Strategic report

The directors present their strategic report and the financial statements for the year ended 31 December 2020.

Review of the business

The principal activities during the year continued to be the management of customers' supply chain requirements, in particular the design, distribution and support of semi-conductor and lighting solutions.

The Company's key financial indicators during the year were as follows:

	2020 £000	2019 £000	Change £000	Change %
Turnover	727,752	720,662	7,090	1.0
Gross profit %	12.2%	13.2%	(1.0%)	(7.6)
Operating profit	2,922	3,785	(863)	(22.8)
Profit after tax	12,650	13,407	(757)	(5.6)
Total equity	273,645	260,995	12,650	4.9
Net current assets	321,212	233,030	88,182	37.8

Turnover increased by 1.0% (2019 – 5% increased). Although the impact of Covid was strongly felt across the sector in the early part of the year, the second half saw a strong recovery resulting in slight growth year on year and acquisition of market share as a result of not being heavily invested in the industries most hard hit by the shutdowns.

Sales, General and Administration Costs (SGA) decreased by 6.3%. Most notably this was most heavily influenced by a reduction in travel costs and associated expenses as a result of the lockdowns put in place in all the countries in which the Company trades.

The increase in volume has added approximately £0.8m to the Gross Profit (GP). The reduction in GP percentage has decreased Gross Margin by approximately £7.4m, giving a total decrease of £6.6m, (2019 – decrease of £24.2m). The decrease in SGA costs, has positively impacted operating profit by £5.9m, giving an overall decrease in operating profit of £0.9m (2019 – decrease of £29.9m).

Income from shares in group undertakings was £12.2m in 2020 compared to £12.5m in 2019, reducing profit on ordinary activities before interest and taxation by £0.3m (2019: £7.1m).

Net current assets have increased by 38% (2019 – 21% decreased), or £88.2m (2019 – £62.5m), reflecting a decrease in stock of £5.4m (2019 – £7.5m decrease), an increase in debtors of £21.2m (2019 – £15.8m decrease), and an increase in net cash of £5.7m (2019 – £18.0m decrease) and a decrease in creditors (<1year) of £66.6m (2019 - £21.3m increase). This is consistent with the movement in trading performance noted above, other than the movement in creditors, which is due to the reclassification in the classification of an intercompany loan that will now expire at the end of 2022 from short-term to long-term.

Strategic report

Principal risks and uncertainties

The Company has identified the principal risks that it faces, and its reaction to them, as follows:

Market risk

The European Electronic Component market is subject to fluctuations of demand by customers. These fluctuations are linked to the economic cycles of the region and each individual country as well as the migration of manufacturing activity to lower cost locations. The Company manages its exposure to these fluctuations by monitoring working capital, restricting dependence on large customers and maintaining close working relationships with suppliers.

Financial risk management

The Company manages its interest rate risk exposure, as interest on the group loan is an annually agreed fixed rate of interest.

The Company manages its foreign currency risk exposures on the sale of goods overseas where possible by invoicing in the same currency that the goods were purchased in. In addition, where the buying and selling currencies are mismatched, the Company attempts to include contractual terms to enable a variable rate to be invoiced in the event of significant currency movements.

The Company assesses the creditworthiness of new customers before commencing trade with them. Based on this, authorised credit line limits are set. A proactive approach to the identification and control of bad and doubtful debts is operated as well as a group insurance policy against uncollectible receivables.

Competitive risk

The Company is at risk from changes in market trading conditions driven by consumer demand and the level of competition in the marketplaces in which the company operates. The Company attempts to offset such risks by maintaining a diversified portfolio of products and suppliers and by extending the geographical marketplaces in which it operates.

Legislative and business environment risk

Unanticipated changes in the legislative framework in which the company operates could affect its future results from operations. In addition, the Company buys and sells products in many different countries exposing it to the additional risks of their legislatures as well as economic, political and business environmental risks. The Company continuously assesses these environments and decides what actions to take to limit its risk following such examination, up to the withdrawal from markets considered to hold a prohibitive level of risk.

