1 Accounting policies

Basis of accounting

The accounts have been prepared under the historical cost convention.

Turnover

Turnover represents net invoiced sales of goods, excluding VAT.

Fixed assets

Depreciation and amortisation is provided, after taking account of any grants receivable, at the following annual rates in order to write off each asset over its estimated useful life:

Freehold land & buildings	- 2% straight line
Equipment and fixtures	- 20% reducing balance
Motor vehicles	- 25% reducing balance

Stocks

Stocks and work in progress are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Deferred taxation

Deferred taxation arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in the company accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more tax at a future date, at the average tax rates that are expected to apply when the timing differences reverse, based on current tax rates and laws.

Deferred taxation is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the asset.

Leased assets

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged to the profit as incurred.

Assets held under finance leases and hire purchase contracts are capitalised and depreciated over their useful lives. The lease or hire purchase obligation is shown in the balance sheet as a liability. The interest on such agreements is charged to the profit and loss account in equal instalments.
