(Registered No.01937364)

## ANNUAL REPORT AND ACCOUNTS 2013

Board of Directors:

J H Bartlett
J S Blythe

C C Verchere A P Martin J M Brame

The directors present the strategic report, their report and the accounts for the year ended 31 December 2013.

## STRATEGIC REPORT

## Results

The loss for the year after taxation was \$12,356,937 which, when added to the retained deficit brought forward at 1 January 2013 of \$1,445,360, gives a total retained deficit carried forward at 31 December 2013 of \$13,802,297.

## Principal activity and review of the business

BP was awarded a 100% interest in the offshore West Aru I Production Sharing Contract ("PSC") by the Government of Indonesia on 21 November 2011 in the Arafura Sea, Indonesia.

BP West Aru I completed a seismic acquisition program in 2013 and is currently undergoing seismic processing and analysis, which is expected to be completed by September 2014.

No key financial and other performance indicators have been identified for this company.

## Principal risks and uncertainties

The company aims to deliver sustainable value by identifying and responding successfully to risks. Risk management is integrated into the process of planning and performance management at a group level. Monitoring and accountability for the management of these risks occur through quarterly performance reviews at a group level.

We urge you to consider carefully the risks described below. The potential impact of the occurrence or reoccurrence of any of the risks described below could have a material adverse effect on the company's business, financial position, results of operations, competitive position, cash flows, prospects, liquidity, shareholder returns and/or implementation of its strategic agenda.

Company level risks have been categorised against the following areas: strategic and commercial; compliance and control; safety and operational; and financial risk management. In addition, we have set out one separate risk for your attention – the risk resulting from the 2010 Gulf of Mexico oil spill.

\*L3CCMFOW\* LD6 18/07/2014 #70

**COMPANIES HOUSE** 

1

## STRATEGIC REPORT

## Principal risks and uncertainties (continued)

## Gulf of Mexico oil spill

The Gulf of Mexico oil spill (the Incident) has had and could continue to have a material adverse impact on BP as a group, and consequently may also have an adverse impact on BP West Aru I Limited.

There is significant uncertainty regarding the extent and timing of the remaining costs and liabilities relating to the Incident, the impact of the Incident on the reputation of the group and the resulting possible impact on the group's licence to operate including its ability to access new opportunities. The amount of claims, fines and penalties that become payable by the BP group (including as a result any potential determination of the BP group's negligence or gross negligence), the outcome of litigation, the terms of any further settlements including the amount and timing of any payments thereunder, and any costs arising from any longer-term environmental consequences of the Incident, will also impact upon the ultimate cost for the BP group.

These uncertainties are likely to continue for a significant period, increase the risks to which the group is exposed and may cause BP group's costs to increase materially. Thus, the Incident has had, and could continue to have, a material adverse impact on the group's business, competitive position, financial performance, cash flows, prospects, liquidity, shareholder returns and/or implementation of its strategic agenda, particularly in the US. The risks associated with the Incident could also heighten the impact of the other risks to which the group, and subsequently the company, is exposed as further described below. Further information on the Incident, is included within the BP group Annual Report and Form 20-F for the year ended 31 December 2013.

## Strategic and commercial risks

## Prices and markets

Oil, gas and product prices and margins can be very volatile, and are subject to international supply and demand. Political developments (including conflict situations), increased supply from the development of new oil and gas sources, technological change, global economic conditions and the influence of OPEC can particularly affect world supply and oil prices. Previous oil price increases have resulted in increased fiscal take, cost inflation and more onerous terms for access to resources. As a result, increased oil prices may not improve margin performance. Decreases in oil, gas or product prices are likely to have an adverse effect on revenues, margins and profitability, and a material rapid change, or a sustained change, in oil, gas or product prices may mean investment or other decisions need to be reviewed, assets may be impaired, and the viability of projects may be affected.

## STRATEGIC REPORT

## Principal risks and uncertainties (continued)

## Strategic and commercial risks (continued)

## Geopolitical

The diverse nature of the company's operations around the world exposes it to a wide range of political developments and consequent changes to the operating environment, regulatory environment and law.

The company has operations in countries and regions where political, economic and social transition is taking place. Some countries have experienced or may experience in the future political instability, changes to the regulatory environment, changes in taxes, expropriation or nationalisation of property, civil strife, strikes, acts of terrorism, acts of war and insurrections. Any of these conditions occurring could disrupt or terminate the company's operations, causing its development activities to be curtailed or terminated in these areas or its production to decline, could limit the company's ability to pursue new opportunities, could affect the recoverability of its assets and could cause it to incur additional costs.

## Competition

The company's strategy depends upon continuous innovation in a highly competitive market.

