	(3.6)
Change in trade and other receivables		32.9	18.2
Change in trade and other payables		(33.9)	(22.9)
Change in provisions		21.3	35.3
Income taxes paid		(72.5)	(91.9)
Employee benefits paid		(40.4)	(22.8)
Net cash provided by operating activities		297.9	318.7
Investing activities			
Capital expenditure		(107.7)	(93.8)
Dividends received from joint ventures and associates	15	27.2	77.1
Interest received		8.8	15.3
Proceeds from disposals of equity accounted investees		-	30.9
Net cash (used in) /provided by investing activities		(71.7)	29.5
Financing activities			
Drawdown from long-term financing	20	65.0	37.5
Repayments of long-term financing	20	(77.3)	(62.1)
Repayments of lease liabilities	21	(34.4)	(32.9)
Payment of loans with group undertakings (net)		(67.0)	(189.5)
Receipt of loans with group undertakings		39.7	23.7
Net interest paid		(69.9)	(76.1)
Amounts contributed by non-controlling interests		1.5	-
Dividends paid to non-controlling interest		(25.5)	(12.9)
Net cash used in financing activities		(167.9)	(312.3)
Increase in cash and cash equivalents		58.3	35.9
Cash and cash equivalents at beginning of year	19	317.1	291.0
Currency translation differences relating to cash and cash equivalents		(6.7)	(9.8)
Cash and cash equivalents at end of year		368.7	317.1

The accompanying notes form an integral part of these consolidated financial statement.

Notes to the consolidated financial statements

(forming part of the financial statements)

1 Reporting entity

The Peninsular and Oriental Steam Navigation Company (the "Company") is a company incorporated and domiciled in the United Kingdom. The consolidated financial statements of the Company for the year ended 31 December 2020 comprise the Company and its subsidiaries (together referred to as the "Group" and individually referred to as "Group entities") and the Group's interests in associates and jointly controlled entities. The parent company financial statements present information about the company as a separate entity and not as a Group.

The Company's ultimate parent undertaking, DP World Limited (formerly DP World PLC), includes the Company in its consolidated financial statements. The consolidated financial statements of DP World Limited are prepared in accordance with IFRS.

2 Basis of preparation

(a) Statement of compliance

These Group financial statements were prepared in accordance with International Accounting Standards in conformity with the requirements of the Companies Act 2006. The Company has elected to prepare its parent company financial statements in accordance with FRS 101; these are presented on pages 76 to 107.

The consolidated financial statements were approved by the board of directors on 29 June 2021.

(b) Basis of measurement

The consolidated financial statements have been prepared on the historical cost basis except for derivative financial instruments and plan assets in defined pension plans which are measured at fair value.

The methods used to measure fair values are discussed further in note 5.

(c) Funding and liquidity

The Group's business activities, together with factors likely to affect its future development, performance and position are set out in the Strategic Report. In addition, note 6 to the consolidated financial statement sets out the Group's objectives, policies and processes for managing the Group's financial risk, including capital management, and note 30 provides details of the Group's exposure to credit risk, liquidity risk and interest rate risk arising from financial instruments.

The Group has within current receivables an amount of £1,256.9 million (2019: £1,225.7 million) due from its intermediate parent companies and fellow subsidiaries and believe these to be recoverable.

The Board of Directors remain satisfied with the Group's funding and liquidity position. At 31 December 2020, the Group had net debt of £1,262.3 million (2019: £1,345.3 million) and has undrawn committed borrowing facilities of £16 m (2019: nil).

Management has made an assessment of the Group's ability to continue as a going concern and is satisfied that the Group has the resources to continue in business for the foreseeable future. Despite, Covid-19 pandemic, the Group has been profitable, and it had positive net asset, working capital and cash flow positions as at the year end.

In response to this and its potential impact on the company's ability to continue as a going concern, Management has prepared an additional downside scenario to model the potential impact for the Group up until 31 December 2023. Under this severe but plausible downside scenario, management projects a prolonged impact of the COVID19 on travel restrictions and international trade for the remainder of 2021 and the first 4 months in 2022. In this scenario the Group is expected to have a closing cash position of approximately 3/% lower than in the base case scenario as at 31 December 2021 and 31 December 2022 after taking mitigation actions, principally related to rescheduling of uncommitted future capital expenditure. The Group would continue to operate within all relevant financial covenants.

Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Group's ability to continue as a going concern. Management concluded that based on all available known facts and circumstances, the Group is a going concern and, therefore, the financial statements continue to be prepared on a going concern basis.

Notes to the consolidated financial statements (continued)

2 Basis of preparation (continued)

(c) Funding and liquidity (continued)

At the start of the pandemic, the world suffered a production shock in China, followed by a demand shock in Europe and North America. After an initial significant dip in volumes, traffic recovered at Group's port in China. The Group's early investment in digital technology and automation ensured the Group faced minimal disruption at its locations. The Group's response to the pandemic was rapid and resolute in continuing to provide our services, maintain operations and protect customers, employees and host communities without compromising on safety. Around the world, the Group has established dedicated teams to monitor, implement, educate and communicate control measures. The Group also monitors, and acts on, every health measure laid down by local government regulations and the WHO, whilst ensuring vital trade continues to flow so that societies have what they need to face the crisis.

As part of Group's strategy to participate across the supply chain to reduce inefficiencies and connect directly with owners of cargo, the Group continued to invest in Logistics and Maritime sector during the year. By integrating the new acquisitions and investing in innovation and technology, the Group continued to assist customers who were struggling with logistics amid the COVID-19 pandemic.

The Group is monitoring all capex closely, has implemented expansive cost control initiatives across all units, is seeking all possible revenue opportunities throughout the business to promote cash preservation and keeping a close watch on receivables. The Group has not observed any significant changes to debtor days as compared to the previous year.

(d) Functional and presentation currency

The functional currency of the Company is Pound sterling ("£"). Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency.

These consolidated financial statements are presented in Pound sterling ("£"), which in the opinion of management is the most appropriate presentation currency of the company in view of the global presence of the Group. All financial information presented in £ are rounded to the nearest 0.1 million.

(e) Use of estimates and judgements

The preparation of consolidated financial statements in conformity with International Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

The significant estimates and judgements are listed below:

- i. Estimate of expected future cash flows and discount rates for calculating present value of such cash flows used to compute value-in-use of cash-generating units.
- ii. Estimate of fair value of derivatives for which an active market is not available, is computed using various generally accepted valuation techniques. Such techniques require inputs from observable markets and judgements on market risk and credit risk.
- iii. Estimate required by actuaries in respect of discount rates, future salary increments, mortality rates and inflation rate used for computation of defined benefit liability.
- iv. Estimate to measure expected credit losses for financial assets.
- v. Judgement is required to determine whether or not a contract contains a lease.

Management has also reassessed significant judgements, estimates and assumptions primarily due to the current economic uncertainties arising from the recent outbreak of the Novel Coronavirus (COVID-19) as outlined below:

Notes to the consolidated financial statements (continued)

2 Basis of preparation (continued)

(e) Use of estimates and judgements (continued)

Note on impairment review

IAS 36 Impairment of Assets requires that goodwill and intangible assets with indefinite lives are tested for impairment at a minimum every year and other non-financial assets are tested only when there are indicators of impairment that these assets might be impaired.

In the current year, given the impact of COVID-19 pandemic, the Group has updated the assumptions (discount rates and growth rates) and future cash flow projections to test for impairment reflecting the increased level of risk and uncertainty. The value in use of each cash-generating units ("CGU") is compared to the carrying amount to assess any probable impairment.

The value in use is calculated using cash flow projections based on the revised financial budgets covering a three year period and a further outlook for five years, which is considered appropriate in view of the outlook for the industry and the long-term nature of the concession agreements held i.e. generally for a period of 25-50 years.

Refer note 12 for further details.

3 Changes in accounting policies

The Group has consistently applied the accounting policies set out in Note 4 to all periods presented in these consolidated financial statements.

a) New standards and interpretations not yet effective

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2020 reporting periods and have not been early adopted by the group. These standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

4 Significant accounting policies

The accounting policies set out below have been applied consistently in the year presented in these consolidated financial statements and have been applied consistently by the Group entities.

(a) Basis of consolidation

(i) Business combinations

The acquisition method of accounting is used to account for business combinations including common control transactions by the Group on the date of acquisition. For each significant business combination, the Group engages external, independent and qualified valuers who have the relevant experiences to carry out the fair valuation exercise of the net assets based on market related assumptions and weighted average cost of capital. In assessing control, the Group takes into consideration potential voting rights that are currently exercisable.

The Group measures goodwill at the acquisition date as:

- the fair value of the consideration transferred; plus
- the recognised amount of any non-controlling interests in the acquiree; plus
- if the business combination is achieved in stages, the fair value of the pre-existing equity interest in the acquiree; less
- the net recognised amount (generally fair value) of the identifiable assets (including previously unrecognised port concession rights) acquired and liabilities (including contingent liabilities and excluding future restructuring) assumed.

In an acquisition, if the purchase price is lower than the fair value of the assets acquired, the resulting gain will be recognised immediately in the statement of consolidated income statement.

In case of business combinations under common control, if the purchase price is lower than the fair value of the assets acquired, the resulting gain will be recognised directly in equity.

The consideration transferred does not include amounts related to the settlement of pre-existing relationships.

Transaction costs, other than those associated with the issue of debt or equity securities, that the Group incurs in connection with a business combination are expensed as incurred.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

Any contingent consideration payable is measured at fair value at the acquisition date. If the contingent consideration is classified as equity, then it is not re-measured and settlement is accounted for within equity. Otherwise, subsequent changes in the fair value of the contingent consideration are recognised in the consolidated income statement.

(ii) Subsidiaries

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.

(iii) Business combination achieved in stages

On business combination achieved in stages, the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the date of acquisition with any resulting gain or loss is recognised in profit or loss.

(iv) Change in ownership interests in subsidiaries without loss of control

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as transactions with owners in their capacity as owners and therefore no goodwill is recognised as a result of such transactions. The difference between the fair value of any consideration paid or received and relevant shares acquired or disposed off in the carrying value of net assets of the subsidiary is recorded in equity under retained earnings.

(v) Disposal of subsidiaries (loss of control)

On the loss of control, the Group derecognises the subsidiary and recognises any surplus or deficit arising on the loss of control in the consolidated income statement. Any retained interest is re-measured at fair value on the date control is lost and is subsequently accounted as an equity-accounted investee or as a FVOCI-equity instrument depending on the level of influence retained.

(vi) Non-controlling interests

For each business combination, the Group elects to measure any non-controlling interests either at their proportionate share of the acquiree's identifiable net assets at the date of acquisition or at its fair value.

Where a put option is held by a non-controlling interest in a subsidiary, whereby that party can require the Group to acquire the NCI's shareholding in the subsidiary at a future date, but the NCI retain present access to the results of the subsidiary, the Group applies the present access method of accounting to this arrangement. The Group recognises a put option liability at its discounted fair value, being the Group's estimate of the amount required to settle that liability with a corresponding reserve in equity. Any subsequent remeasurements of put option liability due to changes in the fair value of the put liability estimation are recognised in the equity and not in the consolidated income statement.

(vii) Investments in associates and joint ventures (equity-accounted investees)

The Group's Interest in equity-accounted investees comprise interest in associates and joint ventures. An associate is an entity over which the Group has significant influence. A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture.

Investments in equity-accounted investees are accounted for using the equity method and are initially recorded at cost including transaction costs. The Group's investment includes fair value adjustments (including goodwill) net of any accumulated impairment losses.

At each reporting date, the Group determines whether there is any objective evidence that the investments in the equity-accounted investees are impaired. If this is the case, the Group calculates the amount of impairment as the difference between the recoverable amount of the equity-accounted investees and its carrying value and recognises the same in the consolidated income statement.

(viii) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealised gains arising from the transactions with equity-accounted investees are eliminated against the investment to the extent of the Group's interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(b) Foreign currency

(i) Foreign currency transactions and balances

Transactions in foreign currencies are translated to the functional currency of each entity at the foreign exchange rate ruling on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency of each entity at the foreign exchange rate ruling at that date. Foreign currency differences are generally recognised in the profit or loss.

Non-monetary assets and liabilities denominated in foreign currency are translated to the functional currency of each entity at the foreign exchange rate ruling at the date of transaction with no further re-measurement in future.

(ii) Foreign operations

For the preparation of consolidated financial statements, the differences arising on translation of financial statements of foreign operations into £ are recognised in other comprehensive income and accumulated in the translation reserve except to the extent of share of non-controlling interests in such differences. Accumulated translation differences are recycled to profit or loss on de-recognition of foreign operations as part of the gain or loss on such derecognition. In case of partial derecognition, accumulated differences proportionate to the stake derecognised are recycled.

