Other information

Aviva Group Holdings Limited (the Company) is a member of the Aviva plc group of companies (the Group).

Annual Report and Financial Statements 2019

Strategic report

The directors present their strategic report for the Company for the year ended 31 December 2019.

Review of the Company's business

Principal activities

The Company, a private limited company incorporated and domiciled in the United Kingdom (UK), is a holding company for subsidiaries transacting life assurance and long-term savings business, fund management and most classes of general and health insurance business in the UK, Ireland, continental Europe, Canada and Asia.

Financial position and performance

The financial position of the Company at 31 December 2019 is shown in the statement of financial position on page 21, with the trading results shown in the income statement on page 18 and the statement of cash flows on page 22.

Significant events

Dividends received

During 2019, the Company received dividend income of £2,678 million which comprised £2,671 million cash dividends and £7 million in specie dividends. The in specie dividends from subsidiaries comprised the settlement of intercompany balances from Aviva Asia Digital Private Limited (AADPL).

Capital contributions

During 2019, the Company made the following capital contributions to its subsidiaries:

- £5 million to Aviva Asia Digital Private Limited (AADPL) on 11 January 2019;
- £21 million to Aviva Asia Private Limited (AAPL) on 6 March 2019.

Transfer to subsidiaries

On 24 May 2019, the Company transferred its entire shareholding in Navigator Investment Services Limited (NISL) to its direct subsidiary, Aviva Ltd, for a consideration of £3 million in the form of shares in Aviva Ltd.

On 31 December 2019, the Company acquired from its direct subsidiary, UK Life Holdings Limited (UKLH), the entire shareholding in Aviva UK Digital Limited (UKD) for £103 million of consideration in the form of an intercompany balance with UKLH. On the same day, the Company transferred its entire shareholding in UKD to its direct subsidiary, Aviva Insurance Limited (AIL) for £233 million in consideration for a capital contribution to AIL. This transfer resulted in a profit on disposal of £27 million.

On 16 August 2019 the Company issued a new perpetual loan of £139 million to its direct subsidiary company, Aviva France SA.

Dividend paid

On 31 December 2019, the Company declared and paid an in specie dividend of £1,450 million (2018: £2,650 million) to its parent, Aviva plc. This dividend was settled against the Company's loans with Aviva plc.

Strategies for the wider Aviva Group as a whole are determined by the Board of Aviva plc and these are shown in the Group 2019 Annual Report and Accounts. The Company will work with the Group to support the implementation of these strategies.

The directors consider that the Company's principal activities will continue unchanged for the foreseeable future.

Annual Report and Financial Statements 2019

Strategic report continued

Principal risks and uncertainties

A description of the principal risks and uncertainties facing the Company and the Company's risk management policies are set out in note 25 to the financial statements.

Risk factors beyond the Company's control that could cause actual results to differ materially from those estimated include, but are not limited to:

- Interest raterisk, as the Company's earnings and financial resources are exposed to potential fluctuations in LIBOR, CDOR and EURIBOR benchmark interest rates. The effect of a 100 basis point increase/decrease in these benchmark rates would be an increase/decrease in net interest expense of £nil (2018: £nil).
- Foreign currency risk, arising from the Company's investment in overseas subsidiaries and planned future dividends from overseas subsidiaries. Foreign
 exchange derivatives and foreign currency denominated loans are used to reduce the Company's net exposure to currency risk.
- Risks arising from funding guarantees to the Aviva Staff Pension Scheme (ASPS), RAC (2003) Pension Scheme (RAC PS), Friends Provident Pension Scheme (FPPS), Aviva Ireland Staff Pension Scheme (AISPS) and Unfunded Unapproved Retirement Benefit Scheme (UURBS).
- Other risk factors that could materially impact the carrying value of the Company's investment in subsidiaries, resulting in a charge against shareholder's
 equity and profits. In particular, where indicators of impairment exist, such as poor performance, the carrying value of investment in subsidiaries is deemed
 impaired.
- Exit of the UK from the EU & UK-EU Free Trade Agreement (FTA) negotiations. In preparing for the end of the transition period on 31 December 2020 under
 the UK-EU withdrawal agreement, the Company has already taken the operational measures necessary irrespective of the outcome of UK-EU FTA
 negotiations. However, beyond 2020 the consequences of the UK's withdrawal from the EU on future financial services regulation and the UK economy
 will require careful monitoring.
- Coronavirus as noted within post balance sheet events in directors report on page 7.

Section 172 Statement

We report here on how our directors have discharged their duties under Section 172 of the Companies Act 2006.

The Board is responsible for monitoring and upholding the culture, values, standards, ethics, and reputation of the Company to ensure that our obligations to its shareholder and to its stakeholders are met. The Board monitors adherence to the Aviva Group business standards and compliance with local corporate governance requirements, and is committed to acting if our businesses should fail to act in the manner the Board expects of them.

For each matter which comes before the Board, stakeholders who may be affected are identified and their interests are carefully considered as part of the Board's decision-making process.

The Board is also mindful of the wider social context within which the Company's businesses operate, including those issues related to climate change which are of fundamental importance to the planet's well-being.

Our culture

The Aviva Group is a provider of vital financial services to millions of customers, it seeks to earn customers' trust by acting with integrity and responsibility at all times. They look to build relationships with all their stakeholders based on openness and continuing dialogue.

The Group's culture is shaped by clearly defined values to help ensure they do the right thing. They value diversity and inclusivity in the workforce and beyond. The commitment they make to each customer extends to all stakeholders; that Aviva is 'with you today, for a better tomorrow.' Throughout the Aviva Group, its people live by the core value of Caring More for customers, for each other and for the communities served.

Aviva Group Holdings as part of the Group looks to operate within and support this culture.

Stakeholder Engagement

(i) Employees

The Company has no employees. All UK employees engaged in the activities of the Company are employed by subsidiary undertakings of Aviva plc. Disclosures relating to employees may be found in the annual report and financial statements of these companies.

(ii) Customers

The Company has no direct customers.

(iii) Suppliers

All Group supplier related activity is managed in line with the Group's Procurement & Outsourcing Business Standard. This ensures that supply risk is managed appropriately including in relation to customer outcomes, data security, corporate responsibility, financial, operational, contractual, and brand damage caused by inadequate oversight or supplier failure.

An important part of the Group's culture is the promotion of high legal, ethical, environmental and employee related standards within our business and also among our suppliers. Before working with any new suppliers, we provide them with our Supplier Code of Behaviour, and our interaction with them is guided by our Business Code of Ethics.

The Board reviews the actions the Group has taken to prevent modern slavery and associated practices in any part of our supply chain and approves the Group's Modern Slavery Act statement each year.

(iv) Communities

The Company has no direct customers.

(v) Shareholders

The Company's ultimate shareholder is Aviva plc and there is ongoing communication and engagement with the Aviva plc Board. Any matters requiring escalation are escalated by the Board through the Chair to its ultimate parent.

Annual Report and Financial Statements 2019

Strategic report continued

Key performance indicators

The directors consider that the Company's key performance indicators (KPIs) that communicate the financial performance are as follows:

		2019 2018
Measuro		
Dividend income received (£m)	2,6	3,255
Net effective interest rate on loans (%)	2	.76 2.64

Dividend income received in 2019 has reduced by £577 million from 2018 largely driven by one-off dividends received from Aviva Life & Pensions UK Limited (UKL) in 2018 not being repeated in 2019.

By order of the Board on 22 July 2020

For and on behalf of Aviva Company Secretarial Services Limited Company Secretary

Annual Report and Financial Statements 2019

Directors' report

The directors submit their annual report and the audited financial statements for the Company for the year ended 31 December 2019.

Directors

The names of the current directors of the Company are shown on page 3.

Details of Board appointments and resignations during the year and since the year end are shown below:

A Montague

Resigned 4 March 2019

M Tulloch

Appointed 25 March 2019 and resigned 6 July 2020

A Darlington

Resigned 7 May 2019

T Stoddard

Resigned 30 June 2019

J Windsor

Appointed 9 July 2019 Resigned 9 July 2019

S Maillet E Arnold

Appointed 25 February 2020

Company secretary

The name of the company secretary of the Company is shown on page 3.

Interim ordinary dividends totalling £1,450 million on the Company's ordinary shares were declared and settled during 2019 (2018: £2,650 million). The directors do not recommend a final dividend on the Company's ordinary shares for the year ended 31 December 2019 (2018: Enil).

Going concern

The Company's business activities, together with the factors likely to affect its future development, performance and position are set out in the strategic report, which includes a section describing the principal risks and uncertainties. In addition, the financial statements include notes on the Company's management of its major risks (see note 25) and derivative financial instruments (see note 26).

The Company and its immediate parent, Aviva plc, have considerable financial resources together with a diversified business model, with a spread of businesses and geographical reach. The directors believe that the Company is well placed to manage its business risks successfully despite the current uncertain macroeconomic outlook.

After making enquiries, the directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for a period of at least twelve months from the date of approval of the financial statements. For this reason, they continue to adopt, and to consider appropriate, the going concern basis in preparing the financial statements.

Post balance sheet events

On 11 March 2020, the World Health Organization declared the outbreak of a strain of novel coronavirus disease, COVID-19, a global pandemic. Governments in affected areas have imposed a number of measures designed to contain the outbreak, including business closures, travel restrictions, stay at home orders and cancellations of gatherings and events. The spread of COVID-19 has resulted in an economic downturn in jurisdictions in which the Company operates and the global economy more widely, as well as causing increased volatility and declines in financial markets. If the pandemic is prolonged, or further diseases emerge that give rise to similar effects, the adverse impact on the global economy could be deepened and result in further declines in financial markets.

The Company's balance sheet exposure has been reviewed and actions are being taken to further reduce the sensitivity to economic shocks. The Company continues to maintain a positive net asset value. Since the onset of the pandemic the Company has remained operational, with key activities such as cash payments and transaction processing being maintained. Notwithstanding the Company's strong balance sheet position, deterioration in the situation could have further adverse implications arising from the impacts on financial markets, insurance exposures and operations. As the situation is rapidly evolving it is not practicable to quantify the potential financial impact of the outbreak on the Company at this stage.

On 16 July 2020 the Company completed the sale of its subsidiary company Friends Provident International Limited (FPIL) to R360 Holding Company Limited (RL360), a subsidiary of International Finance Group Limited (IFGL). Under the revised deal structure, the Company has sold a 76% shareholding in FPIL to IFGL for £259 million, of which £209 million is in cash and £50 million is in deferred cash consideration. This investment is shown as held for sale in these financial

Future outlook

Likely future developments in the business of the Company are discussed in the strategic report on page 4.

Stakeholder engagement

Statement of corporate governance arrangements

For the year ended 31 December 2019, the Company has applied the Wates Corporate Governance Principles for Large Private Companies (the Principles). Application of the Principles by the Company during 2019 is set out below:

Annual Report and Financial Statements 2019

Directors' report continued

Principle 1 - Purpose and leadership

The Company is part of the Aviva Group. Following the appointment of Mr M E Tulloch as Group CEO of Aviva plc in March 2019, the Group embarked on a strategic review aimed at optimising its organisational structure around creating excellent outcomes for its customers. The Group's purpose is to be 'with you today, for a better tomorrow' and the Group includes its customers, employees and our other stakeholders in this. The Group has set out three strategic priorities which will enable it to fulfil its purpose:

- Deliver great customer outcomes:
- Excel at the fundamentals; and
- Invest in sustainable growth.

The Board has made a number of strategic decisions through the year which are aligned to this purpose.

The Board monitors the culture of the Company and raises any concerns during meetings and the Board is able to express its views on the culture of the organisation through the Board Effectiveness Reviews.

The Board is responsible for promoting the long-term success of the Company for the benefit of its members as a whole, taking into account other stakeholders as defined by Section 172 of the Companies Act 2006 and the Articles of Association and including but not limited to; setting the Company's strategic aims, monitoring performance of the Company and management against those aims, setting the Company's risk appetite and monitoring the operation of prudent and effective controls and monitoring compliance with corporate governance principles.

Principle 2 - Board composition

The Board's Chair assesses the composition annually to ensure that the balance of responsibilities, accountabilities and decision making across the Company is effectively maintained. The directors have equal voting rights when making decisions, except the Chair, who has a casting vote. All directors have access to the advice and services of the company secretary.