The oil, gas and petrochemicals industries are highly competitive. There is strong competition, both within the oil and gas industry and with other industries, in supplying the fuel needs of commerce, industry and the home. Competition puts pressure on the terms of access to new opportunities; licence costs and product prices, affects oil products marketing and requires continuous management focus on improving efficiency, while ensuring safety and operational risk is not compromised. The implementation of the BP group strategy requires continued technological advances and innovation including advances in exploration, production, refining, petrochemicals manufacturing technology and advances in technology related to energy usage. The company's performance could be impeded if competitors developed or acquired intellectual property rights to technology that it required or by its failure to adequately protect the company's brands and trademarks. The company's competitive position in comparison to its peers could be adversely affected if competitors offer superior terms for access rights or licences, if it fails to control its operating costs or manage its margins, or if it fails to sustain, develop and operate efficiently a high quality portfolio of assets.

## Compliance and control risks

## Regulatory

The oil industry in general is subject to regulation and intervention by governments throughout the world in such matters as the award of exploration and production interests, the imposition of specific drilling obligations, environmental, health and safety controls, controls over the development and decommissioning of a field (including restrictions on production) and, possibly, nationalisation, expropriation, cancellation or non-renewal of contract rights.

The oil industry is also subject to the payment of royalties and taxation, which tend to be high compared with those payable in respect of other commercial activities, and operates in certain tax jurisdictions that have a degree of uncertainty relating to the interpretation of, and changes to, tax law.

## STRATEGIC REPORT

## Principal risks and uncertainties (continued)

## Compliance and control risks (continued)

## Regulatory (continued)

The company remains exposed to changes in the regulatory environment, such as new laws and regulations (whether imposed by international treaty or by national or local governments in the jurisdiction in which it operates), changes in tax or royalty regimes, price controls, the imposition of trade or other sanctions, government actions to cancel or renegotiate contracts or other factors. Governments are facing great pressure on public finances, which may increase their motivation to intervene in the fiscal and regulatory frameworks of the oil and gas industry and we remain exposed to increases in amounts payable to governments or government agencies. Such factors could reduce the company's profitability from operations in certain jurisdictions, limit its opportunities for new access, require it to divest or write-down certain assets or curtail certain operations, or affect the adequacy of its provisions, tax, environmental and legal liabilities. Potential changes to pension or financial market regulation could also impact funding requirements of the company.

## Ethical misconduct and non-compliance

Incidents of ethical misconduct or non-compliance with applicable laws and regulations, including non-compliance with anti-bribery, anti-corruption and other applicable laws could be damaging to the company's reputation and shareholder value. Multiple events of non-compliance could call into question the integrity of the company's operations.

## Liabilities and provisions

The BP group's potential liabilities resulting from pending and future claims, lawsuits, settlements and enforcement actions relating to the Incident, together with the potential cost and burdens of implementing remedies sought in the various proceedings, have had, and are expected to continue to have, a material adverse impact on the group's business and consequently may also impact the company's business. Further information is included within the BP group Annual Report and Form 20-F for the year ended 31 December 2013.

## Reporting

External reporting of financial and non-financial data is reliant on the integrity of systems and people. Failure to report data accurately and in compliance with external standards could result in regulatory action, legal liability and damage to the company's reputation.

## STRATEGIC REPORT

## Principal risks and uncertainties (continued)

## Safety and operational risks

## Process safety, personal safety and environmental risks

The nature of the company's operations exposes it to a wide range of significant health, safety, security and environmental risks. The scope of these risks is influenced by the geographic range, operational diversity and technical complexity of the company's activities. In addition, in many of the company's major projects and operations, risk allocation and management is shared with third parties, such as contractors, sub-contractors, joint venture partners and associates.

There are risks of technical integrity failure as well as risk of natural disasters and other adverse conditions in many of the areas in which the company operates, which could lead to loss of containment of hydrocarbons and other hazardous material, as well as the risk of fires, explosions or other incidents.

The company's operations are often conducted in hazardous, remote or environmentally sensitive locations, in which the consequences of a spill, explosion, fire or other incident could be greater than in other locations. These operations are subject to various environmental and safety laws, regulations and permits and the consequences of failure to comply with these requirements can include remediation obligations, penalties, loss of operating permits and other sanctions. Accordingly, inherent in the company's operations is the risk that if it fails to abide by environmental and safety and protection standards, such failure could lead to damage to the environment and could result in regulatory action, legal liability, material costs and damage to the company's reputation or denial of licence to operate.

BP's group-wide operating management system (OMS) intends to address health, safety, security, environmental and operations risks, and aims to provide a consistent framework within which the group can analyse the performance of its activities and identify and remediate shortfalls. There can be no assurance that OMS will adequately identify all process safety, personal safety and environmental risks or provide the correct mitigations, or that all operations will be in conformance with OMS at all times.