If the settlement of a monetary item receivable from or payable to a foreign operation is neither planned nor likely to occur in the foreseeable future, then foreign currency differences arising from such item form part of the net investment in the foreign operation. Accordingly, such differences are recognised in OCI (other comprehensive income) and accumulated in the translation reserve.

Foreign currency differences arising on the retranslation of a financial liability designated as a hedge of a net investment in a foreign operation are recognised in the consolidated statement of other comprehensive income, to the extent that the hedge is effective.

(c) Financial instruments

(i) Non-derivative financial assets

Under IFRS 9, on initial recognition, a financial asset is classified and measured at:

- Amortised cost;
- Fair value through other comprehensive income ('FVOCI') - debt instrument;
- FVOCI - equity instrument; or
- Fair value through profit or loss ('FVTPL').

The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and also on the basis of the contractual cash flows characteristics of the financial instrument.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred and it does not retain control of the financial asset.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(c) Financial instruments (continued)

ii Non-derivative financial liabilities

Classification, initial recognition and measurement

Under IFRS 9, financial liabilities at inception can be classified either at amortised cost or FVTPL.

The Group's non-derivative financial liabilities consist of loans and borrowings, bank overdrafts, amounts due to related parties, and trade and other payables. All non-derivative financial liabilities are recognised initially at fair value less any directly attributable transaction costs. The Group classifies all its non-derivative financial liabilities as financial liabilities to be carried at amortised cost using effective interest method.

The subsequent measurement of non-derivative financial liabilities are carried at their amortised cost using the effective interest method.

The Group derecognises a financial liability when its contractual obligations are discharged or cancelled or expired. The Group also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

iii. Derivative financial instruments and hedge accounting

The Group holds derivative financial instruments such as forward currency contracts and interest rate swaps to hedge its cash flows exposed to risk of fluctuations in foreign currencies and interest rates.

The Group has elected to adopt the new general hedge accounting model in IFRS 9. This requires the Group to ensure that hedge accounting relationships are aligned with its risk management objectives and strategy and to apply a more qualitative and forward looking approach to assessing hedge effectiveness.

Initial recognition

Derivatives are recognised initially at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are either recognised in the consolidated income statement or the consolidated statement of other comprehensive income.

The Group designates certain derivatives as hedging instruments to hedge the variability in cash flows associated with highly probable forecast transactions arising from changes in foreign exchange rates and interest rates and certain derivatives and non-derivative financial liabilities as hedges of foreign exchange risk on a net investment in a foreign operation.

On initial designation of the derivatives as the hedging instrument, the Group formally documents the risk management objective and strategy for undertaking the hedge. The Group also documents the economic relationship between the hedging instrument and hedged item, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other together with the methods that will be used to assess the effectiveness of the hedging relationship.

Subsequent measurement

Changes in the fair value of the derivative hedging instrument designated as a cash flow hedge are recognised directly in consolidated statement of other comprehensive income to the extent that the hedge is effective and presented in the hedging reserve in equity. Any ineffective portion of changes in the fair value of the derivative is recognised immediately in the consolidated income statement.

When the hedged item is a non-financial asset, the amount recognised in the consolidated statement of other comprehensive income is transferred to the carrying amount of the asset when it is recognised. In other cases, the amount recognised in consolidated statement of other comprehensive income is transferred to the consolidated income statement in the same period that the hedged item affects the consolidated income statement.

When a derivative instrument or a non-derivative financial liability is designated as the hedging instrument in a hedge of a net investment in a foreign operation, the effective portion of, for a derivative, changes in the fair value of the hedging instrument or, for a non-derivative, foreign exchange gains and losses is recognised in OCI and presented in the translation reserve within equity. Any ineffective portion of the changes in the fair value of the derivative or foreign exchange gains and losses on the non-derivative is recognised immediately in profit or loss. The amount recognised in OCI is reclassified to profit or loss as a reclassification adjustment on disposal of the foreign operation.

Derivative instruments that are not designated as hedging instruments in hedge relationships are classified as financial liabilities or assets at fair value through profit or loss.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(c) Financial Instruments (continued)

iii. Derivative financial instruments and hedge accounting

Derecognition

If the hedging instrument no longer meets the criteria for hedge accounting, expires or is sold, terminated or exercised, or the designation is revoked, then hedge accounting is discontinued prospectively. The cumulative gain or loss previously recognised in consolidated statement of other comprehensive income remains there until the forecast transaction or firm commitment occurs. If the forecast transaction or firm commitment is no longer expected to occur, then the balance in equity is reclassified to the consolidated income statement.

(iv) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount presented in the consolidated statement of financial position when, and only when, the Group has a legal right to offset the amounts and intends either to set off on a net basis, or to realise the assets and settle the liability simultaneously.

(d) Property, plant and equipment

Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses (refer to note 4(i)).

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of a self-constructed asset includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use and the cost of dismantling and removing the items and restoring the site on which they are located.

Purchased software that is integral to the functionality of the related equipment is capitalised as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are depreciated as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment and recognised within 'other income' in the consolidated income statement.

Capital work-in-progress

Capital work-in-progress is measured at cost less impairment losses and not depreciated until such time the assets are ready for intended use and transferred to the respective category under property, plant and equipment.

Dredging

Dredging expenditure is categorised into capital dredging and major maintenance dredging. Capital dredging is expenditure which includes creation of a new harbour, deepening or extension of the channel berths or waterways in order to allow access to larger ships which will result in future economic benefits for the Group. This expenditure is capitalised and amortised over the expected period of the relevant concession agreement. Major maintenance dredging is expenditure incurred to restore the channel to its previous condition and depth. Maintenance dredging is regarded as a separate component of the asset and is capitalised and amortised evenly over 10 years.

(ii) Subsequent costs

The cost of replacing part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably.

(iii) Depreciation

Land and capital work in progress is not depreciated. Depreciation on other assets is recognised in the consolidated income statement on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment and is based on cost less residual value.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(d) Property, plant and equipment (continued)

Dredging (continued)

(iii) Depreciation (continued)

The estimated useful lives of assets are as follows:

Assets	Useful life (years)
Buildings	5 – 50
Plant and equipment	3 – 30
Vessels	5 – 30
Dredging (included in land and buildings)	10 – 99

Dredging costs are depreciated on a straight line basis based on the lives of various components of dredging.

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted prospectively, if required.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (refer to note 4 (i) (i)).

(iv) Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

(e) Goodwill

Goodwill arises on the acquisition of subsidiaries and equity-accounted investees. Goodwill represents the excess of the cost of the acquisition over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities of the acquiree. In an acquisition, if the purchase price is lower than the fair value of the assets acquired, the resulting gain will be recognised immediately in the consolidated income statement.

Goodwill is measured at cost less accumulated impairment losses (refer to note 4(i)). Goodwill is not amortised but it is tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired. An impairment loss in respect of goodwill is not reversed.

In respect of equity-accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment and is not tested for impairment separately.

(f) Port concession rights

The Group classifies the port concession rights as intangible assets as the Group bears demand risk over the infrastructure assets. Substantially all of the Group's terminal operations are conducted pursuant to long-term operating concessions or leases entered into with the owner of a relevant port for terms generally between 25 and 50 years (excluding the port concession rights relating to associates and joint ventures). The Group commonly starts negotiations regarding renewal of concession agreements with approximately 5 - 10 years remaining on the term and often obtains renewals or extensions on the concession agreements in advance of their expiration in return for a commitment to make certain capital expenditures in respect of the subject terminal. In addition, such negotiations may result in the re-basing of rental charges to reflect prevailing market rates. However, based on the Group's experience, incumbent operators are typically granted renewal often because it can be costly for a port owner to switch operators, both administratively and due to interruptions to port operations and reduced productivity associated with such transactions. Port concession rights consist of:

(i) Port concession rights arising on business combinations

The cost of port concession rights acquired in a business combination is the fair value as at the date of acquisition.

Following initial recognition, port concession rights are carried at cost less accumulated amortisation and any accumulated impairment losses (refer to note 4(i)). The useful lives of port concession rights are assessed to be either finite or indefinite.

Port concession rights with finite lives are amortised on a straight-line basis over the useful economic life and assessed for impairment whenever there is an indication that the port concession rights may be impaired. The amortisation period and amortisation method for port concession rights with finite useful lives are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the assets are accounted for by changing the amortisation period or method, as appropriate, and treated as changes in accounting estimates. The amortisation expenses on port concession rights with finite useful lives are recognised in the consolidated income statement on a straight-line basis.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(f) Port concession rights (continued)

(i) Port concession rights arising on business combinations (continued)

Port concession rights with indefinite lives (arising where freehold rights are granted) are not amortised and are tested for impairment at least on an annual basis or when the impairment indicator exists, either individually or at the cash-generating unit level. The useful life of port concession rights with an indefinite life is reviewed annually to determine whether the indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

(ii) Port concession rights arising from Service Concession Arrangements (IFRIC 12)

The Group recognises port concession rights arising from a service concession arrangement, in which the grantor (government or port authorities) controls or regulates the services provided and the prices charged, and also controls any significant residual interest in the infrastructure such as property, plant and equipment, if the infrastructure is existing infrastructure of the grantor or the infrastructure is constructed or purchased by the Group as part of the service concession arrangement.

Any amounts paid by the operator to the grantor as a consideration for obtaining the rights relating to concession arrangements are also accounted as part of port concession rights. These port concession rights are amortised over the life of the concession period on straight line basis.

Port concession rights also include certain property, plant and equipment which are reclassified as intangible assets in accordance with IFRIC 12 'Service Concession Arrangements'. These assets are amortised based on the lower of their useful lives or concession period. Amortisation of port concession rights is recognised in the consolidated income statement as part of 'cost of sales'.

Gains or losses arising from de-recognition of port concession rights are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the consolidated income statement when the asset is derecognised.

The estimated useful lives for port concession rights range within a period of 5 - 50 years (including the concession rights relating to equity accounted investees).

(g) Inventories

Inventories mainly consist of spare parts and consumables. Inventories are measured at the lower of cost and net realisable value. The cost of inventories is based on weighted average method and includes expenditure incurred in acquiring inventories and bringing them to their existing location and condition. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

(h) Leases

i. Group as a lessee

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated over the shorter of the asset's useful life or the lease term on a straight-line basis. If the Group is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in statement of profit or loss.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and

- the exercise price under a purchase option that the Group is reasonably certain to exercise, lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Group is reasonably certain not to terminate early.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Group presents right-of-use assets and lease liabilities separately on statement of financial position.

Variable lease payments that depend on revenue and output are recognised in statement of profit or loss in the period in which the condition that triggers those payments occurs.

ii. Group as a lessor

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

The Group recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of revenue.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(i) Impairment

(i) Non-financial assets

The carrying amounts of the Group's non-financial assets, other than inventories and deferred tax assets are reviewed for impairment whenever there is an indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

For impairment testing, the assets are grouped together into smallest group of assets (cash generating unit or "CGU") that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGU's.

Goodwill and port concession rights with infinite useful lives, as part of their respective cash-generating units, are also reviewed for impairment at each reporting date or at least once in a year regardless of any indicators of impairment. The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash generating unit.

Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro-rata basis.

In respect of non-financial assets (other than goodwill), impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount, which would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(ii) Impairment of non-derivative financial assets

IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' (ECL) model. The new impairment model applies to financial assets measured at amortised cost, contract assets and debt investments at FVOCI, but not to investments in equity instruments. Under IFRS 9, credit losses are recognised earlier than under IAS 39.

The financial assets at amortised cost consist of trade receivables and cash and cash equivalents.

Under IFRS 9, loss allowances are measured on either of the following bases:

- 12-month ECLs: these are ECLs that result from possible default events within the 12 months after the reporting date; and
- lifetime ECLs: these are ECLs that result from all possible default events over the expected life of a financial instrument.

The Group measures loss allowances at an amount equal to lifetime ECLs. When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment and including forward looking information.

The Group considers a financial asset to be in default when:

- the borrower is unlikely to pay credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any are held); or
- the financial asset is more than 180 days past due.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk.

(k) Share capital and premium

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity. Any excess payment received over par value is treated as share premium. Holders of these shares are entitled to dividends as declared from time to time and are entitled to one vote per share at general meetings of the Company.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(l) Employee benefits

(i) Pension and post-employment benefits

Defined contribution plans

A defined contribution plan is a post-employment benefit plan in which the company pays the fixed contribution to a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an expense in the income statement during which the services are rendered by employees.

Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.

