Managers' Report for the year ended 31 May 2016

Managers' Report

The Board of Managers (the "Board") present their report and the audited consolidated financial statements for the year ended 31 May 2016 ("2016").

Development of the business

Misys Newco 2 S.à r.l. (the "Company") is a limited liability company domiciled in Luxembourg. The address of its registered office is 19, Rue de Bitbourg, L-1273, Grand Duchy of Luxembourg.

The Company, together with its subsidiaries ("Misys" or "the Group"), was formed by the combination of two separate acquisitions by Vista Equity Partners in 2012.

The Group's principal activities are the development, management and licensing of a variety of software products and solutions to customers in the financial services industry. The Group operates globally, including partnering with other companies to sell and distribute Misys products and solutions.

During 2016, the Group continued to provide mission-critical software to its customers, with those products being deeply embedded in customers' operations. The financial services market continued to evolve throughout 2016, with ongoing pressure on banks to better manage enterprise-wide risk, to introduce new growth areas and to comply with regulatory requirements.

Performance during the year

2016 was a strong year for the Group, with a combination of excellent sales execution and disciplined cost control resulting in a return to revenue and profit growth. Continued investment in research and development ("R&D") activities has allowed the Group to develop and launch a full suite of integrated products, creating value-added solutions for customers.

Market confidence in the Group's offerings is reflected in the 25 new-name customers secured in 2016, coupled with good volume and significant growth of up-sell and cross-sell licence sales to the Group's existing customer base. Licence revenue increased by 23% to \$253.1m from \$205.4m in 2015 and included the largest licence deals in the Group's history.

Disciplined cost management and the benefits from the restructuring programme announced in May 2015 are reflected in the Adjusted EBITDAC margin improvement to 36.2%, from 33.6% in 2015. Cost management remains a focus area, balanced with targeted investment to set the Group up for long-term success and the benefits of these actions are reflected in the 2016 results.

Throughout 2016, the Group continued to focus on delivering growth and improving operating margins through investing in product development, sales and marketing, and talent. The Board believes that the Group will remain competitive within the markets it operates in, due to the quality, breadth and depth of its products, as well as its competitive positioning.

Research and Development Activity

During the year, R&D gross expenditure before capitalisation decreased to \$109.5m compared to \$122.2m in the prior year, largely due to the consolidation of efforts into lower cost locations and the impact of foreign exchange movements, whilst improved efficiency of capturing all capitalisable activities has resulted in \$47.2m being capitalised, compared with \$30.9m in the year ended 31 May 2015. The Group continued to benefit from active management of R&D locations, along with benefitting from lower associated costs.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

A successful R&D agenda remains a strategic priority of the Group. The markets in which the Group operates are complex, requiring an effective R&D strategy to support and maintain the competitive advantage which the Group enjoys. The Group remains committed to the continuous development of a portfolio of market relevant products which can be delivered on an integrated platform. This agenda will continue into the next financial year. Ongoing investment in new technology and functionality has, and will continue to, enable the Group to maintain and strengthen its market-leading position and develop its Cloud-based offering to the market.

Throughout 2016, the Group has continued to invest in a Group-wide Product Strategy function, which is tasked with the coordination of long-term product strategy for all the markets in which it operates, in order to identify and accelerate the development of integration opportunities between products for the benefit of its customers. Integration and componentisation of the Group's solutions, backed up by a leading FusionFabric technology platform, benefits customers of multiple of the Group's products through increased transparency, reduced implementation costs, more effective decision-making and more efficient operations.

The Group has created new products and integrated solutions while extending the functionality of existing products. The first FusionCapital components and solutions based on the new FusionFabric architecture were released this year. These provide front and back-office capabilities including pricing, curve management, position-keeping, a trade repository, collateral management and post-trade processing. FusionBanking Essence has been extended to meet the requirements of new customers in Europe and Asia and the Digital Channels offering has been productised to simplify and accelerate customer implementations and upgrades. The Corporate Channels offering has been extended to cover lending and treasury and deliver an integrated, cross-product experience to banks' corporate customers. The Group continues to improve the quality, security, usability and performance of all its solutions. Finally, the Group has launched a new programme, FusionReactor, to stimulate and drive innovation. The programme fosters creative grass roots innovation, and has generated a number of new ideas, two of which, Crowd Funding and machine learning for trade capture, have been adopted and are now fully funded and under development.

Key Performance Indicators ("KPIs")

The Group's KPI results for the year were as follows:

	Year ended 31 May 2016	Year ended 31 May 2015	Increase / (decrease)
Revenue (\$m)	900.2	880.5	2%
Licence Fees (\$m)	253.1	205.4	23%
Adjusted EBITDAC ¹ (\$m)	326.2	296.7	10%
Research and development expenditure ² (\$m)	109.5	122.2	(10%)
Net cash flow generated from operations (\$m)	305.8	291.7	5%
Net debt ³ (\$m)	1,764.0	1,757.2	0%
Headcount - year end	4,683	4,619	1%

¹ Adjusted Earnings before Interest, Taxation, Depreciation and Amortisation less the amounts capitalised in respect of internally developed software and other adjustments. See page 5 for a reconciliation of operating profit to this adjusted measure.

² Excluding discretionary employee related costs.

³ Borrowings, excluding Preferred Equity Certificates, less cash and cash equivalents and restricted cash.

Commentary on the Group's KPIs is provided as part of the Financial Review below.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

Financial Review

Results

Revenue increased by 2% from \$880.5m in 2015 to \$900.2m in 2016 largely due to the increase in Licence Fees ("LF") revenue. This revenue growth was partially offset by the impact of foreign exchange movements on reported revenues, in particular the strengthening of the US Dollar against the Euro and Pound Sterling during the year. On a constant-currency basis, calculated by applying current year foreign exchange rates to prior year results, revenue increased by approximately 8% over the prior year.

A 23% growth in LF to \$253.1m, compared to \$205.4m in 2015, was largely due to strong execution, with the Group signing 25 new name customers and a favourable mix of new-name, cross-sell and up-sell deals which have been a strategic and active focus of the Group.

The Board considers LF to be a KPI because it is a measure of new business and drives future Maintenance fees and, in many cases, new Professional Services ("PS") revenue. On a constant-currency basis, LF increased by \$57.3m or 29% over the prior year.

Maintenance fees decreased by 3% from \$474.5m to \$458.5m in 2016 due to the impact of foreign exchange movements of key currencies in relation to the US Dollar. On a constant currency basis, Maintenance fees increased by 3% benefitting from new licences signed in 2015, and annual price increases in 2016. Customer retention has remained high at 94% contributing to the certainty of the Group's recurring revenue.

PS revenue decreased by \$10.0m to \$154.4m from \$164.4m in the prior year, largely due to the impact of foreign exchange but also due to delays in achieving project milestones. The Group remains focused on operational improvements in this business and have recently made leadership changes to tighten the linkage between PS and sales teams and accelerate progress.

Adjusted EBITDAC of \$326.2m, an increase of 10% from \$296.7m in 2015, reflects the growth in revenue and disciplined cost control. Adjusted EBITDAC is the key measure of performance used by management, and also forms part of the financial covenant under the Group's loan facilities. A reconciliation between Adjusted EBITDAC and operating profit as per the consolidated financial statements is shown on page 5 of this report.

R&D expenditure decreased to \$109.5m from \$122.2m in 2015, largely due to the consolidation of development centres of excellence in cost effective locations, and the impact of foreign exchange.

The Group has conducted an annual impairment assessment on the carrying value of goodwill, based on the recoverable amount of the cash-generating unit ("CGU") to which goodwill has been allocated. The results of these reviews are disclosed in note 6 to these financial statements. On an aggregated basis, the Group has a significant surplus on the carrying values of its CGUs. However, on an individual basis an impairment charge of \$26.7m has been recorded in 2016 against the carrying value of goodwill allocated to the FusionInvest CGU and is included in operating expenses in the consolidated income statement. Performance of this CGU during the year did not meet the expectations of management, and together with lower than anticipated forecast revenues and having considered reasonable sensitivities, the Managers have deemed it appropriate to record this impairment charge in the consolidated income statement.

The Group reported operating profit of \$155.1m compared to \$56.3m in 2015, largely due to a decrease in operating expenses of \$79.1m to \$745.1m from \$824.2m in the prior year. 2016 operating profit is inclusive of \$26.7m goodwill impairment in relation to the FusionInvest CGU, whilst the year ending 31 May 2015 was inclusive of a \$60.0m goodwill impairment in relation to the FusionRisk CGU.

Operating profit includes non-recurring charges of \$15.5m (2015: \$23.5m) consisting of \$0.8m (2015: \$1.1m) of costs related to the acquisition of Custom Credit Systems, L.P. ("CCS"), and restructuring charges of \$14.7m (2015: \$22.4m). During the year, the Group continued cost-reduction programmes impacting a number of functions and recorded restructuring charges, mainly related to severance costs. In addition, software development costs capitalised during the year increased to \$47.2m from \$30.9m net of a \$3.3m write off in the prior year, as the Group improved the efficiency of capturing all capitalisable activities.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

The Group incurred net finance costs of \$357.9m, an increase of 6% from \$337.3m in the prior year. This increase was a result of higher interest on Preferred Equity Certificates ("PECs") as a result of compounding interest charged of \$196.9m (2015: \$174.4m) which is not cash-settled. Finance costs also comprise \$141.4m (2015: \$144.5m) of interest on bank loans and facilities which are cash-settled as they become due.

The Group recorded a tax credit of \$47.9m (2015: \$30.2m charge) largely due to deferred tax credits of \$100.2m (2015: \$37.6m) offset by current taxation charges of \$52.3m (2015: \$67.8m). The deferred tax credits relate to the recognition of deferred tax assets of \$72.9m on tax losses that are recoverable against future profits, \$31.5m related to acquired intangible assets and, (\$4.2m) of other deductible temporary differences.

Financial position

Non-current assets of \$2,523.3m (2015: \$2,613.5m) primarily comprise goodwill of \$1,587.6m (2015: \$1,614.1m) and other intangible assets of \$771.4m (2015: \$918.8m). A further \$29.8m (2015: \$28.7m) comprise tangible fixed assets, predominantly office furnishings and information technology equipment.

Non-current trade and other receivables of \$41.7m (2015: \$31.6m) comprise credits on qualified R&D expenditure, revenue from customers which contractually cannot be billed within 12 months of the reporting date, and deposits outstanding in relation to offices occupied by staff of the Group.

Current assets of \$440.7m (2015: \$398.6m) largely comprise billed and unbilled receivables of \$337.0m (2015: \$294.0m) and cash balances of \$41.7m (2015: \$40.3m).

Net deferred tax liabilities of \$35.1m at 31 May 2016 (2015: \$138.8m) primarily relate to timing differences on other intangible assets acquired by way of business combinations, and the recognition of prior year losses where it is now sufficiently probable that there will be future profits in the respective tax jurisdiction to utilise the asset.

Other liabilities comprise trade and other payables of \$154.6m (2015: \$191.4m) and deferred income of \$247.9m (2015: 253.7m). Deferred income is primarily derived from the annual maintenance and support which the Group provides to customers and bills in advance, subsequently recognised over the course of the service period, and has decreased due to movements in foreign exchange.

Net debt

Net debt is defined as borrowings excluding PECs, less cash and cash equivalents and restricted cash. The Group excludes PECs from Net debt for consistency with the financial covenants under its banking facilities. Net debt increased by \$6.8m in the year to \$1,764.0m compared to \$1,757.2m in 2015, primarily as a result of the amortisation of capitalised loan arrangement fees and a \$2.9m increase in the US Dollar value of the Euro 184.4m term loan under the First Lien credit facility due to the strengthening of the Euro against the US Dollar. This increase was partially offset by the mandatory repayment of \$12.8m of First Lien loans (2015: \$13.1m).

Cash flow

Net cash flow generated from operations in the year was \$305.8m compared to \$291.7m in 2015. The increase is largely due to the higher operating profit generated in 2016 offset by the consumption of working capital, driven by the timing of licence deals signed during the year.

Interest paid for the year increased to \$177.3m during 2016 compared with \$145.1m in the previous year primarily due to the early repayment of \$25.0m of accrued interest on the Group's First and Second Lien loans as agreed with the Group's lenders as a means of managing closing cash balances. Interest repayments are largely stable year-on-year for the Group's secured term loans with some impact from the use of short-term facilities.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

The Group paid \$54.0m (2015: \$72.5m) of corporation tax during the year of which \$15.5m (2015: \$11.9m) related to withholding tax levied on payments made to the Group entities where the tax could not be recovered through the local corporate tax regime, due either to underlying tax losses, or other restrictions under local tax law. The Group is within the scope of corporation tax in the jurisdictions it is based in and settles taxes in those locations to the extent that there are taxable profits in the country which are not offset by existing tax losses. The principal corporation tax paid was \$14.0m (2015: \$28.5m) in the United States where remaining tax losses were utilised in the year to 31 May 2016.