The Board is responsible for organising and directing the affairs of the Company in a manner that is most likely to promote the success of the Company for its shareholders as a whole and in a way that is consistent with its articles of association, applicable regulatory requirements and current corporate governance practice.

The Board undertook a formal effectiveness review of its performance, facilitated by the company secretary in July 2019, covering certain key areas to assess its effectiveness and to identify any areas for improvement. The Board's next assessment will take place in mid 2020. The 2019 board effectiveness review assessed that overall the Company was operating effectively with a number of areas prioritised for focus during the coming year.

Principle 3 - Director responsibilities

The Company operates in accordance with the Aviva governance framework, as approved by Aviva plc. The Aviva governance framework articulates the interrelation between its purpose, culture, values; its reporting and escalation structures and their alignment with legal and regulatory duties and its risk management framework. The core elements are the legal and regulatory flow of accountability and decision making and the Company's frameworks, policies and standards and the checks and balances through the operation of the Company's 2nd and 3rd lines of defence which ensure effective Board oversight.

Within the Aviva Group, accountability is formally delegated by the Board of the Company to the Chair. The Chair delegations are referenced in the Board's terms of reference, with accountability resting with the Chair and the Board. The Company must also adhere to the subsidiary governance principles which are a set of internal governance principles.

The Board held six meetings this year, plus one ad hoc meeting to discuss specific items. The Board's key areas of focus in 2019 were aligning its business to the new Aviva Group strategy, embedding of a new leadership team including CEO and the disposal of the remaining shares in UKD from its subsidiary undertaking, AIL, by way of a capital contribution.

Principle 4 - Opportunity and risk

The role of the Board role is to promote the long-term sustainable success of the Company, generating value for its shareholder within a framework of prudent and effective controls, which enable risks to be assessed and managed.

The Company operates a risk management framework that forms an integral part of the management and Board processes and decision-making framework, aligned to the Group's risk management framework. The key elements of the risk management framework comprise risk appetite; risk governance, including risk policies and business standards, and the processes the Company uses to identify, measure, manage, monitor and report risks, including the use of risk models and stress and scenario testing. The Company's risk representative attends Board meetings and provides independent challenge and influence in key business decisions and in ensures the effective operation of the risk management framework and control environment, in addition to assessing the overall risk culture. Material matters are escalated by the Board and the Chief Risk Officer to the Company's parent legal entity Board and other Group forums as appropriate.

Principle 5 - Remuneration

The Company has no employees. The majority of staff engaged in the activities of the Company are employed by fellow subsidiary undertakings of Aviva plc. As part of the Aviva Group, these staff enjoy the benefit of the Aviva Group policies and benefits made available to them.

Under the Aviva Group Reward Governance Framework, the Global Remuneration Policy is approved by the Aviva plc Remuneration Committee, and applies to all employees in entities within the Aviva Group. Details of Directors Remuneration is included in note 7.

The Aviva Group reports on the pay ratio of the Group CEO to UK employees, and details of this can be found in the Directors' Remuneration Report in the Aviva plc Annual Report and Accounts which is available at/www.aviva.com/investors/reports/. Aviva plc also reports on its gender pay gap, and the steps it is taking in relation to this which can be found at www.aviva.com/gpgr.

As employees of the Group, staff are able to enjoy the comprehensive flexible benefits offering including the Aviva staff pension scheme which provides a top rate employer contribution of 14% of salary and Aviva's broader Wellbeing offering which aims to promote health and wellbeing among Aviva colleagues.

Principle 6 - Stakeholders

Details about stakeholders can be found in the S172 statement in the strategic report on page 5.

8

Annual Report and Financial Statements 2019

Directors' report continued

Financial instruments

The Company uses financial instruments to manage certain types of risks, including to those relating to credit, foreign currency exchange, cash flow, liquidity, interest rates, operational and staff pension scheme risks. Details of the objectives and management of these instruments are contained in note 25 on risk management.

Employees

The Company has no employees. All UK employees engaged in the activities of the Company are employed by subsidiary undertakings of Aviva plc.

Disclosure of information to the auditors

In accordance with section 418 of the Companies Act 2006, the directors in office at the date of approval of this report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's External Auditor, PricewaterhouseCoopers LLP, is unaware and each director has taken all steps that ought to have been taken as a director in order to make themselves aware of any relevant audit information and to establish that PricewaterhouseCoopers LLP is aware of that information.

Independent auditors

It is the intention of the directors to reappoint the auditors, PricewaterhouseCoopers LLP, under the deemed appointment rules of section 487 of the Companies

Qualifying indemnity provisions

In 2004, Aviva plc, the Company's immediate parent, granted an indemnity to the directors against liability in respect of proceedings brought by third parties, subject to the conditions set out in the Companies Act 1985, which continue to apply in relation to any provision made before 1 October 2007. This indemnity is a "qualifying third party indemnity" for the purposes of section 309A to section 309C of the Companies Act 1985. These qualifying third party indemnity provisions remain in force as at the date of approving the directors' report by virtue of paragraph 15, Schedule 3 of The Companies Act 2006 (Commencement No. 3, Consequential Amendments, Transitional Provisions and Savings) Order 2007.

The directors also have the benefit of the indemnity provision contained in the Company's articles of association, subject to the conditions set out in the Companies Act 2006. This is a "qualifying third party indemnity" provision as defined by section 234 of the Companies Act 2006.

Statement of directors' responsibilities

The directors are responsible for preparing the strategic report, directors' report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make reasonable and prudent judgements and accounting estimates;
- state whether applicable IFRSs as adopted by the European Union and IFRSs issued by IASB have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006.

They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

By order of the Board on 22 July 2020

For and on behalf of Aviva Company Secretarial Services Limited Company Secretary

Annual Report and Financial Statements 2019

Independent auditors' report to the members of Aviva Group Holdings Limited

Report on the audit of the financial statements

Opinion

In our opinion, Aviva Group Holdings Limited's financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2019 and of its profit and cash flows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report and Financial Statements (the "Annual Report"), which comprise: the statement of financial position as at 31 December 2019; the income statement, the statement of comprehensive income, the statement of changes in equity for the year then ended; the accounting policies; and the notes to the financial statements.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which ISAs (UK) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic Report and Directors' Report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (UK) require us also to report certain opinions and matters as described below.

Strategic Report and Directors' Report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic Report and Directors' Report for the year ended 31 December 2019 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic Report and Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities set out on page 9, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Annual Report and Financial Statements 2019

Independent auditors' report to the members of Aviva Group Holdings Limited continued

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- · we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the company, or returns adequate for our audit have not been received from branches not visited by us; or
- · certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

Philip Watson (Senior Statutory Auditor)

23July 2020

Annual Report and Financial Statements 2019

Accounting policies

The Company, a private limited company incorporated and domiciled in the United Kingdom (UK), is a holding company for subsidiaries transacting life assurance and long-term savings business, fund management and most classes of general and health insurance business in the UK, Ireland, continental Europe, Canada, Asia and other countries throughout the world.

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented, unless otherwise stated.

(A) Basis of preparation

The financial statements of the Company have been prepared and approved by the directors in accordance with International Financial Reporting Standards (IFRSs) as endorsed by the European Union (EU), and those parts of the Companies Act 2006 applicable to those reporting under IFRS. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss (FVTPL).

The financial statements have been prepared on the going concern basis as explained in the Directors' report on page 7.

The Company is exempt from preparing group financial statements by virtue of section 400 of the Companies Act 2006, as it is a subsidiary of an EEA parent and is included in the consolidated financial statements for the Group, i.e. the ultimate parent company, Aviva plc, and its subsidiaries, joint ventures and associates, at the same date. These financial statements therefore present information about the Company as an individual entity.

The Company's financial statements are stated in pounds sterling, which is the Company's functional and presentational currency. Unless otherwise noted, the amounts shown in these financial statements are in millions of pounds sterling (£m).

New standards, interpretations and amendments to published standards that have been adopted by the Company

The Company has adopted the following amendments to standards which became effective for the annual reporting period beginning on 1 January 2019 or earlier, and do not have a significant impact on the Company's financial statements.

(i) IFRIC 23, Uncertainty over Income Tax Treatments

In June 2017, the IASB published IFRIC 23 Uncertainty over Income Tax Treatments. The standard is effective for annual reporting beginning on or after 1 January 2019.

(ii) Amendments to IAS 28: Long-term Interests in Associates and Joint Ventures

In October 2017, the IASB published Long-term Interests in Associates and Joint Ventures (Amendments to IAS 28). The amendments are effective for annual reporting beginning on or after 1 January 2019.

(iii) Annual Improvements to IFRS Standards 2015-2017 Cycle

These improvements consist of amendments to four IFRSs including IFRS 3 Business Combinations, IFRS 11 Joint Arrangements, IAS 12 Income taxes and IAS 23 Borrowing Costs. The amendments are effective for annual reporting beginning on or after 1 January 2019.

Standards, interpretations and amendments to published standards that are not yet effective and have not been adopted early by the Company

The following amendments to existing standards have been issued, are not yet effective and are not expected to have a significant impact on the Company's financial statements:

Amendments to References to the Conceptual Framework in IFRS Standards

Published by the IASB in March 2018. The amendments are effective for annual reporting beginning on or after 1 January 2020 and has been endorsed by the EU.

(ii) Amendment to IFRS 3 Business Combinations

Published by the IASB in October 2018. The amendments are effective for annual reporting beginning on or after 1 January 2020 and has been endorsed by the EU.

(iii) Amendment to IAS 1 and IAS 8: Definition of material

Published by the IASB in October 2018. The amendments are effective for annual reporting beginning on or after 1 January 2020 and has been endorsed by the EU.

(iv) Interest Rate Benchmark Reform

Published by the IASB in October 2019. The amendments are effective for annual reporting beginning on or after 1 January 2020 and has been endorsed by the

(v) Amendments to IAS 1 Presentation of Financial Statements: Classification of liabilities as current or non current

Published by the IASB in January 2020. The amendments are effective for annual reporting beginning on or after 1 January 2022 and have not yet been endorsed by the EU.

Annual Report and Financial Statements 2019

Accounting policies continued

(B) Critical accounting policies and the use of estimates

The preparation of financial statements requires the Company to select accounting policies and make estimates and assumptions that affect items reported in the income statement, statement of financial position, other primary statements and notes to the financial statements.

Critical accounting policies

The following accounting policies are those that have the most significant impact on the amounts recognised in the financial statements, with those judgements involving estimation summarised thereafter.

Item	Critical accounting judgement	Accounting policy
Subsidiaries	Set out in accounting policy C.	С
Financial investments	Classification and measurement of financial investments including the	
	mandatory application of measurement at fair value through profit or loss (FVTPL).	

Use of estimates

All estimates are based on management's knowledge of current facts and circumstances, assumptions based on that knowledge and their predictions of future events and actions. Actual results may differ from those estimates, possibly significantly.

The table below sets out those items considered particularly susceptible to changes in estimates and assumptions, and the relevant accounting policy and note disclosures.

Item	Critical accounting estimates	Accounting policy	Note
Investment in subsidiaries	Investments in subsidiaries are recognised at cost less impairment. Investments are reviewed annually to test whether any indicators of impairment exist. Where there is objective evidence that such an asset is impaired, the investment is impaired to its recoverable value and any unrealised loss is recorded in the income statement.	С	11
Fair value of financial instruments and derivatives	Thevaluation techniques involve judgement with regard to the valuation models used and the inputs to these models can lead to a range of plausible valuations for financial investments.	E, H & L	13, 14 & 26
Impairment of financial investments	Factors considered when assessing the size of expected credit losses include payments terms, counterparty credit quality and whether there has been a significant or prolonged decline in fair value.	Н	13
Provisions and contingent liabilities	When evaluating whether a provision or a contingent liability should be recognised the Company assesses the likelihood of a constructive or legal obligation to settle a past event and whether the amount can be reliably estimated. The amount of provision is determined based on the Company's estimation of the expenditure required to settle the obligation at the statement of financial position date.	P	23

(C) Subsidiaries

Subsidiaries are those entities over which the Company has control, either directly or indirectly. The Company controls an investee if, and only if, the Company has all of the following:

- power over the investee;
- exposure, or rights, to variable returns from its involvement with the investee; and
- the ability to use its power over the investee to affect its returns.

