#### 16 Deferred taxation

Full provision is made for deferred tax arising from timing differences existing at the balance sheet date where there exists an obligation to pay more, or right to pay less tax, with the following exceptions

- Provision is made for tax on gains arising from revaluation of fixed assets, or gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold.
- Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be sufficient taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax balances are not discounted and are calculated at the tax rates that are expected to apply in the periods in which the timing differences are expected to reverse