The Group used \$60.3m of cash for investing activities (2015: \$69.5m) largely comprising \$47.2m (2015: \$34.2m) expenditure incurred on internally developed software, and the net cash outflow of \$11.6m (2015: \$6.5m) for the purchase of leasehold improvements, computer equipment and other capital equipment.

Net cash of \$12.8m (2015: \$13.1m) was used in financing activities, being the mandatory repayment of the First Lien credit facility referred to in Note 16 with the variance in repayments being caused by the strengthening of the US Dollar over the Euro on average over the course of the year.

Reconciliation between Operating profit and Adjusted EBITDAC

Below is a reconciliation between Operating profit and Adjusted EBITDAC.

	Year ended 31 May 2016	Year ended 31 May 2015
all figures in \$ millions		
Operating profit	155.1	56.3
Add back:		
Non-recurring charges ¹	15.5	23.5
Goodwill impairment	26.7	60.0
Amortisation of other intangible assets	195.8	210.2
Depreciation of property, plant and equipment	10.2	9.8
Net other foreign exchange gain	(30.8)	(25.7)
Investor management fees	2.7	1.4
Gain on embedded derivatives	(1.8)	(7.9)
Adjusted EBITDA	373.4	327.6
Capitalised software development costs	(47.2)	(30.9)
Adjusted EBITDAC	326.2	296.7

¹Non-recurring charges consist of acquisition and integration costs, and restructuring related charges.

Principal risks and uncertainties

The Group is continuing to execute its vision to transform the global financial services industry by making financial institutions more resilient, more efficient and more competitive. The Group aims to realise its vision by building world class products and solutions, ensuring continued focus on customer success and satisfaction, nurturing a high performance workplace and delivering sustainable financial performance. Executive management actively track and manage a variety of risks that impact these strategic imperatives.

The key risks and associated mitigation activities below do not comprise all the risks associated with the Group, and they are not set out in any order of priority. Additional risks not presently known to management, or currently deemed to be less material, may also have an adverse effect on the business.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

Changing macro-economic conditions and impact on customer demand and deal cycles

The global financial services software industry is highly competitive and can be adversely impacted by changing macro-economic factors such as sovereign indebtedness, economic slowdowns, currency devaluations, governmental budgetary constraints and political instability resulting in change in demand of certain products, inability to service certain markets and an increase in deal cycles.

The impact of macro-economic factors on the Group is somewhat limited due to a high recurring revenue base (over 50% of the Group's revenue is recurring in nature) from a geographically diversified customer base (over 2,000 customers in 130 countries). The Group has low levels of revenue concentration with the top 10 customers contributing 16% of revenues for the year. However, long term changes in macro-economic and political conditions globally or in key regions could adversely impact the Group's results.

Recently, the United Kingdom's vote to exit the European Union ("EU") has increased the uncertainty in the markets. While it is still early to comment on the nature and extent of the impact this may have on the Group and its customers, beyond the initial impact of foreign exchange rate movements, it is important to note that any significant changes to the Group's operations are unlikely. The Group will continue to consider changes that are in the best interests of its customers and investors.

Technology investments in financial services software are usually significant in value and the Group has to compete with various global, regional and local software service providers to win business. In addition, deal cycles are usually lengthy due to formalised vendor diligence and procurement processes in the financial services industry. This, combined with changing customer requirements and inconsistent sales execution, can create difficulties in forecasting the quantum and timing of new licence sales.

The Group manages these risks by employing sales teams and sales partners that are compensated based on performance, geographically based in key markets supported by product specialists where needed. The sales teams are required to develop and maintain healthy sales pipelines to allow for historical deal win rates and unpredictability in the timing of closing deals. While sales pipeline forecasts are subject to regular business reviews and adjusted for changes in sales dynamics, forecast assumptions of pipeline 'conversion rates' and 'win rates' can be impacted by factors such as deal sizes, market conditions, change in customer behaviour, product maturity and sales performance resulting in increased unpredictability of new licence sales performance.

Risks related to revenue recognition

The Group sells complex solutions and products to customers and needs to exercise reasonable judgements on the quantum and timing of revenue recognition. This can be particularly challenging for large and complex contracts with multiple commitments. The Group manages these risks by using a standard commercial policy and ensuring that contractual terms and conditions are approved by the appropriate personnel within the business. In addition the Group has a dedicated finance and accounting team that adhere to revenue and accounting policies, which are reviewed at least annually, to ensure that contracts are accounted on the basis of International Financial Reporting Standards ("IFRS") and generally accepted accounting principles on a consistent basis.

A substantial portion of the Group's sales activity has historically been completed in the latter part of the financial year and a shortfall in revenue can have a significant impact on profitability due to the relatively fixed nature of the Group's cost base in the short to medium term.

Market predictions and risks related to product delivery

In a global and rapidly changing market, the Group needs to respond to the changing needs of customers and regulators by investing in high quality products and solutions that meet their requirements and are delivered on time. Over time the Group has built a software portfolio that has grown to become the broadest range of solutions focused on the financial services industry.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

The increased demand for Digital Channels solutions, data analytics, Cloud, risk management and reporting tools plus the introduction of regulations such as Dodd-Frank, FRTB and EMIR provides the Group opportunities to sell new solutions to existing and new customers. This requires the Group to track and predict global and regional market requirements, trends and changes in regulations and direct the R&D investment in the right solutions to ensure maximum return on investment.

While the Group continues to make significant investment in its products with approximately 15% (2015: 16%) of operational costs in the current year invested in R&D, it is possible that some investments might not deliver anticipated returns within expected timeframes, due to changes in market conditions, inherent uncertainties in accurately predicting requirements for a global market or the failure to deliver quality products on time.

The Group manages the risks related to ongoing product investments and product development through various means including the use of agile product development methodologies, product investment reviews, hiring experienced product managers and business analysts who understand various market requirements, and the use of customer advisory boards which bring together key client stakeholders to discuss and validate the top priorities for Misys product roadmaps. Over 45% of the Group's staff is dedicated to R&D, and the Group maintains a strong focus on engineering excellence, implementing best practice product development methodologies, tools and processes, and independent product testing and quality assurance processes. However, the Group could be adversely impacted by unforeseen delays in product development due to changing requirements, increased complexity and coding or manufacturing errors, despite testing prior to release.

The Group also invests in acquiring complementary technology as evidenced by the previous acquisitions of IND and CCS. Acquisitions are inherently risky requiring strong due diligence, analysis and integration processes to ensure projected benefits and synergies are realised. The Group uses dedicated and experienced leadership teams with significant experience in corporate development and employs appropriate due diligence processes when identifying acquisition targets. While the Group has a track record and significant experience of integrating acquired businesses, it may fail to identify all shortcomings or liabilities related to acquisitions or fail to realise all anticipated benefits and synergies.

Risks related to project implementations and customer support

To ensure that customers maximise their return on investment, the Group's products usually need to be supported by timely implementations, integration with existing customer systems and after-sales support services. In general, system implementations, migrations and integrations can be impacted by unforeseen challenges in delivering solutions on time and to budget. These risks can also have an adverse effect on the timing of revenue recognition.

The Group manages these risks by the use of services staff and managers with deep domain expertise, modular, repeatable and predictable project delivery models and project reporting/forecasting processes. The Group uses service delivery centres that are co-located with development teams to continuously refine and improve implementations. However, due to the length and complexity of some implementations, and the ongoing evolution of product cycles, the Group may face unforeseen issues with services delivered that can have an adverse impact on customer satisfaction and profitability. The Group usually invests in services capabilities in advance of projected new licence sales, and an unforeseen decline in sales performance can have an adverse impact on services profitability.

The Group has increasingly used, and will continue to use, the services of partners in order to access new markets, broker deals and provide full implementation services to customers. This approach to market enables the Group to scale its sales organisation quickly to reflect specific market fluctuations, however can at times add complexity to contractual arrangements whereby an additional party, being the partner, is involved and obligated to perform key activities.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

Customers can choose from standard support or specialised premium support packages based on their requirements. Many support agreements include service level agreements that the Group needs to comply with. The Group uses trained customer support staff that has deep domain expertise deployed in multiple locations globally to ensure continuous availability of appropriate support levels. The Group also uses a dedicated customer support portal to monitor support queries. However, it is possible that the Group may not comply with support service level agreements which could have an adverse impact on customer satisfaction, profitability and customer retention.

Talent management, performance management and employee retention risks

The Group considers its people to be its most important asset and relies on the continued service of key staff at various levels within the organisation to succeed. The Group's talent management systems are used to support ongoing identification, development, training and retention of talent and implementation of training programmes to ensure staff skills remain relevant and current. Regular benchmarking of compensation and benefits across key markets is conducted to ensure salaries remain competitive.

In addition, a strong recruitment and talent acquisition process is in place to ensure high potential talent is introduced to the Group where needed. However, the Group could be adversely impacted by the loss of key talent and it is possible that such losses, if not managed, can be disruptive to the business.

The Group uses performance management systems to ensure individual and team goals are aligned to corporate objectives. Performance management actions may require workforce restructuring that could be potentially disruptive to the business, and could be accompanied by increased restructuring costs and temporary reduction in productivity.

Liquidity, debt, financial control and foreign exchange risks

The Group aims to achieve outstanding financial performance to ensure sustainable availability of capital and liquidity to allow further investments in people, products and services, and appropriate management of the Group's debt and liquidity position. In addition, the Group carries a significant amount of debt with associated interest, repayment and covenant compliance obligations. This means the Group needs to focus on strong financial and cash control, budgeting and reliability of financial forecasts. The Group has a dedicated finance and treasury team that assists management in operating key financial controls over budgets, forecasts and cash flow optimisation. Any unforeseen reductions in revenue or increase in costs or liabilities, especially around seasonal periods of reduced liquidity, may have an adverse impact on the Group's financial performance and working capital position.

The Group has operations in around 50 countries and its customers operate in over 130 countries around the world. While the Group's financial performance is measured in US Dollar, a significant amount of the Group's cash flows are denominated in other currencies particularly Euro, Pound Sterling, Indian Rupee, Philippine Peso, and Australian Dollar based on where significant business is conducted around the world. Any significant variations in foreign exchange rates against the US Dollar can have an impact on key financial performance indicators including revenue. The Group operates a hedging strategy to protect a significant portion of anticipated net cash flows in key foreign currencies using forward currency contracts. However, long-term variations in foreign exchange rates of key currencies could adversely impact the Group's profitability.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

Security and intellectual property risks

The Group is a provider of financial services software and has to ensure appropriate security of its Information Technology ("IT") infrastructure, products and intellectual property. The Group invests a great deal of time and effort in protecting its IT infrastructure and data, including any sensitive data held. The Group's hosting and Cloud offerings go through external security reviews and product security and vulnerability testing is a part of the software development lifecycle. Customers are also increasingly demanding that products contain appropriate security measures, even if they are not hosted on the Group's IT infrastructure. High profile security breaches at other companies have increased over time due to increasingly sophisticated cyber-attacks. A highly sophisticated attack on the Group's infrastructure or products installed in a customer's environment could result in the loss of sensitive information or intellectual property, or damage to customers' business or regulatory obligations, and this could have an adverse impact on the Group's competitiveness and profitability.

In addition, the Group's ongoing development efforts result in the creation of intellectual property ("IP") such as copyrights, trademarks and patents. The Group also embeds third party software within its product solutions to customers. While patenting and other forms of IP protection are utilised to protect the Group's IP, it is possible that these processes may not be sufficient to prevent IP theft and could result in loss of competitive advantage. In addition, the Group may face claims from other companies, including patent trolls, claiming infringement or other misuse of IP rights. Responding to such claims, regardless of validity, can be time-consuming and expensive and could require the Group to cease selling or releasing certain products.

Business continuity and disaster recovery risks

The Group has over 4,600 employees in around 50 locations, including a significant presence in Asia, Europe and the Americas. Due to the global nature of the Group's business, a significant natural or man-made disaster, political changes, acts of terrorism, restrictions in travel or the movement of people or capital could have an impact on the Group's ability to continue to provide sufficient services to customers or release products on time. While the Group has resilience built into its operations with data backups processes, cloud-based systems and remote working and has successful track record of managing business continuity incidents across multiple locations, the Group's operations could be impacted by major disasters in key sites or countries.