The Company considers all relevant facts and circumstances in assessing whether it has power over an investee including: the purpose and design of an investee, relevant activities, substantive and protective rights, and voting and potential voting rights. The Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control.

Investments in subsidiaries are recognised at cost less impairment. Investments are reviewed at least annually to test whether any indicators of impairment exist. Where there is objective evidence that such an asset is impaired, the investment is impaired to its recoverable value and any unrealised loss is recorded in the income statement.

(D) Foreign currency translation

Foreign currency transactions are accounted for at the exchange rate prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions, and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognised in the income statement.

Translation differences on debt securities and other monetary financial assets measured at fair value are included in foreign exchange gains and losses in the income statement. Translation differences on non-monetary items, such as equities which are designated as FVTPL, are reported as part of the fair value gain or loss in the income statement.

Annual Report and Financial Statements 2019

Accounting policies continued

(E) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. This presumes that the transaction takes place in the principal (or most advantageous) market under current market conditions. Fair value is a market-based measure and in the absence of observable market prices in an active market, it is measured using the assumptions that market participants would use when pricing the asset or liability.

The fair value of a non-financial asset is determined based on its highest and best use from a market participant's perspective. When using this approach, the Company takes into account the asset's use that is physically possible, legally permissible and financially feasible.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price i.e. the fair value of the consideration given or received. In certain circumstances, the fair value at initial recognition may differ from the transaction price. If the fair value is evidenced by comparison with other observable current market transactions in the same instrument (i.e. without modification or repackaging), or is based on a valuation technique whose variables include only data from observable markets, then the difference between the fair value at initial recognition and the transaction price is recognised as a gain or loss in the income statement. When unobservable market data has a significant impact on the valuation of financial instruments, the difference between the fair value at initial recognition and the transaction price is not recognised immediately in the income statement, but deferred and recognised in the income statement on an appropriate basis over the life of the instrument but no later than when the valuation is supported wholly by observable market data or the transaction is closed out or otherwise matures.

If an asset or a liability measured at fair value has a bid price and an ask price, the price within the bid-ask spread that is most representative of fair value in the circumstances is used to measure fair value.

(F) Net investment income

Investment income consists of dividends and interest for the year, movements in amortised cost on debt securities, realised gains and losses, and unrealised gains and losses on FVTPL investments and loans due from Group operations (as defined in accounting policy H and I respectively). Dividends on equity securities are recorded as revenue on the ex-dividend date. Dividends from investments in subsidiaries are recorded as revenue on the date the dividends are declared. Interest income is recognised as it accrues, taking into account the effective yield on the investment. It includes the interest rate differential on forward foreign exchange contracts.

A gain or loss on a financial investment is only realised on disposal or transfer, and is the difference between the proceeds received, net of transaction costs, and its original cost or amortised cost, as appropriate.

Unrealised gains and losses, arising on investments which have not been derecognised as a result of disposal or transfer, represent the difference between the carrying value at the year end and the carrying value at the previous year end or purchase value during the year, less the reversal of previously recognised unrealised gains and losses in respect of disposals made during the year.

(G) Derecognition and offset of financial assets and financial liabilities

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third
 party under a "pass-through" arrangement; or
- the Company has transferred its rights to receive cash flows from the asset and either transferred substantially all the risks and rewards of the asset, or has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a currently enforceable legal right to set off the recognised amounts and there is the ability and intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

(H) Financial investments

The Company classifies its investments as financial assets at FVTPL based on a business model assessment and the extent to which the contractual cash flows associated with financial assets are solely payments of principle and interest. Purchases and sales of investments are recognised on the trade date, which is the date that the Company commits to purchase or sell the assets, at their fair values.

In general, the Company's investment or risk management strategy is to manage its financial investments on a fair value basis.

Debt and equity securities, which the Company manage and evaluate performance on a fair value basis, are classified as mandatorily held at FVTPL as are non-hedge derivatives (see accounting policy L).

Investments carried at fair value are measured using the methodology outlined in note 13, with values based on the quoted price within the bid-ask spread that is most representative of fair value or based on cash flow models using market observable inputs or unobservable inputs.

(I) Receivables and other financial assets

Receivables and other financial assets are recognised initially at their fair value. Subsequent to initial measurement receivables, excluding those loans due from Group operations held at fair value as described below, are measured at amortised cost using the effective interest rate method, less expected credit losses.

Loans due from Group operations

Loans with fixed maturities are recognised when cash is advanced to borrowers. Loans where repayments consist solely of principal or interest are subsequently measured at amortised cost using the effective interest rate method. Loans with indefinite future lives are carried at unpaid principal balances. All other loans are held at FVTPL based on the outcome of a business model assessment, or where the contractual cash flows are not solely payment of principal and interest.

To the extent that a loan is considered to be uncollectable, it is written down as impaired through the Income Statement. Any subsequent recoveries are credited to the income statement.

Annual Report and Financial Statements 2019

Accounting policies continued

(J) Payables and other financial liabilities

Payables and other financial liabilities, excluding derivatives, are recognised initially at their fair value and are subsequently measured at amortised cost using the effective interest rate method. Derivative liabilities are carried at fair value (see accounting policy L)

(K) Financial guarantees

Financial guarantees are recognised initially at their fair value and are subsequently amortised over the duration of the contract. A liability is recognised for amounts payable under the guarantee if it is more likely than not that the guarantee will be called upon.

(L) Derivative financial instruments

Derivative financial instruments include foreign exchange contracts, interest rate futures, currency and interest rate swaps, interest rate and currency options (both written and purchased) and other financial instruments that derive their value mainly from underlying interest rates, foreign exchange rates, credit or equity indices, commodity values or equity instruments.

All derivatives are initially recognised in the statement of financial position at their fair value, which usually represents their cost. They are subsequently remeasured at their fair value, with the method of recognising movements in this value depending on whether they are designated as hedging instruments and, if so, the nature of the item being hedged. The Company has not designated any derivatives as hedging instruments and they are therefore treated as derivatives mandatorily held at FVTPL. Their fair value gains and losses are recognised immediately in net investment income. Fair values are obtained from quoted market prices or, if these are not available, by using valuation techniques such as discounted cash flow models or option pricing models. All derivatives are carried as assets when the fair values are positive and as liabilities when the fair values are negative. Premiums paid for derivatives are recorded as an asset on the statement of financial position at the date of purchase, representing their fair value at that date.

Derivative contracts may be traded on an exchange or over-the-counter (OTC). Exchange-traded derivatives are standardised and include certain futures and option contracts and foreign exchange contracts. OTC derivative contracts are individually negotiated between contracting parties and include forwards, swaps, caps and floors. Derivatives are subject to various risks including market, liquidity and credit risk, similar to those related to the underlying financial instruments.

Many OTC transactions are contracted and documented under International Swaps and Derivatives Association (ISDA) master agreements or their equivalent, which are designed to provide legally enforceable set-off in the event of default, reducing the Company's exposure to credit risk.

The notional or contractual amounts associated with derivative financial instruments are not recorded as assets or liabilities on the statement of financial position as they do not represent the fair value of these transactions. These amounts are disclosed in note 26.

The Company has collateral agreements in place with relevant counterparties. Accounting policy N below covers collateral, both received and pledged, in respect of these derivatives.

Interest rate and currency swaps

Interest rate swaps are contractual agreements between two parties to exchange fixed rate and floating rate interest by means of periodic payments, calculated on a specified notional amount and defined interest rates. Most interest rate swap payments are netted against each other, with the difference between the fixed and floating rate interest payments paid by one party. Currency swaps, in their simplest form, are contractual agreements that involve the exchange of both periodic and final amounts in two different currencies. Both types of swap contracts may include the net exchange of principal. Exposure to gain or loss on these contracts will increase or decrease over their respective lives as a function of maturity dates, interest and foreign exchange rates, and the timing of payments.

Interest rate futures, forwards and options contracts

Interest rate futures are exchange-traded instruments and represent commitments to purchase or sell a designated security or money market instrument at a specified future date and price. Interest rate forward agreements are OTC contracts in which two parties agree on an interest rate and other terms that will become a reference point in determining, in concert with an agreed notional principal amount, a net payment to be made by one party to the other, depending upon what rate in fact prevails at a future point in time. Interest rate options, which consist primarily of caps and floors, are interest rate protection instruments that involve the potential obligation of the seller to pay the buyer an interest rate differential in exchange for a premium paid by the buyer. This differential represents the difference between current rate and an agreed rate applied to a notional amount. Exposure to gain or loss on all interest rate contracts will increase over their respective lives as interest rates fluctuate. Certain contracts, known as swaptions, contain features which can act as swaps or options. These contracts are categorised according to the type of contract they most closely resemble in practice.

Foreign exchange contracts

Foreign exchange contracts, which include spot and forward contracts, represent agreements to exchange the currency of one country for the currency of another country at an agreed price and settlement date. Foreign exchange option contracts are similar to interest rate option contracts, except that they are based on currencies, rather than interest rates. Exposure to gain or loss on these contracts will increase or decrease over their respective lives as currency exchange and interest rates fluctuate.

Derivative instruments

For a variety of reasons, certain derivative transactions, while providing effective economic hedges under the Company's risk management positions, do not qualify for hedge accounting under the specific IFRS rules and are therefore treated as derivatives mandatorily held at FVTPL. Their fair value gains and losses are recognised immediately in net investment income.

Annual Report and Financial Statements 2019

Accounting policies continued

(M) Hedging

Financial instruments for hedging

Most of the Company's investments in foreign subsidiaries expose it to foreign exchangerisk arising from movements in the underlying currency of the investment. In order to protect the value of these investments, the Company utilises financial instruments in the form of foreign currency loans from its parent, Aviva plc.

The Company's Euro currency loans from Aviva plc have been designated as fair value hedging instruments against certain overseas investments which are in

Hedge accounting is used for the loans designated in this way, provided certain criteria are met. At the inception of the transaction, the Company documents the relationship between the hedging instrument and the hedged item, as well as the risk management objective and the strategy for undertaking the hedge transaction. The Company also documents its assessment of whether the hedge is expected to be, and has been, highly effective in offsetting the risk in the hedged item, both at inception and on an ongoing basis.

Changes in the carrying value of the designated loans which arise from movements in exchange rates are recognised in the income statement. The gain or loss on the hedged item that is attributable to the hedged risk is recognised in the income statement. This applies even if the hedged item is measured at amortised cost. If a hedging relationship no longer meets the criteria for hedge accounting, the cumulative adjustment made to the carrying amount of the hedged item is amortised to the income statement, based on a recalculated effective interest rate over the residual period to maturity. In cases where the hedged item has been derecognised, the cumulative adjustment is released to the income statement immediately.

(N) Collateral

The Company receives and pledges collateral in the form of cash or non-cash assets in respect of stock lending transactions and certain derivative contracts, in order to reduce the credit risk of these transactions. Collateral is also pledged as security for bank letters of credit. The amount and type of collateral required depends on an assessment of the credit risk of the counterparty.

Collateral received in the form of cash, which is not legally segregated from the Company, is recognised as an asset in the statement of financial position with a corresponding liability for the repayment in financial liabilities. However, where the Company has a currently enforceable legal right of set-off and the ability and intent to net settle, the collateral liability and associated derivative balances are shown net. Non-cash collateral received is not recognised in the statement of financial position unless the transfer of the collateral meets the derecognition criteria from the perspective of the transferor. Such collateral is typically recognised when the Company either (a) sells or re-pledges these assets in the absence of a default, at which point the obligation to return this collateral is recognised as a liability; or (b) the counterparty to the arrangement defaults, at which point the collateral is seized and recognised as an asset.

Collateral pledged in the form of cash, which is legally segregated from the Company, is derecognised from the statement of financial position with a corresponding receivable recognised for its return. Non-cash collateral pledged is not derecognised from the statement of financial position unless the Company defaults on its obligations under the relevant agreement, and therefore continues to be recognised in the statement of financial position within the appropriate asset classification.

(O) Statement of cash flows

Cash and cash equivalents

Cash and cash equivalents consist of cash at bank and in hand, deposits held at call with banks, treasury bills and other short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value. Such investments are those with less than three months' maturity from the date of acquisition, or which are redeemable on demand with only an insignificant change in their fair values.