COVID-19 Virus

Throughout 2020 the Company took appropriate measures to protect staff whilst safeguarding the business. The Company had already adopted the technology required to be able to work from home before the pandemic struck and so was well placed to make a swift transition to a new business model. In between lockdowns we allowed employees back into the office on a voluntary basis based on a rotation of staff and having taken significant measures to make the offices Covid-proof. Currently employees are still working from home but will be allowed back into the office, again on a rotational basis, when government guidelines allow and assuming that in the view of the directors, this can be done whilst still keeping the staff safe. Throughout the pandemic, the Company has not furloughed any staff or benefitted from any government incentive schemes.

Our experience is that we adapted well to the changed circumstances. Our distribution centre in Leipzig continued to operate with a full team. Additionally, stringent measures, and daily checks were carried out, and to date there have been no cases of infection reported.

Our suppliers and customers took the measures they felt appropriate to their situations and national laws. Our supply and level of inventory was sufficient to enable us to continue to operate without disruption.

Strategic report

Principal risks and uncertainties (continued)

COVID-19 Virus (continued)

During the spring of 2020 many customers, particularly in France, Spain and Italy closed temporarily, resulting in a weaker second quarter, however the business strengthened significantly in Q3 and Q4, with an increasing backlog of orders.

2021 is showing significant growth with the first half of 2021 growing over 30% in turnover compared to prior year in US dollars. The industry is benefitting from resurgent demand driven by all sectors, but in particular those associated with 5G network projects and the automotive sectors

Brexit

In June 2016 the United Kingdom voted in a referendum to leave the European Union. In January 2020 the Withdrawal Agreement was signed, agreeing the terms of the departure of the UK from the EU. A transition period was agreed until the end of 2020. Since the start of 2021 the Company has been operating under the new legislature. The Company took many precautions to ensure that UK customers would not be impacted by providing them with additional inventory and extended payment terms. Although the new process has proved cumbersome, particularly given the worldwide shortage of semiconductors and passive components, we have managed the situation successfully. It remains the view of the Directors that the implementation of the decisions in 2021 has not had a materially negative effect on the Company. It should be noted that majority of the Company's business is outside of the UK, being supplied from the distribution centre in Germany, and has therefore not been affected by these changes.

Statement by the Directors in performance of their statutory duties in accordance with S172 (1) Companies Act 2006

The directors consider that both individually and together they have acted in the way they consider, in good faith, would be most likely to promote the success of the Company for the benefit of its members as a whole (having regard to the stakeholders and matters set out in s172 (1) (a-f) of the Act) in the decisions taken during the year ended 31 December 2019. This forms part of the directors' statement required under section 414CZA of the Companies Act 2006.

Through the actions detailed below, the directors have worked to ensure that the long-term objectives of the business are met and its reputation maintained

Customers

The Company works closely with its customers to understand and address their business requirements in order to further the success of the respective businesses in partnership.

Senior management (including company directors) meet regularly with key strategic partners, which provides valuable insights into customers' issues, challenges and opportunities.

Employees

Matters affecting employees are communicated via the management structure to enable employees to be aware of the Company's strategy and performance. As a key component of making the Company a great place to work, wellbeing initiatives have been successfully delivered during the year including private health insurance, social club, cycle schemes, eyesight testing, life-style management programs and training 5 'mental health first aiders' who are available to support all employees. The Company also rolled out a compulsory online management training course on 'Mental Health Awareness'.

Strategic report

Statement by the Directors in performance of their statutory duties in accordance with S172 (1) Companies Act 2006 (continued)

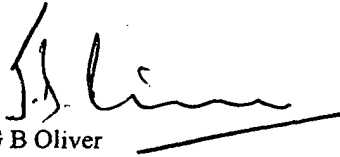

Suppliers

Company suppliers are fundamental to the success of its business. Key supplier relationships are managed at an executive level across the Future Electronics organisation globally, regionally and locally.

Community and environment

The Company is committed to managing the wider social and environmental impacts of its operations. Reference is made to the Future Electronics website for details of the 'Code of Conduct', 'Environmental Policy' and 'Modern Slavery and Human Trafficking Statement'.