The Group's net obligation in respect of defined benefit pension plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine the present value, and the fair value of any plan asset is deducted to arrive at net obligation. The calculation is performed annually by a qualified actuary using the projected unit credit method which attributes entitlement to benefits to the current period (to determine current service cost) and to the current and prior periods (to determine the present value of defined benefit obligation) and is based on actuarial advice.

Re-measurements of the net defined benefit liability, which comprise actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest) are recognised directly in the consolidated statement of other comprehensive income. The cost of providing benefits under the defined benefit plans is determined separately for each plan.

Contributions, including lump sum payments, in respect of defined contribution pension schemes and multi-employer defined benefit schemes where it is not possible to identify the Group's share of the scheme, are charged to the consolidated income statement as they fall due.

(ii) Long-term service benefits

The Group's net obligation in respect of long-term service benefits, other than pension plans, is the amount of future benefit that employees have earned in return for their service in the current and prior periods. The obligation is calculated using the projected unit credit method and is discounted to its present value and the fair value of any related assets is deducted. The discount rate is the yield at the reporting date on AA credit rated bonds that have maturity dates approximating to the terms of the Group's obligations.

(iii) Short-term service benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(m) Provisions

Provisions for environmental restoration, restructuring costs and legal claims are recognised when: the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Restructuring provisions comprise lease termination penalties and employee termination payments. Provisions are not recognised for future operating loss.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as a finance cost in the consolidated income statement.

(n) Revenue

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duty.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(n) Revenue (continued)

The following specific recognition criteria must also be met before revenue is recognised:

Rendering of port related services

The Group's revenue mainly consists of port related services (containerised stevedoring, break bulk, general cargo, and marine services) which are generally carried out in a short span of time. These port related services are contracted with the customers as a single transaction. These port related services have high degree of integration and accordingly, constitute a single distinct performance obligation for the Group. Revenue from these services is recognised at the point in time when the services are rendered to the customer and are usually payable within 30 to 45 days.

The Group also provides container storage services at the request of the customer based on the usage period in the storage yard which constitute a separate distinct performance obligation. Revenue from container storage services is recognised over a period of storage days and are usually payable within 30 to 45 days.

For revenue recognition, the Group determines the transaction price in accordance with the tariff rates published by the port authorities in certain jurisdictions or agreed rates with the customers.

(o) Finance income and expense

Finance income comprises interest income on funds invested and gains on hedging instruments that are recognised in the consolidated income statement. Interest income is recognised as it accrues, using the effective interest method.

Finance costs comprises interest expense on borrowings, unwinding of the discount on provisions, impairment losses recognised on financial assets and losses on hedging instruments that are recognised in the consolidated income statement.

Finance income and expense also include realised and unrealised exchange gains and losses on monetary assets and liabilities (refer to note 1(b)(ii)).

(p) Income tax

Income tax expense comprises current and deferred tax. Income tax expense is recognised in the consolidated income statement except to the extent that it relates to a business combination, or items recognised directly in consolidated statement of other comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date in the countries where the Group operates and generates taxable income. It also includes any adjustment to tax payable in respect of previous years.

Current tax assets and liabilities are offset only if certain criteria are met.

Deferred tax is recognised using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognised for:

- the temporary differences arising on the initial recognition of goodwill and the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss; and
- the temporary differences relating to investments in subsidiaries and jointly controlled entities to the extent that they probably will not reverse in the foreseeable future.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

A deferred tax asset is recognised for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax assets and liabilities are offset only if certain criteria are met.

Notes to the consolidated financial statements (continued)

4 Significant accounting policies (continued)

(q) Government grants

Government grants that compensate the Group for expenses incurred are recognised in profit or loss as an offset against the respective expenses on a systematic basis in the periods in which the expenses are recognised, unless the conditions for receiving the grant are met after the related expenses have been recognised. In this case, the grant is recognised when it becomes receivable..

(r) Separately disclosed items

The Group presents, as separately disclosed items on the face of the consolidated income statement, those items of income and expense which, because of the nature of the events giving rise to them, merit separate presentation to allow users to understand better, the elements of financial performance in the period, so as to facilitate a comparison with prior periods and a better assessment of trends in financial performance.

(s) Investment properties

Investment property is measured initially at cost, including related transaction costs and where applicable borrowing costs. After initial recognition, investment property is carried at cost less accumulated depreciation and impairment, if any. Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably.

5 Determination of fair values

A number of the Group's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/ or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

(i) Property, plant and equipment

The fair value of property, plant and equipment recognised as a result of a business combination is based on market values. The market value of property is the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. The market value of items of plant, equipment, fixtures and fittings is based on the quoted market prices for similar items.

(ii) Port concession rights

Port concession rights acquired in a business combination are accounted at their fair values. The fair value is based on the discounted cash flows expected to be derived from the use and eventual sale of the assets.

(iii) Investments in debt securities

The fair values of equity and debt securities are determined by reference to their quoted closing bid price at the reporting date. The fair value of debt securities held to maturity is determined based on the discounted cash flows at a market related discount rate. The fair value of debt securities held to maturity is determined for disclosure purposes only.

(iv) Trade and other receivables/ payables

The fair value of trade and other receivables and trade and other payables approximates to the carrying values due to the short term maturity of these instruments.

(v) Derivatives

The fair value of forward exchange contracts and interest rate swaps is based on the bank quotes at the reporting dates. Similar contracts are traded in an active market and the quotes reflect the actual transactions in similar instruments.

(vi) Non-derivative financial liabilities

Fair value for quoted bonds is based on their market price (including unpaid interest) as at the reporting date. Other loans include term loans and lease liabilities. These are largely at variable interest rates and therefore, the carrying value normally equates to the fair value.

The fair value of bank balances and cash and bank overdrafts approximates to the carrying value due to the short term maturity of these instruments.

Notes to the consolidated financial statements (continued)

6 Financial risk management

Overview

The Group has exposure to the following risks from its use of financial instruments:

- (a) credit risk
- (b) liquidity risk
- (c) market risk

This note presents information about the Group's exposure to each of the above risks, the Group's objectives, policies and processes for measuring and managing risk. Further quantitative disclosures are included throughout these consolidated financial statements. Also refer to note 29 for further details.

Risk management framework

The Board of Directors, in conjunction with the Board of Directors of DP World Limited, have overall responsibility for the establishment and oversight of the Group's risk management framework.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

(a) Credit risk

Credit risk is the risk of financial loss to the Group if a customer fails to meet its contractual obligations, and arises principally from the Group's receivables from customers, amounts due from related parties and investment securities.

Trade and other receivables

The Group trades mainly with recognised and creditworthy third parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures and are required to submit financial guarantees based on their creditworthiness. In addition, receivable balances are monitored on an ongoing basis with the result that the Group's exposure to bad debts is not significant. The Group has not observed any significant changes to debtor days due to COVID-19, as compared to the previous year.

The Group applies IFRS 9 simplified approach to measure expected credit losses (ECLs) which uses a lifetime expected loss allowance for all trade receivables and contract assets. The Group uses an allowance matrix to measure the ECLs of trade receivables which comprise a very large number of small balances. These historical loss rates are calculated using a 'roll rate' method based on the probability of a receivable progressing through successive stages of delinquency to write-off. Thus, expected credit loss rates are based on the payment profile of sales over a period of 60 months before 31 December 2020 and the corresponding historical credit losses experienced within this period. These historical rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of customers to settle the receivables. The Group identified gross domestic product (GDP), global supply/ demand index of container market, global freight rate index of container market, oil prices in international markets and consumer price index (CPI) to be the most relevant factors for performing macro level adjustments in expected credit loss financial model.

Other financial assets

Credit risk arising from other financial assets of the Group comprises cash and cash equivalents and certain derivative instruments. The Group's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments.

The Group manages its credit risks with regard to bank deposits, throughout the Group, through a number of controls, which include assessing the credit rating of the bank either from public credit ratings, or internal analysis where public data is not available and consideration of the support for financial institutions from their central banks or other regulatory authorities.

Financial guarantees

The Group's policy is to consider the provision of a financial guarantee to wholly-owned subsidiaries, where there is a commercial rationale to do so. Guarantees may also be provided to equity accounted investees in very limited circumstances and always only for the Group's share of the obligation. The provision of guarantees always requires the approval of senior management.

Notes to the consolidated financial statements (continued)

6 Financial risk management (continued)

Risk management framework (continued)

(b) Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient cash to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank facilities and by ensuring adequate internally generated funds. The Group's terms of business require amounts to be paid within 60 days of the date of provision of the service. Trade payables are normally settled within 45 days of the date of purchase. COVID-19 has not impacted the Group's ability to maintain the normal payment cycle.

(c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

The Group enters into derivative contracts in order to manage market risks. All such transactions are carried out within the guidelines set by the Board of Directors in the Group Treasury policy. Generally, the Group seeks to apply hedge accounting in order to manage the volatility in the consolidated income statement.

During the year, COVID-19 had no significant impact on Group's exposure to foreign exchange and interest rate risks.

The Group determines the existence of an economic relationship between the hedging instrument and hedged item based on the currency, amount and timing of their respective cash flows. The Group assesses whether the derivative designated in each hedging relationship is expected to be and has been effective in offsetting changes in cash flows of the hedged item using the hypothetical derivative method.

In these hedge relationships, the main sources of ineffectiveness are:

- the effect of the counterparties' and the Group's own credit risk on the fair value of the forward foreign exchange contracts, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in exchange rates; and
- changes in the timing of the hedged transactions.

(i) Currency risk

The proportion of the Group's net operating assets denominated in foreign currencies is approximately 85.2% (2019: 84.8%) with the result that the Group's consolidated statement of financial position, and in particular owner's equity, can be affected by currency movements when it is retranslated at each year end rate. The Group partially mitigates the effect of such movements by borrowing in the same currencies as those in which the assets are denominated and using cross currency swaps. The impact of currency movements on operating profit is partially mitigated by interest costs being incurred in foreign currencies.

Interest on borrowings is denominated in the currency of the borrowings. Generally, borrowings are denominated in currencies that match the cash flows generated by the underlying foreign operations of the Group. This provides an economic hedge without derivatives being entered into and therefore hedge accounting is not applied in these circumstances.

A portion of the Group's activities generate part of their revenue and incur some costs outside their main functional currency. Due to the diverse number of locations in which the Group operates there is some natural hedging that occurs within the Group. When it is considered that currency volatility could have a material impact on the results of an operation, hedging using forward foreign currency contracts is undertaken to reduce the short-term effect of currency movements.

When the Group's businesses enter into capital expenditure or lease commitments in currencies other than their main functional currency, these commitments are hedged in most instances using forward contracts and currency swaps in order to fix the cost when converted to the functional currency. The Group classifies its forward exchange contracts hedging forecast transactions as cash flow hedges and states them at fair value.

(ii) Interest rate risk

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's long-term debt obligations with a fixed/floating interest rate and bank deposits.

Notes to the consolidated financial statements (continued)

6 Financial risk management (continued)

(c) Market risk (continued)

(ii) Interest rate risk (continued)

The Group's policy is to manage its interest cost by entering into interest rate swap agreements, in which the Group agrees to exchange, at specified intervals, the difference between fixed and variable rate interest amounts calculated by reference to an agreed-upon notional principal amount. These swaps are designated to hedge underlying debt obligations.

At 31 December 2020, after taking into account the effect of interest rate swaps, approximately 63.5% (2019: 59.2%) of the Group's borrowings are at a fixed rate of interest.

Capital management

The Board's policy is to maintain a strong equity base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Board seeks to maintain a balance between the higher returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position.

Equity consists of issued capital, share premium, other reserves, retained earnings, and non-controlling interests. The primary objective of the Group's capital management strategy is to ensure that it maintains a strong credit rating and healthy capital ratios such as adjusted net debt/ adjusted equity and adjusted net debt/ adjusted EBITDA in order to support its business and maximise shareholder value. The Group also monitors its interest coverage ratio as well for this purpose.

For calculating these ratios:

- Adjusted net debt is defined as total loans and borrowings including lease liabilities less cash and cash equivalents.
- Adjusted EBITDA is defined in note 7 Segment information.

The Board monitors these ratios without considering the impact of IFRS 16 Leases which require further adjustments to adjusted EBITDA and equity. These modified ratios are also provided as an additional information.

Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements. The key performance ratios as at 31 December are as follows:

£ million				
	Note	2020*	2020	2019*
		Pre-IFRS 16	Post-IFRS 16	Pre-IFRS 16
				Post-IFRS 16
Total interest bearing loans and borrowings		1,183.4	1,183.4	1,214.4
Add: lease liabilities		-	447.6	-
Less: cash and cash equivalents	19	(368.7)	(368.7)	(317.1)
Total adjusted net debt	A	814.7	1,262.3	897.3
Total Equity		2,473.4	2,473.4	2,328.7
Add: IFRS 16 adjustments		-	-	63.0
Adjusted equity	B	2,473.4	2,473.4	2,391.7
EBITDA as per segmentation		495.4	495.4	512.0
Less: lease expense		(34.4)	-	(40.6)
Adjusted EBITDA	C	461.0	495.4	471.4
Net finance costs before separately disclosed items	D	92.4	92.4	86.1
Adjusted net debt/ Equity	A/D	0.3	0.5	0.4
Adjusted net debt/ adjusted EBITDA	B/C	5.4	5.0	5.1
Interest cover before separately disclosed items	C/D	5.0	5.4	5.5

* Ratios recomputed without considering the impacts of leases and concession liabilities

Notes to the consolidated financial statements (continued)

7. Operating segments

The internal management reports which are prepared under EU-IFRS are reviewed by the Board of Directors ('Chief Operating Decision Maker') based on the location of the Group's assets and liabilities. The Group has identified the following geographic areas as its basis of segmentation.

- Asia Pacific and India
- Australia and Americas
- Europe, Africa and Middle East

Each of the above operating segments have an individual appointed as Segment Director responsible for these segments, who in turn reports to the Chief Operating Decision Maker.

In addition to the above reportable segments, the Group also reports unallocated head office costs, finance costs, finance income, tax expense and tax liabilities under the head office segment in line with Group internal management report. In presenting the geographic information, segment revenue, segment results from operation, segment assets and segment liabilities has been allocated based on the geographic location of the entity.

The Group measures segment performance based on the earnings before separately disclosed items, interest, tax, depreciation and amortisation ("Adjusted EBITDA"). Although this is a non-IFRS measure, this will provide additional information to the users of the consolidated financial statements.

The Chief Operating Decision Maker also monitors certain key performance ratios from the perspective of capital management which are disclosed in note 6.

Information regarding the results of each reportable segment is included below.

						£ million
						2020
	Note	Asia Pacific and India	Australia and Americas	Europe Africa and Middle East	Head Office	Total group
By region						
Revenue from ports and terminals		193.7	202.8	474.1	-	870.6

The Group presents, as separately disclosed items on the face of the consolidated income statement, those items of income and expense which, because of the nature of the events giving rise to them, merit separate presentation to allow users to understand better, the elements of financial performance in the period, so as to facilitate a comparison with prior periods and a better assessment of trends in financial performance.

Restructuring costs mainly relates to severance pay associated with redundancies resulting from the impact of COVID-19 in the "Americas and Australia" region. (2019: Nil).

Impairment expenses relates to impairment of property, plant and equipment in the 'Europe and Africa' region. (2019 related to impairment of property, plant and equipment in the 'Europe and Africa' region).

Guaranteed minimum pension costs relates to additional costs arising in respect of "guaranteed minimum pension" (GMP) based on a landmark High Court judgment confirming that UK pension schemes are required to equalise male and female members' benefits for the effect of unequal GMPs.

Share of loss from equity-accounted investees relates to ineffective hedge in the 'Europe and Africa' region. (2019 related to impairment of property, plant and equipment in the 'Europe and Africa' region).

Sale of business relates to the loss on sale of a subsidiary and an equity accounted investee in the 'Europe and Africa' region. (2019 related to the loss on termination of a concession in the 'Asia Pacific and India' region).

Hedge costs relates to the ineffective elements of hedges in subsidiaries in the 'Europe and Africa' region and 'Asia Pacific and India' region.

Income tax relates to the tax impact on the restructuring in the "Americas and Australia" region. (2019: Nil).

Total	(0.3)	4.8

The adjustments in respect of prior periods is £ 10.2 million (2019: £3.9 million) arises from the finalisation and agreement of prior year tax computations for companies in the UK and overseas.

Notes to the consolidated financial statements (continued)

11. Taxation (continued)

Factors affecting the taxation charge for the current year

The total taxation charge is higher (2019: higher) than the profit on ordinary activities multiplied by the standard rate of corporation tax in the UK of 19.00 per cent (2019: 19.00 per cent). The differences are explained as follows:

Reconciliation of the effective tax rate	%	£ million	%	£ million
	2020		2019	
Profit before taxation		233.5		265.0
Profit before taxation multiplied by the standard rate of corporation tax in the UK of:	19.00%	44.4	19.00%	50.3
Effects of:				
Non-taxable income less expenses not deductible for tax purposes	3.6%	8.3	(4.3%)	(11.4)
Tax deduction in respect of the pension schemes	(1.5%)	(3.5)	(1.1%)	(2.8)
Net of (unrelieved tax losses carried forward) utilization of tax losses	(0.4%)	(0.9)	(0.0%)	(0.1)
Accounting profits on chargeable assets	(0.7%)	(1.6)	0.0%	0.0
Changes in corporate tax rates	0.3%	0.7	0.9%	2.3
Higher rate taxes on overseas earnings	14.1%	33.0	15.6%	41.3
Withholding and other taxes suffered overseas	1.8%	4.1	5.7%	15.2
Tax on earnings from equity accounted investees at 19%	(10.9%)	(25.4)	(10.6%)	(28.2)
Adjustments to tax charge in respect of prior periods	(4.4%)	(10.2)	(1.5%)	(3.9)
Effective tax rate	20.9%	48.9	23.65%	62.7

The profit before taxation of £233.5 million (2019: £265.0 million) includes the Group's share of profits of joint ventures and associates within continuing operations of £92.6 million (2019: £106.5 million) which is net of a tax charge of £41.0 million (2019: £42.1 million).

The Group's overseas tax rates are typically a mixture of rates higher and lower than 19.00 percent. They include the effect of overseas tax benefits available to infrastructure projects.

A reduction in the UK corporation tax rate from 19% to 17% (effective 1 April 2020) was substantively enacted on 6 September 2016. The March 2020 Budget announced that a rate of 19% would continue to apply with effect from 1 April 2020, and this change was substantively enacted on 17 March 2020. The UK deferred tax asset/(liability) as at 31 December 2020 was calculated at 19% (2019: 17%).

An increase in the UK corporation rate from 19% to 25% (effective 1 April 2023) was substantively enacted on 24 May 2021. This increase does not affect the amounts of current or deferred income taxes recognised at 31 December 2020. However, this change will increase Group's future current tax charge accordingly. If the new tax rate was applied to calculate taxable/deductible temporary differences and tax losses recognised as at 31 December 2020, then the net deferred tax liability would increase by £1.02m.

Port concession rights mainly represents concession agreements which are identified and accounted as a part of business combinations. These concessions were determined to have finite and indefinite useful lives based on the terms of the respective concession agreements and the income approach model was used for the purpose of determining their fair values. Service concession assets represent assets arising on account of application of IFRIC 12 on service concession arrangements. Four of the Group's deep seaport terminals in emerging markets are operated under certain restrictive price and service conditions. The grantor controls any significant residual interest in the infrastructure. The amounts paid by the Group as an operator to the grantor (government or port authorities) as a consideration for obtaining the rights relating to concession arrangements are accounted as part of port concession rights. In addition, Port concession rights also include certain property, plant and equipment which are reclassified as intangible assets in accordance with IFRIC 12 'Service Concession Arrangements'.

Notes to the consolidated financial statements (continued)

12. Intangible assets (continued)

Impairment testing of goodwill

Goodwill acquired through business combinations and port concession rights with indefinite useful lives have been allocated to various cash-generating units ("CGU"), which are reportable business units, for the purposes of impairment testing.

Impairment testing is done at operating port (or group of ports) level that represents an individual CGU. Details of the CGUs by operating segment are shown below:

Cash generating units aggregated by operating segment	Carrying amount of goodwill £' million	Pre-tax discount rate %	Terminal growth rate %	Discount rate change required for carrying amount to equal recoverable amount %	Average budgeted margin growth change required for carrying amount to equal recoverable amount %	Terminal growth rate change required for carrying amount to equal recoverable amount %
2020						
Europe, Africa and Middle East	14.9	6.0 - 13.5	2.5	0.4 - 13.0	Refer note (a)	Refer note (a)
Australia and Americas	15.2	6.0 - 7.0	2.5	3.2	Refer note (a)	Refer note (a)
Asia Pacific and India	9.6	9.0 - 9.5	2.5	9.9	Refer note (a)	Refer note (a)
Total	39.7					
2019						
Europe, Africa and Middle East	14.2	7.3 - 15.3	2.5	0.4 - 13.0	Refer note (a)	Refer note (a)
Australia and Americas	15.7	7.5 - 16.2	2.5	4.4	Refer note (a)	Refer note (a)
Asia Pacific and India	10.1	7.7 - 10.8	2.5	6.0	(2.6)	Refer note (a)
Total	40.0					

- (a) As per the sensitivity analyses, even if these assumptions are reduced to 0%, it will still result in recoverable amounts being higher than the carrying amounts.

The recoverable amount of the CGU has been determined based on their value in use calculated using cash flow projections based on the financial budgets approved by the Board covering a three year period and a further outlook for five years, which is considered appropriate in view of the outlook for the industry and the long-term nature of the concession agreements held i.e. generally for a period of 25-50 years.

Key assumptions used in value in use calculations (adjusted for COVID-19 impact)

The following describes each key assumption on which the Board has based its cash flow projections to undertake impairment testing of goodwill.

Budgeted margins – The basis used to determine the value assigned to the budgeted margin is the average gross margin achieved in the year immediately before the budgeted year, adjusted for expected efficiency improvements, price fluctuations and manpower costs.

Discount rates – These represent the cost of capital adjusted for the respective location risk factors. The Group uses the post-tax industry average weighted average cost of capital based on the rate of 10 years default free US treasury bonds adjusted for country-specific risks.

Cost inflation – The forecast general price index is used to determine the cost inflation during the budget year for the relevant countries where the Group is operating which has been sourced from International Monetary Fund (IMF).

Terminal growth rate – In the Board's view, the terminal growth rate is the minimum growth rate expected to be achieved beyond the eight-year period. This is based on the overall regional economic growth forecasted and the Group's existing internal capacity changes for a given region. The Group also takes into account competition and regional capacity growth to provide a comprehensive growth assumption for the entire portfolio. Based on the historical trend of growth in global trade, the long-term growth in the range of 1% to 2.5% is considered reasonable for the diversified businesses of the Group. The values assigned to key assumptions are consistent with the past experience of the Board.

Sensitivity to changes in assumptions

The calculation of value in use for the CGU is sensitive to future earnings and therefore a sensitivity analysis was performed. A sensitivity analysis demonstrated that a 10% decrease in earnings for a future period of three years from the reporting date would not result in impairment. An increase of 0.10% in discount rate and decrease of 0.25% in terminal value growth rate would not result in impairment.

The Group leases out its investment property. The Group has classified these leases as operating leases, because they do not transfer substantially all of the risks and rewards incidental to the ownership of the assets. Investment property comprises a commercial property leased out to third parties.

Revenue on lease rentals from investment properties recognised in the profit or loss amount to £ 0.4 million (2019: £ 0.3 million) while associated costs related to these investment properties amount to £ 0.04 million (2019: £ 0.01 million). The rental income is dependent upon variable rates and the contracts are renewed annually.

Although the risks associated with rights that the Group retains in underlying assets are not considered to be significant, the Group employs strategies to further minimise these risks. For example, ensuring all contracts include clauses requiring the lessee to compensate the Group when a property has been subjected to excess wear-and-tear during the lease term.

Notes to the consolidated financial statements (continued)

15. Investments in equity accounted investees

The following table summarises the financial information for equity-accounted investees, adjusted for fair value adjustments at acquisition and reconciled to the carrying amount of Group's interest in equity-accounted investees as included in consolidated statement of financial position:

	£ million
Cost at 1 January 2020	491.9
Share of profits for the year	92.6
Share of actuarial losses, net of tax	(0.1)
Share of movement in effective portion of cash-flow hedges, net of tax	0.7
Share of movement in other reserves	(0.8)
Dividends	(27.2)
Exchange adjustments	10.6
Cost at 31 December 2020	567.7

Deferred tax assets have not been recognised by some of the subsidiaries on their trading losses where utilisation is unclear, either because they have not been agreed with tax authorities, or because of uncertainties of future profits to offset against these losses, or because of the impact of tax holidays. The Group will continuously review/monitor these unrecognised tax losses and will consider recognising them as deferred tax asset in future if there are any significant changes to these assumptions. Details are as follows:

	2020			2019		
	Gross amount	Tax effect	Expiry date	Gross amount	Tax effect	Expiry date
	£ million	£ million		£ million	£ million

Notes to the consolidated financial statements (continued)

24. Issued capital and reserves**Share capital and share premium account**

The balances classified as share capital and share premium account include the total net proceeds on issue of the Company's equity share capital. The authorised share capital is £953.2 million (2019: £953.2 million) being the allotted capital together with £110.0 million (2019: £110.0 million) of unclassified shares. The nominal value of each class of share unit is £1. The number of shares held is 843.2 million. Share premium amounted to £815.4 million (2019: £815.4 million). The allotted, called up and fully paid share capital was £843.2 million as at 31 December 2020 (2019: £843.2 million).