For the purposes of the statement of cash flows, cash and cash equivalents also include bank overdrafts, which are included in payables and other financial liabilities on the statement of financial position.

(P) Provisions and contingent liabilities

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is more probable than not that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recorded as a provision is the best estimate of the expenditure required to settle the present obligation at the balance sheet date. Where the effect of the time value of money is material, the provision is the present value of the expected expenditure. Provisions are not recognised for future operating losses.

Where the Company expects a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

The Company recognises a provision for onerous contracts when the expected benefits to be derived from a contract are less than the unavoidable costs of meeting the obligations under the contract.

Contingent liabilities are disclosed if there is a possible future obligation as a result of a past event, or if there is a present obligation as a result of a past event but either a payment is not probable, or the amount cannot be reasonably estimated.

(Q) Income taxes

The current tax expense is based on the taxable profits for the year, after any adjustments in respect of prior years. Tax, including tax relief for losses if applicable, is allocated over profits before taxation and amounts charged or credited to components of other comprehensive income and equity as appropriate.

Provision is made for deferred tax liabilities, or credit taken for deferred tax assets, using the liability method, on all material temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements.

The rates enacted or substantively enacted at the statement of financial position date are used to value the deferred tax assets and liabilities.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Where there is a history of tax losses, deferred tax assets are only recognised in excess of deferred tax liabilities if there is convincing evidence that future profits will be available.

Annual Report and Financial Statements 2019

Accounting policies continued

(Q) Income taxes continued

Deferred tax is provided on any temporary differences arising from investments in subsidiaries, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the difference will not reverse in the foreseeable future.

Deferred taxes are not provided in respect of any temporary differences arising from the initial recognition of goodwill, or from the initial recognition of an asset or liability in a transaction which is not a business combination and affects neither accounting profit nor taxable profit or loss at the time of the transaction.

Current and deferred tax relating to items recognised in other comprehensive income and directly in equity are similarly recognised in other comprehensive income and directly in equity respectively. Deferred tax related to any fair value re-measurement of investments, pensions and other post-retirement obligations and other amounts charged or credited directly to other comprehensive income is recognised in the statement of financial position as a deferred tax asset or liability.

(R) Share capital

Equity instruments

An equity instrument is a contract that evidences a residual interest in the assets of an entity after deducting all its liabilities. Accordingly, a financial instrument is treated as equity if:

- (i) there is no contractual obligation to deliver cash or other financial assets or to exchange financial assets or liabilities on terms that may be unfavourable;
- (ii) the instrument is a non-derivative that contains no contractual obligation to deliver a variable number of shares or is a derivative that will be settled only by the Company exchanging a fixed amount of cash or other assets for a fixed number of the Company's own equity instruments.

Dividends

Interim dividends on ordinary shares are recognised in equity in the period in which they are paid. Final dividends on these shares are recognised when they have been approved by shareholders.

(S) Pensions

The Company has no employees. However, it is one of a number of companies in the Group being charged for staff participating in pension schemes in the UK and Ireland, and its contributions are affected by the financial position of these schemes. In the absence of any contractual arrangements to allocate the net defined benefit cost for these schemes, measured in accordance with IAS 19, to individual businesses, it is the Group policy to allocate this cost fully to the main trading companies.

The Company provides a significant proportion of the funding of the UK pension schemes and, where possible, recharges this funding to individual Group operating businesses. The funding paid for the Aviva Staff Pension Scheme, RAC (2003) Pension Scheme, Friends Provident Pension Scheme and Aviva Ireland Staff Pension Scheme is recognised as an expense in the income statement. The recharge to the operating businesses is recognised as income in the income statement. Full disclosure of the Group's pension schemes is given in the Annual Report and Accounts of Aviva plc.

(T) Held for sale assets

Assets held for disposal as part of operations which are held for sale are shown separately in the statement of financial position. Operations held for sale are recorded at the lower of their carrying amount and their fair value less the estimated selling costs.

Profit or loss on disposal of subsidiaries is only realised on disposal or transfer, and is the difference between the proceeds received, net of transaction costs, and carrying value, as appropriate.

Profit on disposal of subsidiaries		27	90

In 2013, the Company sold its subsidiary, AUSC. As part of this sale, a provision for ongoing tax disputes and litigation fees with the US Inland Revenue Services was made. In 2018, the aggregate development of this provision resulted in a net £80 million gain which was presented as profit on disposal of subsidiary.

		(7)	(9)

6. Employee information

The Company has no employees (2018: nil). All UK employees are employed by fellow subsidiary undertakings of Aviva plc.

Directors' remuneration

The directors were all remunerated by Aviva Employment Services Limited, a fellow subsidiary of Aviva plc for their services to the Group as a whole. They were not remunerated for their services as directors of the Company and the amount of time spent performing their duties is incidental to their roles across the Group. This is consistent with prior years.

Sir Montague was the Non-Executive Chairman of Aviva plc during the year and his remuneration is disclosed in that Company's annual report and accounts.

Messrs Tulloch, Stoddard and Windsor were directors of Aviva plc during the year and their emoluments are disclosed in that company's annual report and accounts

Ms Darlington's and Ms Maillet's remuneration is disclosed within the aggregate of key management compensation in the annual report and accounts of Aviva plc.

8. Auditors' remuneration

The total remuneration payable by the Company, excluding VAT, to its auditors, PricewaterhouseCoopers LLP is as follows:

	2019	2018
	0003	£000
Fees payable to PricewaterhouseCoopers LLP for the statutory audit of the Company's financial statements	59	103
	59	103

The Company is exempt under SI 2008/489 from the obligation to disclose fees in respect of 'Other services' as the Company is a subsidiary of Aviva plc, which prepares consolidated financial statements. Fees paid to the Company's auditors, PricewaterhouseCoopers LLP and its associates for services other than the statutory audit and audit related assurance services of the Company and other Group undertakings are disclosed in the consolidated accounts of Aviva plc.

All fees have been borne by Aviva plc.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

9. Tax

(a) Tax credit to the income statement

(i) The total tax credit comprises:

	2019	2018
	£m	£m
Current tax		
For this year	16	17
Prior period adjustments	53	(2)
Total current tax	69	15
Deferred tax		
Origination and reversal of temporary differences	_	7
Total deferred tax		7
Total tax credited to the income statement	69	22

(b) Tax credited to other comprehensive income

There was no tax credited or charged to other comprehensive income in either 2019 or 2018.

(c) Tax reconciliation

The tax on the Company's profit before tax differs from the theoretical amount that would arise using the tax rate of the United Kingdom as follows:

	Note	2019	2018
		£m	£m
Total profit before tax		2,383	2,822
Tax calculated at standard UK corporation tax rate of 19% (2018: 19%)		(453)	(536)
Adjustment in respect of prior years		53	(2)
Non-assessable dividends		509	618
Impairment of investment in subsidiaries		(39)	(78)
Disallowable expenses		(6)	(6)
Non-taxable profit on sale of subsidiaries		5	17
Movement in unprovided deferred tax		_	9
Total tax credit to the income statement	9(a)	69	22

Finance Act 2016 introduced legislation reducing the UK corporation tax rate from 1 April 2020 to 17%. This reduced rate was used in the calculation of the Company's deferred tax assets and liabilities as at 31 December 2019. In the Budget of 11 March 2020 the UK Government reversed this rate reduction, announcing that the UK corporation tax rate will remain at 19% from 1 April 2020 and this was substantively enacted on 17 March 2020.

As of 31 December 2019, this measure had not been substantively enacted and therefore no impact is reflected in the calculation of the Company's deferred tax assets and liabilities as at 31 December 2019. This measure would increase the Company's deferred tax asset by approximately £1 million.

10. Dividends

		2019	2018
	Note	£m	£m
Ordinary dividends declared and charged to equity in the year:		·-·-	
Interim dividend – £1,115.13 per share, paid on 31 December 2019	18 & 28(c)(v)	1,450	-
Interim dividend – £2,037.99 per share, paid on 31 December 2018	18 & 28(c)(v)	-	2,650
	-	1,450	2,650

The interim dividends were settled by reducing the loan due from the Company's parent, Aviva plc.

At 31 December		19,297	19,485

(b) Material movements

(i) Additions

During 2019, the Company made the following capital contributions to its subsidiaries:

- £5 million to AADPL on 11 January 2019;
- £21 million to AAPL on 6 March 2019;
- £3 million purchase of shares in Aviva Ltd upon sale of NISL on 24 May 2019 (see note 11(b)(ii));
- £103 million acquisition of further shareholding in UKD from UKLH on 31 December 2019 (see note 11(b)(ii)); and
- £233 million capital contribution in AIL upon transfer of UKD on 31 December 2019 (see note 11(b)(ii)).

(ii) Transfer to subsidiaries

On 24 May 2019, the Company transferred its entire shareholding in NISL to its direct subsidiary, Aviva Ltd, for a consideration of £3 million in the form of shares in Aviva Ltd.

On 31 December 2019, the Company acquired from its direct subsidiary, UKLH, the entire shareholding in UKD for £103 million of consideration in the form of an intercompany balance with UKLH. On the same day, the Company transferred its entire shareholding in UKD to its direct subsidiary, AlL for £233 million in consideration for a capital contribution to AlL. This transfer resulted in a profit on disposal of £27 million.

(iii) Impairments

Interest in subsidiaries are tested for impairment of their carrying value when there is an indicator of impairment. They are tested for impairment by comparing the carrying value of the investment to the recoverable value of that investment. Recoverable value is the higher of value in use and fair value. Value in use is calculated as the discounted value of expected future profits of each investment. Fair value is determined based on IFRS net assets, Solvency II net assets or IFRS tangible net asset value multiples underpinned by the quoted market valuation of comparable listed entities.

In 2019 the Company determined that its investments in the following were impaired following management's annual impairment review, resulting in a total impairment of £207 million (2018: £404 million) within the income statement:

- £27 million for AAPL largely driven by the transfer of activities to Singapore Life;
- £18 million for AADPL largely driven by the transfer of activities to Singapore Life;
- £56 million for Aviva International Holdings Limited due to adverse movements in respect of its investment in its Indian business;
- £75 million for Aviva Re due to lower net asset value as the entity is winding down;
- £24 million for Aviva Central Services Limited due to the adoption of the modified respective approach for IFRS 16 within this entity;
- £2 million for Wealthify Limited due to lower net asset value driven by the under-performance of Wealthify Limited; and
- £5 million for NISL due to lower net asset value driven by the under-performance of NISL.

(c) Related undertakings

See note 30 for details of all related undertakings.

Annual Report and Financial Statements 2019

12. Investments in subsidiaries classified as held for sale

Movements in the Company's investments in its subsidiaries held for sale are as follows:

		2019	2018
	Note	£m	£m
Fair value at 1 January		334	375
Disposals		_	(16)
Transfer to subsidiaries		_	(18)
Impairments	4	_	(7)
Fair value at 31 December	<u>-</u>	334	334

Investments in subsidiaries classified as held for sale are comprised of the Company's investment in Friends Provident International Limited (FPIL) of £334 million (2018: £334 million). A sale has been agreed for FPIL and was completed on 16 July 2020.

13. Fair value methodology

(a) Basis for determining fair value hierarchy of financial instruments

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the 'fair value hierarchy' described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1

Inputs to Level 1 fair values are quoted prices (unadjusted) in active markets for identical assets and liabilities that the Company can access at the measurement date.

Level 2

Inputs to Level 2 fair values are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. If the asset or liability has a specified (contractual) term, a Level 2 input must be observable for substantially the full term of the instrument. Level 2 inputs include the following:

- quoted prices for similar assets and liabilities in active market;
- quoted prices for identical or similar assets and liabilities in markets that are not active, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly;
- inputs other than quoted prices that are observable for the asset or liability (for example, interest rates and yield curves observable at commonly quoted intervals, implied volatilities, and credit spreads); and
- market-corroborated inputs

Where broker quotes are used and no information as to the observability of inputs is provided by the broker, the investments are classified as follows:

- where the broker price is validated by using internal models with market observable inputs and the values are similar, the investment is classified as Level 2: and
- in circumstances where internal models are not used to validate broker prices, or the observability of inputs used by brokers is unavailable, the investment is classified as Level 3.