Legal, regulatory and litigation risks

The Group operates globally and is subject to various regulations and laws in each country including health and safety rules, data protection regulations, employment laws, tax regulations, economic sanctions and the UK Bribery Act. The Group employs dedicated internal regional legal teams supported by legal advisors and experienced business staff.

The Group's global operations, particularly in emerging economies, increase the risk of inappropriate business conduct. The Group manages this risk through a prescribed code of conduct, anonymous whistle-blower sites, anti-bribery training to relevant staff and regular monitoring of customer facing staff and partners. While compliance with all significant laws and regulations is monitored by the regional legal teams there remains a risk that the Group may not be compliant with all applicable laws and regulations in every jurisdiction.

In addition, from time to time the Group has been subject to litigation claims from former employees, customers and business partners. While the Group has appropriate process to manage and account for known litigation (none of which is currently considered to be material to the Group's results and financial position), any new and significant litigation in the future could have an adverse impact on financial performance.

Misys Newco 2 S.à r.l.

Managers' Report for the year ended 31 May 2016

Managers

The Managers of the Company who were in office during the year and up to the date of signing the consolidated financial statements are

Donald Park

Olivier Hamou

Elvin Montes

Events after the reporting date

As disclosed in note 33 to the consolidated financial statements, no significant events have occurred since the reporting date

Going concern

The Managers have reviewed the Group's forecasts and assumptions relevant in determining the appropriateness of the going concern basis and, at the time of approving these consolidated financial statements, have a reasonable expectation that the Company and the Group have access to adequate financial resources to continue in operational existence for the foreseeable future. While assessing going concern assumption the Managers noted that the Group has complied with covenant terms since their inception in May 2012 and believe that it will continue to comply with covenant terms in the foreseeable future. They therefore continue to adopt the going concern basis of accounting in preparing the consolidated financial statements, as further discussed in notes to the consolidated financial statements

Subsidiary companies

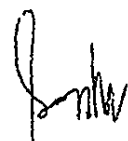

The Group conducts its activities through subsidiary companies across the world. A list of all subsidiaries is shown in note 30 to the consolidated financial statements.

Financial Instruments

The financial risk management objectives and policies of the Group are set out in note 26 to the consolidated financial statements.

Exemption from audit by Parent Guarantee

The Managers of the Company have decided to apply for exemption from audit by Parent Guarantee for some of its eligible subsidiaries for the year ended 31 May 2016, as permitted by EU directive. A list of subsidiaries applying for the audit exemption under parent guarantee is shown in note 32 to the consolidated financial statements.

Audit report

To the Shareholder of
Misys Newco 2 S.à r.l.

Report on the consolidated financial statements

We have audited the accompanying consolidated financial statements of Misys Newco 2 S.à r.l. and its subsidiaries, which comprise the consolidated statement of financial position as at 31 May 2016, and the consolidated statement of income, the consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information.

Board of Managers' responsibility for the consolidated financial statements

The Board of Managers is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the European Union, and for such internal control as the Board of Managers determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Responsibility of the "Réviseur d'entreprises agréé"

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier". Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the judgment of the "Réviseur d'entreprises agréé" including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the "Réviseur d'entreprises agréé" considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Board of Managers, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the financial position of Misys Newco 2 S.à r.l. and its subsidiaries as at 31 May 2016, and of their performance and cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Report on other legal and regulatory requirements

The Managers' report, which is the responsibility of the Board of Managers, is consistent with the consolidated financial statements

des

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The Company is a 'Société à Responsabilité Limitée', domiciled in Luxembourg. The Company's country of incorporation is Luxembourg and its registered address is 19, Rue de Bitbourg, L -1273 Luxembourg.

Nature of entity operations and principal activities

The Group's principal activities are the development, management and licensing of a variety of software products and solutions to customers in the financial services industry

Basis of preparation

The consolidated financial statements have been prepared in accordance with IFRS and IFRS Interpretations Committee ('IFRS IC') interpretations as adopted by the EU and in accordance with Luxembourg laws and regulations.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies.

Going concern

The Group's forecasts and projections, taking account of reasonable potential variations in trading performance, show that the Group is expected to operate within the level of its current financing facilities for the foreseeable future. In making this assessment, the Group has considered bank covenant compliance and the ability to operate within those covenants with adequate headroom to take into account risks in future expected cash flows.

After making enquiries, the Managers of the Company have a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. For this reason, they continue to adopt the going concern basis in preparing the consolidated financial statements.

Changes in accounting policy and disclosures

New and amended standards adopted by the Group

The following IFRS and IFRS IC interpretations and amendments have been adopted by the Group, but none had any material impact on the Group results or financial position:

- Amendment to IAS 19, 'Defined Benefit Plans' - Employee Contributions;
- Improvements to IFRSs 2010-2012, and
- Improvements to IFRSs 2011-2013.

New standards, amendments and interpretations not yet effective

The following new standards, interpretations, improvements and amendments to existing standards have been published and are mandatory for the Group's accounting periods beginning on or after 1 June 2016 or later periods. The Group has decided to not early adopt these:

- IFRS 9 'Financial instruments' (not yet endorsed by the EU);
- Amendments to IFRS 10 'Consolidated financial statements' and IAS 28 'Investments in associates and joint ventures' on investment entities and applying the consolidation exceptions (effective from 1 June 2016);
- Amendments to IFRS 10 'Consolidated financial statements' and IAS 28 'Investments in associates and joint ventures' (not yet endorsed by the EU);
- Amendment to IFRS 11, 'Joint arrangements' on acquisition of an interest in a joint operation (effective from 1 June 2016);
- Amendment to IAS 16, 'Property, plant and equipment' relating to depreciation and amendment to IAS 38, 'Intangible assets', on amortisation (effective from 1 June 2016);

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

- Amendment to IAS 27, 'Separate financial statements on equity methods' (effective from 1 June 2016),
- Annual improvements (2014) (effective from 1 June 2016);
- Amendments to IAS 1, 'Presentation of financial statements' disclosure initiative (effective from 1 June 2016);
- Amendments to IAS 12, 'Income taxes' on Recognition of deferred tax assets for unrealised losses (not yet endorsed by the EU), and
- Amendments to IAS 7, 'Statement of cash flows on disclosure initiative' (not yet endorsed by the EU)

The Group has undertaken an initial review of the impact of these new standards, interpretations and amendments and has concluded that they are unlikely to significantly impact the Group's results or financial position

On 28 May 2014, the International Accounting Standards Board ("IASB") issued IFRS 15 'Revenue from contracts with customers'. The standard is expected to become effective for the Group's accounting period beginning on 1 June 2018, subject to endorsement by the EU. The Group is analysing the potential impact of the standard on its consolidated financial statements

In January 2016, IASB published IFRS 16 Leases (not yet endorsed by the EU). The standard is expected to become effective for the Group's accounting period beginning on 1 June 2019 (with earlier adoption permitted if IFRS 15, 'Revenue from Contracts with Customers', is also applied). The Group is analysing the potential impact of the standard on its consolidated financial statements

A summary of the Group's accounting policies is given below.

Accounting convention

The consolidated financial information has been prepared under the historical cost convention, except for certain items which are measured at fair value, as disclosed in the accounting policies below. These accounting policies have been consistently applied to all years presented, unless otherwise stated

Basis of consolidation

The Group's financial statements consolidate the financial statements of Misys Newco 2 S.à r.l. and its subsidiary undertakings. On acquisition, the assets, liabilities and contingent liabilities of a subsidiary are measured at their fair value at the date of acquisition

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity

Subsidiary undertakings acquired during a year are included in the financial statements from the date at which control passes to the Group. Subsidiary undertakings disposed of are included in the financial statements up to the date at which control passes from the Group. Accordingly, the consolidated income statement, the consolidated statement of comprehensive income and the consolidated statement of cash flows include the results and cash flows for the period of control

Inter-company transactions, balances and unrealised gains and losses on transactions between Group companies are eliminated.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Revenue recognition

Revenue represents the fair value of consideration received or receivable from customers for services provided by the Group, stated net of discounts, returns and value added taxes. Revenue is recognised when a legal right to consideration exists and can be reliably measured, delivery to a customer has occurred with no significant vendor obligations remaining and where the collection of the resulting receivable is considered probable.

Where these circumstances exist but no invoice to the customer has been raised, under the terms of the contracts, revenue is recognised but the corresponding receivable is shown as accrued income in the consolidated statement of financial position.

The Group generates revenue as follows

- Licence fees,
- Maintenance fees;
- Professional Services; and
- Subscriptions

Revenue is recognised in accordance with IAS 18 – 'Revenue'. In determining the amount of revenue to be recognised, management exercise judgement, and also adopt estimates in reaching certain conclusions. Management considers guidance from software industry common practice in forming its estimates

Licence fees

The Group grants its customers licences to use its software. This revenue can relate to (a) Initial Licence Fee ("ILF"), where a fee relates to the right to use a software product, including significant upgrades pertaining to customers purchasing new modules or user rights; and (b) Roadmap Accelerator ("RA"), where a fee is payable for a significant variation of an existing product

Where a licence is not subject to material modification or customisation certain criteria must be met before revenue is recognised:

- Arrangement existence is evidenced,
- Software has passed internal quality checks and is deemed generally available;
- Delivery to the customer has occurred;
- Risks and rewards of ownership have been transferred from the Group to the customer,
- Revenue, and associated costs, can be measured reliably and are not subject to further adjustment; and
- Collection from the customer is deemed probable

In instances where significant vendor obligations exist, revenue recognition is deferred until the obligation has been satisfied. No revenue is recognised for multiple deliveries or multiple element products if an element remains undelivered and is essential to the functionality of the elements already delivered

ILF on heavily customised software, together with associated PS revenue, are treated as a single deliverable and recognised on a percentage of completion basis over the period from commencement of performance to customer acceptance.

Maintenance fees

Maintenance of software is often included in licence agreements. The pricing is usually based on a percentage of the ILF, which is common practice in the industry. The Maintenance fee provides customers with rights to unspecified product upgrades, enhancements and help desk access during a defined support period. This revenue is recognised rateably over the term of the contract

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Professional Services

Revenue is generated from training, consulting and implementation services. These services are reflected in separate contracts to licence contracts and can be either on a time and materials or fixed-price basis. A percentage of completion approach is adopted to account for fixed-price contracts, which is in accordance with the rules applicable to long-term contract revenue recognition in IAS 11 – Construction Contracts. This involves a comparison of costs incurred to date with total expected costs of the contract. Losses on contracts are recognised at the point a loss is foreseen by reference to estimated costs of completion.

Subscriptions

In addition to the revenue streams above, the Group earns other revenues as follows.

- Hosting revenue is generated by way of an additional subscription fee payable to the Group to provide a software hosting service. Fees are recognised on a straight-line basis over the term of the contract;
- Cloud revenue is generated whereby the customer pays a subscription fee to cover the software, maintenance and hosting service. Fees are recognised on a straight-line basis over the term of the contract, and
- Leasing revenue is generated by way of granting customers licence access, and providing maintenance support. Fees are recognised on a straight-line basis over the term of the contract.

Multiple element arrangements

The Group often enters into transactions with customers that include multiple elements such as software licence, maintenance and professional services revenues. The revenues from these arrangements are generally accounted for separately. The factors considered in determining whether the revenue should be accounted for separately include the nature of the services, the existence of the fair value for the separable elements, the timing of payments and the acceptance criteria on the ability to realise the software licence fee.

Revenue from multiple element arrangements is allocated to the different elements based on their fair value. Fair value for professional services is determined by market pricing for equivalent performance obligation sold separately or the "cost plus reasonable margin" methodology when market data does not exist.

When revenue is objectively determined for all undelivered elements with the exception of one delivered element, the residual method is used to allocate revenue to the delivered element. Revenue for delivered elements is recognised when the revenue recognition criteria described above are met and revenue is free from any future uncertainties or adjustments attributable to the undelivered elements from which a portion of the fees have been allocated. Revenue for any undelivered elements is deferred and recognised when the product is delivered or over the period in which the service is performed.

Pensions

The Group operates a number of defined contribution pension schemes covering the majority of its employees. The costs of these pension schemes are charged to the consolidated income statement as incurred. In addition, the Group has a closed-funded defined benefit pension scheme in the UK, as well as a number of other smaller defined benefit arrangements outside the UK.

The remaining active members of the closed UK defined benefit scheme now contribute to a defined contribution section of the scheme and do not accrue further benefits under the defined benefit scheme. Full independent actuarial valuations of the defined benefit scheme are carried out on a regular basis and updated at each reporting date. The assets of the schemes are held separately from those of the Group.