On behalf of the Board

G B Oliver
Director

29 September 2021

Registered No. 2087867

Directors' report

The directors present their report and financial statements for the year ended 31 December 2020.

Results and dividends

The profit for the year after taxation amounted to £12.7m (2019 – profit of £13.4m). No dividend was paid to Future Electronics Management Services Ltd (2019 – £nil).

Future developments

The Company is committed to strengthening its market position across EMEA and continues to invest in improving its presence, efficiency and effectiveness in all locations to achieve that aim.

Going concern

A financial review of the results and group financial position occurs each month with the Board of Future Electronics Limited (FEL) and the Board of Future Electronics Inc. The group has considerable financial resources together with established long-term relationships with a number of customers, suppliers and advisors. As a consequence, the directors believe that the group is well placed to manage its business risks successfully.

As mentioned in the Strategic report under the principal risks and uncertainties, Covid-19 has not had a significant negative impact on the Company in relation to its going concern status. The Company is trading profitably, with positive cash flow and a strong balance sheet forecasted throughout the going concern assessment period of 12 months from approval of the financial statements. In addition, the Company has a letter of support from the ultimate parent company, Future Electronics Inc., committing to provide continuing financial support in the event the Company is unable to meet its obligations itself.

Whilst the consequences of the COVID-19 pandemic have been far-reaching, the impact on the industries in which the company serves, with the exception of the transportation sector, has been limited. The demand for electronic components has continued to be relatively strong, and despite the overall industry suffering a circa 15% reduction in the first part of 2020 vs 2019, FEL achieved some top-line growth in 2020 vs 2019. In 2021, as anticipated, some of the market went into supply shortage as demand exceeded supply in these areas. As a result of this, the company experienced record breaking EMEA revenues in Q1 and Q2, and are on track for a record Q3 as this high level of demand continues. The directors expect demand to continue to be strong beyond that, as countries begin electronic intensive infrastructure projects such as the roll out of 5G and all of the products that become enabled by that. In assessing going concern, the Directors have noted the following matters:

- In 2020 FEL had operating profit of £2.9m on turnover of £728m. PBT was £12.9m and net income £12.6m;
- The forecast for 2021 is operating profit of £5.3m on turnover of £847m. PBT is forecast at £13.6m and net income £12.8m;
- As at December 2020 current assets totalled £408m. Forecast for December 2021 is £441m. This includes £189m of inventory and £246m of trade debtors;
- Agreements with suppliers provide a level of return rights and subsidised inventory write-offs. Typically write-offs to our results have not exceeded the 0.5%-1% range. Therefore, the majority of this value would be convertible to cash;
- As noted above, management of credit terms is very strict and as a result bad debts tend not to exceed 0.1% of receivables. FY 2020 was 0.02%. Again this asset has very high liquidity;
- Short-term payables are forecast at £107m at December 2021, compared to £87m at December 2020;
- Intercompany loan funding of £75.5m is in place until 1 December 2022 at an interest rate of 2.29%; and

Directors' report

Going concern (continued)

- Excluding the investment in subsidiaries and fixed assets, at 31 December 2020 the company has circa £274m of net assets (Inventory - £191m; Trade Debtors - £204m; Cash - £13m; Short Term Creditors - £(87m); Long-Term Creditors - £(75.5m) that are highly liquid. This compares to total SG&A costs annualised at around £86m (Commissions to subsidiary promotional entities - £36m; Interco Charges (incl. Distribution centre recharge) - £21m; Compensation - £18m; Rent and Rates - £2.6m; Freight out - £2.1m; Other - £6m), before any potential restructuring. Therefore, indicating that the company has significant financial headroom.

The Company also has access to additional cash resources through its ability to call on its investments to pay dividends but this is not expected to be required based on the forecasts for the assessment period.

After making due enquiries, considering the impact of Covid-19 and the access to funds, potential downside scenarios, and strength of the ultimate parent undertaking, Future Electronics Inc. who have provided a letter of support, the Directors have a reasonable expectation that the Company has adequate resources to continue in operation during the going concern assessment period of 12 months from approval of the financial statements. Accordingly, the directors have prepared the financial statements on a going concern basis.