Level 3

Inputs to Level 3 fair values are unobservable inputs for the asset or liability. Unobservable inputs may have been used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e. an exit price at the measurement date from the perspective of a market participant that holds the asset or owes the liability. Unobservable inputs reflect the assumptions the Company considers that market participants would use in pricing the asset or liability. Examples are investment properties, certain private equity investments and private placements.

The majority of the Company's assets and liabilities measured at fair value are based on quoted market information or observable market data. Where estimates are used, these are based on a combination of independent third-party evidence and internally developed models, calibrated to market observable data where possible. Third-party valuations using significant unobservable inputs validated against Level 2 internally modelled valuations are classified as Level 3, where there is a significant difference between the third-party price and the internally modelled value. Where the difference is insignificant, the instrument would be classified as Level 2.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

13. Fair value methodology continued

(b) Changes to valuation techniques

There were no changes in the valuation techniques during the year compared to those described in the 2018 annual report and financial statements.

(c) Comparison of the carrying amount and fair values of financial instruments

Fair value of the following assets and liabilities approximate to their carrying amounts:

- · Receivables and other financial assets
- · Cash and cash equivalents
- · Payables and other financial liabilities

(d) Fair value hierarchy

An analysis of assets and liabilities measured at fair value categorised by fair value hierarchy is given below:

		Level 1	Level 2	Level 3	2019

Annual Report and Financial Statements 2019

Notes to the financial statements continued

13. Fair value methodology continued

(e) Transfers between levels of the fair value hierarchy

For financial instruments that are recognised at fair value on a recurring basis, the Company determines whether transfers have occurred between levels of the fair value hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of the reporting year.

No material transfers occurred between Level 1 and Level 2, Level 1 and Level 3 and Level 2 and Level 3.

(f) Further information on Level 3 financial instruments

The table below shows movements in the Level 3 assets and liabilities measured at fair value:

		Liabilities		
	Equity securities	Other investments	Loans from fellow group companies	Derivative liabilities
	£m	£m	£m	£m
Opening balance at 1 January 2019	51	775	867	(6)

Purchases	6	61	139	_
Disposals	(1)	(8)	-	-
Balance at 31 December 2019	58	790	980	(9)

		Liabilities		
	Equity securities	Other investments	Loans from fellow group companies	Derivative liabilities
	Em	£m	£m	£m
Opening balance at 1 January 2018	26	628	505	
Total net gains / (losses) recognised in the income statement	3	8	(2)	(6)
Purchases	24	139	364	_
Disposals	(2)			
Balance at 31 December 2018	51	775	867	(6)

Sensitivities

Where possible, the Company tests the sensitivity of the fair values of Level 3 liabilities to changes in unobservable inputs to reasonable alternatives. Valuations for Level 3 investments are sourced from independent third parties when available and, where appropriate, validated against internally-modelled valuations, third-party models or broker quotes. Where third-party pricing sources are unwilling to provide a sensitivity analysis for their valuations, the Company undertakes, where feasible, sensitivity analysis on the following basis:

- For third-party valuations validated against internally-modelled valuations using significant unobservable inputs, the sensitivity of the internally modelled valuation to changes in unobservable inputs to a reasonable alternative is determined.
- For third-party valuations either not validated or validated against a third-party model or broker quote, the third-party valuation in its entirety is considered an unobservable input. Sensitivities are determined by flexing inputs of internal models to a reasonable alternative, including the yield, NAV multiple or other suitable valuation multiples of the financial instrument implied by the third-party valuation. For example, for a fixed income security the implied yield would be the rate of return which discounts the security's contractual cash flows to equal the third-party valuation.

On the basis of the methodology outlined above, the Company is able to perform sensitivity analysis on the multiple valuations for £475 million (2018: £481 million) of the Company's Level 3 assets. For these Level 3 assets, changing unobservable valuation inputs to a reasonable alternative would result in a change in fair value by +£32 million (-218: £1,212 million) Level 3 assets for which sensitivity analysis is not provided, it is estimated that a 5% change in valuation downwards of these assets would result in a change in fair value of approximately £68 million (2018: £61 million).

Annual Report and Financial Statements 2019

	1,529	89	(97)	1,521	1,529	91	(78)	1,542

All unrealised gains and losses and impairments on financial investments classified as FVTPL have been recognised in the income statement.

Unrealised gains and losses on financial investments and derivative liabilities reported within payables note 21, classified as FVTPL and recognised in the income statement in the year, were a net gain of £5 million (2018: net gain of £14 million), which comprises unrealised gains of £8 million (2018: gains of £26 million) and unrealised losses of £3 million (2018: losses of £12 million).

The movement in the unrealised gain/loss position reported in the statement of financial position during the year, shown in the table above, includes transfers due to the realisation of gains and losses on disposal and the recognition of impairment losses.

Annual Report and Financial Statements 2019

Expected to be recovered in more than one year		4,050	4,254
	,	4,415	4,380

Loans due from subsidiaries include £980 million of loans mandatorily held at FVTPL (2018: £868 million). All other receivables are held at amortised cost.

16. Ordinary share capital

	2019	2018
	£m	£m
Allotted, called up and fully paid		
1,300,300 (2018: 1,300,300) ordinary shares of £10,000 each	13,003	13,003

Ordinary shares in issue in the Company rank pari passu. All the ordinary shares in issue carry the same right to receive all dividends and other distributions declared, made or paid by the Company.

17. Special Reserve

As part of the ongoing Group restructuring, the Company transferred its entire shareholding in Aviva Insurance Limited at its fair value of £1,348 million to its subsidiary Aviva International Insurance Limited (AII) on 31 December 2007. The consideration was satisfied by the issue of new shares in AII with the nominal value of £1,237 million, and the establishment of a special reserve of £111 million under the group reconstruction relief provisions of section 611 of the Companies Act 2006, which will become distributable upon the assets being disposed of or transferred, realising the value of the assets.

There has been no movement in the special reserve since inception.

18. Retained earnings

		2019	2018
	Note	£m	£m
Balance at 1 January		3,894	3,700

(b) Deferred tax

(i) The balance at 31 December comprises:

	2019	2018
	£m	£m
Deferred tax asset	7	7
Deferred tax asset	7	7
(ii) The net deferred tax balance arises on the following items:		
	2019	2018
	£m	£m
Revaluation of loans due to and from group undertakings	7	7
Net deferred tax asset	7	7
(iii) The movement in the net deferred tax asset was as follows:		
	2019	2018
	£m	£m
Net deferred tax asset at 1 January	. 7	_
Amounts credited to income statement		7
Net deferred tax asset at 31 December	7	. 7

The Company has unrecognised capital losses of £66 million (2018: £66 million) to carry forward indefinitely against future taxable income.

20. Pension obligations

(a) Introduction

In the UK and Ireland, the Group operates a number of defined benefit and defined contribution pension schemes. The material defined benefit schemes are the Aviva Staff Pension Scheme (ASPS), the RAC (2003) Pension Scheme which was retained after the sale of RAC Limited in September 2011, the Friends Provident Pension Scheme (FPPS), which was acquired as part of the Friends Life acquisition in 2015, and the Aviva Ireland Staff Pension Scheme (AISPS).

Formal actuarial valuations normally take place every three years and, where there is a deficit, the Company and the Trustee would agree a deficit recovery plan. The assumptions adopted for triennial actuarial valuations are determined by the Trustee and agreed with the Company and are normally more prudent than the assumptions adopted for IAS19 purposes, which are best estimate.

For ASPS, following the actuarial valuation as at 31 March 2015, a schedule of contributions was agreed, even though the ASPS was fully funded on its technical provisions basis consistent with the requirements of the UK pension regulations. This funding arrangement was reaffirmed following the triennial actuarial valuation as at 31 March 2018. As at 31 December 2019, the ASPS was fully funded.

In 2010 AGH entered into a Deed Poll in favour of senior managers with Unfunded Unapproved Retirement Benefit Scheme (UURBS) entitlements, to give them similar protection to the members of the ASPS. Pursuant to the Deed Poll, AGH would replace all previous Aviva group guarantors of the UURBS and become the sole Group guarantor in relation to all contracts of employment granted to Eligible Employees.

Full details of the Group's pension arrangements are given in note 52 of the Aviva plc Annual report and accounts 2019.

(b) Charges to the income statement

The Company provides a proportion of the deficit funding to the ASPS pension scheme and, where possible, recharges this funding to individual Group operating businesses. The Company provides the full proportion of the deficit funding to the RAC PS and AISPS.

The total costs of funding of the UK pension schemes borne by the Company were:

		2019	2018 £m
	Note	£m	
Total pension costs	4	60	60
Less: amounts recharged	2 & 28(c)(i)	_	(22)
Costs retained in the Company	_	60	38

There were no significant contributions outstanding or prepaid as at either 31 December 2019 or 2018.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

20. Pension obligations continued

(c) Guarantees in respect of UK and Ireland pension schemes

The Company has provided a guarantee in respect of the three UK schemes noted in section (a) above, and the AISPS covering the employing companies' performance obligations up to the full cost of buying out the entire scheme liabilities with a third party insurance company should this be necessary. It has also provided a guarantee for the UURBS entitlements noted in section (a).

21. Payables and other financial liabilities

23. Contingent liabilities and other risk factors

The Company has guaranteed and indemnified the obligations of certain other Group companies. In the opinion of the directors, no material loss will arise in respect of these guarantees.

The Company has also provided guarantees for the ASPS, RAC PS, FPPS and AISPS. See note 20 for further details.

In addition, in line with standard business practice, the Company has given guarantees, indemnities and warranties in connection with disposals in recent years of subsidiaries outside the group. In the opinion of the directors, no material loss will arise in respect of these guarantees, indemnities and warranties.

25. Risk management

(a) Risk management framework

The Group operates a risk management framework that forms an integral part of the management and Board processes and decision-making framework across the Group, including the Company and its subsidiaries. The key elements of the risk management framework comprise risk appetite; risk governance, including risk policies and business standards, risk oversight committees and roles and responsibilities; and the processes the Group uses to identify, measure, manage, monitor and report (IMMMR) risks, including the use of risk models and stress and scenario testing.

For the purposes of risk identification and measurement, and aligned to the Group's risk policies, risks are usually grouped by risk type: credit, market, liquidity, life insurance, general insurance, asset management and operational risk. Risks falling within these types may affect a number of metrics including those relating to statement of financial position strength, liquidity and profit. They may also affect the performance of the products the Group delivers to its customers and the service to its customers and distributors, which can be categorised as risks to brand and reputation or as conduct risk.

Aviva Group Holdings Limited

Annual Report and Financial Statements 2019

Notes to the financial statements continued

Risk management continued

Risk management framework continued

To promote a consistent and rigorous approach to risk management across all businesses, the Group has a set of risk policies and business standards which set out the risk strategy, appetite, framework and minimum requirements for the Group's worldwide operations. The business chief executive officers make an annual declaration supported by an opinion from the business chief risk officers that the system of governance and internal controls was effective and fit for purpose for their business throughout the year.

A regular top-down key risk identification and assessment process is carried out by the risk function. This includes the consideration of emerging risks and is supported by deeper thematic reviews. The risk assessment processes are used to generate risk reports which are shared with the relevant risk committees.

Risk models are an important tool in the measurement of risks and are used to support the monitoring and reporting of the risk profile and in the consideration of the risk management actions available. The Group carries out a range of stress (where one risk factor, such as equity returns, is assumed to vary) and scenario (where combinations of risk factors are assumed to vary) tests to evaluate their impact on the business and the management actions available to respond to

the conditions envisaged.

Roles and responsibilities for risk management in the Group, including the Company, are based around the 'three lines of defence model' where ownership for risks takened at lilevels in the Group. Line management in the business is accountable for risk management, including the implementation of the risk management framework and embedding of the risk culture. The risk function is accountable for quantitative and qualitative oversight and challenge of the risk identification, measurement, monitoring, management and reporting processes and for developing the risk management framework. Internal Audit provides an independent assessment of the risk management framework and internal control processes.

Board oversight of risk and fisk management across the Group is maintained on a regular basis through the Aviva plc Risk Committee and Customer, Conduct and Reputation Committee. The Aviva plc Board has overall responsibility for determining risk appetite, which is an expression of the risk the business is willing to take. Risk appetites are set relative to capital and liquidity at Group and in the business units.

