Cable Camden Limited

The Directors' Report

Year ended 31 December 2011

The directors present their report and the financial statements of the company for the year ended 31 December 2011

Principal activities and business review

The principal activity of the company during the year was, and will continue to be, the provision of cable television, telephony, broadband internet and other telecommunication services as well as running some of the telecommunication systems over which they are provided

The company is a wholly owned subsidiary undertaking of Virgin Media Inc. The Virgin Media group ("the group") is a leading entertainment and communications business, being a "quad play" provider of broadband internet, television, fixed line telephony and mobile telephony services that offer a variety of entertainment and communications services to residential and commercial customers throughout the UK.

As at 31 December 2011, the group provided services to approximately 4.8 million residential cable customers on its network. The group is also one of the UK's largest mobile virtual network operators by number of customers and at 31 December 2011 provided mobile telephony services to approximately 1.5 million prepay mobile customers and approximately 1.5 million contract mobile customers over third party networks. As of 31 December 2011, approximately 64% of residential customers on the group's cable network were "triple play" customers, receiving broadband internet, television and fixed line telephony services from the group. In addition, the group provides a complete portfolio of voice, data and internet solutions to businesses, public sector organizations and service providers in the UK through Virgin Media Business.

The group believes that its advanced deep fibre access network enables it to offer faster and higher quality broadband services than its digital subscriber line, or DSL, competitors. As a result it provides its customers with a leading next generation broadband service and one of the most advanced television on-demand services available in the UK market.

On 30 September 2011 the group completed the disposition of its interest in the UKTV television channels to a subsidiary of Scripps Networks Interactive Inc. On 12 July 2010 the group sold its television channel business known as Virgin Media TV.

Key performance indicators (KPI's)

The company's key financial and other performance indicators for the year are considered below

	2011	2010	
Turnover (£000)	17,909	17,890	Revenue has increased by 0.1% primarily due to the uptake of broadband from new and existing customers, an increase in TV services due to an increase in up-selling together with selective price increases, partially offset by higher price discounting to stimulate customer activity and retention in light of competitive factors in the market place
Gross profit margin (%)	82.5	79.4	The increase of 3.1% reflects changes in the product mix including additional customers subscribing to the higher margin broadband product, together with selective price increases, partially offset by higher price discounting
Administrative expenses (£000)	11,377	10,662	Administrative expenses have increased by 6.7% during 2011 mainly due to higher asset usage recharges allocated to the company by fellow group undertakings and an increase in depreciation expense

Selected statistics for residential cable customers served by the company at 31 December 2011 and 31 December 2010 are shown in the table below

	2011	2010
Products		
Television	22,100	22,400
Fixed line telephone	21,800	22,100

Total customers	<u>30,400</u>	<u>30,100</u>
Products per customer	<u>2.32</u>	<u>2.34</u>

Accordingly, a subscriber who receives both telephone and television services counts as two products. Products may include subscribers receiving some services for free or at a reduced rate in connection with promotional offers.

The company reported an increase in both net current assets and total assets less current liabilities for the year ended 31 December 2011 as a result of normal operations. During the year, no new external finance was arranged and there was no movement in the called up equity share capital of the company. Notes to the Financial Statements

Year ended 31 December 2011

1. Accounting policies

A summary of the principal accounting policies is set out below. All accounting policies have been applied consistently, unless noted below.

Basis of accounting

The financial statements have been prepared under the historical cost convention in accordance with the Companies Act 2006, and applicable UK accounting standards.

Cash flow statement

The company is exempt from publishing a cash flow statement as permitted by FRS 1 "Cash flow statements (revised 1996)", as it is a wholly owned subsidiary of its ultimate parent company, Virgin Media Inc.

Turnover

Turnover represents the value of services provided, stated net of value added tax and discounts, and is attributable to continuing activities, being the provision of cable television, telephony, broadband internet and other telecommunication services and to run certain of the telecommunication systems over which they are provided, all of which is derived from operations in the United Kingdom. The directors consider this to be a single class of business.

Tangible fixed assets

Depreciation is provided on all tangible fixed assets, other than land, so as to write off the cost of a tangible fixed asset on a straight line basis over the expected useful economic life of that asset as follows:

Network assets	3 - 30 years
----------------	--------------

The carrying values of tangible fixed assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

Deferred taxation

Deferred tax is recognised, as appropriate, in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions:

- provision is made for deferred tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold, and

- deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Trade and other debtors

Trade and other debtors are stated at their recoverable amount. Provision is made when the amount receivable is not considered recoverable and the amount is fully written off when the probability for recovery of a balance is assessed as being remote.

In addition, changes to the capital allowances regime were enacted in the Finance Act 2011, including a reduction in the rate of capital allowances on plant and machinery additions from 20% to 18% with effect from 1 April 2012.