Pension scheme assets are measured at fair value. Pension scheme liabilities are measured using a projected unit method and discounted at the current rate of return on a high quality corporate bond of equivalent term and currency to the liability. The pension scheme surplus (to the extent that it is recoverable) or deficit is recognised in full on the consolidated statement of financial position. Any current or past service cost and administration expenses are recognised in the consolidated income statement as are the net interest on the schemes' liabilities.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in the statement of comprehensive income as they arise.

Leases

Leases in which substantially all of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases such as rentals, are charged to the consolidated income statement on a straight-line basis over the period of the lease, taking into account the benefit of any rent-free period or other incentives.

Leases of property, plant and equipment where the Group has substantially all the risks and rewards of ownership are classified as finance leases. Property, plant and equipment held under finance leases is capitalised in the consolidated statement of financial position at the lower of cost or present value of the minimum lease payments and is depreciated over its useful life. The capital elements of future obligations under leases are included as liabilities in the consolidated statement of financial position.

Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of return on the remaining balance of the liability.

Taxation

Taxation comprises the amount chargeable on the profits for the year, together with deferred taxation. Deferred taxation is recognised, using the liability method, in respect of all temporary differences arising between the tax basis of assets and liabilities and their carrying amount in the financial statements.

Deferred tax assets are recognised only to the extent that it is probable that there will be sufficient taxable profits from which the underlying temporary differences can be offset, or where there are deferred tax liabilities against which the assets can be recovered.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which the related deferred tax asset is realised, or the deferred tax liability is settled based on tax rates and laws enacted or substantively enacted at the reporting date.

The carrying amount of deferred tax assets is reviewed at each reporting date and is reduced or increased according to the level of probable future profits considered available. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it is probable that future profits will allow the deferred tax asset to be recovered.

Current and deferred tax is recognised in the consolidated income statement except when the tax relates to items charged or credited directly to the statement of comprehensive income or directly in equity, in which case the tax is also recognised in the other comprehensive income or directly in equity.

Foreign currencies

Items included in the financial statements of Group entities are measured using the currency of the primary economic environment in which each entity operates, known as the functional currency. The consolidated financial statements are presented in US Dollars as this is considered to be the currency of the primary economic environment of the Group.

Foreign currency transactions are translated into the functional currency of the subsidiary using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions, and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement within 'Operating expenses'.

Goodwill and intangible assets recognised on the acquisition of entities whose functional currency is not US Dollar is treated as an asset of that entity and translated at the closing rate.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The Group hedges its exposure to certain foreign exchange risks using derivatives and foreign currency borrowings. Details of the accounting policies in respect of these items are given in the derivative financial instruments section.

Translation of Group companies

Financial statements of subsidiaries whose functional currency is not the US Dollar are translated into US Dollar at the exchange rates prevailing at the end of the reporting period for items in the statement of financial position, and at average exchange rates for consolidated income statement items.

All effects of exchange rate adjustments are recognised in the consolidated income statement, with the exception of exchange rate adjustments of investments in subsidiaries arising from:

- the translation of foreign subsidiaries' net assets at the beginning of the year to the exchange rates at the end of the reporting period;
- the translation of foreign subsidiaries' statement of comprehensive income from average exchange rates to the exchange rates at the end of the reporting period; and
- the translation of non-current intra-Group balances that are considered to be an addition to net investments in subsidiaries

These specific exchange rate adjustments are recognised in other comprehensive income.

If the subsidiary undertaking is subsequently sold or closed, cumulative gains or losses recognised in other comprehensive income are recycled to the consolidated income statement as part of the profit or loss on disposal. If a non-current intra-Group balance is settled or altered to a point it is no longer considered part of the net investment in a subsidiary undertaking, any related foreign exchange gains or losses which had previously been recorded to the statement of other comprehensive income are recycled to the consolidated income statement as part of operating expenses.

Business combinations

The Group uses the acquisition method of accounting to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities assumed and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired as well as liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

On acquisition, specific intangible assets are identified and recognised separately from goodwill and then amortised over their estimated useful lives. These include such items as brand names, customer relationships and complete technology, to which value is first attributed at the time of acquisition. The capitalisation of these assets and related amortisation charges are based on judgements about the value and economic life of such items. These economic lives for intangible assets are estimated at between three and fifteen years.

The excess of purchase consideration and the fair value of separable assets and liabilities acquired is allocated to goodwill and recognised as an intangible asset. Goodwill is not amortised but is reviewed for impairment annually, and whenever there is a potential indicator of impairment. Any impairment is recognised immediately in the consolidated income statement and is not subsequently reversed.

On the disposal of a previously acquired subsidiary, the attributable amount of goodwill is included in the determination of the gain or loss on disposal.

Transaction costs

Acquisition-related costs are expensed as incurred once any related contingencies have been resolved.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Other intangible assets and research and development expenditure

Research expenditure is expensed in the period in which it is incurred. Expenditure on developed software is capitalised when the Group is able to demonstrate all of the following: the technical feasibility of the resulting asset, the ability and intention to complete the development and use or sell it, how the asset will generate probable future economic benefits, and, the ability to measure reliably the expenditure attributable to the asset during its development. Capitalised expenditure on internally developed software is amortised over its useful economic life in line with expected future economic benefits, once the related software product is available for use.

Development costs which do not meet these criteria are recognised in the consolidated income statement as incurred and are not subsequently capitalised.

Development costs that are directly attributable to the design and testing of identifiable and unique third party software products controlled by the Group are recognised as intangible assets when the following criteria are met:

- It is technically feasible to complete the software product so that it will be available for use;
- Management intends to complete the software product and use or sell it;
- There is an ability to use or sell the software product;
- It can be demonstrated how the software product will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- The expenditure attributable to the software product during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of relevant overheads. Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period.

Computer software development costs recognised as assets are amortised over their estimated useful lives, which is between three and seven years. Costs associated with maintaining computer software programmes are recognised as an expense as incurred.

Intangible assets purchased separately, such as software licences that do not form an integral part of related hardware, are capitalised at cost and amortised over their useful economic lives.

Intangible assets acquired through a business combination are initially measured at fair value and amortised on a systematic basis that reflects the pattern of benefits expected over their useful economic lives. If the pattern of future benefits cannot be determined reliably, the intangible assets are amortised on a straight-line basis. The amortisation period is reviewed annually.

Estimated useful lives by major class of assets are as follows.

Complete technology	3 - 7 years
Customer relationships	4 - 15 years
Other acquired intangibles	2 - 15 years
Internally developed software	3 - 5 years
Third party software	3 - 7 years

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Cost includes the original purchase price of the asset and the cost attributable to bringing the asset to its working condition for its intended use. Depreciation is calculated on a straight-line basis so as to write off the cost, less estimated residual value of each asset, over its expected useful life.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The residual values and useful economic lives of property, plant and equipment are reviewed annually. The useful lives by major class of asset applied from the date of purchase are:

Buildings	20 - 30 years
Leasehold improvements	5 - 15 years or the period of the lease if shorter
Computer and other equipment	4 - 15 years

Impairment of assets

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable and annually in the fourth quarter.

Goodwill and developed software not yet brought into use are reviewed for impairment annually. For the purpose of impairment testing, assets are grouped at the lowest levels for which goodwill is allocated and goodwill is allocated to each of the Group's CGUs expected to benefit from the synergies of the combination. CGUs to which goodwill has been allocated are tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the CGU is less than the carrying amount of the unit, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit, and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. Prior impairments of assets (other than goodwill) are reviewed for possible reversal annually.

An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and its value in use.

Any gain or loss arising on de-recognition of the asset is included in the consolidated income statement in the year the asset is de-recognised.

Financial assets

Financial assets are classified in the following categories: 'at fair value through profit or loss', 'loans and receivables', and 'available for sale'.

'Financial assets at fair value through profit or loss' are financial assets held for trading or where designated as such on original recognition. Derivatives are also classified as held for trading unless they are designated as effective hedges. Gains and losses arising from changes in fair value of 'financial assets at fair value through profit or loss' are included in the consolidated income statement in the period in which they arise. Financial assets at fair value through profit or loss are subsequently held at fair value.

'Loans and receivables' are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and are carried at amortised cost.

'Available for sale' financial assets are measured at fair value. Unrealised gains and losses are recognised in equity except for impairment losses, interest and dividends arising from those assets which are recognised in the consolidated income statement.

Cash and cash equivalents

Cash and cash equivalents include cash held at bank and in hand together with short-term highly liquid investments with an original maturity of less than three months that are readily convertible to known amounts of cash and subject to an insignificant change in value.

Restricted cash

Restricted cash is disclosed separately on the face of the consolidated statement of financial position and denoted as restricted when it is not under the exclusive control of the Group.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Trade and other receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment

Where there is objective evidence that there is an impairment loss, the amount of loss is measured as the difference between the carrying amount and the present value of the estimated future cash flows discounted at the effective interest rate. The amount of loss is recognised in the consolidated income statement within operating expenses. The carrying amount of a receivable is reduced by appropriate allowances for estimated irrecoverable amounts through the use of an allowance account for trade receivables. Amounts charged to the allowance account are written off when there is no expectation of further recovery. Subsequent recoveries of amounts previously written off are credited against operating expenses in the consolidated income statement.

Investments

Equity investments are classified as 'fair value through profit or loss'. Gains and losses arising from changes in fair value are included in the consolidated income statement in the period in which they arise.

Financial liabilities and equity instruments

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

Trade payables

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation and this amount is capable of being reliably estimated. If such an obligation is not capable of being reliably estimated, no provision is recognised and the item is disclosed as a contingent liability where material.

Onerous property contracts

Provision for onerous lease commitments on property contracts is made when a property is no longer used by the Group, and is based on an estimate of the net unavoidable lease and other payments in respect of these properties, including dilapidation costs. These comprise rental and other property costs payable, plus any termination costs, less any income expected to be derived from the properties being sublet. The provisions are discounted at an appropriate rate to take into account the effect of the time value of money.

Borrowings

Borrowings consist of term loans, overdrafts and other short term facilities, and are initially recognised at fair value less directly attributable transaction costs, and are subsequently measured at amortised cost using the effective interest rate method. The difference between the proceeds (net of transaction costs) and the redemption value is recognised in the consolidated income statement, within finance costs, over the period of the borrowings. Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Preferred Equity Certificates

The Group has additional financing in the form of PECs issued to the immediate parent company, Misys Newco S.à r.l. The PECs are repayable in cash within a period of up to 49 years from inception and have a contractual requirement to accrue and pay interest, and accordingly have been classified as a liability.

Derivative financial instruments

Derivative financial instruments are initially recognised at fair value on the date a derivative is entered into and are subsequently remeasured at fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. Changes in the fair value of derivative financial instruments, where they are not designated as hedging instruments, are recognised in the consolidated income statement because the requirements that permit hedge accounting in certain circumstances were not satisfied.

Certain forecast non-US Dollar cash flows of the Group in key currencies are hedged with forward currency contracts. Hedge accounting is not applied and the gains and losses are recorded in the consolidated income statement in operating expenses.

Certain financial assets and liabilities which are denominated in currencies other than those of the functional currencies of the entities concerned, may also be hedged using forward currency contracts. Gains and losses on these contracts are recorded in operating expenses together with offsetting gains and losses on the underlying items.

Embedded derivatives

Certain long-term software licensing contracts are priced in currencies which are not the functional currencies of the entities entering into the contracts or are not common contracting currencies in the location in which the transaction takes place. Such contracts are considered to contain an embedded foreign currency derivative which must be extracted from the host contract and measured separately at each reporting date.

Gains or losses on embedded derivatives are charged or credited to the consolidated income statement. The contracts are generally of up to 10 years duration and this is therefore the period over which the assets and liabilities recognised in the consolidated statement of financial position are expected to crystallise.

Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from proceeds.

Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and the grants will be received. The effect of grants, which include certain incentives structured as R&D credits, is to reduce the value of the asset or expense.

Government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are disclosed as a liability in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Critical accounting estimates and judgements

In making estimates and assumptions, actual outcomes could differ from those assumptions and estimates. The critical judgements that have been made in arriving at the amounts recognised in the Group's financial statements, and the key sources of estimation uncertainty that have a significant risk of causing a material adjustment to the carrying values of assets and liabilities within the next financial year are discussed below.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Revenue recognition

The recognition of ILF revenue is dependent upon fair value allocation, separability of components, collectability and there being no significant vendor obligations outstanding. Management exercises judgement in assessing whether such obligations are significant and, if necessary, the value of the revenue to be deferred. Such revenue is recognised on signing only for products which are judged to be in a state fit for general availability and ready to be shipped, to contain all planned components and to have completed quality testing.