## Financial risk management

The main financial risks faced by the company which arise from natural business exposures are market risks relating to foreign currency exchange rates. The management of these financial risks is performed at BP group level. The company seeks to maintain a financial framework to ensure that it is able to maintain an appropriate level of liquidity and financial capacity. This framework constrains the level of assessed capital at risk for the purposes of positions taken in financial instruments. Failure to accurately forecast or maintain sufficient liquidity and credit to meet these needs could impact the company's ability to operate and result in a financial loss.

## STRATEGIC REPORT

## Principal risks and uncertainties (continued)

## Financial risk management (continued)

## Market risk

Market risk is the risk or uncertainty arising from possible market price movements and their impact on the future performance of a business. The primary commodity price risks that the company is exposed to include oil, natural gas and power prices that could adversely affect the value of the company's financial assets, liabilities or expected future cash flows. The company enters into derivatives in a well-established entrepreneurial trading operation. In addition, the BP group has developed a control framework aimed at managing the volatility inherent in certain of its natural business exposures. In accordance with this control framework the group enters into various transactions using derivatives for risk management purposes.

The major component of market risk is foreign currency exchange risk which is discussed below.

Foreign currency exchange risk

Fluctuations in foreign exchange rates can have significant effects on the company's reported results. The company's financial assets and liabilities give rise to transactional currency exposures. Such exposures arise from transactions in a currency other than the company's functional currency. The management of such risks is performed at BP group level. The main underlying economic currency of the BP group's cash flows is the US dollar. This is because the BP group's major product, oil, is priced internationally in US dollars. The BP group's foreign currency exchange management policy is to limit economic and material transactional exposures arising from currency movements against the US dollar. The BP group co-ordinates the handling of foreign exchange risks centrally, by netting off naturally occurring opposite exposures wherever possible, and then dealing with any material residual foreign currency exchange risks. For highly probable forecast capital expenditures the group locks in the US dollar cost of non US dollar supplies by using currency forwards and futures.

Crude oil prices are generally set in US dollars, while sales of refined products may be in a variety of currencies. Fluctuations in exchange rates can therefore give rise to foreign currency exchange exposures, with a consequent impact on underlying costs and revenues.

## **DIRECTORS' REPORT**

## **Directors**

The present directors are listed on page 1.

J H Bartlett, J S Blythe, W W L Lin, A P Martin and M R Illingworth served as directors throughout the financial year. Changes since 1 January 2014 are as follows:

	•			<u>Appointed</u>	Resigned
M R Illingworth			•	•	31 January 2014
W W L Lin		•			10 May 2014
C C Verchere				10 May 2014	

## **Directors' indemnity**

The company indemnifies the directors in its Articles of Association to the extent allowed under section 232 of the Companies Act 2006. Such qualifying third party indemnity provisions for the benefit of the company's directors remain in force at the date of this report.

## **Dividends**

The company has not declared any dividends during the year (2012: \$Nil). The directors do not propose the payment of a dividend.

## Post balance sheet event

After the balance sheet date, 12,000,000 ordinary shares of \$1 each for a total nominal value of \$12,000,000 were allotted to the immediate parent company at par value.

## **Future developments**

The directors consider that, despite the uncertainties deriving from the current economic environment and the loss reported for the year, the company has adequate resources to continue in operational existence for the foreseeable future.

## **Auditor**

In the absence of a notice proposing that the appointment be terminated, Ernst & Young LLP will be deemed to be re-appointed as the company's auditor for the next year.

## **DIRECTORS' REPORT**

## Directors' statement as to the disclosure of information to the auditor

The directors who were members of the board at the time of approving the directors' report are listed on page 1. Having made enquiries of fellow directors and of the company's auditor, each of these directors confirms that:

- To the best of each director's knowledge and belief, there is no information relevant to the preparation of their report of which the company's auditor is unaware; and
- Each director has taken all the steps a director might reasonably be expected to have taken to be aware of relevant audit information and to establish that the company's auditor is aware of that information.

## STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE ACCOUNTS

The directors are responsible for preparing the Strategic Report, the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom accounting standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and the profit or loss for that period. In preparing these accounts, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable United Kingdom accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors confirm that they have complied with these requirements and, having a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future, continue to adopt the going concern basis in preparing the accounts.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

## 1. Accounting policies

## Accounting standards

These accounts are prepared on a going concern basis and in accordance with the Companies Act 2006 and applicable UK accounting standards.

The principal accounting policies are set out below and have been applied consistently throughout the year.

In addition to the requirements of accounting standards, the accounting for exploration and production activities is governed by the Statement of Recommended Practice ('SORP') 'Accounting for Oil and Gas Exploration, Development, Production and Decommissioning Activities' issued by the UK Oil Industry Accounting Committee on 7 June 2001.

These accounts have been prepared in accordance with the provisions of the SORP.

