## Notes to the Financial Statements For the Year Ended 31 December 2011

## 1. Accounting Policies

#### 1.1 Basis of preparation of financial statements

These financial statements have been prepared on the going concern basis, under the historical cost convention and in accordance with the Companies Act 2006 and applicable accounting standards in the United Kingdom. The directors, in accordance with the Financial Reporting Standard 18, "Accounting Policies" ("FRS 18"), confirm that the accounting policies used by the Company are the most appropriate, consistently applied and adequately disclosed.

#### 12 Cash flow

The Company, being a subsidiary undertaking where 90% or more of the voting rights are controlled within the group whose consolidated financial statements are publicly available, is exempt from the requirement to draw up a cash flow statement in accordance with FRS 1

#### 13 Turnover

Turnover comprises revenue recognised by the Company in respect of goods and services supplied during the year, exclusive of Value Added Tax and trade discounts

Revenue is recognised when the significant risks and rewards of ownership have been transferred to a third party, or for services provided, at the point when it is probable that the economic benefits will flow to the Company and when the amount of revenue can be reliably measured. Revenue is measured at the fair value of the consideration.

Radio advertising revenue is recognised on the date of broadcast

## 1.4 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following bases.

Short Term Leasehold Property - over length of lease Office equipment and vehicles - 3 to 5 years

## 15 Operating leases

Rentals under operating leases are charged to the Profit and Loss Account on a straight line basis over the lease term

## 16 Dividends payable

Dividend distributions to the Company's shareholders are recognised as a liability either in the period in which the dividends are approved by the Company's shareholders or, in the case of interim dividends when the dividend is paid

## Notes to the Financial Statements For the Year Ended 31 December 2011

## 1. Accounting Policies (continued)

#### 1.7 Deferred taxation

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse

Deferred tax assets and liabilities are not discounted

#### 1.8 Pensions

The Bauer Group, of which the Company is a subsidiary, operates a defined contribution pension scheme provided by Scottish Widows known as Bauer Consumer Media Pension scheme for all eligible staff across the Group. The costs of this pension scheme are charged to the profit and loss account as they become payable.

### 1.9 Provisions for liabilities

Provisions are recognised when the Company has a present legal or constructive obligation as a result of a past event, when it is probable that an outflow of resources will be required to settle the obligation and when a reliable estimate can be made of the amount of the obligation

Where the Company expects some or all of a provision to be released, the release is recognised only when it is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement.

If the time value of money has a material effect on quantifying the provision, the provision is determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a finance charge.

## 2. Turnover

The Company takes part in barter advertising deals the value of which are included in both turnover and cost of sales. The value of these transactions in the year amounted to £1,733 (2010 £10,118)

All turnover arose within the United Kingdom

## 5. Taxation (continued)

## Factors that may affect future tax charges

The standard rate of Corporation Tax in the UK reduced from 28% to 26% with effect from 1 April 2011 Accordingly the Company's profits for this accounting period are taxed at an effective rate of 26.5%

The March 2011 Budget Announcement proposed that the main rate of corporation tax would be reduced to 26% from 1 April 2011 and 25% from 1 April 2012. As these changes were substantively enacted at the balance sheet date, the deferred tax asset has been restated to reflect the reduced tax rate of 25%. The effect of this in these financial statements is not material.

The March 2012 Budget announcement included a further proposal to reduce the main rate of corporation tax to 24% from 1 April 2012, with further reductions to reduce the rate to 22% by 1 April 2014. As these changes had not been substantively enacted at the balance sheet date no account has been taken of them in these financial statements.

The overall effect of the further changes from 25% to 22% if applied to the deferred tax balance at 31 December 2011 would not be material

The rate of writing down allowances on the main pool of plant and machinery and on the special rate pool will fall to 18% and 8% respectively with effect from 1 April 2012