The revenue and profit of fixed-price Professional Services contracts is recognised on a percentage of completion basis when the outcome of a contract can be estimated reliably. Management exercises judgement in identifying onerous service contracts and determining whether a contract's outcome can be estimated reliably. Management also makes estimates in the calculation of future contract costs, fair values of contracts, the value of discounts given, the value of upgrade clauses in contracts which are used in determining the value of amounts recoverable on contracts, and timing of revenue recognition. Estimates are continually revised based on changes in the facts relating to each contract.

Impairment of goodwill and intangible assets

Goodwill and other intangible assets are reviewed annually for impairment. An impairment review requires an estimate to be made of the 'value in use' or the 'fair value less costs to sell', as appropriate. The value in use calculation includes estimates about the future financial performance of the cash generating units, including management's estimates of long-term operating margins and long-term growth rates. In the current period, management has assessed the recoverable amount of the cash generating units based on their values in use and have identified an impairment in relation to the carrying value of goodwill allocated to the FusionInvest CGU. On an aggregated basis, the Group has a significant surplus on the carrying value of its CGUs. A reasonably possible change in the assumptions used has been considered and is unlikely to result in any additional impairment.

Capitalisation of development costs

Expenditure on developed software is capitalised when the Group is able to demonstrate all of the following: the technical feasibility of the resulting asset; the ability and intention to complete the development and use or sell it; how the asset will generate probable future economic benefits, and the ability to measure reliably the expenditure attributable to the asset during its development. Management estimates the future sales and long-term operating margins of the asset.

Onerous property contracts

Property provisions require an estimate to be made of the net present value of the future costs of vacant and sublet properties. The calculation includes estimates of future cost involved, including management's estimates of the long term letting potential of the properties.

Taxation

A good tax control framework is a standard global requirement for the Group to base the multiple tax filings it is required to make to authorities globally. Management use this documented process to review key judgements and risk areas to determine the financial statement impact from those filings with particular areas of focus on future income flows, the activities being undertaken in the Group's entities compared to their financial statement results and the impact of changes to the tax regulatory landscape with new tax laws being introduced. The recognition of deferred tax assets requires an evaluation of the extent to which it is probable that future profits will allow the deferred tax asset to be recovered. Tax losses in Luxembourg have been recognised in full where they can be offset following the assessment of future trading profitability at an entity level.

Tax estimates and judgements are regularly reassessed and changes in the expected financial statement impact accounted for in the period in which the reassessment is made.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Provision for the impairment of trade receivables and accrued income

Provision for the impairment of trade receivables and accrued income requires an estimate for the recoverability of the outstanding receivables and accrued income keeping in view various implementation challenges, disputes with customer, customers experiencing financial difficulty and receivables which have become significantly aged. Management's estimates include reasonable resolution of these matters along with customer financial standing to ensure that the trade receivable will be collected.

Pensions

The present value of the pension obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) for pension include the discount rate. Any changes in these assumptions will impact the carrying amount of pension obligations.

Research and development credits

The Group annually files claims for R&D credits in multiple jurisdictions, and management's estimate of the recoverable amount relies upon procedures in place to support the assessment and documented processes and controls to support these claims.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

1. Revenue

Revenue by activity is as follows:

	Year ended 31 May 2016	Year ended 31 May 2015
<i>all figures in \$ millions</i>		
Licence fees	253.1	205.4
Maintenance fees	458.5	474.5
Professional Services	154.4	164.4
Subscriptions	34.2	36.2
	900.2	880.5

The Group is exempt from IFRS 8, 'Operating Segments', and accordingly is not required to present segmental information

2. Operating expenses

Operating expenses are comprised of the following:

	Note	Year ended 31 May 2016	Year ended 31 May 2015
<i>all figures in \$ millions</i>			
Acquisition and integration costs		0.8	1.1
Restructuring related charges		14.7	22.4
Goodwill impairment	6	26.7	60.0
Amortisation of other intangible assets	7	195.8	210.2
Depreciation of property, plant and equipment	8	10.2	9.8
Capitalised software development costs	7	(47.2)	(34.2)
Capitalised software development costs written off	7	-	3.3
Investor management fees	25	2.7	1.4
Realised trading foreign exchange loss / (gain)		0.1	(1.2)
Net other foreign exchange (gain) / loss		1.9	9.4
Reclassification of foreign exchange on liquidation or disposal of overseas subsidiaries		(32.3)	2.2
Gain on forward currency contracts	11	(0.4)	(37.3)
Gain on embedded derivatives	11	(1.8)	(7.9)
Employee costs	below	367.8	363.2
Other operating expenses	below	206.1	221.8
		745.1	824.2

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Employee costs comprise of.

	Year ended 31 May 2016	Year ended 31 May 2015
<i>all figures in \$ millions</i>		
Wages, salaries and benefits including redundancy costs	317.9	307.7
Social security costs	35.3	38.8
Pension costs		
Defined contribution plans	13.1	15.8
Defined benefit plans	1.5	0.9
	367.8	363.2

Remuneration of Managers and key management personnel is disclosed in note 25. The average monthly number of people employed by the Group during the year was 4,720 (2015: 4,635).

Other operating expenses include:

	Year ended 31 May 2016	Year ended 31 May 2015
<i>all figures in \$ millions</i>		
Sales commissions and sales related bonus	34.2	29.1
Third party royalty fees	14.1	17.2
Agency fees	4.4	4.1
Subcontractor costs	35.5	37.5
Direct sales costs	1.7	1.7
Marketing expenses	8.1	9.9
Travel expenses	33.3	31.8
People related expenses	5.9	6.3
Occupancy costs	27.9	32.7
Information systems costs	30.0	30.9
Legal and professional costs	10.6	11.4
Other costs	0.4	9.2
	208.1	221.8

During the year, the Group obtained the following services from the Company's auditors and their associates:

	Year ended 31 May 2016	Year ended 31 May 2015
<i>all figures in \$ millions</i>		
Fees payable to Company's auditors and their associates for the audit of the consolidated financial statements	0.7	0.7
Fees payable to Company's auditors and their associates for the audit of the Company's subsidiaries	0.4	0.8
	1.1	1.5
Tax services	0.8	0.7
	1.9	2.2

Misys Newco 2 S.à r.l.

4. Taxation

Taxation on ordinary activities

	Note	Year ended 31 May 2016	Year ended 31 May 2015
all figures in \$ millions			
Current taxation			
Corporation tax on losses for the year		(34.9)	(50.2)
Adjustments in respect of prior year		(0.7)	(5.5)
Irrecoverable withholding taxes		(16.7)	(12.1)
Current taxation		(52.3)	(67.8)
Deferred taxation	10	100.2	37.6
Tax credit / (charge)		47.9	(30.2)

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The difference between actual tax income computed using a weighted average rate and the tax computed on the Group's loss can be explained as follows

	Year ended 31 May 2016	Year ended 31 May 2015
Loss before taxation (\$m)	(202.8)	(281.0)
Tax credit / (charge) (\$m)	47.9	(30.2)
Tax as a percentage of loss before tax	23.6%	(10.7)%
Weighted average tax rate on the loss before tax	14.8%	15.2%
Tax effects of:		
Permanent differences	(0.1)%	(2.9)%
Interest expense not deductible for tax purposes	(13.7)%	(8.8)%
Re-measurement of deferred tax due to changes in tax rates	0.9%	0.1%
Credit / (charge) from changes to the recognition of deferred tax assets	32.5%	(9.5)%
Adjustments in respect of prior year current tax	(0.3)%	(2.0)%
Prior year adjustments for deferred tax	(2.3)%	1.5%
Irrecoverable withholding tax	(8.2)%	(4.3)%
Tax credit / (charge)	23.6%	(10.7)%

The weighted average tax rate is calculated using the underlying statutory tax rates in the location where the profits arise. Deferred tax movements are described in note 10.

A tax credit of \$3.5m (2015: charge of \$5.8m) related to currency translation differences has been recognised in reserves.

5. Business combinations

Acquisition of CCS

On 8 August, 2014 the Group acquired 100% of the issued and outstanding membership interests of CCS for a total consideration of \$26.6m (\$24.9m, net of cash acquired). CCS is a software business based in the US which provides a loan origination product for the banking sector.

The value of the assets and liabilities acquired in the purchase of CCS and the associated fair value adjustments related to those assets are as follows:

all figures in \$ millions	Book value	Fair value adjustments	Fair value at 8 August 2014
Intangible assets	-	9.8	9.8
Property, plant and equipment	0.2	-	0.2
Cash and cash equivalents	1.7	-	1.7
Trade and other receivables	1.8	-	1.8
Accrued income	-	0.1	0.1
Trade and other payables	(0.2)	-	(0.2)
Accruals	(0.5)	-	(0.5)
Deferred income	(1.2)	(2.4)	(3.6)
Net assets acquired	1.8	7.5	9.3
Goodwill			17.3
Cash consideration			26.6

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

An analysis of enterprise value of CCS is as shown below.

	8 August 2014
<i>all figures in \$ millions</i>	
Consideration paid in cash	26.6
Cash acquired	(1.7)
Enterprise value of CCS	24.9

Goodwill arising on the acquisition of CCS is principally attributable to future profits from new customers in new markets and regions, through cross-selling opportunities and the assembled workforce. Costs associated with the acquisition of CCS of \$0.8m (2015: \$1.0m) are included in operating expenses in the consolidated income statement.

Revenue and profit of CCS were not material to the Group's financial performance in 2015. The revenue and profit that CCS would have contributed had it been consolidated from 1 June 2014 would not have been material to the Group.

6 Goodwill

	31 May 2016	31 May 2015
<i>all figures in \$ millions</i>		
Cost and net book value at 1 June	1,614.1	1,686.3
Differences on exchange	0.2	(29.5)
Acquisition of CCS (note 5)	-	17.3
Impairment charge	(26.7)	(60.0)
Cost and net book value at 31 May	1,587.6	1,614.1

Goodwill impairment testing

Goodwill acquired through business combinations has been allocated for the purposes of impairment testing to CGUs. The Group conducts annual impairment testing on the carrying value of goodwill, which is based on the recoverable amount of the CGU to which goodwill has been allocated.

The recoverable amounts of CGUs are determined by way of value in use ("VIU") calculations. The determination of whether or not goodwill has been impaired requires an estimate to be made of the VIU of the CGU to which goodwill has been allocated.

The VIU calculations use pre-tax cash flows of each CGU, based on the approved budget for the year ending 31 May 2017, and medium-term plans for the following four years which are consistent with the recent financial performance of the relevant CGU. Thereafter, a long term growth rate of 2% (2015: 2%) has been used.

The table below shows the allocation of the carrying value of goodwill as at the reporting period by CGU:

<i>all figures in \$ millions</i>	2016	2015
FusionCapital	655.6	655.4
FusionInvest	90.7	117.4
FusionBankingCore	419.1	419.1
FusionRisk	30.0	30.0
FusionBankingTransaction	219.5	219.5
FusionBankingLending	172.7	172.7
Total	1,587.6	1,614.1

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Key assumptions

The key assumptions in the VIU calculations are discount rate applied, operating margin and the long-term growth rate of net operating cash flows.

Discount rate

Discount rates used are pre-tax and reflect specific risks relating to the relevant CGU or group of CGUs. The pre-tax discount rates applied to CGUs were as follows:

	2016	2015
FusionCapital	16.2%	15.8%
FusionInvest	13.8%	13.9%
FusionBankingCore	14.8%	15.0%
FusionRisk	16.1%	16.7%
FusionBankingTransaction	15.5%	14.9%
FusionBanking Lending	15.2%	15.0%

Operating margin

Management determined budgeted operating margin based on prior performance and expectation of market development.

Long-term growth rate

Long-term growth rates of net operating cash flows are assumed equal to the long-term growth rate in the gross domestic product of the country in which the CGU's operations are undertaken, and were 2% (2015 2%) for periods beyond the first five years.

Summary of results

The impairment reviews indicated significant headroom on an aggregated basis in comparison to the total carrying value of the combined CGUs.

For the MisysFusionInvest CGU, the recoverable amount was less than its carrying value and an impairment charge of \$26.7m was recognised against the carrying value of its goodwill in 2016. The main driver for the impairment was lower revenue growth experienced in 2016 in this product group, and the lower revenue outlook for the forecast period.

In the year ended 31 May 2015 the recoverable amount of MisysFusionRisk CGU was less than its carrying value and an impairment charge of \$60.0m was recognised against the carrying value of its goodwill. The main driver for the impairment was the revenue and operating margin deterioration in 2015 experienced in this product group, and the lower revenue outlook for the forecast period.

Sensitivity to changes in assumptions

As part of the VIU testing the Managers consider the impact that a range of scenarios could have on the key assumptions within the VIU calculation.