Translation reserve

The translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations that are integral to the operations of the Company.

Hedging reserve

The hedging reserve comprises the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedged transactions that have not yet occurred.

Other reserves

Other reserves of £170.5 million (2019: £170.5 million) is made up of the Group's merger reserve of £454.2 million (2019: £454.2 million) and capital reserve £161.4 million (2019: £161.4 million), less goodwill deducted from reserves of £451.9 million (2019: £451.9 million), all arising under UK GAAP prior to transition to IFRS, plus a capital redemption reserve of £3.3 million (2019: £3.3 million) and amounts relating to share based payments of £3.5 million (2019: £3.5 million).

25. Employees

26. Employee benefits

The Group participates in a number of pension schemes throughout the world, mostly concentrated in the United Kingdom.

The board of a pension scheme in the UK is required by law to act in the best interests of the fund participants and is responsible for setting certain policies (e.g. investment, contributions and indexation policies) and determining recovery plans, if appropriate.

These defined benefit schemes expose the Group to actuarial risks, such as longevity risk, currency risk, interest rate risk and market (investment) risk. In addition, by participating in certain multi-employer industry schemes, the Group can be exposed to a pro-rata share of the credit risk of other participating employers.

Notes to the consolidated financial statements *(continued)*

26. Employee benefits *(continued)*

a) P&O UK Scheme

This principal scheme is located in the UK (the "P&O UK Scheme"). The P&O UK Scheme is a funded defined benefit scheme and was closed to routine new members on 1 January 2002 and to future accrual on 31 December 2015. The pension fund is legally separated from the Group and managed by a Trustee board. The assets of the scheme are managed *on behalf of the Trustee by independent fund managers*.

Formal actuarial valuations of the P&O UK scheme are normally carried out triennially by qualified independent actuaries, the most recent valuation was at 31 March 2019 on a market related basis. The deficit on a statutory funding objectives basis was GBP 98 million. The Group agreed with the Trustee to a new monthly deficit payment plan effective from 1 April 2020 as follows:

Payment Dates	Monthly payments
From 1 April 2019 to 31 March 2020	GBP 0.8 million
From 1 April 2020 to 31 May 2020	GBP 1.3 million
In May 2020	GBP 6.5 million (one off lump sum)
From 1 June 2020 to 31 March 2021	GBP 2.5 million
From 1 April 2021 to 31 March 2025	GBP 1.3 million

In December 2007, as part of a process developed with the Group to de-risk the pension scheme, the Trustee transferred GBP 800 million of P&O UK Scheme assets to Paternoster (UK) Ltd, in exchange for a bulk annuity insurance policy to ensure that the assets (in the Company's statement of financial position and in the Scheme) will always be equal to the current value of the liability of the pensions in payment at 30 June 2007, thus removing the funding risks for these liabilities.

b) Merchant Navy Officers' Pension Fund ("MNOFF")

The Group participates in various industry multi-employer schemes in the UK. These generally have assets held in separate trustee administered funds which are legally separated from the Group.

The MNOFF Scheme is an industry wide multi-employer defined benefit scheme in which officers employed by companies within the Group have participated. The scheme has been closed to further benefit accrual from 31 March 2016.

The most recent formal actuarial valuation of the New Section of MNOFF Scheme was carried out as at 31 March 2019. This resulted in a deficit of USD 8.6 million. The Trustee Board believe their investment strategy will address this deficit and therefore has not issued deficit contribution notices to employers in respect of the 2019 actuarial valuation.

Following earlier actuarial valuations in 2009, 2012 and 2015 the Trustee and Employers agreed contributions to be paid to the Section by participating employers over the period to 30 September 2023. These contributions included an allowance for the impact of irrecoverable contributions in respect of companies no longer in existence or not able to pay their share.

The Group's share of the net deficit of the MNOFF Scheme at 31 December 2020 is estimated at 5.21%.

c) Merchant Navy Ratings' Pension Fund ("MNRPF")

The MNRPF Scheme is an industry wide multi-employer defined benefit pension scheme in which sea staff employed by companies within the Group have participated. The scheme has a significant funding deficit and has been closed to further benefit accrual from 2001.

Certain Group companies, which are no longer current employers in the MNRPF Scheme had settled their statutory debt obligation and were not considered to have any legal obligation with respect to the on-going deficit in the fund. However, following a legal challenge, by Stena Line Limited, the High Court decided that the Trustee could require all employers that had ever participated in the scheme to make contributions to fund the deficit. Although the Group appealed, the decision was not overturned.

Notes to the consolidated financial statements (continued)

26. Employee benefits (continued)

d) Merchant Navy Ratings' Pension Fund ("MNRPF") (continued)

The most recent formal actuarial valuation was carried out as at 31 March 2017. The deficit contributions arising from the valuation totalled GBP 7.7 million. The contributions due to the Scheme in respect of this valuation will be paid over the period to 31 October 2023.

For the Group, aggregated outstanding contributions from these valuations are payable as follows:

- 2021: GBP 4.5 million
- 2022 to 2025: GBP 9.9 million

The Trustee set the payment terms for each participating employer in accordance with the Trustee's Contribution Collection Policy which includes credit vetting.

The outcome of the MNRPF Scheme's 2020 triennial actuarial valuation is still to be finalised.

During the year, MNRPF Scheme has sought direction for the UK Court regarding the correct benefit provision to its scheme members in respect of Ill Health Early Retirement. The Case was due to be heard in November 2020 but was adjourned until July 2021 whilst representatives from the Trustee Board, the Employers and the Members/employees considered a Settlement proposal. The outcome of either the Court direction or the Settlement proposal is unknown to the Group at the current time, but the Group's share of potential additional liability is estimated to be in the range of USD Nil to GBP 22.14 million.

The Group's share of the net deficit of the MNRPF at 31 December 2020 is estimated at 7.38%.

e) Others

The Group also operates a number of smaller defined benefit and defined contribution schemes.

Notes to the consolidated financial statements (continued)

26. Employee benefits (continued)

Reconciliation of assets and liabilities recognised in the consolidated statement of financial position

The amounts recognised in the balance sheet are as follows

	£ million	
	2020	2019
Non-current		
Defined benefit schemes net liabilities	101.8	110.4
Liability in respect of long service leave	0.4	0.2
Liability for other non-current deferred compensation	1.5	0.6
	103.7	111.2
Current		
Liability for current deferred compensation	6.6	5.6
Net liability	110.3	116.8
Reflected in the consolidated statement of financial position as follows:		
Employee benefit liabilities: non current	103.7	111.2
Employee benefit liabilities: current	6.6	5.6
	110.3	116.8

Long term employee benefit expense recognised in consolidated statement of profit and loss consist of following:

	£ million	
	2020	2019
Defined benefit schemes*	7.9	7.7
Defined contribution schemes	12.3	10.7
Other employee benefits	13.2	9.5
	33.4	27.9

* In 2020, this includes £3.0 million additional costs arising in respect of "guaranteed minimum pension" (GMP) based on a landmark High Court judgment in the UK.

Notes to the consolidated financial statements (continued)

26. Employee benefits (continued)

The re-measurements of the net defined benefit liability recognised in the statement of other comprehensive income is as follows:

	£ million	
	2020	2019
Actuarial loss/(gain) recognised in the year	173.9	178.1
Return on plan assets (greater) / lesser than the discount rate	(164.5)	(149.0)
Change in share in multi-employer scheme	-	0.3
Movement in minimum funding liability	9.7	(29.5)
	19.1	(0.1)

Actuarial valuations and assumptions

The latest valuations of the defined benefit schemes have been updated to 31 December 2020 by qualified independent actuaries. The principal assumptions are included in the table below. The assumptions used by the actuaries are the best estimates chosen from a range of possible actuarial assumptions, which, due to the timescale covered, may not necessarily be borne out in practice.

	P&O UK Scheme		MNOFF Scheme		Other Scheme	
	2020	2019	2020	2019	2020	2019
Discount rates	1.25%	1.95%	1.25%	1.95%	1.71%	1.80%
Discount rates - Bulk Annuity Asset	1.15%	1.85%	n/a	n/a	n/a	n/a
Expected rates of salary increases *	n/a*	n/a*	n/a*	n/a*	1.47%	1.34%
Pension increases:						
- Deferment	2.80%	3.00%	2.00%	2.25%	2.07%	2.20%
- Payment	2.80%	3.00%	2.75%	3.15%	2.27%	2.51%
Inflation	2.80%	3.25%	2.80%	3.25%	2.29%	2.75%

* The P&O UK Scheme and MNOFF were closed to future accrual as at 31 December 2016, so future pay increases is not relevant.

In the current year, the methodology for determining the Retail Price Index (RPI) assumption used for the valuation of the Defined Benefit Pension Scheme Obligation changed, resulting in an RPI of 2.80% (compared to an RPI of 3.25% under the old methodology). However, the resulting decrease in the DBO has no impact on the net defined benefit pension liability on the balance sheet as at 31 December 2020. This is because the impact is offset by an equal and opposite change to the minimum funding liability.

The assumptions for pensioner longevity under both the P&O UK scheme and the MNOFF scheme are based on an analysis of pensioner death trends under the respective schemes over many years.

For illustration, the life expectancies for the two schemes at age 65 now and in the future are detailed in the table below.

	Male		Female	
	Age 65 now	Age 65 in 20 years' time	Age 65 now	Age 65 in 20 years' time
2020				
P&O UK scheme	22.8	24.5	25.0	26.7
MNOFF scheme	21.9	24.0	24.0	26.2
2019				
P&O UK scheme	22.8	24.5	24.9	26.7
MNOFF scheme	21.8	23.9	23.9	26

At 31 December 2020, the weighted average duration of the defined benefit obligation was 14.3 years (2019: 14.9 years).

Reasonably possible changes to one of the actuarial assumptions, holding other assumptions constant (in practice, this is unlikely to occur, and changes in some of the assumptions may be correlated), would have increased the net defined benefit liability as at 31 December 2020 by the amounts shown below:

	£ million	
	2020	2019
0.1% reduction in discount rate	4.4	3.9
0.1% increase in inflation assumption and related assumptions	2.8	5.4
0.25% p.a. increase in the long term rate of mortality improvement	2.4	6.9
	9.6	16.2

Notes to the consolidated financial statements (continued)

26. Employee benefits (continued)

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

The schemes' strategic asset allocations across the sectors of the main asset classes are:

	P&O UK Scheme £'million	MNOPF Scheme £'million	Other Scheme £'million	Total Fair value £'million
2020				
Equities	185.9	45.7	57.1	288.7
Bonds	427.7	129.7	214.9	772.3
Other	105.2	-	32.8	138.0
Value of insured pensioner liability	718.7	-	2.0	720.7
	1,437.5	175.4	306.8	1,919.7
2019				
Equities	178.6	51.1	48.7	278.4
Bonds	218.8	120.0	178.8	517.6
Other	212.8	-	35.5	248.3
Value of insured pensioner liability	721.8	-	2.0	723.8
	1,332.0	171.1	265.0	1,768.1

With the exception of the insured pensioner liability all material investments have quoted prices in active markets.

Reconciliation of the opening and closing present value of defined benefit obligations and fair value of scheme assets for the period ended 31 December 2020:

	P&O UK Scheme	MNOPF Scheme	Other Scheme	£ million Total
Present value of obligation at 1 January 2020	(1,370.0)	(158.1)	(290.4)	(1,818.5)

Administration costs incurred during period	(1.6)	(0.3)	(0.9)	(2.8)
Fair value of scheme assets at 31 December 2020	1,437.5	175.4	306.8	1,919.7
Defined benefit schemes net liabilities	(24.5)	12.8	(19.6)	(31.3)
Minimum funding liability	(43.2)	(12.8)	(14.5)	(70.5)
Net liability recognised in the consolidated statement of financial position as at 31 December 2020	(67.7)	(0.0)	(34.1)	(101.8)

* In 2020, this includes £3.0 million additional costs arising in respect of "guaranteed minimum pension" (GMP) based on a landmark High Court judgment in the UK.

