Basis of preparation (continued)

Financial assets (continued)

Trade and other receivables Amounts owed by other group companies are initially measured at fair value and are subsequently reported at amortised cost. Non-interest-bearing trade receivables are stated at their nominal value as they are due on demand. Allowances for expected credit losses are made based on the risk of non-payment taking into account ageing, previous experience, economic conditions and forward-looking data. Such allowances are measured as either 12-months expected credit losses or lifetime expected credit losses depending on changes in the credit quality of the counterparty.

Taxation

Current tax is based on taxable profit for the year. Taxable profit is different from accounting profit due to temporary differences between accounting and tax treatments, and due to items that are never taxable or tax deductible. Tax benefits are not recognised unless it is probable that the tax positions are sustainable. Once considered to be probable, tax benefits are reviewed each year to assess whether a provision should be taken against full recognition of the benefit on the basis of potential settlement through negotiation and/or litigation. Tax provisions are included in current liabilities. Penalties and interest on tax liabilities are included in profit before taxation. In prior years penalties and interest on tax liabilities were provided for in the tax charge.
