1 Accounting policies

Basis of preparation

These financial statements are prepared on a basis other than going concern, under historical cost convention and in accordance with the Companies Act 2006 and Financial Reporting Standard 102 (FRS 102) issued by the Financial Reporting Council. The principal accounting policies, which have been applied consistently throughout the current and prior year, are set out below.

The functional currency of the Company is considered to be pounds sterling because that is the operational currency of the primary economic environment in which the Company operates.

The Company is a private limited company, limited by shares, and is incorporated and domiciled in the UK and registered in England and Wales. The address of its registered office is Lindred House, 20 Lindred Road, Brierfield, Nelson, BB9 5SR.

The Company meets the definition of a qualifying entity under FRS 102 and has therefore taken exemptions available to it in the preparation of its financial statements. Exemptions have been taken in relation to the presentation of a cash flow statement and remuneration of key management personnel.

Going concern

The Company does not plan to continue to act as a property holding company for the foreseeable future as all properties held by the Company were sold in September 2017 and the Company will be non-trading going forward. Consequently, the financial statements have been prepared on a basis other than that of a going concern which includes, where appropriate, writing down the Company's assets to net realisable value. The financial statements do not include any provision for the future costs of terminating the business of the Company except to the extent that such costs were committed at the balance sheet date. No adjustments arose as a result of ceasing to apply the going concern basis.

Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument.

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

All financial assets and liabilities are initially measured at the transaction price (including transaction costs), except for those financial assets classified at fair value through profit or loss, which are initially measured at fair value (which is normally the transaction price excluding transaction costs), unless the arrangement constitutes a financing transaction. If an arrangement constitutes a financing transaction, the financial asset or financial liability is measured at the present value of the future payments discounted at a market rate of interest for a similar debt instrument.

Financial assets and liabilities are offset in the statement of financial position only when there exists a legally enforceable right to set off the recognised amounts and the Company intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Commitments to make and receive loans which meet the conditions mentioned above are measured at cost (which may be nil) less impairment.

Financial assets are derecognised only when a) the contractual rights to the cash flows from the financial asset expire or are settled, b) the Company transfers to another party substantially all of the risks and rewards of ownership of the financial asset, or c) the Company, despite having retained some, but not all, significant risks and rewards of ownership, has transferred control of the asset to another party.

Financial liabilities are derecognised only when the obligation specified in the contract is discharged, cancelled or expires.

2 Debtors

	Unaudited 2020 £ 000	Unaudited 2019 £ 000
Amounts owed by a group undertaking	50	50

Amounts owed by a group undertaking are unsecured, have no fixed date of repayment and are repayable on demand.