Discount rate

The Group bases its estimate for the long-term pre-tax discount rate on its weighted average cost of capital ("WACC") using long-term market data and industry data to derive the appropriate inputs to the calculation. The Managers consider that a 1.5% change in the absolute discount rate is the maximum change that should be considered as reasonably possible as this represents an 11% to 12% increase in the WACC.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Operating margin

The Managers consider that a reduction of 5% in the absolute value of long-term operating margins across all CGUs would be the limit of what could be considered to be reasonably possible on the basis that the Group's cost base is flexible and could quickly respond to market changes. The Group is spread across a range of geographies and has a large recurring maintenance revenue stream which help to insulate it from more significant changes

Long-term growth rate

The Group uses a long-term growth rate that is the same as the long-term growth rate of gross domestic product (GDP) of the territories in which the CGU is based. Given these are long-term rates, the Managers consider a change of 1% in the absolute value of the long-term growth rate to be the limit of what is reasonably possible.

Summary of sensitivity analysis

Sensitivity analyses have been performed around the base case assumptions with the conclusion that no reasonably possible changes in key assumptions would cause the recoverable amount to be less than the carrying amount in any CGU.

7. Other intangible assets

all figures in \$ millions	Complete technology	Customer relationships	Other acquired intangibles	Total acquired intangibles	Developed software	Third party software	Total

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

all figures in \$ millions	Losses	Other deductible temporary differences	Goodwill and acquired intangibles deferred tax liability	Total
At 1 June 2014	13.8	(4.6)	(179.2)	(170.0)
Differences on exchange	-	(0.1)	(0.5)	(0.6)
Credited (charged) to the consolidated income statement (note 4)	(4.2)	2.9	38.7	37.4
Impact of change in tax rates taken to the consolidated income statement (note 4)	-	0.2	-	0.2
Charge related to components of other comprehensive income	-	(5.8)	-	(5.8)
At 31 May 2015	9.6	(7.4)	(141.0)	(138.8)

Certain deferred tax assets and liabilities have been offset. The following is an analysis of the deferred tax balances (after offset)

all figures in \$ millions	31 May 2016				31 May 2015			
	Losses	Other temporary differences	Goodwill and acquired intangibles	Total	Losses	Other temporary differences	Goodwill and acquired intangibles	Total
Deferred tax assets	78.9	5.1	-	84.0	9.6	-	-	9.6
Deferred tax liabilities	-	(9.6)	(109.5)	(119.1)	-	(7.4)	(141.0)	(148.4)
As shown above	78.9	(4.5)	(109.5)	(35.1)	9.6	(7.4)	(141.0)	(138.8)

Included within the deferred tax liability of \$35.1m (2015: \$148.4m) is \$109.5m (2015: \$141.0m) arising from acquired intangibles and goodwill. This represents the net future tax liabilities arising from the underlying goodwill and acquired intangibles. The deferred tax liability will reverse by \$21.5m (2015: \$31.0m) within one year. Deferred tax assets are recognised to the extent that it is probable that there will be sufficient future profits in the respective tax jurisdiction to utilise the assets.

In March 2016 the UK Budget announced a reduction in the corporate tax rate to 17% from 1 April 2020 from the previously enacted 18% rate. This has not been substantively enacted at the reporting date and its effect has not been included in these financial statements. The overall effect of that change, if it had applied at the reporting date would be to reduce the deferred tax liability by \$1.2m and increase the tax credit for the period by \$1.2m.

There continued to be significant international focus on tax reform during 2015/16, including the Organisation for Economic Co-operation and Development's ("OECD") Base Erosion and Profit Shifting ("BEPS") project to address mismatches in international rules and European Commission initiatives. The Group will continue to monitor developments and assess the potential impact for the Group of these and any further initiatives.

The Group has a number of deferred tax assets that are not recognised as their utilisation is not deemed to be probable due to insufficient future profits expected to arise in country or because there are legal restrictions on their use which prevent the Group being able to access them. The components of the unrecognised assets, stated gross, are UK capital losses of \$323.4m (2015: \$328.7m), Luxembourg corporate tax losses \$234.5m (2015: \$357.7m), UK corporate tax losses and other tax deductions not recognised of \$550.2m (2015: \$402.8m) and tax losses in other jurisdictions of \$5.1m (2015: \$26.1m).

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The total of these when multiplied by the respective country tax rate gives an unrecognised deferred tax asset of \$226.7m (2015: \$254.7m).

11. Derivative financial instruments

All derivative financial instruments are measured at their fair value and are calculated by reference to the net present value of future cash flows, based on exchange rates and interest rates quoted on international financial markets, at the reporting date. See note 26 for additional disclosure.

	31 May 2016		31 May 2015	
all figures in \$ millions	Assets	Liabilities	Assets	Liabilities
Forward foreign currency contracts	7.6	(6.2)	20.8	(4.0)
Embedded derivatives	7.0	(0.5)	5.9	(1.1)
	14.6	(6.7)	26.7	(5.1)
Analysed as follows				
Current	8.5	(4.9)	18.5	(4.0)
Non-current	6.1	(1.8)	8.2	(1.1)
	14.6	(6.7)	26.7	(5.1)

Forward currency contracts used to economically hedge cash flow risks

The aggregate notional amounts of the outstanding forward foreign currency contracts at 31 May 2016 were.

all figures in \$ millions	31 May 2016	31 May 2015
Euro	248.2	152.2
Pound Sterling	92.0	93.0
Indian Rupee	47.8	46.1
Philippine Peso	42.6	45.7
Romanian Leu	27.6	-
Australian Dollar	17.8	16.9
	476.0	353.9

Selected expected future non-US Dollar key currency cash flows of the Group are hedged with forward currency contracts. Hedge accounting is not applied as the technical requirements of IAS 39 'Financial Instruments' are not met. Gains and losses are recorded in the consolidated income statement within operating expenses.

During the year a \$0.4m gain (2015: \$37.3m gain) was recognised through operating expenses in the consolidated income statement in relation to forward currency contracts.

Embedded derivatives

Certain long-term software licensing contracts are priced in currencies which are not the functional currencies of the entities entering into the contracts, or are not common contracting currencies in the location in which the transaction takes place. Such contracts are considered to contain an embedded foreign currency derivative which must be extracted from the host contract and measured separately at each reporting date, except where the currency of the contract is recognised as a common means of exchange in the country concerned. Gains or losses on these derivatives are charged or credited to the consolidated income statement. The contracts are generally of up to 10 years duration and this is therefore the period over which the assets and liabilities recognised in the consolidated statement of financial position are expected to crystallise.

During the year, a \$1.8m gain (2015: \$7.9m gain) was recognised in operating expenses in the consolidated income statement in relation to embedded derivatives.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

12 Trade and other receivables

	31 May 2016	31 May 2015
<i>all figures in \$ millions</i>		
Trade receivables	250.9	208.4
Less: provision for impairment of trade receivables	(8.2)	(5.5)
Net trade receivables	242.7	202.9
Research and development credits	4.5	1.7
Other taxation and social security	4.4	3.6
Deposits	2.0	5.7
Other receivables	11.5	8.7
Prepayments	26.8	20.6
Accrued income	94.3	92.6
Current trade and other receivables	386.2	335.8
Research and development credits	17.6	16.6
Deposits	5.7	1.1
Prepayments	-	1.1
Accrued income	18.4	12.8
Non-current trade and other receivables	41.7	31.6
Total trade and other receivables	427.9	367.4

The provision for impaired trade receivables relates to receivables from customers in financial difficulty, customer acceptance issues and cancelled contracts

The accrued income balance is stated net of a provision of \$10.1m (31 May 2015: \$8.3m) for items where future billings have become uncertain due to specific circumstances with identified customers

As at 31 May 2016, trade receivables of \$100.3m (2015: \$102.1m) were past due but not impaired. These relate to a number of customers for whom there is no recent history of default and where commercial discussions lead management to conclude that it remains likely that the customer will pay without concessions from the Group. There is no significant concentration of outstanding customer receivables which is considered a heightened risk factor by management.

The ageing analysis of net trade receivables is as follows.

	31 May 2016	31 May 2015
<i>all figures in \$ millions</i>		
0-30 days	142.4	100.8
30-60 days	17.5	24.0
60-90 days	18.2	13.7
90-120 days	11.1	15.3
120-180 days	20.5	33.2
Over 180 days	33.0	15.9
	242.7	202.9

The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Other operating costs	12.5	18.7
Total accrued expenses	130.5	151.2

16. Borrowings

Borrowings consists of two main categories of external debt, being term loans which are governed by specific agreements between the Group and a consortium of lenders as identified in the following breakdown, and overdrafts and other short term facilities which were not drawn down at 31 May 2016 (2015: nil)

Term loans

	31 May 2016	31 May 2015
All figures in \$ millions		
Term loans	12.8	12.8
Capitalised arrangement fees	(12.8)	(12.8)
Borrowings – current	-	-
Term loans	1,847.6	1,857.5
Capitalised arrangement fees	(34.6)	(53.8)
Borrowings – non-current	1,813.0	1,803.7
Total term loans	1,813.0	1,803.7
Capitalised arrangement fees reclassified to other receivables	(6.4)	(5.3)
Bank loans (Note 22)	1,806.6	1,798.4

First Lien credit agreement:

- A \$1,029.8m (2015: \$1,040.5m) term loan, maturing on 12 December 2018. The term loan carries interest at London Interbank Offered Rate ("LIBOR") + 4% (May 2015: LIBOR + 4%). Principal repayments of \$2.7m are made every three months,
- A €184.4m (2015: €186.3m) term loan, maturing on 12 December 2018. The term loan carries interest at LIBOR + 4.25% (May 2015: LIBOR + 4.25%). Principal repayments of €0.5m are made every three months; and
- A \$100m (2015: \$100m) Revolving Credit Facility ("RCF"), maturing on 12 June 2017. The credit facility was unutilised at 31 May 2016 (May 2015: unutilised) although the Group drew on the facility at various times during the year. Repayments of all drawn amounts are made within three months of drawdown and are available for redrawing until maturity.

Second Lien credit agreement

- A \$625m (2015: \$625m) term loan maturing on 12 June 2019. The term loan was fully drawn on 31 May 2016 and 31 May 2015 and carries interest at 12.0% (May 2015: 12.0%). No principal repayments are due during the term of the loan.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The Group is subject to certain finance covenants under the credit agreements. These specify a maximum ratio of net borrowings to operating profit, before depreciation, amortisation and exceptional or non-recurring items, deducting capitalised research and development costs. These covenants have not been breached during the year. Substantially all of the assets of the Group are pledged as security under the credit agreements.

No additional fees were capitalised during the year ended 31 May 2016. The unamortised amounts remaining in the consolidated statement of financial position at 31 May 2016 amounted to \$53.8m, of which \$6.4m related to the current portion which was reclassified to other receivables as it exceeded the current portion of loans (May 2015: \$71.9m, of which \$5.3m was reclassified). Amortisation expense for the year of \$18.1m (2015: \$16.8m) is included in finance costs in the consolidated income statement.

The fair values are based on future expected cash flows associated with borrowings are shown in note 26.

Overdrafts and other short term facilities

The Group currently has access to two short-term uncommitted borrowing facilities provided by commercial banks. The facilities have a total availability of \$48.0m and may be drawn as short-term loans or utilised as overdraft facilities on related bank accounts. At 31 May 2016, no amounts were drawn against the facilities (May 2015: \$nil). Borrowings under the facilities are secured by participation in the security arrangements of the First Lien credit agreement and are subject to annual renewal.

17. Preferred Equity Certificates

In May 2012, the Group issued \$1,257.1m as a series of PECs, each with a par value of \$1, to its immediate parent company, Misys Newco S.à r.l. The PECs have a term of 49 years from the date of issuance (effective date) but may be retired earlier at any time by the Group or upon liquidation of the Company. The effective date, interest rate and outstanding balances for each PEC series are as follows:

all figures in \$ millions				
PEC Series	Effective date	Interest	31 May 2016	31 May 2015
A	4-May-12	12.50%, compounded monthly	30.8	27.2
B	4-May-12	12.50%, compounded annually	32.7	29.0
C	4-May-12	12.50%, compounded annually	176.5	156.6
D	4-May-12	12.50%, compounded annually	272.5	241.8
E	30-May-12	12.50%, compounded annually	1,236.7	1,097.7
F	30-May-12	0.00%	5.0	5.0
G	4-May-12	0.00%	7.5	7.5
Total			1,761.7	1,564.8

Interest of \$196.9m accrued during the year (2015: \$174.4m offset against a related party receivable from Vista Equity Partners of \$1.2m resulting in \$173.2m capitalised to the PEC balance on 31 May 2015).