The Group's position against risk appetite is monitored and reported to the Aviva plc Board on a regular basis. Long-term sustainability depends upon the protection of franchise value and good customer relationships. As such, the Group has a risk preference that we will not accept risks that materially impair the reputation of the Group and requires that customers are always treated with integrity. The oversight of risk and risk management at the Group level is supported by the Asset Liability Committee (ALCO), which focuses on insurance business and financial risks, and the Operational Risk Committee (ORC), which focuses on

Further information on the types and management of specific risk types is given in sections (b) to (i) below. The risks to the Company's subsidiaries are managed through the risk management framework described above. Sections (b) to (i) below are limited to the specific risks of the Company.

operational and reputational risks. Similar committee structures with equivalent terms of reference exist in the business units.

(b) Credit risk

Credit risk the risk of finanges in earlies are suited the default or failure of third parties to meet their payment obligations to the Company, or variations in market values as a result of hanges in experiations related to these risks. Credit risk is taken so that the Company can provide the returns required to satisfy policyholder liabilities and to generate returns to the Company's shareholders.

The Company's approach to managing credit risk ecognises that there is a risk of adverse financial impact resulting from fluctuations in credit quality of third parties including elebalt, rating transition and credit spread movements. The Company's credit risks arise principally through exposures to debt securities, structured asset investments, bank deposits, enrative and securities financing counterparties, and Group counterparties to bank deposits, inter-company loans and receivables, and indirectly by guaranteeing the obligations of certain other Group companies.

The Group manages its credit risk at business unit and Group level. All business units' management of credit risk includes implementation of credit risk management processes (including limits frameworks), the operation of specific risk management committees, and detailed reporting and monitoring of exposures against pre-established risk criteria.

Financial exposures to Group companies

The Company has significant financial exposure to amounts due from fellow Group companies. The credit risk arising from Group counterparties falling to meet all or part of their obligations is considered remote. Due to the nature of the interagroup loans, the level of collateral provided and the fact that these loans are not traded, the Company does not provide for fluctuations in market value caused by changing perceptions of the credit worthiness of such counterparties. As at the reporting date, there are no material expected credit losses recognised in relation to loans due from subsidiaries held at amortised cost.

(ii) Financial exposures by credit ratings

Financial assets, other than equities, are graded according to current external credit ratings issued. AAA is the highest possible rating, Investment grade financial assets are classified within the range of AAA to BBB ratings. Financial assets which fall outside this range are classified as sub-investment grade. The following table provides information regarding the aggregated credit risk exposure of the Company for financial assets with external credit ratings excluding assets. "held for sale": "Not rated" assets capture assets not rated by external ratings agencies. The majority of non-rated debt securities are allocated an internal rating using a methodology consistent with that adopted by an external rating agency and are considered to be of investment grade credit quality. The credit quality of receivables and other financial assets is monitored by the Company, and provisions for impairment are made for irrecoverable amounts. In assessing whether assets are impaired, due consideration is given to the factors outlined in accounting policy I.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

25. Risk management continued

(b) Credit risk continued

31 December 2019	AAA	AA	_				
		AM	Α	888	Below BBB	Not-rated	£m
Debt securities	_	100%	_	_			515
Derivative financial assets	_	_	_	_	_	100%	21

							Carrying value
31 December 2018	AAA	AA	A	888	Below BBB	Not-rated	£m
Debt securities	_	100%	_		_	_	517
Derivative financial assets	_	_	_	_	_	100%	76

An assessment is carried out over all categories of financial asset to determine to what extent assets held can be considered to have low credit risk as at the reporting date. A low credit risk is demonstrated where the borrower has a strong capacity to meet its contractual cash flow obligations in the near term. In making this assessment, the Company makes use of both internal and external credit risk ratings, along with other qualitative and quantitative factors where external ratings are not available. Where a financial asset is deemed to have low credit risk, it is assumed that the credit risk on the respective assets has not increased significantly since initial recognition.

A financial asset is considered to be in default where contractual payments are past due, and there is objective evidence that the counterparty will be unable to subsequently meet their payment obligations. A financial asset is written off only when all other available measures have been taken to recover amounts due. During the period, none of the cashflows associated with any of the Company's financial assets have been modified or renegotiated (2018: none).

(iii) Other investments

Other investments include unit trusts and other investment vehicles; derivative assets, representing positions to mitigate the impact of adverse market movements; and other financial assets includes deposits with credit institutions.

The credit quality of the underlying debt securities within investment vehicles is managed by the safeguards built into the investment mandates for these funds which determine the funds' risk profiles. The asset quality of unit trusts and other investment vehicles is monitored against set limits.

A proportion of the assets underlying these investments are represented by equities and so credit ratings are not generally applicable. Equity exposures are managed against agreed benchmarks that are set with reference to overall appetite for market risk.

(iv) Calculation of expected credit losses

Expected credit losses on material receivables and other assets are calculated with reference to the Company's historical experience of losses, along with an analysis of payment terms. Short term financial assets (where all amounts are receivable within twelve months from the reporting date) do not generally attract an expected credit loss charge, unless there is objective evidence that losses are likely to arise.

The Company has no financial assets which are categorised such that lifetime expected credit losses are calculated or which are deemed to be credit impaired at the reporting date. The Company has not purchased or originated any credit-impaired financial assets as at the reporting date.

The Company makes use of the simplified approach when calculating expected credit losses on trade receivables which don't include a significant financing component, and therefore calculates expected credit losses over the lifetime of the instrument in question. As at the reporting date, no lifetime expected credit losses have been recognised in relation to trade receivables.

Receivables, other financial assets and financial investments of £5,936 million (2018: £5,922 million) are neither past due nor impaired and are comprised of loans and amounts due from other Group companies and financial investments.

(v) Modification of contractual cash flows that have not resulted in derecognition

There have been no significant modifications of contractual cash flows on any of the Company's financial assets during the period.

(vi) Derivative credit exposures

The Group is exposed to counterparty credit risk through derivative trades. This risk is generally mitigated through holding collateral for most trades. Residual exposures are captured within the Group's credit management framework.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

25. Risk management continued

(b) Credit risk continued

(vii) Impairment of financial assets

In assessing the extent to which expected credit losses should be recognised, due consideration is given to the factors outlined in accounting policy I. The following table provides information regarding the carrying value of financial assets subject to impairment testing that have been impaired and the ageing of those assets that are past due but not impaired.

	_	Financ	ial assets that are past	due but not impai	red		2019
Neither past due nor impaired	Neither past due nor impaired £m	0-3 months	3-6 months	6 months- 1 year	Greater than 1 year	Financial assets that have been impaired	Carrying value
		£m	£m	£m	£m	£m	£m
Receivables and other financial assets	4,415	-			_	_	4,415
		Finan	cial assets that are past of	lue but not impaire	d		2018

		Fina	ncial assets that are pa	st due but not impaired	1		2018
	Neither past due nor impaired	0-3 months	3-6 months	6 months- 1 year	Greater than 1 year	Financial assets that have been impaired	Carrying value
	£m	£m	£m	£m	£m	£m	£m
Receivables and other financial assets	4,380			_			4,380

Receivables and other financial assets carried at amortised cost include loans due from parent of £3,045 million (2018: £3,045 million) and amounts due from other Group companies of £275 million (2018: £398 million).

The Company's maximum exposure to credit risk of financial assets, without taking collateral into account, is represented by the carrying amount of assets included in the statement of financial position plus financial guarantees given to other Group companies (see note 23), and funding guarantees provided to the ASPS, RAC PS, FPPS, AISPS and UURBS (see note 20).

(c) Market risk

Market risk is the risk of adverse financial impact resulting directly or indirectly from fluctuations in interest rates, inflation and foreign currency exchange rates. Market risk arises due to fluctuations in both the value of liabilities and the value of investments held. The Company seeks some market risks as part of its investment. However, it has limited appetite for interest rate risk because it does not believe interest rate risk is adequately rewarded.

The management of market risk is undertaken at business unit and at Group level. Businesses manage market risks locally using the Group market risk framework and within local regulatory constraints. Group Capital is responsible for monitoring and managing market risk at Group level and has established criteria for matching assets and liabilities to limit the impact of mismatches due to market movements.

The most material types of market risk that the Company is exposed to are described below.

(i) Equity price risk

The Company is subject to direct equity price risk arising from changes in the market values of its equity securities portfolio.

The Company continues to limit its direct equity exposure in line with its risk preferences. The Company's investment limits and investment regulations require that it holds diversified portfolios of assets thereby reducing exposure to individual equities. The Company does not have material holdings of unquoted equity securities.

Equity risk is also managed using a variety of derivative instruments, including futures and options.

Sensitivity to changes in equity prices is given in section (f) 'risk and capital management' below.

(ii) Interest rate risk

Interest rate risk arises primarily from the Company's loans with fellow Group companies. The interest received and paid on the loans is linked to LIBOR, CDOR or EURIBOR benchmark rates and so a change in any of those rates would impact the level of interest income earned and interest expense paid by the Company.

Sensitivity of profit before tax and shareholder funds to changes in these benchmark interest rates is given in section (f) 'risk and capital management' below.

(iii) Currency risk

The Company has exposure to currency risk primarily through Euro and Canadian Dollar denominated loans due to and from its parent and subsidiaries, foreign exchange derivatives and its investment in overseas subsidiaries principally denominated in Euro. The Company has a low appetite for currency risk and actively manages the position using derivatives where appropriate.

The Company's total equity deployment by currency (after impact of hedging) is set out below. Some of the Company's Euro denominated loans have been designated as a fair value hedge of its investment in overseas subsidiaries (see note 11). In addition, the Company uses foreign currency forwards to manage planned Euro dividend distributions from its subsidiaries (albeit no forward contracts were in-force at 31 December 2019) and Euro denominated equity options, which are sensitive to changes in foreign currency exchange rates.

Annual Report and Financial Statements 2019

	GBP	EUR	CAD	Total
31 December 2018	£m	£m	£m	£m
Total equity	18,611	(58)	78	18,631

(iv) Derivatives risk

Derivatives are used for efficient investment management, and risk hedging purposes. Derivatives are used within policy guidelines agreed by the Board of Directors and activity is overseen by the Group Capital and Group Risk teams, which monitor exposure levels and approve large or complex transactions.

The Company applies strict requirements to the administration and valuation processes it uses, and has a control framework that is consistent with market and industry practice for the activity that is undertaken.

(d) Liquidity risk

Liquidity risk is the risk of not being able to make payments as they become due because there are insufficient assets in cash form.

The Company seeks to ensure that it maintains sufficient financial resources to meet its obligations as they fall due.

The Company has set its investment strategy to ensure it has sufficient liquid funds to meet its expected obligations as they fall due. In extreme circumstances, the Company would approach the Company's parent, Aviva plc, for additional short-term borrowing whilst the Company liquidated other assets.

Aviva plc maintains significant undrawn committed borrowing facilities (£1,650 million) from a range of highly-rated banks to mitigate this risk further.

The Company's liquidity position and financing of its longer-term loan commitments is dependent on the payment of dividends by subsidiaries, which may be subject to regulatory approval.

Maturity analyses

The following tables show the maturities of the Company's liabilities, and of the financial assets held to meet them. A maturity analysis of the contractual amounts payable for payables, other financial liabilities and derivatives is given in notes 21, 22 and 26, respectively.

(i) Analysis of maturity of liabilities

The following table shows the Company's financial liabilities analysed by duration:

				2019

	_	6,685	1,482	3,451	366	1,386

The assets above are analysed in accordance with the earliest possible redemption date of the instrument at the initiation of the Company. Where an instrument is transferable back to the issuer on demand, such as a unit trust or similar type of investment vehicle, it is included in the 'On demand or within 1 year' column. Debt securities with no fixed contractual maturity date are generally callable at the option of the issuer at the date the coupon rate is reset under the contractual terms of the instrument. The terms for resetting the coupon are such that the Company expects the securities to be redeemed at this date, as it would be uneconomic for the issuer not to do so, and for liquidity management purposes the Company manages these securities on this basis. The first re-pricing and call date is normally ten years or more after the date of issuance. Most of the Company's investments in equity securities and debt securities are market traded and therefore, if required, can be liquidated for cash at short notice in unstressed circumstances.

(e) Operational risk

Operational risk is the risk of direct or indirect loss, arising from inadequate or failed internal processes, people and systems, or external events including changes in the regulatory environment.