Directors

The directors who served the company during the year were as follows:

G B Oliver

A Shepherd

Charitable contributions

In the current year the Company supported charities in the areas of medical research and child welfare. Contributions during the year amounted to £1,944 (2020 – £2,542).

Employee involvement

During the year, the policy of providing employees with information about the Company has continued. Regular meetings are held between management and employees to allow a free flow of information and ideas.

Disabled employees

The Company gives full and fair consideration to applications for employment made by disabled persons, having regard to their particular aptitudes and abilities, and is committed to continuing the employment of, and arranging the appropriate training for, employees who may become disabled persons during the period when they were employed by the Company. Also, the Company will endeavour to ensure that as far as possible the training, career development and promotion of disabled persons is the same as for other employees.

Directors' report

Streamlined Energy and Carbon Reporting

This is the first year of reporting under the new Streamlined Energy & Carbon Reporting requirements.

Methodology

The following methodology was applied in the preparation and presentation of this data:

- The Greenhouse Gas Protocol published by the World Business Council for Sustainable Development and the World Resources Institute (the "WBCSD/WRI GHG Protocol").
- Application of appropriate emission factors to the Company's activities to calculate GHG emissions.
- Scope 2 reporting method – application of location-based emission factor for electricity supplies.
- Inclusion of all the applicable Kyoto gases, expressed in carbon dioxide equivalents, or CO₂e.
- Presentation of gross emissions as the Company does not purchase carbon credits (or equivalents).
- Presentation of annual energy use.

Absolute Emissions

The total Scope 1, 2 and Scope 3 GHG emissions from the Company's operations in the year ending 31st December 2020 were:

- 382.9 tonnes of CO₂ equivalent (tCO₂e) using a 'location-based' emission factor methodology for Scope 2 emissions.

Scope 1 emissions from onsite combustion of natural gas.

Scope 2 emissions from purchased electricity using the location-based method.

Scope 3 emissions from fuel for personal cars and hire cars for business use.

Intensity Ratios

As well as reporting the absolute emissions, the Company's GHG emissions are reported below on the following intensity ratios. These were decided as the most appropriate metrics for the Company.

- 0.05 tCO₂e per square meter of occupied space using the location-based method
- 1.11 tCO₂e per FTE employee

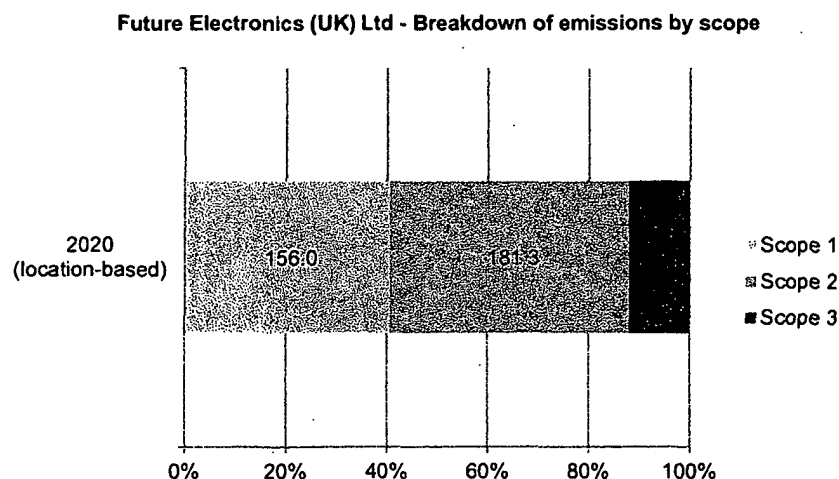

Target and Baselines

The Company's objective is to maintain or reduce its GHG emissions per square meter of occupied space and per FTE employee each year and will report each year whether it has been successful in this regard.

Directors' report

Streamlined Energy and Carbon Reporting (continued)

Key Figures

Total Energy Use

The total energy use for the Company for FY2020 was 1,754,519 kWh.

