# Strategic Report For the Year Ended 31 December 2014

## **Business review**

Despite increased employment costs, a further increase in turnover at Silflex Limited led to a successive year of improved operating profitability.

The contribution of the management and employees of the company's subsidiary to these improved results is both recognised and appreciated.

The outlook for demand at Silflex Limited during 2015 is similar, and with improved margins offset by further increases in the costs of employment, the business anticipates achieving a similar operating profit.

## Financial risk management objectives and policies

The company's principal financial instruments comprise balances due to its subsidiary companies and cash and short-term deposits. The main purpose of these financial instruments is to finance the company's operations. The company has various other financial instruments such as trade debtors and trade creditors, which arise directly from its operations. The company does not enter into derivative transactions. It is, and has been throughout the period under review, the company's policy that no trading in financial instruments shall be undertaken. The main risk arising from the company's financial instruments is liquidity risk. The board reviews and agrees policy for managing this risk and this is summarised below:

## Liquidity risk

The company carries significant balances owed to its wholly owned subsidiaries by virtue of these subsidiaries lending cash to the company. The company closely monitors the financial performance and position of its investments in subsidiary undertakings in order to control its exposure to liquidity risk, and is able when desirable to approve dividends recommended by subsidiary undertakings in order to convert its liabilities to distributable reserves.

This report was approved by the board on 23 September 2015 and signed on its behalf.

## 1. Accounting Policies

The following accounting policies have been used in dealing with items which are considered material in relation to the company's financial statements.

## 1.1 Basis of preparation of financial statements

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards.

## 1.2 Consolidation

Group financial statements are not submitted as the company is a subsidiary of Currie & Warner (Floldings) Limited, incorporated in Great Britain and registered in England & Wales.

#### 1.3 Turnover

Turnover comprises revenue recognised by the company in respect of services supplied, exclusive of Value Added Tax.

## 1.4 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets over their expected useful lives on the following bases:

Freehold land - No depreciation

Freehold buildings - 40 years

Leasehold land and buildings - 40 years or period of lease if shorter

Property held for resale - No depreciation

Additions to fixed assets during the accounting period are depreciated at an appropriate proportion of the annual rate attributable to that category of asset.

Property held for resale is property not used by the company for its operations and is therefore held in a separate classification of fixed assets. This property is not depreciated, but is reviewed annually for any impairment provisions required.

## 1.5 Investments

Investments are stated at cost less provision for any impairment in value.

## 1.6 Operating leases

Payments under operating leases are charged to revenue in the financial period in which they are incurred.

Deferred tax assets are recognised when it is more likely than not that they will be recovered. Deferred tax is measured using rates of tax that have been enacted or substantively enacted by the balance sheet date.

## 1.8 Foreign currencies

Transactions in foreign currencies are recorded using the rate of exchange ruling at the date of the transactions. Any amounts receivable or payable at the balance sheet date are converted at the rate then ruling and any differences are taken to the profit and loss account.