The Group has limited appetite for operational risk and aims to reduce these risks as far as is commercially sensible.

The Company's Operational Risk and Control Management Framework integrates the results of the risk identification and assurance activities carried out across the Company's three lines of defence. Operational risks are initially identified and assessed against implemented controls. Residual risk, outside tolerance, is given prioritised management action to reduce it within tolerance.

Operational risk is quantitatively assessed on the basis of financial loss and misstatement. Potential reputational and conduct impacts are qualitatively assessed. Management use key indicator data to help monitor the status of the risk and control environment. They also identify and capture loss events, taking appropriate action to address actual control breakdowns and promote internal learning.

(f) Risk and capital management

The Company uses a number of sensitivity test-based risk management tools to understand the volatility of earnings, the volatility of capital requirements and to manage its capital more efficiently. Risk based capital models are used to support the quantification of risk under the Solvency II framework. Management undertakes a quarterly review of risk, the output from which is a key input into the risk-based capital assessments. Primarily, a risk-based capital model and scenario tests are used. Sensitivities to economic and operating experience are regularly produced on financial performance measurements to inform the Group's decision making and planning processes, and as part of the framework for identifying and quantifying the risks to which the Company is exposed.

(f) Risk and capital management continued

(i) Sensitivity results

Some results of sensitivity testing for the Company's business are set out below. For each sensitivity the impact of a change in a single factor is shown, with other assumptions left unchanged.

Sensitivity factor	Description of sensitivity factor applied
Interest rate and investment return	The impact of a change in market interest rates by ± 1%
Equity market values	The impact of a change in equity/property market values by ± 10%
Credit spreads	The impact of a 0.5% increase in credit spreads over risk free interest rates on corporate bonds and other non-sovereign credit assets.
Foreign exchange rates	The impact of a change in the GBP: Foreign currency exchange rate of $\pm 10\%$, with a positive change representing a strengthening of pound sterling.

The above sensitivity factors are applied using statistical models. The impacts are shown in tables below:

	· · · · · · · · · · · · · · · · · · ·					
						2019
	Interest rates 1%	Interest rates -1%	Credit spreads 0.5%	Credit spreads -0.5%	Equity 10%	Equity -10%

						2018
			Euro 10%	Euro -10%	CAD 10%	CAD -10%
			£m	£m	£m	£m
Impact on profit before tax			80	(98)	(9)	11
Impact on shareholder's equity			64	(78)	(7)	9

Limitations of sensitivity analysis

The sensitivity analyses do not take into account that the assets and liabilities are actively managed and may vary at the time that any actual market movement occurs. For example, the Company's financial risk management strategy aims to manage the exposure to market fluctuations. As investment markets move past various trigger levels, management actions could include selling investments, changing investment portfolio allocation and taking other protective action.

Other limitations in the above sensitivity analyses include the use of hypothetical market movements to demonstrate potential risks that only represent the Company's view of possible near-term market changes that cannot be predicted with any certainty, and the assumption that all interest rates move in an identical fashion.

Assets are held at fair value in accordance with the relevant accounting policy. Other than investments in subsidiaries, the majority of such assets are valued based on quoted market information or observable market data and the remaining assets recorded at fair value are based on estimates. Where estimates are used, these are based on a combination of independent third party evidence and internally developed models calibrated to market observable data where possible.

The Company's capital risk is determined with reference to the requirements of the Company's stakeholders. In managing capital, the Company seeks to maintain sufficient, but not excessive, financial strength to support the payment of interest due on loans and the requirements of other stakeholders. The sources of capital used by the Company are equity shareholders' funds.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

25. Risk management continued

(g) Risks relating to staff pension schemes

In addition to credit risk, the funding guarantees provided to the ASPS, FPPS, RAC PS, UURBS and AISPS expose the Company indirectly to risks affecting the value of the assets and liabilities of these schemes, which can be summarised as follows:

- Market risks affecting the valuation of pension scheme assets, being interest rates, equity prices, property prices and foreign exchange rates,
- Credit and market risks affecting the average rate yield on AA-rated corporate bonds used to discount pension scheme liabilities.
- Risks affecting assumptions used to calculate pension scheme liabilities, such as retail/consumer price inflation and mortality assumptions. Mortality assumptions are subject to longevity risk.

See note 20 for further information on ASPS, FPPS, RAC PS and AISPS and the funding guarantees provided by the Company to them.

(h) Exit of the UK from the EU & UK-EU Free Trade Agreement (FTA) negotiations

In preparing for the end of the transition period on 31 December 2020 under the UK-EU withdrawal agreement, we have already taken the operational measures irrespective of the outcome of UK-EU Free Trade Agreement negotiations. However, beyond 2020 the consequences of the UK's withdrawal from the EU on future financial services regulation and the UK economy will require careful monitoring.

(i) Coronavirus

On 11 March 2020, the World Health Organization declared the outbreak of a strain of novel coronavirus disease, COVID-19, a global pandemic. Governments in affected areas have imposed a number of measures designed to contain the outbreak, including business closures, travel restrictions, stay at home orders and cancellations of gatherings and events. The spread of COVID-19 has resulted in an economic downturn in jurisdictions in which the Company operates and the global economy more widely, as well as causing increased volatility and declines in financial markets. If the pandemic is prolonged, or further diseases emerge that give rise to similar effects, the adverse impact on the global economy could be deepened and result in further declines in financial

The Company's balance sheet exposure has been reviewed and actions are being taken to further reduce the sensitivity to economic shocks. The Company continues to maintain a positive net asset value. Since the onset of the pandemic the Company has remained operational, with key activities such as cash payments and transaction processing being maintained. Notwithstanding the Company's strong balance sheet position, deterioration in the situation could have further adverse implications arising from the impacts on financial markets, insurance exposures and operations. As the situation is rapidly evolving it is not practicable to quantify the potential financial impact of the outbreak on the Company at this stage.

26. Derivative financial instruments and hedging

The Company uses a variety of derivative financial instruments, including both exchange traded and over-the-counter instruments, in line with our overall risk management strategy. The objectives include managing exposure to price, foreign currency and/or interest rate risk on existing assets or liabilities, as well as planned or anticipated investment purchases.

In the narrative and tables below, figures are given for both the notional amounts and fair values of these instruments. The notional amounts reflect the aggregate of individual derivative positions on a gross basis and so give an indication of the overall scale of the derivative transaction. They do not reflect current market values of the open positions. The fair values represent the gross carrying values at the year end for each class of derivative contract held (or issued) by the Company.

The fair values do not provide an indication of credit risk, as many over-the-counter transactions are contracted and documented under International Swaps and Derivatives Association (ISDA) master agreements or their equivalent. Such agreements are designed to provide a legally enforceable set-off in the event of default, which reduces credit exposure. In addition, the Company has collateral agreements in place with the relevant counterparties. See note 27 for further information on collateral and net credit risk of derivative instruments.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

(b) Instruments qualifying for hedge accounting

The Company has formally assessed and documented the effectiveness of its instruments qualifying for hedge accounting.

The Company's hedge activity at 31 December 2019 was as follows:

Fair value hedges

The Company has EUR denominated investments in overseas subsidiaries which expose the Company to foreign currency risk. To reduce its exposure to foreign currency risk, the Company has designated its foreign currency denominated loans as a fair value hedge of the foreign exchange exposure in relation to these subsidiaries. The matching currency denomination of the investments in subsidiaries and the loan liabilities leads to an economic relationship, where a change in the value of the asset, as a result of changes in the foreign exchange rate, will be offset directly by an opposite change in the value of the liability.

The value of the EUR denominated hedged items are designated in a hedge relationship in such a way that the value hedged matches exactly the nominal amounts of the hedging instrument being used. The hedge ratio is therefore 1:1 and the hedge is fully effective. Foreign exchange gains of £137 million (2018: losses of £27 million) on translation of the debt to sterling at the statement of financial position date have been offset by a release of foreign exchange losses of £137 million (2018: gains of £27 million) on investments in subsidiaries.

Annual Report and Financial Statements 2019

Notes to the financial statements continued

26. Derivative financial instruments and hedging continued

(b) Instruments qualifying for hedge accounting continued

At inception, the nature of the economic relationship is such that the fair value hedge is expected to be highly effective, however, ineffectiveness or discontinuation of the hedging relationship may arise should a hedged item be sold during the period or where a hedging instrument matures without the availability of a replacement instrument (see note 5).

Other risks associated with the Company's investments in overseas subsidiaries are not covered by this hedging arrangement.

The following hedging instruments were placed in a fair value hedge as at the period end:

						2019		2018
				Nominal amount	Carrying amount	Change as a result of FX movement	Carrying amount	Change as a result of FX movement
Hedging instrument	Currency	Maturity date	Note	€m	£m	£m	£m	£m

•		2,360	(39)	(137)	2,497	98	27

No ineffective loss was recognised in profit or loss in either 2019 or 2018.

(c) Collateral

Certain derivative contracts, primarily interest rate and currency swaps, involve the receipt or pledging of cash and non-cash collateral. The amounts of cash collateral payable are included in note 21.

27. Financial assets and liabilities subject to offsetting, enforceable master netting arrangements and similar agreements

(a) Offsetting financial assets and liabilities and related net exposures

Financial assets and liabilities are offset in the statement of financial position when the Company has a currently enforceable legal right to offset and has the intention to settle the asset and liability on a net basis, or to realise the asset and settle the liability simultaneously.

The Company mitigates credit risk in derivative contracts by entering into collateral agreements, where practical, and in International Swaps and Derivatives Association (ISDA) master netting agreements to facilitate the Company's right to offset credit risk exposure. The credit support agreement will normally dictate the threshold over which collateral needs to be pledged by the Company or its counterparty.

Derivative transactions requiring the Company or its counterparty to post collateral are typically the result of over-the-counter derivative trades, comprised mostly of interest rate swaps, currency swaps and credit swaps. These transactions are conducted under terms that are usual and customary to standard long-term borrowing, derivative, securities lending and securities borrowing activities.

In other arrangements, securities are exchanged for other securities. The collateral received must be in a readily realisable form such as listed securities and is held in segregated accounts. Transfer of title always occurs for the collateral received. In many instances, however, no market risk or economic benefit is exchanged and these transactions are not recognised on the statement of financial position in accordance with our accounting policies, and accordingly not included in the tables below. If risks and benefits are exchanged then the transactions are recognised on the statement of financial position and reflected in the tables below.

Annual Report and Financial Statements 2019

Total financial assets	76	_	76	(21)	55
Financial liabilities					
	(11)	_	(11)		(11)

Derivative assets are recognised as 'Derivative financial instruments' in note 15, while derivative liabilities are recognised as such in note 21.

(b) Collateral

In the tables above, the amounts of assets or liabilities presented in the statement of financial position are offset first by financial instruments that have the right of offset under master netting or similar arrangements with any remaining amount reduced by the amount of cash and securities collateral. The actual amount of collateral may be greater than amounts presented in the tables above in the case of over collateralisation.

Of the collateral received by the Company, none can be sold or re-pledged in the absence of default in 2019 or 2018.

The level of collateral held is monitored regularly, with further collateral obtained where this is considered necessary to manage the Company's risk exposure.

28. Related party transactions

The Company has the following transactions with related parties which include parent companies, subsidiaries, and fellow Group companies in the normal course of business.

(a) The Company had the following related party transactions

(i) Loans receivable

Loans due from parent

On 3 September 2013 a loan facility was put in place with the Company's parent which is an unsecured loan accruing interest at 75 basis points above 6 month LIBOR and with maturity date of 3 September 2018, which was subsequently extended to 31 December 2023. As at the Statement of Financial Position date, the loan balance outstanding was £3,045 million (2018: £3,045 million).

Loans due from subsidiaries

The Company provided the following loans to its subsidiary, Aviva Investors Holdings Limited:

- 16 December 2014, an unsecured loan of £65 million, accruing interest at a fixed rate of 5% per annum. As at the statement of financial position date, the total loan balance outstanding was £nil as this loan was fully repaid on 16 December 2019 (2018: £65 million).
- On 30 November 2015, an unsecured loan of £25 million, accruing interest at a fixed rate of 5.5% per annum with settlement expected to be received at
 maturity in November 2026. As at the statement of financial position date, the total loan balance outstanding was £25 million (2018: £25 million).