	2020				
	Electricity	Gas	Personal car use	Hire car use	Total Energy Use (kWh)
Electricity/fuel	777,690	848,306	-	-	1,625,996
Mileage claimed	-	-	128,007	516	128,523

Energy Efficiency Actions

Due to the COVID pandemic, improvement opportunities were limited, but nonetheless we were still able to make some positive changes during the year at the UK HQ building in Egham:

- Continued with the program to replace existing halogen lights with more energy-efficient LEDs. A further 35 LEDs change with an estimated additional annual saving of 6,898 kWh.
- Night guard now instructed to turn all building lighting off by 10pm provided no staff in building.
- AHU filters upgraded to reduce required run-time and consequent energy consumption, which saved additional energy while the office was unoccupied more often during the COVID pandemic.
- Some Light Control Systems were converted to Passive Infrared Sensors as part of an ongoing upgrade program.

Directors' report

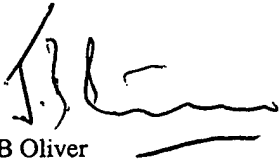

Disclosure of information to the auditors

So far as each person who was a director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditor is unaware. Having. Made enquiries of fellow directors and the company's auditor, each director has taken all the steps that he/she is obliged to take as a director in order to make himself/herself aware of any relevant audit information and to establish that the auditor is aware of that information.

Auditors

A resolution to reappoint Ernst & Young LLP as auditors will be put to the members at the Annual General Meeting.

On behalf of the Board

G B Oliver
Director

29 September 2021

Statement of directors' responsibilities

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Independent auditors' report

to the members of Future Electronics Limited

Opinion

We have audited the financial statements of Future Electronics Limited for the year ended 31 December 2020 which comprise the Income Statement, the Statement of Total Comprehensive Income, the Statement of Financial Position, the Statement of Changes in Equity, the Statement of Cash Flows and the related notes 1 to 23, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the company's affairs as at 31 December 2020 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Independent auditors' report

to the members of Future Electronics Limited

Other information (continued)

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement set out on page 12, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Independent auditors' report

to the members of Future Electronics Limited

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the company and determined that the most significant are those that relate to the reporting framework (Financial Reporting Standard 102 (FRS 102) and the Companies Act 2006) and the relevant tax compliance regulations in the United Kingdom.
- We understood how Future Electronics Limited is complying with those frameworks by making enquiries of management and those charged with governance to understand how the company maintains and communicates its policies and procedures in these areas. Our audit procedures were designed to either corroborate or provide contrary evidence, the results of which were followed up appropriately. Specifically, we have completed a board minute review to understand procedures in place and verify they are in line with the frameworks.
- We assessed the susceptibility of the company's financial statements to material misstatement, including how fraud might occur by meeting with management within various parts of the business to understand where they considered there was susceptibility to fraud. We considered the programmes and controls that the Company has established to address risks identified, or that otherwise prevent, deter and detect fraud; and how senior management monitors those programmes and controls. Where this risk was higher, we performed incremental audit procedures to address each identified fraud risk. These procedures included:
 - The vouching of a statistical sample to source evidence, monthly analytical review and the deployment of data analytics in our execution of journal entry testing procedures to respond to the risk of overstatement of supplier rebate arrangements.
 - Trade receivable existence testing (through external circularisation and vouching to source evidence such as invoices, delivery notes and bank statements), the deployment of data analytics in our execution of both journal entry testing procedures and our revenue correlation assessment, monthly analytical review, post balance sheet date credit note evaluation and a revenue cut-off assessment to respond to the risk of inappropriate revenue recognition.

Independent auditors' report

to the members of Future Electronics Limited

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud (continued)

- Based on this understanding we designed our audit procedures to identify noncompliance with such laws and regulations. Our procedures involved a review of board minutes to identify any noncompliance with laws and regulations, assessment of financial statement disclosures to ensure compliance with relevant reporting frameworks and enquiries of management and those charged with governance.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

- This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed

Notes to the financial statements

at 31 December 2020

1. General information

Future Electronics Limited (the Company) is engaged in the management of customers' supply chain requirements, in particular, the design, distribution and support of semi-conductor and lighting solutions. The Company is a private limited company and is incorporated and domiciled in the UK. The address of its registered office is Future House, The Glanty, Egham, Surrey TW20 9AH.

2. Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

The financial statements have been prepared in accordance with Financial Reporting Standard 102, "The Financial Reporting Standard Applicable in the UK and the Republic of Ireland" (FRS 102). The financial statements have been prepared on the going concern basis, under the historical cost convention except for derivative financial instruments which are measured at fair value, and in accordance with the Companies Act 2006.

The financial statements have been prepared in sterling which is the Company's functional currency and rounded to the nearest £000.

Going Concern

A financial review of the results and group financial position occurs each month with the Board of Future Electronics Limited (FEL) and the Board of Future Electronics Inc. The group has considerable financial resources together with established long-term relationships with a number of customers, suppliers and advisors. As a consequence, the directors believe that the group is well placed to manage its business risks successfully.

As mentioned in the Strategic report under the principal risks and uncertainties, Covid-19 has not had a significant negative impact on the Company in relation to its going concern status. The Company is trading profitably, with positive cash flow and a strong balance sheet forecasted throughout the going concern assessment period of 12 months from approval of the financial statements. In addition, the Company has a letter of support from the ultimate parent company, Future Electronics Inc., committing to provide continuing financial support in the event the Company is unable to meet its obligations itself.

Whilst the consequences of the COVID-19 pandemic have been far-reaching, the impact on the industries in which the company serves, with the exception of the transportation sector, has been limited. The demand for electronic components has continued to be relatively strong, and despite the overall industry suffering a circa 15% reduction in the first part of 2020 vs 2019, FEL achieved some top-line growth in 2020 vs 2019. In 2021, as anticipated, some of the market went into supply shortage as demand exceeded supply in these areas. As a result of this, the company experienced record breaking EMEA revenues in Q1 and Q2, and is on track for a record Q3 as this high level of demand continues. The Directors expect demand to continue to be strong beyond that, as countries begin electronic intensive infrastructure projects such as the roll out of 5G and all of the products that become enabled by that. In assessing going concern, the Directors have noted the following matters:

- In 2020 FEL had operating profit of £2.9m on turnover of £728m. PBT was £12.9m and net income £12.6m;
- The forecast for 2021 is operating profit of £5.3m on turnover of £847m. PBT is forecast at £13.6m and net income £12.8m;
- As at December 2020 current assets totalled £408m. Forecast for December 2021 is £441m. This includes £189m of inventory and £246m of trade debtors;

Notes to the financial statements

at 31 December 2020

2. Summary of significant accounting policies (continued)

- Agreements with suppliers provide a level of return rights and subsidised inventory write-offs. Typically write-offs to our results have not exceeded the 0.5%-1% range. Therefore, the majority of this value would be convertible to cash;
- As noted above, management of credit terms is very strict and as a result bad debts tend not to exceed 0.1% of receivables. FY 2020 was 0.02%. Again this asset has very high liquidity;
- Short-term payables are forecast at £107m at December 2021, compared to £87m at December 2020;
- Intercompany loan funding of £75.5m is in place until 1 December 2022 at an interest rate of 2.29%; and
- Excluding the investment in subsidiaries and fixed assets, at 31 December 2020 the company has circa £274m of net assets (Inventory - £191m; Trade Debtors - £204m; Cash - £13m; Short Term Creditors - £(87m); Long-Term Creditors - £(75.5m) that are highly liquid. This compares to total SG&A costs annualised at around £86m (Commissions to subsidiary promotional entities - £36m; Interco Charges (incl. Distribution centre recharge) - £21m; Compensation - £18m; Rent and Rates - £2.6m; Freight out - £2.1m; Other - £6m), before any potential restructuring. Therefore, indicating that the company has significant financial headroom.

The Company also has access to additional cash resources through its ability to call on its investments to pay dividends but this is not expected to be required based on the forecasts for the assessment period.