Misys Newco 2 S.à r.l.

Differences on exchange	(1.3)	(0.1)	(1.4)
At 31 May 2015	6.5	0.3	6.8
Analysis of total provision:			
Current	2.5	0.3	2.8
Non-current	4.0	-	4.0
Total provisions	6.5	0.3	6.8

Property provisions

The property provisions comprise the net present value of the estimated future costs of vacant, sublet and occupied properties of the Group after taking into account dilapidation obligations in the lease. The provision relating to vacant and sublet properties is expected to be utilised on average over the next five years. Provisions released during the year relate to dilapidation provisions which are no longer required as those properties have been surrendered.

Other provisions

Other provisions relate to obligations following the acquisition of third party software, and open litigation claims.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

19. Deferred income

all figures in \$ millions	31 May 2016	31 May 2015
Current		
Maintenance fees	216.6	220.0
Other revenue	12.2	18.1
	228.8	238.1
Non-current		
Maintenance fees	4.6	3.3
Other revenue	14.5	12.3
	19.1	15.6

Deferred maintenance fees represent amounts invoiced in advance for contracts which provide technical support and trouble-shooting assistance in addition to upgrades and enhancements to the Group's software products and hardware maintenance. Maintenance fees are recognised as revenue ratably as the services are performed over the period of the contract.

Other revenue represents amounts invoiced primarily in respect of Professional Services for which the revenue recognition criteria have yet to be satisfied.

20. Retirement benefit obligations

Defined contribution schemes

The Group operates a number of defined contribution pension schemes covering the majority of its employees. The cost of these pension schemes was \$13.1m (2015: \$15.8m) and was charged to the consolidated income statement as incurred and included within employee costs. There were no outstanding or prepaid contributions at either the beginning or the end of the financial year.

Defined benefit schemes

The Group operates various defined benefit schemes across the world. The most significant scheme is in the UK and the disclosures in this note relate to that scheme. In terms of the non-UK schemes, these are summarised below.

all figures in \$ millions	31 May 2016	31 May 2015
Philippines funded scheme		
Scheme assets	5.3	4.7
Scheme liabilities	(6.2)	(6.2)
Net liability	(0.9)	(1.5)
Unfunded schemes:		
United Arab Emirates	(2.3)	(2.3)
India	(2.1)	(1.8)
Indonesia	(0.7)	(0.7)
USA	(0.2)	(0.4)
Total pension liabilities for non-UK schemes	(6.2)	(6.7)

UK Retirement Benefits Plan

In 2003/04 the active members of the Misys UK final salary retirement benefits plan (the "Plan") ceased to accrue benefits on the basis of their final salary during the year. Thereafter the benefits of the active members accrue on a money purchase (defined contribution) basis.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The Plan is a funded, defined benefit, final salary pension plan. The level of benefits provided depends on members' length of service and their salary at their date of leaving the Plan. Pensions in payment receive different levels of increases, some fixed (at 0%, 3% and 3.5% per annum) and some receiving inflationary increases in line with the increase in the Retail Prices Index ("RPI") (subject to certain caps and floors). The benefit payments are from trustee-administered funds. The amounts of contributions to be paid are decided jointly by the employer and the Trustees of the Plan. Assets held in trust are governed by UK regulations and practice. The Plan's investment strategy is decided by the Trustees, in consultation with the employer. The board of Trustees must be composed of representatives of the employer and plan participants in accordance with the Plan's legal documentation.

The latest full actuarial valuation of the Plan was carried out as at 31 May 2014, the assumptions of which have been updated to 31 May 2016 by qualified independent actuaries.

The amounts recognised in the consolidated statement of financial position are determined as follows.

	31 May 2016	31 May 2015
<i>all figures in \$ millions</i>		
Present value of funded obligations	(81.8)	(83.8)
Fair value of plan assets	92.4	91.1

Actuarial value of liabilities	(83.8)		
Surplus in the Plan	7.3		
Unrecognised asset due to limit in IAS 19 'Employee benefits' paragraph 64	(7.3)		
Net pension liability at 31 May 2015	-		

The Trustee of the Plan bought a bulk annuity policy from Legal & General Assurance (Pensions Management) Limited in respect of the Plan's pensioners and their dependents as at 14 August 2012. An estimate of the value of the buy-in contract is included in the asset value.

The market value of assets is considered to be materially the same as the fair value.

Movement in the Plan assets and obligations during the year:

all figures in \$ millions	Present value of obligation	Fair value of plan assets	Total
At 1 June 2015	(83.8)	91.1	7.3
Interest (expense) / income	(2.7)	2.7	-
	(86.5)	93.8	7.3
<i>Remeasurements:</i>			
Return on plan on assets excluding amounts included in interest expense	-	5.1	5.1
Gain from change in demographic assumptions	-	-	-
Gain from change in financial assumptions	(2.7)	-	(2.7)
Experience losses	1.0	-	1.0
	(1.7)	5.1	3.4
Exchange differences	3.3	(3.4)	(0.1)
<i>Payments from plans:</i>			
Benefit payments	3.1	(3.1)	-
At 31 May 2016	(81.8)	92.4	10.6

The actuarial gain recognised in the Group's other comprehensive income is \$0.9m (2015: \$0.6m) which relates to non-UK schemes (2015: gain from the UK scheme of \$0.8m offset by an actual loss in the non-UK schemes of \$0.2m).

Pension costs of \$14.6m (2015: \$16.7m) were recognised in the Group's consolidated income statement in operating expenses for both defined contribution and defined benefit plans.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Movement in the Plan assets and obligations during the prior year

all figures in \$ millions	Present value of obligation	Fair value of plan assets	Total
At 1 June 2014	(86.2)	85.4	(0.8)
Interest (expense) / income	(3.3)	3.3	-
	(89.5)	88.7	(0.8)
<i>Remeasurements.</i>			
Return on plan on assets excluding amounts included in interest expense	-	16.7	16.7
Gain from change in demographic assumptions	(0.5)	-	(0.5)
Gain from change in financial assumptions	(9.2)	-	(9.2)
Experience losses	1.4	-	1.4
	(8.3)	16.7	8.4
Exchange differences	7.7	(8.0)	(0.3)
<i>Payments from plans.</i>			
Benefit payments	6.3	(6.3)	-
At 31 May 2015	(83.8)	91.1	7.3

The principal assumptions used in the valuations of the Plan are:

	2016 %	2015 %
Inflation (RPI)	3.0	3.4
Inflation (CPI)	2.0	2.4
Rate of increase in pensions in payment.		
Fixed 3%	3.0	3.0
Fixed 3.5%	3.5	3.5
RPI max 5% min 3%	3.5	3.7
RPI max 5% min 3.5%	3.8	3.9
Post 1988 Guaranteed minimum pension	1.8	2.1
Discount rate for plan liabilities	3.1	3.4

Assumptions regarding future mortality are set based on actuarial advice in accordance with published statistics and experience. These assumptions translate into an average life expectancy in years for a pensioner retiring at age 60:

	2016 Years	2015 Years
Life expectancy for male currently aged 60	29.3	29.2
Life expectancy for a female currently aged 60	30.4	30.3
Life expectancy for male currently aged 40	30.8	30.6
Life expectancy for a female currently aged 40	32.9	32.7

elew

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

The sensitivity of the defined benefit obligation to changes in the principal assumptions is:

	Change in assumption	Impact on defined benefit obligation (\$millions)
Discount rate	-0.1%	(0.8)
RPI inflation	+0.1%	(0.2)
Demographic change	One year increase in life expectancy	(1.8)

The above sensitivity analysis on the discount rate is based on a change in an assumption while holding all other assumptions constant. The change in RPI inflation assumption impacts on the Consumer Prices Index ("CPI") assumption, revaluation in deferment and pension increase assumptions. When calculating sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the pension liability recognised within the statement of financial position. This is consistent with sensitivities calculated in previous periods.

The Plan is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility

The liabilities are calculated using a discount rate set with reference to corporate bond yields. If assets underperform this yield, this will create a deficit. The Plan holds a significant proportion of growth assets (e.g. equities, property, absolute return fund) which are expected to outperform corporate bonds in the long-term while providing volatility and risk in the short-term. The allocation to growth assets is monitored such that it is suitable with the Plan's long term objectives.

Changes in bond yields

A decrease in the corporate bond yields will increase the Plan's liabilities, although this will be partially offset by an increase in the value of the Plan's bond holdings.

Inflation risk

The majority of the Plan's benefit obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect against extreme inflation). The majority of the assets are either unaffected by or loosely correlated with inflation, meaning that an increase in inflation will also increase the deficit.

Life expectancy

The majority of the Plan's obligations are to provide benefits for the life of the members, so increases in life expectancy will result in an increase in the liabilities.

The Plan uses the buy-in contract and liability matching assets (which includes swaps and cash funds) as matching assets. The remainder of the assets is used as growth assets. Funding levels are monitored on a quarterly basis and the next triennial valuation is due to be completed as at 31 May 2017.

There are no employer contributions expected to be paid to the Plan for the year ending 31 May 2017. The weighted average duration of the defined benefit obligation is approximately 16 years.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

21. Net cash flow generated from operations

all figures in \$ millions	Note	Year ended 31 May 2016	Year ended 31 May 2015
Operating profit		155.1	58.3
Amortisation of other intangible assets	7	195.8	210.2
Depreciation of property, plant and equipment	8	10.2	9.8
Capitalised developed software written off	7	-	3.3
Goodwill impairment	6	26.7	60.0
Differences between pension charge and cash contributions		0.4	0.5
Gains on embedded derivatives	11	(1.8)	(7.9)
Unrealised foreign exchange gains		(16.8)	(22.3)
Movements in working capital			
(Increase) / decrease in trade and other receivables		(59.8)	10.4
Increase / (decrease) in payables and provisions		0.3	(22.0)
Decrease in deferred income		(4.3)	(8.6)
Net cash flow generated from operations		305.8	291.7

22. Reconciliation of movements in net debt

The Group defines net debt as borrowings excluding PECs, less cash and cash equivalents and restricted cash

all figures in \$ millions	Cash and cash equivalents	Restricted cash	Bank loans	Net debt
At 1 June 2014	50.8	1.4	(1,843.7)	(1,791.5)
Acquisitions	(24.9)	-	-	(24.9)
Cash flow	16.4	(0.5)	13.1	29.0
Non-cash movements	-	-	(16.8)	(16.8)
Differences on exchange	(2.0)	-	49.0	47.0
At 31 May 2015	40.3	0.9	(1,798.4)	(1,757.2)
Cash flow	1.7	-	12.8	14.5
Non-cash movements	-	-	(18.1)	(18.1)
Differences on exchange	(0.3)	-	(2.9)	(3.2)
At 31 May 2016	41.7	0.9	(1,806.6)	(1,764.0)

Restricted cash of \$0.9m (2015: \$0.9m) is not available for the general use of the Group

Bank loans are inclusive of capitalised loan arrangement fees of \$6.4m (2015: \$5.3m) which have been reclassified to other receivables as described in note 16.

23. Contingent liabilities

Contingent liabilities that are quantifiable arise from guarantees, letters of credit and bonds that have been issued in support of tenders submitted to prospective customers. These amount to \$0.9m (2015: \$1.1m).

A contingent liability exists in relation to the Group's defined benefit scheme (note 20) as a result of the proposed equalisation of Guaranteed Minimum Pension ("GMP"). The UK Government intends to implement legislation which could result in an increase in the value of GMP for males. This would increase the defined benefit obligation of the Plan. At this stage it is not possible to quantify the impact of this change.

Misys Newco 2 S.à r.l.**Notes to the consolidated financial statements for the year ended 31 May 2016**

The Company and its subsidiaries may be parties to legal actions and claims arising in the ordinary course of business. Whilst the outcome of current outstanding actions and claims remains uncertain, it is expected that they will be resolved without a material impact to the Group's financial position.

The Group considers that it is remote that any material liabilities will arise from any other contingent liabilities which are not identified above.

24. Commitments

Commitments of the Group under non-cancellable operating leases at 31 May

all figures in \$ millions	2016		2015	
	Land and buildings	Plant and equipment	Land and buildings	Plant and equipment
Rental payments due within one year	28.0	0.3	26.6	0.3
Rental payments due between one and five years	91.2	0.5	77.0	0.2
Rental payments due after five years	55.2	-	43.1	-
Total	174.4	0.8	146.7	0.5

Total future sublease income under non-cancellable subleases is \$3.5m due within one year (2015: \$4.2m), \$8.7m due between one and five years (2015: \$10.5m) and \$3.1m due after five years (2015: \$4.9m).