On 18 December 2015, the Company provided an unsecured loan of £250 million to its subsidiary, Aviva Life Holdings UK Limited. The loan accrues interest at 164 basis points above 6 month LIBOR with settlement expected to be received at maturity in December 2020. As at the statement of financial position date, the total amount drawn down at 2019 was £250 million (2018: £250 million).

Annual Report and Financial Statements 2019

Notes to the financial statements continued

28. Related party transactions (continued)

(a) The Company had the following related party transactions (continued)

The Company provided the following loans to its subsidiary, Aviva Participations SA:

- On 8 December 2015, the Company provided an unsecured, perpetual loan of £250 million. The loan accrues interest at 453 basis points above 6 month EURIBOR. As at the financial position date, the total loan balance outstanding was £21.2 million (2018: £225 million).
- On 16 August 2019, the Company provided an unsecured, perpetual loan of £120 million. The loan accrues interest at 405 basis points above 6 months EURIBOR. As at the financial position date, the total loan balance outstanding was £127 million.

On 27 June 2016, the Company provided an unsecured loan of CAD 480 million to its subsidiary, Aviva Insurance Limited. The loan accrues interest of 474 basis points above 6 month CDOR with settlement expected to be received at maturity on 26 June 2046. As at the statement of financial position date, the total amount drawn down was £280 million (2018: £277 million).

On 19 March 2018, the Company provided an unsecured loan of CAD 100 million to its subsidiary, Aviva Canada Inc. The loan accrues interest of 50 basis points above 3 month CDOR. Settlement was received at maturity on 19 March 2019 and therefore at the statement of financial position date, the total amount drawn down was £nil (2018: £57 million).

On 8 Movember 2018, an unsecured, perpetual loan of £356 million was transferred from the Company's subsidiary Friends Life Holdings plc to the Company at its fair value of £364 million. The loan accrues interest at a fixed rate of 10.05% per annum. As at the statement of financial position date, the total fair value loan balance was £367 million (2018: £367 million).

The maturity analysis of the related party loans receivable is as follows:

3.00%	%8£.£	Effective interest rate
4,311	4,300	_
£69	007	mrət bəxfi o <i>M</i>
399	302	Over 5 years
3,295	3,045	Z-5 years
LS	720	Within 1 year
шз	m3	
2078	5019	

The interest received on these loans shown in the income statement is £173 million (2018: £136 million), which comprises interest income due from subsidiaries of £2.0 million (2018: £49 million). See note 2.

(ii) Loans payable

Loans due to parent

On J. January 2013, Aviva International Holdings Limited, a subsidiary, transferred the following loan liabilities with the Company's parent Aviva plc by way of in specie dividend to the Company at their fair value of £1,610 million:

an unsecured loan of £250 million (fair value £329 million) entered into on 7 May 2003. The loan accrues interest at a fixed rate of 5.5% with settlement to be paid at maturity in May 2033. As at the statement of financial position date, the total amount drawn down on the facility was £255 million (2018: £273million).

On 23 December 2014, the Company's parent, Aviva plc, provided an unsecured revolving credit facility of £2,000 million to the Company with an initial maturity date of 3 September 2018, which was subsequently extended to 31 December 2023. The facility accrues interest at 75 basis points above 6 month LIBOR. As at the statement of financial position date, the total amount drawn down on the facility was £1,563 million (2018: £1,752 million).

On 27 June 2016, the Company's parent, Aviva plc, provided an unsecured loan of CAD 446 million to the Company with a maturity date of 27 June 2046. The loan accrues interest at 348 basis points above 6 month CDOR. As at the statement of financial position date, the total amount drawn down was £260 million (2018: £256 million).

On 30 September 2016, the Company's parent, Aviva plc, provided the following unsecured loans:

- 6850 million to the Company with a maturity, date of 30 September 2021. The loan accrues interest at 115 basis points above 12 month EURIBOR with settlement to be paid at maturity. As at the statement of financial position date, the total amount drawn was £661 million (2018: £700 million).
- 6650 million to the Company with a maturity date of 5 July 2023. The loan accrues interest at a fixed rate of 1.54% with settlement to be paid at maturity.

 As at the statement of financial position date, the total amount drawn down on the facility was £551 million (2018: £584 million).
- €700 million to the Company with a maturity date of 3 July 2024. The loan accrues interest at a fixed rate of 1.64% with settlement to be paid at maturity.

 As at the statement of financial position date, the total amount drawn down on the facility was £593 million (2018: £628 million).
- E900 million to the Company with a maturity date of 4 December 2025. The loan accrues interest at a fixed rate of 1.74% with settlement to be paid at maturity. As at the statement of financial position date, the total amount drawn down on the facility was £762 million (2018: £808 million).

On 21 November 2016, the Company's parent, Aviva plc, provided an unsecured loan €500 million to the Company with a maturity date of 27 October 2023. The loan accrues interest at a fixed rate of 1.75% with settlement to be paid at maturity. As at the statement of financial position date, the total amount drawn was £424 million (2018: £449 million).

bb

Annual Report and Financial Statements 2019

Notes to the financial statements continued

28. Related party transactions (continued)

(a) The company had the following related party transactions (continued)

Loans due to subsidiaries

On 22 December 2008, Aviva Annuity UK Limited, the Company's indirect subsidiary, provided an unsecured loan of £87 million to the Company. This loan was transferred to UKLAP via a Part VII Transfer on 1 January 2017 prior to the dissolution of Aviva Annuity UK Limited. The loan accrues interest at a fixed rate of 8.2% with settlement to be paid at maturity in December 2028. As at the statement of financial position date, the total loan balance outstanding was £87 million (2018: £87 million).

On 1 January 2013, the Company entered into a loan of £5,870 million from Aviva Insurance Limited, a subsidiary. The loan is secured on the UK Life business and certain non-UK operations of the Group, and has a final maturity date of December 2042. Interest accrued at 308 basis points above 12 month LIBOR until 31 December 2017, after which interest accrues at 240 basis points above 12 month LIBOR until the next reset date on 31 December 2022. Effective in 2017, minimum annual repayments were amended to £50 million until December 2026, with no rights of deferral. During the year, the loan balance has been reduced by £51 million to £1,268 million at 31 December 2019 (2018: £1,319 million). The reduction was the annual repayment in cash of £50 million plus a £1 million payment in specie.

On 1 January 2013, Aviva International Insurance Limited, a subsidiary, provided a secured loan facility to the Company of £15,942 million. The loan accrues interest at 12 month LIBOR plus a credit margin, currently at 195 basis points, with settlement to be paid in cash at maturity in December 2042. The credit margin is reset every 5 years, and was reset on 31 December 2017. This follows a fair value of assessment of the credit risk of the Company and the terms and conditions of the loan agreement. The next reset of the credit margin is due on 31 December 2022. The aggregate interest rate moves each year with changes in the risk free rate (12 month LIBOR), and with the change in credit margin the effective interest rate from 1 January 2018 will be 2.72%. As at the statement of financial position date, the loan balance outstanding was £200 million (2018: £200 million). This facility has been secured by a legal charge against the ordinary share capital of Aviva Insurance Limited.

On 25 March 2015, Aviva International Holdings Limited, the Company's subsidiary, provided an unsecured revolving credit facility of £300 million to the Company. This facility accrues interest at 65 basis points above 12 month LIBOR, with settlement expected to be received in cash at maturity in April 2020. As at the statement of financial position date, the total drawn down on the facility is £14 million (2018: £16 million).

On 25 March 2015, Aviva Europe SE, the Company's subsidiary, provided an unsecured revolving credit facility of £300 million to the Company. This facility accrues interest at 65 basis points above 12 month LIBOR, with settlement expected to be received in cash at maturity in April 2020. As at the statement of financial position date, the total drawn down on the facility at 2019 was £nil (2018: £nil).

Aviva Life & Pensions UK Limited, the Company's indirect subsidiary, provided the following loans to the Company:

- On 18 December 2015, an unsecured loan of £250 million accruing interest at 144 basis points above 6 month LIBOR with settlement to be paid at maturity in December 2020. As at the statement of financial position date, the total loan balance outstanding is £250 million (2018: £250 million).
- On 9 January 2017, an unsecured loan of £150 million accruing interest at a fixed rate of 3.26% with settlement to be paid at maturity, initially in January 2019 and subsequently extended to January 2022. As at the statement of financial position date, the total loan balance outstanding is £150 million (2018: £150 million).

The maturity analysis of the related party loans payable is as follows:

	2019	2018
	£m	£m
Within 1 year	314	50
1-5 years	4,904	4,100
Over 5 years	1,820	3,322
	7,038	7,472
Effective interest rate	2.1%	2.37%

The interest paid on these loans shown in the Income Statement is £155 million (2018: £150 million), see note 4:

(b) Financial investments

On 8 December 2015, Aviva Participations SA issued €700 million Tier 1 subordinated loan notes to the Company. As at the financial position date, the total loan balance outstanding was £593 million (2018: £628 million). The interest received from these loan notes shown in the income statement is £38 million (2018: 39 million).

On 31 May 2018, the Company transferred its entire shareholding in Friends First Life Assurance Company Limited to its indirect subsidiary, UKLAP for a consideration of £114 million Tier 1 subordinated loan notes issued by UKLAP to the Company. The interest received from these loan notes shown in the income statement is £6 million (2018: £4 million), which includes £1 million (2018: £1 million) outstanding at the financial position date included within accrued interest.

Expenses incurred in the year relates to pension funding expense of £60 million (2018: £60 million) and £3 million other expenses (2018: £51 million).

The related parties' payables are not secured, and no guarantees were given in respect thereof. The payables will be settled in accordance with normal credit terms.

(iii) Audit fees

There were no non-audit fees paid to the Company's auditors during the year (2018: £nil). Audit fees as described in note 8 are borne by the Company's ultimate parent, Aviva plc.

(iv) Group relief

Transactions with Group companies for settlement of corporation tax assets and liabilities by way of group relief are described in note 19.

(v) Dividends paid

Dividends paid relates to an intercompany transaction of £1,450 million (2018: £2,650 million) with the Company's parent, Aviva plc.

(d) Key management compensation

Key management, which comprises the directors of the Company, are not remunerated directly for their services as directors of the Company and the amount of time spent performing their duties is incidental to their role across the Group. All such costs are borne by Aviva plc and are not recharged to the Company. See note 7 for details of directors' remuneration.

(e) Ultimate parent entity

The ultimate parent entity and controlling party, is Aviva plc, a public limited Group incorporated and domiciled in the United Kingdom. This is the parent undertaking of the smallest and largest Group to consolidate these financial statements. Copies of Aviva plc consolidated financial statements are available on application to the Group Company Secretary, Aviva plc, St Helen's, 1 Undershaft, London EC3P 3DQ, and on the Aviva plc website at www.aviva.com.

29. Subsequent events

On 11 March 2020, the World Health Organization declared the outbreak of a strain of novel coronavirus disease, COVID-19, a global pandemic. Governments in affected areas have imposed a number of measures designed to contain the outbreak, including business closures, travel restrictions, stay at home orders and cancellations of gatherings and events. The spread of COVID-19 has resulted in an economic downturn in jurisdictions in which the Company operates and the global economy more widely, as well as causing increased volatility and declines in financial markets. If the pandemic is prolonged, or further diseases emerge that give rise to similar effects, the adverse impact on the global economy could be deepened and result in further declines in financial markets.

The Company's balance sheet exposure has been reviewed and actions are being taken to further reduce the sensitivity to economic shocks. The Company continues to maintain a positive net asset value. Since the onset of the pandemic the Company has remained operational, with key activities such as cash payments and transaction processing being maintained. Notwithstanding the Company's strong balance sheet position, deterioration in the situation could have further adverse implications arising from the impacts on financial markets, insurance exposures and operations. As the situation is rapidly evolving it is not practicable to quantify the potential financial impact of the outbreak on the Company at this stage.

On 16 July 2020 the Company completed the sale of its subsidiary company FPIL to R360 Holding Company Limited (RL360), a subsidiary of International Finance Group Limited (IFGL). Under the revised deal structure, the Company has sold a 76% shareholding in FPIL to IFGL for £259 million, of which £209 million is in cash and £50 million is in deferred cash consideration. This investment is shown as held for sale in these financial statements.
