NOTES TO THE ABBREVIATED ACCOUNTS
for the Year Ended 28 February 2014

1. ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents net invoiced sales of goods and services, excluding value added tax, except in respect of service contracts where turnover is recognised when the company obtains the right to consideration.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under a finance lease, over the lease term, whichever is the shorter.

Plant and machinery	- 25% on reducing balance
Fixtures and fittings	- 15% on reducing balance

Stocks and work in progress

Stocks and work in progress are valued at the lower of cost and net realisable value. Cost includes all direct expenditure and an appropriate proportion of fixed and variable overheads.

Deferred tax

Full provision is made at current rates for taxation in respect of all timing differences that have originated but not reversed by the balance sheet date. Deferred tax balances are not discounted.

Leasing commitments

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to the profit and loss account in the period to which they relate.

Long term contracts

Profit on long term contracts is taken as the work is carried out if the final outcome can be assessed with reasonable certainty. The profit included is calculated on a prudent basis to reflect the proportion of work carried out at the year end by recording turnover and related costs as contract activity progresses. Turnover is calculated as that proportion of total contract value which revenue generated to date bears to total expected revenue for that contract.

Where a contract is in its early stages, such that the outcome cannot be assessed with reasonable certainty, turnover is recognised in accordance with the costs incurred, in order to reflect a nil profit.

Full provision is made for losses on all contracts in the period in which they are first foreseen.