Notes to the consolidated financial statements (continued)

26. Employee benefits (continued)

Reconciliation of the opening and closing present value of defined benefit obligations and fair value of scheme assets for the period ended 31 December 2019:

	£ million			
	P&O UK Scheme	MNOPF Scheme	Other Scheme	Total
Present value of obligation at 1 January 2019	(1,278.8)	(157.3)	(244.7)	(1,680.8)
Current service cost	-	-	(4.6)	(4.6)
Interest cost on Defined Benefit Obligation	(35.3)	(4.4)	(7.3)	(47.0)
Contributions by scheme participants	-	-	(0.9)	(0.9)
Effect of movement in exchange rates	-	-	(14.5)	(14.5)
Actuarial gain/(loss) - experience	18.5	(0.9)	1.3	18.9
Actuarial gain/(loss) - demographic assumptions	(15.7)	7.4	4.9	(3.4)
Actuarial gain/(loss) - financial assumptions	(143.3)	(16.2)	(34.1)	(193.6)
Gain/(Loss) due to change in share	-	4.3	-	4.3
Actual benefit paid	84.6	9.0	9.5	103.1
Present value of obligation at 31 December 2019	(1,370.0)	(158.1)	(290.4)	(1,818.5)
Fair value of scheme assets at 1 January 2019	1,266.4	168.9	211.2	1,646.5
Interest income on assets	35.0	4.7	6.5	46.2
Return on plan assets (greater)/less than the discount rate	108.9	11.4	28.7	149.0
Actual employer contributions	9.0	-	13.8	22.8
Contributions by scheme participants	-	-	0.9	0.9
Effect of movement in exchange rate	(0.8)	-	14.3	13.5
Actual benefit paid	(84.6)	(9.0)	(9.5)	(103.1)
Gain/(Loss) due to change in share	-	(4.6)	-	(4.6)
Administration costs incurred during period	(1.9)	(0.3)	(0.9)	(3.1)
Fair value of scheme assets at 31 December 2019	1,332.0	171.1	265.0	1,768.1
Defined benefit schemes net liabilities	(38.0)	13.0	(25.4)	(50.4)
Minimum funding liability	(32.2)	(13.0)	(14.8)	(60.0)
Net liability recognised in the consolidated statement of financial position as at 31 December 2019	(70.2)	(0.0)	(40.2)	(110.4)

A minimum funding liability arises where the statutory funding requirements are such that future contributions in respect of past service will result in a future unrecognisable surplus.

The below table shows the movement in minimum funding liability:

	£ million	
	2020	2019
Minimum funding liability as on 1 January	(60.0)	(87.1)
Interest cost on minimum funding liability	(0.8)	(2.4)
Actuarial movement during the year	(9.7)	29.5
Minimum funding liability as on 31 December	(70.5)	(60.0)

It is anticipated that the company will make the following contributions to the pension schemes in 2021:

	£ million		
	P&O UK Scheme	MNOPF Scheme	Other Scheme
Pension scheme contributions	19.1		10.3
			20.4

Notes to the consolidated financial statements (continued)

27. Commitments

Capital commitments

	£ million	
	2020	2019
Estimated capital expenditure contracted for as at 31 December	114.0	141.5

28. Contingent liabilities

- (a) The Group has contingent liabilities amounting to £21.5 million (2019: £22.3 million) of payment guarantees, £46.1 million (2019: £47.7 million) of performance guarantees and £0.7 million (2019: £1.6 million) of letter of credit. The bank guarantees are arising in the ordinary course of business from which it is anticipated that no material liabilities will arise.
- (b) The Group has contingent liabilities in respect of guarantees issued on behalf of equity accounted investees amounting to £14.9 million (2019: £15.1 million).

29. Related parties

For the purpose of these consolidated financial statements, parties are considered to be related to the Group, if the Group has the ability, directly or indirectly, to control the party or exercise significant influence over it in making financial and operating decisions, or vice versa, or where the Group and the party are subject to common control or significant influence i.e. part of the same Parent Group.

Related parties represent associated companies, shareholders, directors and key management personnel of the Group, the Parent Company, Ultimate Parent Company and entities jointly controlled or significantly influenced by such parties. Pricing policies and terms of these transactions are approved by the Group's management. The terms and conditions of the related party transactions were made on an arm's length basis.

Parent entities

The largest group of companies for which consolidated financial statements are prepared and in which the company is consolidated is DP World Limited, a company limited by shares incorporated in Dubai, whose accounts are filed with the Dubai International Financial Centre. DP World Limited has 19.55% of its shares traded on the NASDAQ Dubai.

In the opinion of the directors, the ultimate controlling parent company as at 31 December 2019 was Port & Free Zone World FZE, which owns 80.45% of DP World Limited. Port & Free Zone World FZE is a wholly owned subsidiary of Dubai World Corporation, (ultimate parent company).

Transactions with parent group

Amounts due from the parent group are disclosed in note 16. Interest earned on these loans amounted to £7.0 million (2019: £9.3 million). Amounts due to the parent group are disclosed in note 20. Interest cost on these loans amounted to £0.0 million (2019: £1.2million).

Management fees of £15.7 million (2019: £16.4 million) were paid to DP World group companies during the year.

Management fees of £5.7 million (2019: £7.3 million) were received from DP World group companies during the year.

On 30th January 2019 the Group transferred its 3.15% interest in DP World Australia (Holding) Pty Ltd held as investments in unlisted companies to a parent Group entity (DP World Australia B.V) for a sale consideration of \$1.

There were no other material transactions with the parent group during the year (2019: £nil).

Transactions with key management personnel

Given the operational and organisational structure of the Group, the key management personnel as defined under IAS 24 'Related Party Disclosures' consists of the board of directors of the company together with the key management personnel of DP World Limited.

The Group's share of the remuneration of these key personnel was £1.9 million (2019: £1.3 million). The remuneration of the Directors of the Company is disclosed in note M to the Company financial statements.

The remuneration of the key management personnel of DP World Limited and any relevant transactions are set out in the financial statements of DP World Limited which are publicly available on their website at www.dpworld.com.

Notes to the consolidated financial statements *(continued)*

29. Related parties *(continued)*

Other related party transactions

During the year the Group provided services including office accommodation and IT support to Istithmar P&O Estates an affiliated company under ultimate parent company, amounting to £0.1 million (2019: £0.1 million).

There are no other related party transactions during the year, (2019: Nil)

30. Financial instruments

(a) Credit risk

(i) Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

	£ million	
	Carrying amount 2020	Carrying amount 2019
Trade receivables	98.7	93.7
Other receivables	139.7	138.6
Amounts owed by group companies	1,256.9	1,240.5
Cash and cash equivalents	368.7	317.1
Loan to equity accounted investees	1.5	44.5

The maximum exposure to credit risk for trade receivables at the reporting date by geographical region is as follows:

	£ million	
	2020	2019
Europe and Africa	69.4	62.1
Australia and Americas	14.6	17.8
Asia Pacific and India	14.7	13.8
	98.7	93.7

(ii) Credit quality of financial assets and impairment losses

Movement in the allowance for impairment in respect of trade and other receivables during the year was:

	£ million	
	2020	2019
At 1 January	3.1	0.5
Charge/ (reversed) during the year	6.1	2.6
At 31 December	9.2	3.1

The ageing of trade receivables at the reporting date was:

	£ million	
	2020	2019
Neither past due or impaired	54.5	52.6
Past due on the reporting date		
Past due less than 30 days	20.6	20.2
Past due 31-60 days	9.1	10.2
Past due over 60 days	6.5	4.7
	98.7	93.7

(b) Liquidity risk

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

Notes to the consolidated financial statements (continued)

AUD	1.864	1.836	1.765	1.881
INR	95.074	89.848	99.683	94.339
CAD	1.720	1.693	1.738	1.717

Foreign currency sensitivity analysis

A 10% strengthening of pound sterling against the following currencies at 31 December 2020 and 31 December 2019 would have increased/(decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. Further, as each entity in the Group determines its own functional currency, the effects of translating financial assets and liabilities of the respective entity would mainly impact equity.

Notes to the consolidated financial statements (continued)

30. Financial instruments (continued)

(c) Market risk (continued)

2020	£'million	
	Consolidated statement of OCI	Consolidated Income statement
USD	7.5	1.2
EUR	1.5	0.0
AUD	(1.4)	(0.0)
INR	13.6	0.6
CAD	1.7	(0.0)
2019	£'million	
	Equity	Income Statement
USD	7.2	1.5
EUR	2.0	(0.1)
AUD	(0.2)	(0.0)
INR	15.6	0.3
CAD	1.7	(0.0)

A 10% weakening of pound sterling against the above currencies at 31 December 2020 and 31 December 2019 would have had the equal but opposite effect on the above currencies to the amounts shown above, on the basis that all other variables remain constant.

(ii) Interest rate risk

At the reporting date the interest rate profile of the Group's interest-bearing financial instruments was:

	£ million	
	Carrying amount 2020	Carrying amount 2019
Fixed Rate instruments		
Financial liabilities (Loans and lease liabilities)	(149.4)	(93.7)
Interest rate swaps hedging floating rate debt	(886.2)	(891.0)
	(1,035.6)	(984.7)
Variable rate instruments		
Financial assets	1,399.2	1,280.1
Financial liabilities (Loans and lease liabilities)	(1,481.6)	(1,568.8)
Interest rate swaps hedging floating rate debt	886.2	891.0
	803.8	602.3

The group has hedged its exposure to variable rates by entering into fixed interest rate swaps for a notional amount equivalent to £886.2 million (2019: £891.0 million)

Interest rate sensitivity analysis

A change of 100 basis points ("bp") in interest rates at the reporting date would have increased/(decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular foreign currency exchange rates, remain constant and the hedging arrangements are effective.

	Income statement		Equity	
	100bp increase	100bp decrease	100bp increase	100bp decrease
31-Dec-20				
Variable rate instruments	8.0	(8.0)	-	-
Interest rate swaps	-	-	8.9	(8.9)
Cash flow sensitivity net	8.0	(8.0)	8.9	(8.9)
31-Dec-19				
Variable rate instruments	6.0	(6.0)	-	-
Interest rate swaps	-	-	8.9	(8.9)
Cash flow sensitivity net	6.0	(6.0)	8.9	(8.9)

Notes to the consolidated financial statements (continued)

(d) Fair value of financial assets and liabilities

The table below presents the carrying amounts and the fair values of the Group's financial assets and liabilities at 31 December:

£ million				
	2020		2019	
	Book value	Fair value	Book value	Fair value
Primary financial assets and liabilities held or issued to finance the Group's operations:				
Trade and other receivables	238.4	238.4	232.3	232.3
Trade and other payables	(234.6)	(234.6)	(248.4)	(248.4)
Unsecured bond issues	(5.8)	(5.8)	(6.0)	(6.0)
Secured bank loans	(781.0)	(781.0)	(792.8)	(792.8)
Unsecured bank loans	(382.4)	(382.4)	(402.2)	(402.2)
Lease liabilities	(447.6)	(447.6)	(448.0)	(448.0)
Mortgage debenture stock	(1.4)	(1.4)	(1.4)	(1.4)
Amounts owed by group undertakings	1,256.9	1,256.9	1,240.5	1,240.5
Amounts owed to group undertakings	(108.8)	(108.8)	(119.7)	(119.7)
Cash and cash equivalents	368.7	368.7	317.1	317.1
Derivative financial instruments held to manage the interest rate and currency profile:				
Interest rate swap - liabilities	(52.5)	(52.5)	(51.0)	(51.0)
Cash flow sensitivity net	(150.1)	(150.1)	(279.6)	(279.6)

The following valuation methods have been used at the end of above years:

The fair value of trade and other receivables and trade and other payables approximates to the book value due to the short-term maturity of these instruments.

The fair value of bonds and dollar notes included in loans above is based on the quoted market price of comparable debt. Other loans include term loans and lease liabilities. These are largely at variable interest rates and therefore the book value normally equates the fair value.

The fair value of interest rate swaps is based on the bank quotes at the reporting dates.

The fair value of mortgage debenture stocks is based on the quoted market value at the reporting dates. The fair value of other investments is based on the year-end quoted price for listed investments and the estimated recoverable amount for unlisted investments. The fair value of cash and bank overdrafts approximates to the book value due to the short-term maturity of the instruments. The fair value of derivative financial instruments is based on the cash flows discounted to the net present value using prevailing market rates and foreign currency rates at the reporting date.

Notes to the consolidated financial statements (continued)

30. Financial instruments (continued)

(d) Fair value of financial assets and liabilities (continued)

Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs)

	£ million		
	Level 1	Level 2	Level 3
	2020		
Financial liabilities at amortised cost			
Unsecured bond issues	(6.8)	—	—
Financial liabilities through profit and loss			
Derivative financial liabilities	—	(52.5)	—
	(6.8)	(52.5)	—
	2019		
Financial liabilities at amortised cost			
Unsecured bond issues	(6.9)	—	—
Financial liabilities through profit and loss			
Derivative financial liabilities	—	(51.0)	—
	(6.9)	(51.0)	—

* The Group enters into derivative financial instruments such as interest rate swaps with various counterparties, principally financial institutions with investment grade credit ratings. These derivative financial instruments are valued using discounted cash flow valuation techniques, which employ the use of market observable inputs such as credit quality of counterparties and observable interest rate curves at each reporting date.

