NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 AUGUST 2009

1 Accounting policies

1.1 Accounting convention

The financial statements are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

1.2 Turnover

Turnover represents amounts receivable for goods and services net of VAT and trade discounts

It is the company's policy to recognise income in respect of hire agreements as each agreement progresses. The appropriate proportion of income in respect of agreements which have not concluded by the year end date is invoiced by the company and included as turnover in the accounts

1.3 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost less estimated residual value of each asset over its expected useful life, as follows

Plant and machinery	20% straight line on cost
Fixtures, fittings & equipment	20% straight line on cost
Motor vehicles	at varying rates on cost

1.4 Leasing and hire purchase commitments

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible assets and depreciated over the shorter of the lease term and their useful lives. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period

Rentals payable under operating leases are charged against income on a straight line basis over the lease term

1.5 Investments

Fixed asset investments are stated at cost less provision for diminution in value

1.6 Stock

Stock is valued at the lower of cost and net realisable value

1.7 Pensions

The company operates a defined contribution scheme for the benefit of its employees. Contributions payable are charged to the profit and loss account in the year they are payable

1.8 Deferred taxation

Deferred tax is recognised in respect of all timing differences which have originated but not reversed at the balance sheet date. Timing differences are differences between taxable profits and the results as stated in the financial statements which arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of underlying timing differences can be deducted.

Deferred tax is not recognised when fixed assets are revalued unless by the balance sheet date there is a binding agreement to sell the revalued asset and the resulting gain or loss has been recognised in the financial statements. Neither is deferred tax recognised when fixed assets are sold and it is more likely than not that the taxable gain will be rolled over, being charged to tax only if and when the replacement assets are sold.

Deferred tax is measured at the average tax rates which are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws which have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non - discounted basis.
