NOTES TO THE FINANCIAL STATEMENTS

1. ACCOUNTING POLICIES

(a) Adoption of International Financial Reporting Standards

The financial statements have, for the first time, been prepared in accordance with International Financial Reporting Standards adopted by the International Accounting Standards Board (IASB), and interpretations issued by the International Financial Reporting Interpretations Committee of the IASB. The date of transition to IFRS for the Company and the date of its opening IFRS balance sheet was 1 January 2004.

(b)Accounting convention

The financial statements have been prepared on the historical cost basis, except that equity shares classified as available for sale are stated at their fair value.

(c)Foreign currencies

The financial statements are presented in sterling, which is the functional currency of the Company.

Transactions in foreign currencies are translated into sterling at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Foreign exchange differences arising on translation are recognised in profit or loss.

(d)Taxation

Provision is made for taxation at current enacted rates on taxable profits, arising in income or in equity, taking into account relief for overseas taxation where appropriate. Deferred taxation is accounted for in full for all temporary differences between the carrying amount of an asset or liability for accounting purposes and its carrying amount for tax purposes.

Deferred tax assets are only recognised to the extent that it is probable that they will be recovered.

(e)Financial assets

Equity shares are recognised as available for sale assets. Available-for-sale financial assets are initially recognised at fair value plus directly related transaction costs. They are subsequently measured at fair value. Exchange differences resulting from retranslating the amortised cost of currency monetary available-for-sale financial assets are recognised in profit or loss. Other changes in the fair value of available-for-sale financial assets are reported in a separate component of shareholders' equity.

(f) Cash and cash equivalents

Cash and cash equivalents comprises cash on hand and demand deposits with banks together with short-term highly liquid investments that are readily convertible to known amounts of cash and subject to insignificant risk of changes in value.

2. Critical accounting estimates and judgments

The reported results of the Company for 2005 are sensitive to the accounting policies, assumptions and estimates that underlie the preparation of its financial statements. The Company's principal accounting policies are set out in note 1. UK company law and accounting standards requires the director, in preparing the Company's financial statements, to select suitable accounting policies, apply them consistently and make judgements and estimates that are reasonable and prudent. Where accounting standards are not specific and management have to choose a policy, International Accounting Standard ("IAS") 8 'Accounting Policies, Changes in Accounting Estimates and Errors' requires them to adopt policies that will result in information that is relevant, reliable, free from bias, prudent and complete in all material respects.

There are no particular judgements and assumptions involved in the Company's accounting policies that are considered by the Board to be of significance to the portrayal of its financial condition are discussed below. All equity shares recorded at fair value are listed and valuations are based on quoted prices at the balance sheet date.