* During the year, the Group has recognised losses on effective portion of changes in fair value of cash flow hedges amounting to £3.5 million (2019: £13.8 million gain) in the consolidated statement of comprehensive income. Furthermore, the Group has recognised loss on ineffective portion on cash flow hedges amounting to £6.0 million (2019: £2.3 million gain) (refer to note 8).

Notes to the consolidated financial statements (continued)

31. Significant group entities

The extent of the Group's ownership in its various subsidiaries, equity accounted investees and their principal activities are as follows:

Subsidiaries	Country of incorporation	Ownership interest	Business description
Chennai Container Terminal Private Ltd	India	100%	Container terminal operations
DP World Antwerp Terminals N.V.	Belgium	100%	Container terminal and other port operations
DP World Callao S.A.	Peru	100%	Container terminal operations
DP World Australia (POSN) Pty Ltd	Australia	100%	Holding Company
DP World Overseas Pty Limited	Australia	100%	Holding Company
DP World (POSN) R.V.	Netherlands	100%	Holding Company
DP World Red B.V.	Netherlands	100%	Holding Company

Antwerp Gateway NV	Belgium	60%*	Container terminal operations
Laem Chabang International Terminal Co Ltd	Thailand	34.5%	Container terminal operations
Eurofos S.A.R.L	France	50%	Container terminal operations
Genralc de Manutention Portuaire S.A	France	50%	Container terminal operations
Qingdao Qianwan Container Terminal Co. Ltd	China	29%	Container terminal operations
Asian Terminals Inc.	Philippines	41.72%	Container terminal operations
Portus Indico - Sociedade de Servicos Portuarios Ltd	UAE	48.5%	Holding company
Visakha Container Terminals Private Limited	India	26%	Container terminal operations

* Although the Group has more than 60% effective ownership interest in this entity, it is not treated as a subsidiary, but instead treated as an equity accounted investee. The underlying shareholder agreement does not provide control to the Group.

32. Subsequent events

No other matter or circumstance has arisen since 31 December 2020 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

Notes to the Company financial statement

A. Basis of Preparation

Statement of compliance

These financial statements were prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework ("FRS 101").

In preparing these financial statements, the Company applies the recognition, measurement and disclosure requirements of international accounting standards in conformity with the requirements of the Companies Act 2006 ("Adopted IFRSs") but makes amendments where necessary in order to comply with Companies Act 2006 and has set out below where advantage of the FRS 101 disclosure exemptions has been taken. The financial statements have been prepared on the historic cost basis.

The Company's ultimate parent undertaking, DP World Limited, includes the Company in its consolidated financial statements. The consolidated financial statements of DP World Limited are prepared in accordance with IFRS and are filed with the Dubai International Financial Centre. The financial statements are available to the public and may be obtained from 16 Palace Street, London SW1E 5JQ, United Kingdom.

Disclosure exemptions

In these financial statements, the Company has applied exemptions available under FRS 101 in respect of the following disclosures:

- A cash flow statement and related notes;
- Comparative period reconciliations for share capital, tangible fixed assets, and investments;
- Disclosures in respect of transactions with wholly owned subsidiaries;
- Disclosures in respect of capital management; and
- Disclosures required by IFRS 7 Financial Instruments Disclosures
- The effects of new but not yet effective IFRSs

Going concern

The Directors consider that the Company's basis of preparation as a going concern is integrally linked to the Group and its position. Therefore, the Directors have considered the Company not only on a standalone basis but also in the context of the Group.

The Company has within current receivables an amount of £2,310.8 million (2019: £2,258.5 million) due from its parent companies and fellow subsidiaries and believe these to be recoverable.

The Board of Directors remain satisfied with the Company's funding and liquidity position. At 31 December 2020, the Company had net debt of £4.5 million (2019: £3.8 million) and had no committed borrowing facilities (2019: nil).

As disclosed in Note 2(c.) to the consolidated financial statements, the appearance of COVID-19 has however introduced additional risk and uncertainty which may impact the future trading performance and liquidity of the Group. This could result in the mandatory closure of ports, a reduction in volumes and lower levels of new business being generated, as well as the likelihood of slower cash receipts. As the situation and uncertainty associated with the COVID-19 pandemic continues to evolve, there remains the potential for the creation of additional future financial risk.

In response to this and its potential impact on the company's ability to continue as a going concern, Management has prepared an additional downside scenario to model the potential impact for the Group up until 31 December 2023. Under this severe but plausible downside scenario, management projects a prolonged impact of the COVID19 on travel restrictions and international trade for the remainder of 2021 and the first 4 months in 2022. In this scenario the Group is expected to have a closing cash position of approximately 37% lower than in the base case scenario as at 31 December 2021 and 31 December 2022 after taking mitigation actions, principally related to rescheduling of uncommitted future capital expenditure. The Group would continue to operate within all relevant financial covenants.

Notes to the Company financial statement (continued)

A. Basis of Preparation (Continued)

On this basis, the board has a reasonable expectation that the Group has adequate resources to manage its business risks successfully and continue in operational existence for the foreseeable future. Thus, the board is of the view that the going concern assumption is appropriate and as such the consolidated financial statements have been prepared on this basis.

Functional currency

The functional currency of the Company is sterling. All financial information presented in Sterling is rounded to the nearest million.

B. Accounting policies

The accounting policies set out below have been applied consistently in the year presented in the financial statements and have been applied consistently by the Company.

Foreign currency transactions

Transaction in foreign currencies are initially recorded at the exchange rate ruling on the date of the transaction. Monetary items denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date and exchange differences, if any, are recognised in the income statement.

Non-monetary items in a foreign currency that are measured at historical cost are translated to the functional currency using the exchange rate at the date of initial transaction and is not retranslated at a later date. Non-monetary items that are measured at fair value in a foreign currency are translated into the functional currency using the exchange rates at the date when the fair value was determined.

Foreign currency differences arising on retranslation of monetary items are recognised in the statement of profit or loss, except for differences arising on the retranslation of available-for-sale equity instruments, of a financial liability designated as a hedge of the net investment in a foreign operation, or qualifying cash flow hedges, which are recognised directly in statement of other comprehensive income.

Tangible fixed assets

These assets are stated at cost less accumulated depreciation and any provision for impairment. Assets constructed by the Company are depreciated from the date that the assets are available for use.

Provision for any impairment in value of other fixed assets is made in the profit and loss account.

Depreciation is calculated to write off the cost of these assets to estimated residual value, on a straight line basis over the expected useful life of the asset concerned. The expected useful lives of property and other fixed assets (reported within plant and machinery, fixtures and fittings) vary up to 40 years

The estimated useful lives of assets are as follows:

Assets	Useful life (years)
Buildings	5 – 40
Plant and Machinery	3 – 25
Fixtures & Fittings	3 – 25

Interest incurred in respect of assets under construction is capitalised into the cost of the asset concerned.

Notes to the Company financial statement (continued)

B. Accounting policies (continued)

Investment properties

Investment property is measured initially at cost including any related transaction costs. After initial recognition, investment property is carried at cost less accumulated depreciation and impairment, if any. Depreciation is calculated to write off the cost of the asset to estimated residual value, on a straight line basis over the expected useful life of the asset. The estimated useful life is as follows:

Asset	Useful life (years)
Buildings	5 – 40

At 31 December 2020, the fair value of investment property was £4.6million.

Investment in subsidiaries

Investment in subsidiaries are initially measured at historic cost, including transaction costs, and stated at cost less accumulated impairment losses. The Company assesses investments for impairment whenever events or changes in circumstances indicate that the carrying value of an investment may not be recoverable. If any such indication of impairment exists, the Company makes an estimate of its recoverable amount. Where the carrying amount of an investment exceeds its recoverable amount, the investment is considered impaired and is written down to its recoverable amount.

Financial instruments

Financial assets

Classification, initial recognition and measurement

Under IFRS 9, Financial Instruments, on initial recognition, the Company classifies and measures its financial assets in the following categories

- Amortised cost;
- Fair value through other comprehensive income ('FVOCI'); or
- Fair value through profit or loss ('FVTPL').

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred and it does not retain control of the financial asset.

Impairment of non-derivative financial assets

The Company assesses, on a forward-looking basis the expected credit losses ('ECLs') applicable to its financial assets measured at amortised cost. The Company measures loss allowances at an amount equal to lifetime ECLs. When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

Notes to the Company financial statement (continued)

B. Accounting policies (continued)

Non-derivative financial liabilities

Classification, initial recognition and measurement

The Company's financial instruments include non-derivative financial liabilities comprising of trade and other payables including amounts owed to group undertakings and interest-bearing borrowings. All non-derivative financial liabilities are recognised initially at fair value less any directly attributable transaction costs. The Company classifies all its non-derivative financial liabilities as financial liabilities to be carried at amortised cost using effective interest method.

The subsequent measurement of non-derivative financial liabilities is carried at the amortised cost using the effective interest method.

Derecognition of financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled or expired.

The Company also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

Financial guarantees

This is where the Company enters into financial guarantee contracts to guarantee the indebtedness of subsidiaries, joint ventures or associates. The Company considers these to be insurance arrangements, and accounts for them as such. In this respect, the Company treats the guarantee contract as a contingent liability until such time as it becomes probable that the Company will be required to make a payment under the guarantee.

Taxation

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the profit and loss account except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case it is recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The following temporary differences are not provided for: the initial recognition of assets or liabilities that affect neither accounting nor taxable profit other than in a business combination, and differences relating to investments in subsidiaries to the extent that they will probably not reverse in the foreseeable future.

The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised.

Notes to the Company financial statement (continued)

B. Accounting policies (continued)

Provisions

A provision is recognised in the balance sheet when the Company has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation, and where the amount of the associated costs can be reliably estimated. If the effect is material, provisions are calculated by discounting the expected future cash flows at a rate that reflects current market assessments of the time value of money, and where appropriate the risks specific to the liability.

A provision for onerous contracts is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract.

Leases

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Contracts may contain both lease and non-lease components. The Company allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices.

Company as a lessee

The company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred, less any lease incentives received.

The right-of-use asset is subsequently depreciated over the shorter of the asset's useful life or the lease term on a straight-line basis. If the Company is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life. The right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

Payments associated with short-term leases and leases of low-value assets are recognized on a straight-line basis as an expense in statement of profit or loss.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments, including in-substance fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option if the Company is reasonably certain to exercise that option, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option
- penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the group, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

Notes to the Company financial statement (continued)

B. Accounting policies (continued)

Company as a lessee (continued)

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in-substance fixed lease payment.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The company presents right-of-use assets and lease liabilities separately on statement of financial position.

Variable lease payments that depend on revenue and output are recognized in statement of profit or loss in the period in which the condition that triggers those payments occurs.

Pensions

Defined contribution plans

A defined contribution plan is a post-employment benefit plan in which the company pays the fixed contribution to a separate entity and will have no legal or constructive obligation to pay further amounts. Contributions, including lump sum payments, in respect of defined contribution pension schemes and multi-employer defined benefit schemes where it is not possible to identify the Company's share of the scheme, are charged to the profit and loss account as they fall due.

Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan.

The Company's net obligation in respect of defined benefit pension plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods. That benefit is discounted to determine the present value, and the fair value of any plan assets is deducted. The calculation is performed annually by a qualified actuary using the projected unit credit method. The discount rate is the yield at the reporting date on AA credit rated bonds that have maturity dates approximating to the terms of the Company's obligations.

When the actuarial calculation results in a benefit to the Company, the recognised asset is limited to the present value of economic benefits available in the form of any future refunds from the plan or reductions in future contributions to the plan. In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements that apply to any plan in the Company. An economic benefit is available to the Company if it is realisable during the life of the plan, or on settlement of the plan liabilities.

Where the present value of the deficit contributions exceeds the IAS 19 deficit an additional liability is recognised.

Re-measurements of the net defined benefit liability, which comprise of actuarial gains and losses, the return on plan assets (excluding interest) and the effect of the asset ceiling (if any, excluding interest) are recognised directly in statement of other comprehensive income. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognise gains and losses on the settlement of a defined benefit plan when the settlement occurs.

Notes to the Company financial statement (continued)

C. Audit fees

The Company's audit fee paid to its principal auditors, KPMG LLP was £127,962 (2019: £200,000), and non-audit fee was £nil (2019: £52,000).

D. Dividends

No dividend was declared during the year (2019: £nil).

