13. OTHER FINANCIAL COMMITMENTS

It is the company's policy to match all significant forward purchase and sales contracts. However, the company's customer base has changed over recent years to include smaller breweries. This has resulted in the company now having forward purchase contracts that are not fully matched to a sales contract.

The company regularly reviews its stock relating to unmatched purchase contracts in order to identify whether losses are likely to be incurred and to ensure provision for these losses has been recognised in the financial statements.

In addition, the company enters into forward contracts to buy currency at specified rates from time to time. This normally occurs when the directors are aware of future liabilities on forward purchase contracts arising in foreign currencies and these are then covered partially or in full depending on the cash requirements of the business.

In the opinion of the directors, the company had no unmatched commitments on forward contracts that represented a significant risk to the company at the balance sheet date.