## Accounting convention

The accounts are prepared under the historical cost convention.

## Basis of preparation

At 31 December 2013 the company's balance sheet had total net liabilities amounting to \$6,302,292.

The directors consider it appropriate to prepare the accounts on a going concern basis because since the balance sheet date the company received an injection of cash from its immediate parent of \$12,000,000:

## Cash flow statement and related party disclosures

The group accounts of the ultimate parent undertaking, which are publicly available, contain a consolidated cash flow statement. Consequently the company has taken advantage of the exemption from preparing a cash flow statement under the terms of FRS 1 "Cash Flow Statements" (Revised 1996). The company is also exempt under the terms of FRS 8 "Related Party Disclosures" from disclosing related party transactions with entities that are wholly-owned members of the BP group. For details of other related party transactions see note 12.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

## Accounting policies (continued)

## Foreign currency transactions

Foreign currency transactions are initially recorded in dollars by applying the exchange rate ruling on the date of transaction. Foreign currency monetary assets and liabilities are translated into dollars at the rate of exchange ruling at the balance sheet date. Exchange differences are included in the profit and loss account.

## Intangible assets.

Intangible assets include expenditure on the exploration for and evaluation of oil and natural gas resources, computer software, patents, licences, trademarks and product development costs. Product development costs are capitalised as intangible assets when a project has obtained sanction and the future recoverability of such costs can reasonably be regarded as assured.

Intangible assets are not depreciated. The indefinite life of intangible assets is reviewed on an annual basis and, if necessary, changes in useful lives are accounted for prospectively.

The carrying value of intangible assets is reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. To the extent that the carrying amount exceeds the recoverable amount, that is, the higher of net realisable value and value in use, the asset is written down to its recoverable amount. The value in use is determined from estimated discounted future net cash flows.

## Oil and natural gas exploration and development expenditure

Oil and natural gas exploration and development expenditure is accounted for using the successful efforts method of accounting.

## Licence and property acquisition costs

Exploration licence and property leasehold acquisition costs are initially capitalised within intangible fixed assets. Upon determination of economically recoverable reserves ('proved reserves' or 'commercial reserves'), the costs are aggregated with exploration expenditure and held on a field-by-field basis as proved properties awaiting approval within intangible assets. When development is sanctioned, the relevant expenditure is transferred to tangible production assets.

Each property is reviewed on an annual basis to confirm that drilling activity is planned and the property is not impaired. If no future activity is planned, the remaining balance of the licence and property acquisition costs is written off.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

## 1. Accounting policies (continued)

## Exploration expenditure ·

Geological and geophysical exploration costs are charged against income as incurred. Costs directly associated with an exploration well are capitalised as an intangible asset until the drilling of the well is complete and the results have been evaluated. These costs include employee remuneration, materials and fuel used, rig costs and payments made to contractors. If hydrocarbons are not found, the exploration expenditure is written off as a dry hole. If hydrocarbons are found and, subject to further appraisal activity, which may include the drilling of further wells, are likely to be capable of commercial development, the costs continue to be carried as an asset. All such carried costs are subject to regular technical, commercial and management review to confirm the continued intent to develop or otherwise extract value from the discovery. When this is no longer the case, the costs are written off. When proved reserves of oil and natural gas are determined and development is sanctioned, the relevant expenditure is transferred to tangible production assets.

### Other debtors

Other debtors are carried at the original invoice amount, less allowances made for doubtful receivables. Provision is made when there is objective evidence that the company will be unable to recover balances in full. Balances are written off when the probability of recovery is assessed as being remote.

## Trade and other creditors

Trade and other creditors are carried at payment or settlement amounts. If the effect of the time value of money is material, trade and other creditors are determined by discounting the expected future cash flows at a pre-tax rate.

## 2. Loss on ordinary activities before taxation

	This is stated after crediting:		2013	2012
•			. \$	\$
	Currency exchange gains	•	(38,148)	(280)
<b>3.</b> • .	Auditor's remuneration			
•			2013	2012
·	Fees for the audit of the company		9,145	\$ 6,714

Fees paid to the company's auditor, Ernst & Young LLP, and its associates for services other than the statutory audit of the company are not disclosed in these accounts since the consolidated accounts of BP West Aru I Limited's ultimate parent, BP p.l.c., are required to disclose non-audit fees on a consolidated basis.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2013

## 4. Taxation

The company is a member of a group for the purposes of relief within Part 5, Corporation Tax Act 2010. No UK corporation tax has been provided because another group company, BP International Limited, has undertaken to procure the claim or surrender of group relief to the extent it is required and to provide for any current or deferred UK tax that arises without charge.

The following table provides a reconciliation of the UK statutory corporation tax rate to the effective current tax rate on loss before taxation.

	2013	2012