E. Profit for the financial year

The profit for the financial year, being the profit on ordinary activities after taxation, was £3.7 million (2019: profit of £19.1 million).

The aggregate emoluments of the highest paid director were £1,463,492 (2019: The aggregate emoluments of the highest paid director were £1,050,845 and no pension contribution was made on his behalf).

The Directors hold a variety of roles and responsibilities with the ultimate parent Group and not all are directly employed by the Company. Therefore, where necessary, an estimation has been made of the proportion of their remuneration that relates to qualifying services for the Company.

Notes to the Company financial statement (continued)

Q. Pensions

The Company participates in a number of pension schemes throughout the world, mostly concentrated in the United Kingdom.

The board of a pension scheme in the UK is required by law to act in the best interests of the fund participants and is responsible for setting certain policies (e.g. investment, contributions and indexation policies) and determining recovery plans, if appropriate.

These defined benefit schemes expose the Company to actuarial risks, such as longevity risk, currency risk, interest rate risk and market (investment) risk. In addition, by participating in certain multi-employer industry schemes, the Company can be exposed to a pro-rata share of the credit risk of other participating employers.

The Company has no unconditional right to refund of surplus of assets under the rules of the P&O Pension Schemes. Upon winding up of the Scheme, if any surplus exists will be settled in accordance with the pension's legislation in place at that time. The Company has recognized net pension obligation under the relevant accounting rules.

P&O Pension Scheme

This principal scheme is located in the UK (the "P&O UK Scheme"). The P&O UK Scheme is a funded defined benefit scheme and was closed to routine new members on 1 January 2002 and to future accrual on 31 December 2015. The pension fund is legally separated from the Company and managed by a Trustee board. The assets of the scheme are managed on behalf of the Trustee by independent fund managers.

Formal actuarial valuations of the P&O UK scheme are normally carried out triennially by qualified independent actuaries, the most recent valuation was at 31 March 2019 on a market related basis. The deficit on a statutory funding objectives basis was GBP 98 million. The Company agreed with the Trustee to a new monthly deficit payment plan effective from 1 April 2019 as follows:

Payment Dates	Monthly payments
From 1 April 2019 to 31 March 2020	GBP 0.8 million
From 1 April 2020 to 31 May 2020	GBP 1.3 million
In May 2020	GBP 6.5 million (one off lump sum)
From 1 June 2020 to 31 March 2021	GBP 2.5 million
From 1 April 2021 to 31 March 2025	GBP 1.1 million

In December 2007, as part of a process developed with the Company to de-risk the pension scheme, the Trustee transferred GBP 800 million of P&O UK Scheme assets to Paternoster (UK) Ltd, in exchange for a bulk annuity insurance policy to ensure that the assets (in the Company's statement of financial position and in the Scheme) will always be equal to the current value of the liability of the pensions in payment at 30 June 2007, thus removing the funding risks for these liabilities.

Merchant Navy Officers' Pension Fund Scheme ("MNOFF")

The Company participates in various industry multi-employer schemes in the UK. These generally have assets held in separate trustee administered funds which are legally separated from the Company.

The MNOFF Scheme is an industry wide multi-employer defined benefit scheme in which officers employed by the Company have participated. The scheme has been closed to further benefit accrual from 31 March 2016.

The most recent formal actuarial valuation of the New Section of MNOFF Scheme was carried out as at 31 March 2019. This resulted in a deficit of USD 8.6 million. The Trustee Board believe their investment strategy will address this deficit and therefore has not issued deficit contribution notices to employers in respect of the 2019 actuarial valuation.

Following earlier actuarial valuations in 2009, 2012 and 2015 the Trustee and Employers agreed contributions to be paid to the Section by participating employers over the period to 30 September 2023. These contributions included an allowance for the impact of irrecoverable contributions in respect of companies no longer in existence or not able to pay their share.

The Company's share of the net deficit of the MNOFF Scheme at 31 December 2020 is estimated at 5.21%.

Notes to the Company financial statement (continued)

Q. Pensions (continued)

Merchant Navy Ratings' Pension Fund Scheme ("MNRPF")

The MNRPF Scheme is an industry wide multi-employer defined benefit pension scheme in which sea staff employed by the Company have participated. The scheme has a significant funding deficit and has been closed to further benefit accrual from 2001.

Certain Companies, which are no longer current employers in the MNRPF Scheme had settled their statutory debt obligation and were not considered to have any legal obligation with respect to the on-going deficit in the fund. However, following a legal challenge, by Stena Line Limited, the High Court decided that the Trustee could require all employers that had ever participated in the scheme to make contributions to fund the deficit. Although the Company appealed, the decision was not overturned.

The most recent formal actuarial valuation was carried out as at 31 March 2017. The deficit contributions arising from the valuation totalled GBP 7.7 million. The contributions due to the Scheme in respect of this valuation will be paid over the period to 31 October 2023.

For the Company, aggregated outstanding contributions from these valuations are payable as follows:

- 2021: GBP 4.4 million
- 2022 to 2025: GBP 9.9 million

The Trustee set the payment terms for each participating employer in accordance with the Trustee's Contribution Collection Policy which includes credit vetting.

The outcome of the MNRPF Scheme's 2020 triennial actuarial valuation is still to be finalised.

During the year, MNRPF Scheme has sought direction for the UK Court regarding the correct benefit provision to its scheme members in respect of Ill Health Early Retirement. The Case was due to be heard in November 2020 but was adjourned until July 2021 whilst representatives from the Trustee Board, the Employers and the Members/employees considered a Settlement proposal. The outcome of either the Court direction or the Settlement proposal is unknown to the Company at the current time, but the Company's share of potential additional liability is estimated to be in the range of USD Nil to GBP 22.14 million.

The Company's share of the net deficit of the MNRPF at 31 December 2020 is estimated at 7.38%.

The amounts recognised in the balance sheet are as follows

	2020	2019
Present value of obligations	(1,647.6)	(1,548.2)
Irrecoverable surplus (effect of asset ceiling)	(62.1)	(51.5)
Fair value of plan assets	1,633.9	1,519.2
Net liability deficit	(75.8)	(80.5)
Related deferred tax asset	-	-
Net liability	(75.8)	(80.5)
Amounts in the balance sheet		
Non-current Liabilities	(75.8)	(80.5)
Net liability	(75.8)	(80.5)

The defined pension benefit schemes of GBP 75.8 million (2019: £80.5 million) is in respect of Company's three schemes shown on page 96.

The re-measurements of the net defined benefit liability recognized in the statement of other comprehensive income is as follows:

Notes to the Company financial statement (continued)

Q. Pensions (continued)

The re-measurements of the net defined benefit liability recognized in the statement of other comprehensive income is as follows:

	2020	2019
Actuarial gain/(loss) recognised in the year	(143.2)	(153.7)
Return on plan assets lesser/ (greater) than the discount rate	132.0	123.9
Change in share in multi-employer scheme	-	(0.3)
Movement in minimum funding liability	(10.0)	30.4
	(21.2)	0.3

The pension costs for defined benefit schemes are as follows:

	2020	2019
Employer's past service cost*	(3.2)	-
Gain due to settlements/curtailments	-	-
Administration costs	(2.2)	(2.5)
Total charge to operating profit	(5.4)	(2.5)
Net Interest on net defined benefit liability	(1.2)	(2.4)
Total expenses recognised in the income statement	(6.6)	(4.9)

* In 2020, this includes GBP 3.0 million additional costs arising in respect of "guaranteed minimum pension" (GMP) based on a landmark High Court judgment in the UK

Actuarial valuations and assumptions

The latest valuations of the defined benefit schemes have been updated to 31 December 2020 by qualified independent actuaries. The principal assumptions are included in the table below.

The assumptions used by the actuaries are the best estimates chosen from a range of possible actuarial assumptions, which, due to the timescale covered, may not necessarily be borne out in practice.

	P&O UK Scheme		MNOFF Scheme		MNRPF Scheme	
	2020	2019	2020	2019	2020	2019
Discount rates	1.25%	1.95%	1.25%	1.95%	1.25%	1.95%
Discount rates - Bulk Annuity Asset	1.15%	1.85%	n/a	n/a	n/a	n/a
Expected rates of salary increases *	n/a	n/a	n/a	n/a	n/a	n/a
Pension increases:						
- Deferral	2.00%	3.00%	2.00%	2.25%	2.00%	2.25%
- Payment	2.80%	3.00%	2.75%	3.15%	2.75%	3.15%
Inflation	2.80%	3.25%	2.80%	3.25%	2.80%	3.25%

* The P&O UK Scheme and MNOFF were closed to future accrual as at 31 December 2016, so future pay increases are not relevant.

Notes to the Company financial statement (continued)

Q. Pensions (continued)

Actuarial valuations and assumptions

In the current year, the methodology for determining the Retail Price Index (RPI) assumption used for the valuation of the Defined Benefit Pension Scheme Obligation changed, resulting in an RPI of 2.8% (compared to an RPI of 3.2% under the old methodology). However, the resulting decrease in the DBO has no impact on the net defined benefit pension liability on the balance sheet as at 31 December 2020. This is because the impact is offset by an equal and opposite change to the minimum funding liability.

Reasonably possible changes to one of the actuarial assumptions, holding other assumptions constant (in practice, this is unlikely to occur, and changes in some of the assumptions may be correlated), would have increased the net defined benefit liability as at 31 December 2020 by the amounts shown below:

	£ million	
	2020	2019
0.1% reduction in discount rate	0.1	0.3
0.1% increase in inflation assumption and related assumptions	-	3.9
0.25% p.a. increase in the long term rate of mortality improvement	-	4.9
	0.1	9.1

The schemes' strategic asset allocations across the sectors of the main asset classes are:

	P&O UK Scheme £'million	MNOPF Scheme £'million	MNRPF Schemes £'million	Total Fair value £'million
2020				
Equities	185.9	33.5	9.3	228.7
Bonds	427.7	94.9	58.7	581.3
Other	105.2	-	-	105.2
Value of insured pensioner liability	718.7	-	-	718.7
	1,437.5	128.4	68.0	1,633.9
2019				
Equities	178.6	37.4	6.9	222.9
Bonds	218.8	88.1	54.8	361.7
Other	212.8	-	-	212.8
Value of insured pensioner liability	721.8	-	-	721.8
	1,332.0	125.5	61.7	1,519.2

With the exception of the insured pensioner liability all material investments have quoted prices in active markets.

The assumptions for pensioner longevity under both the P&O UK scheme and the MNOPF scheme are based on an analysis of pensioner death trends under the respective schemes over many years.

Notes to the Company financial statement (continued)

Q. Pensions (continued)

For illustration, the life expectancies for the two schemes at age 65 now and in the future are detailed in the table below.

	Male		Female	
	Age 65 now	Age 65 in 20 years' time	Age 65 now	Age 65 in 20 years' time
2020				
P&O UK scheme	22.8	24.5	25.0	26.7
MNRPF scheme	19.3	21.3	22.5	24.6
MNOPF scheme	21.9	24.0	24.0	26.2
2019				
P&O UK scheme	22.8	24.5	24.9	26.7
MNRPF scheme	19.2	21.2	22.4	24.5
MNOPF scheme	21.8	23.9	23.9	26.0

At 31 December 2020 the weighted average duration of the defined benefit obligation was 14.3 years (2019: 14.9 years).

Notes to the Company financial statement (continued)

Q. Pensions (continued)

Reconciliation of the opening and closing present value of defined benefit obligations and fair value of scheme assets for the period ended 31 December 2020:

	£ million			
	P&O UK Scheme	MNOPF Scheme	MNRPF Scheme	Total
Present value of obligation at 1 January 2020	(1,370.0)	(116.3)	(61.9)	(1,548.2)

U. Post Balance Sheet Events

No other matter or circumstance has arisen since 31 December 2020 that has significantly affected, or may significantly affect the Company's operations, the results of those operations, or the Company's state of affairs in future financial years.

Glossary

EBITDA and Adjusted EBITDA

EBITDA, a measure used by the Company's management to measure operating performance, is defined as profit after tax from continuing operations plus finance costs (net of finance income), income tax, depreciation and amortisation. EBITDA includes the Group's share of profit from associates and joint ventures.

Adjusted EBITDA is defined as EBITDA further adjusted to remove the impact of Separately disclosed items ('SDI's'). Adjusted EBITDA includes the Group's share of profit from associates and joint ventures.

The Company's management believes that EBITDA and Adjusted EBITDA are helpful in highlighting trends because they exclude certain items that are outside the normal course of business and can differ significantly from company to company depending on long-term strategic decisions regarding capital structure, the tax jurisdictions in which companies operate and capital investments. The Company's management uses EBITDA and Adjusted EBITDA to supplement IFRS results to provide a more complete understanding of the factors and trends affecting the business than IFRS results alone.