25. Related party transactions*Parent and subsidiaries*

Transactions between the Company and its subsidiaries, which are related parties, have been eliminated on consolidation and are not disclosed in this note.

The \$1,761.7m (2015: \$1,564.8m) PECs balance and associated accrued interest is owed to Misys Newco S.à r.l., the immediate parent entity of the Group.

Remuneration of key management personnel

The key management personnel of the Group comprise the Managers and certain other senior management. Their remuneration is set out below in aggregate.

all figures in \$ millions	Year ended 31 May 2016	Year ended 31 May 2015
Short-term employment benefits	5.4	8.1
Post-employment benefits	0.2	0.1
Termination benefits	0.2	-
	5.8	8.2

The key management personnel of the Group were due a discretionary compensation amount of \$1.9m (2015: nil) at 31 May 2016.

The Group operates a Long-Term Incentive Plan for key management personnel which has an immaterial nominal value at 31 May 2016 (2015: immaterial).

Misys Newco 2 S.à r.l.**Notes to the consolidated financial statements for the year ended 31 May 2016***Other related parties*

During the year ended 31 May 2016 the Group transacted with the following related parties:

Related Party	Relationship	Nature of transaction	During the year	Outstanding at year end
SumTotal Systems UK Limited	Formerly Vista Equity Partners portfolio company	Purchase of software	0.2	-
TIBCO Software Inc.	Vista Equity Partners portfolio company	Purchase of software	1.6	-
Vista Consulting Group LLC	Related party	Management consulting	2.7	1.3
PeopleAdmin Inc	Vista Equity Partners portfolio company	Administrative services	0.1	-
Advanced Computer Software and Solutions Limited	Vista Equity Partners portfolio company	Administrative services	0.1	-

During the year ended 31 May 2015 the Group transacted with the following related parties:

Related Party	Relationship	Nature of transaction	During the year	Outstanding at year end
SumTotal Systems UK Limited	Formerly Vista Equity Partners portfolio company	Purchase of software	0.2	-
TIBCO Software Inc.	Vista Equity Partners portfolio company	Purchase of software	0.3	-
Vista Consulting Group LLC	Related party	Management consulting	1.4	0.2
Aptean Corporation	Vista Equity Partners portfolio company	Administrative services	0.2	0.1

The Group paid \$0.4m of expenses on behalf of Vista Equity Partners (2015: \$0.6m). There is a receivable balance of \$0.6m (2015: \$0.2m) from Vista Equity Partners at 31 May 2016 which was not settled. In May 2015, cumulative debt of \$1.2m was settled via a repayment of accrued interest on Series E PECs as is prescribed under the PEC agreement.

26. Financial instruments: risk management

The Group operates a centralised treasury function which is responsible for managing the liquidity, interest rate and foreign exchange risks associated with the Group's activities under policies approved by the Board. Treasury policy is reviewed and approved annually by the Board and specifies the parameters within which treasury operations must be conducted, including authorised counterparties, instrument types, transaction limits and principles governing the management of liquidity, interest rate and foreign exchange risks.

The Group's principal financial instruments, other than derivatives, are cash, short term deposits, bank loans, PECs, trade and other receivables and trade and other payables. The main purpose of these financial instruments is to raise finance for the Group's operations.

Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations. The Group reviews the non-US Dollar net cash flow exposure of the Group and hedges forecast exposures which exceed the limit specified by management using external forward contracts. A portion of the Group's Euro denominated First Lien debt is also hedged using forward currency contracts at specific rates approved by the Board.

The Group's net exposure to foreign currency risk is illustrated by the sensitivity analysis in note 29.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Interest rate risk

The Group is exposed to cash flow interest rate risk on floating rate loans, overdrafts and cash held on deposit. The Group's borrowings are a mix of floating and fixed rates with variable interest rates set for periods of three months or less. The Group's variable rate term loan debt references LIBOR, with a specified floor of 1%. Based on various scenarios, the Group manages its cash flow interest rate risk using interest rate hedging instruments such as caps or swaps. As at 31 May 2016 the Group held no interest rate hedging instruments (2015: none).

The Group's net exposure to interest rate risk is illustrated by the sensitivity analysis in note 29.

Credit risk

Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, but primarily from outstanding trade receivables and committed transactions. The Group has policies in place to ensure that sales are made to customers with an appropriate credit history.

Derivative and cash transactions are limited to high-quality financial institutions. The Group has policies that limit the amount of credit exposure to any financial institution. For customer contracts, the Group and each reporting subsidiary have specified risk control and authorisation procedures in place to assess the credit quality of a customer. Where there is no independent risk rating for a customer, such an assessment takes into account financial position, past experience and other factors.

The Group has no significant concentrations of credit risk, with exposures spread over a large number of customers and counterparties.

Liquidity risk

The Group manages its cash and borrowing requirements centrally to minimise net interest expense within risk parameters set by the Board, whilst ensuring that the Group has sufficient liquid resources to meet the operating needs of the business. The long term forecast cash and borrowings profile of the Group is monitored to ensure that adequate headroom remains under current and projected borrowing facilities.

The table below shows the maturity analysis of the undiscounted remaining contractual cash flows of the Group's non-derivative financial liabilities.

all figures in \$ millions	Less than 1 year	1 to 2 years	2 to 5 years	Over 5 years	2016 Total
Borrowings and associated interest	125.5	149.8	1,906.2	-	2,181.5
Trade and other payables	129.8	-	-	-	129.8
Total cash flows – 2016	255.3	149.8	1,906.2	-	2,311.3

all figures in \$ millions	Less than 1 year	1 to 2 years	2 to 5 years	Over 5 years	2015 Total
Borrowings and associated interest	150.8	150.2	2,052.6	-	2,353.6
Trade and other payables	155.9	-	-	-	155.9
Total cash flows – 2015	306.7	150.2	2,052.6	-	2,509.5

The Group has also issued PECs with a maturity of 49 years as outlined in Note 17. At the reporting date, the PECs have 45 years outstanding to maturity. The PECs have not been taken into account in the above maturity analysis of undiscounted contractual cash flows. The total impact for the PECs in 45 years on an undiscounted contractual cash flow basis is \$377,251.9m (2015: \$377,251.9m).

The table below analyses the Group's outflow and inflow from derivative financial instruments into relevant maturity groupings based on the remaining contractual maturity period at the reporting date. The amounts disclosed in the table are the contractual undiscounted gross cash flows.

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

all figures in \$ millions	Less than 1 year	1 to 2 years	2 to 5 years	Over 5 years	2016 Total
Derivative financial instruments (gross settled)					
- inflows	376.5	103.2	2.5	1.8	484.0

Netting arrangements of derivative financial instruments

The gross fair value of derivative financial instruments as presented in the Group consolidated statement of financial position, together with the Group's rights to offset associated with recognised financial assets and recognised financial liabilities subject to enforceable master netting arrangements and similar agreements is summarised as follows.

all figures in \$ millions	May 2016			May 2015		
	Gross amount	Amount presented	Net amount	Gross amount	Amount presented	Net amount
Financial assets						
Forward foreign currency contracts	7.6	7.6	5.8	20.8	20.8	16.9
Financial liabilities						
Forward foreign currency contracts	(6.2)	(6.2)	(4.4)	(4.0)	(4.0)	(0.1)
	1.4	1.4	1.4	16.8	16.8	16.8

Net amounts show the effect if all amounts were netted off for each individual counter party under the terms of relevant ISDA agreements.

Capital risk

The capital structure of the Group consists of net debt, PECs (note 17) and equity attributable to equity holders of the Company, comprising issued capital, reserves and retained earnings as shown in the consolidated statement of changes in equity and note 14. The Group manages its capital with the objective that all entities within the Group continue as a going concern while maintaining an efficient structure to minimise the cost of capital.

The Group is subject to certain financial covenants under its loan facilities. These specify a maximum ratio of net debt to operating profit, before depreciation, amortisation and non-recurring items, deducting capitalised research and development costs. This covenant has not been breached during the year.

27. Financial instruments: categories*Fair value measurement hierarchy*

Fair value measurements of financial instruments (where relevant) are classified using the following fair value hierarchy which reflects the significance of the inputs used in making the measurements:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Input other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) (Level 2), and
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3)

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

		(5.1)	-	(3,536.4)	(23.5)	(186.6)	(3,378.4)

¹Fair value hierarchy shows the fair value measurement categories as described below.

²Assets that do not qualify as a financial instrument include prepayments of \$26.8m (2015: \$21.7m). Liabilities that do not qualify as financial instruments are tax and other social security payments of \$14.2m (2015: \$23.5m).

a) Financial instruments in level 1

The fair value of financial instruments traded in active markets is based on quoted market prices at the close of business on the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1 and comprise investments in quoted marketable securities.

de

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

b) Financial instruments in level 2

The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined by using valuation techniques. The valuation techniques maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Forward exchange rates valuation technique was used to value financial instruments

Financial assets

Cash and cash equivalents primarily comprise cash deposits and investments. Cash which bears interest at nominal rates comprises of: US Dollar of \$16.1m (2015: \$16.1m), Pound Sterling of \$0.5m (2015: \$3.0m), Euro of \$1.8m (2015: \$3.0m) and other currencies of \$23.3m (2015: \$18.2m). Restricted cash comprises \$0.9m (2015: \$0.9m) denominated in US Dollar and \$nil (2015: \$nil) in other currencies.

Forward foreign exchange contracts

The fair value of foreign exchange derivatives was a net asset of \$2.7m (2015: net asset of \$16.8m)

28. Financial instruments: fair values

The fair values of each category of the Group's financial instruments are approximate to their carrying values in the Group's statement of financial position as the impact of discounting is not significant.

29. Financial instruments: sensitivity analysis

Foreign currency sensitivity analysis

The Group's principal foreign currency exposures are to Pound Sterling, Euro and Indian Rupee. The table below illustrates the hypothetical sensitivity of the Group's reported profit and equity for every 10% increase and decrease, in relation to the US Dollar, Euro, Pound Sterling, Indian Rupee and Philippine Peso exchange rates at the reporting date, assuming all other variables remain unchanged. The sensitivity rate of 10% represents the Managers' assessment of a reasonably possible change for the foreseeable future.

Outstanding forward contracts used to hedge the non-US Dollar net cash flow exposure of the Group as described in note 26 are included in this analysis. It is anticipated that on maturity of the hedges an underlying future anticipated cash flow exposure will crystallise and offset any gain or loss.

Positive figures represent an increase in operating profit.

all figures in \$ millions	Consolidated income statement	
	2016	2015
US Dollar strengthens by 10%		
Euro	(10.1)	(13.0)
Pound Sterling	(3.0)	(2.0)
Indian Rupee	4.4	4.8
Philippine Peso	3.2	4.5
US Dollar weakens by 10%		
Euro	10.1	13.0
Pound Sterling	3.0	2.0
Indian Rupee	(4.4)	(4.8)
Philippine Peso	(3.2)	(4.5)

Year average exchange rates applied in the above analysis are Euro 0.90, Pound Sterling 0.67, Indian Rupee 66.21 and Philippine Peso 46.69 (2015: Euro 0.83, Pound Sterling 0.63, Indian Rupee 61.91 and Philippine Peso 44.36)

Misys Newco 2 S.à r.l.

Notes to the consolidated financial statements for the year ended 31 May 2016

Interest rate sensitivity analysis

The Group's variable rate debt references LIBOR with a floor of 1%. The Group is exposed to increases in interest rates beyond this floor. The table below illustrates the hypothetical sensitivity of the Group's reported profit to a 0.5% increase in interest rates beyond the 1%, assuming all other variables remain unchanged. The sensitivity of 0.5% represents the Managers' assessment of a reasonably possible change for the foreseeable future. Table below illustrates the impact on the consolidated income statement for a decrease of 0.5% ignoring the impact of the Group's variable rate floor of 1%.

all figures in \$ millions	Consolidated income statement	
	2016	2015
Interest rate increase of 0.5%	(6.4)	(6.7)
Interest rate decrease of 0.5%	6.4	6.7

30. Subsidiary undertakings

The Company is the direct owner and has 100% of the nominal value and voting rights over all the equity share capital of Magic Newco 4 S.à r.l. which has a registered office at 287-289 route d'Arton, L-1150, Luxembourg.

The Company is the beneficial owner and has 100% of the nominal value and voting rights over all the equity share capital, through subsidiary undertakings, of the below subsidiary undertakings.

Company Name	City	Country
Almonde Inc	Wilmington	United States
Finance Information et Technologie S.A.S	Paris	France
IND Group Holding Limited	Nicosia	Cyprus
Kapiti Limited	London	United Kingdom
