## The Directors' Report

#### Year ended 31 March 2013

The directors present their report and the audited financial statements of the Company for the year ended 31 March 2013 The comparatives are for the year ended 31 March 2012

#### Principal activities and business review

The principal activities of the Company continued to be that of music publishing No material change in the activities of the business is contemplated

During the financial year, the Company experienced a fall in turnover of 95% on prior year. The Company made a profit on ordinary activities before taxation of £1 (2012 £32)

The turnover of the Company is generated from usage of the songs written by the Company's composers and will vary in any given year alongside the market conditions and popularity of various genres of music. Direct costs attributed to the turnover are the writer's shares of the royalties earned on their compositions.

The Company employs no staff and has no separate facilities or overheads, except for those recharged for services rendered by other companies in the EMI Music Publishing group

Key performance indicators are designed to indicate how the company had performed on key ratios, and the company uses NPS margin and operating margin as the key performance indicators which are most appropriate

There are no KPIs specifically relating to environmental and employee issues as the company has no employees or separate facilities. It is not possible to obtain meaningful market share information for a company of this size, so we do not consider a KPI appropriate.

#### Going concern

The directors have prepared consolidated Group financial projections for a period of more than twelve months from the date of approval of these financial statements. After considering these financial projections, the directors have concluded that they have a reasonable expectation that the Company has adequate resources to continue as a going concern for the foreseeable future and as a result have prepared these financial statements on a going concern basis

## Change of ownership

On 11 November 2011, Citigroup signed definitive agreements to sell the Group's Recorded Music business to Universal Music Group and Music Publishing business to an investor Group that comprised primarily of Sony Corporation of America, the Estate of Michael Jackson, Mubadala Development Company PJSC, Jynwel Capital Limited, and the Blackstone Group's GSO Capital Partners LP (the 'Investor Group') The agreements did not take effect until clearance was received from various Competition authorities and other conditions were met. The Music Publishing business sale completed on 29 June 2012

#### Principal risks and uncertainties

The principal risks and uncertainties facing the Company concern the value of the worldwide market for recorded music which despite a 0 3% increase this year, has in recent years declined by about 9% year on year according to data from the IFPI. Whilst we believe that new digital products and services will drive a return to overall industry growth, there are no assurances of the timing or extent of any improvement. This may have a negative impact, as the Company generates a significant portion of its revenues from mechanical royalties, primarily from the sale of music in CD and other formats. We are dependent on identifying, signing and retaining talented songwriters whose new releases are well received and whose music will continue to generate revenues for years to come. Competition for such talent is intense and our financial results would be adversely affected if we fail to identify, sign and retain songwriters. External bodies such as local third-party collection societies, have a significant influence on some of our revenues. Mechanical and Performance rates as well as distribution rules are usually set by performing rights societies through board approval and as such may result in the setting of rates at levels lower than we would wish and may therefore adversely affect our ability to increase profitability.