After making due enquiries, considering the impact of Covid-19 and the access to funds, potential downside scenarios, and strength of the ultimate parent undertaking, Future Electronics Inc. who have provided a letter of support, the Directors have a reasonable expectation that the Company has adequate resources to continue in operation during the going concern assessment period of 12 months from approval of the financial statements. Accordingly, the directors have prepared the financial statements on a going concern basis.

Consolidation

The Company is a wholly owned subsidiary of Future Electronics Management Services Limited, a company registered in England and Wales. Alonim Investments Inc. is regarded by the directors as being the entity's ultimate parent entity and is incorporated in Canada.

The smallest group of undertakings for which group financial statements are drawn up and of which the Company and its subsidiaries are included is Future Electronics Inc. (incorporated in Canada).

Tangible assets

All tangible fixed assets are initially recorded at cost and are stated at cost less accumulated depreciation. Depreciation is provided on all tangible fixed assets, at rates calculated to write off the cost, less estimated residual value - updated if indicators are present that its value has changed, of each asset evenly over its expected useful life, as follows:

Short leasehold improvements	–	5 years
Equipment and fixtures	–	5 to 10 years
Computer equipment	–	4 years

The carrying values of tangible fixed assets are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable.

Notes to the financial statements

at 31 December 2020

2. Summary of significant accounting policies (continued)

Investments

Investments in other group companies are carried at cost. The Company assesses potential impairments to its investments when events or changes in circumstances indicate that the carrying amount may not be fully recoverable. If necessary, an impairment loss is recognised as the difference between the carrying value and the recoverable amount of the investment. Recoverable amount is determined based on the greater of fair value less costs to sell or value in use.

Revenue recognition

Revenue is recognised when the significant risk and rewards of ownership of the goods have passed to the buyer, when the price to the buyer is determinable and collectability is reasonably assured. Risk and rewards of ownership pass depending on terms of agreement with the customer, typically with most agreements this is on delivery. Revenue is measured at the fair value of consideration received, excluding VAT and other sales taxes or duty.

Interest income is recognised as interest accrues using the effective interest method, and dividend income when the right to receive dividend is obtained.

Stocks

Stock, including consignment inventory, is stated at the lower of cost and net realisable value including provision for any slow moving or obsolete items. Cost is purchase price including the cost to bring the stock into its present location less trade discounts and is computed on a weighted average cost basis. Net realisable value is based on estimated selling price less any further costs expected to be incurred on disposal.

Deferred taxation

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or right to pay less or to receive more, tax, with the following exception:

- Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Foreign currencies

Transactions in foreign currencies are recorded at the spot exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the rate of exchange ruling at the balance sheet date. All exchange differences are taken to the statement of comprehensive income.

Provisions of liabilities

A provision is recognised when the company has a legal or constructive obligation as a result of a past event, the amount of the obligation can be estimated reliably, and it is probable that an outflow of funding will be required to settle the obligation.

Notes to the financial statements

at 31 December 2020

2. Summary of significant accounting policies (continued)

Provisions of liabilities (continued)

The Company has applied a pre-tax rate in order to take account of the time value of money on future obligations and benefits arising from a lease agreement to arrive at the value of a leasehold dilapidation provision.

Provision for the expected costs of leasehold dilapidations are recognised when there is an obligation to restore the building to its original condition, such cost is provided for over the term of the lease through the income statement on a straight-line basis over the shorter of the period to the first rent review or the life of the lease. The obligation will be relinquished when the lease has ended.

Operating leases

Rentals payable under operating leases are charged in the profit and loss account on a straight-line basis over the lease term. Lease incentives are recognised over the lease term.

Pensions

The Company makes payments into a defined contribution pension scheme for all eligible and enrolled employees. As such the amounts are charged to the statement of comprehensive income in the period in which they become payable.

Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and in hand and short-term deposits with an original maturity date of three months or less. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

Financial instruments

Financial assets

The Company's financial assets include cash, trade and other debtors.

Cash and cash equivalents comprise balances on bank financial statements, cash in transit and cash floats held in the business.

Trade and other debtors that have fixed or determinable payments that are not quoted in an active market are classified as debtors. Trade debtors are measured initially at transaction price and subsequently at amortised cost using the effective interest method, less any impairment. Impairment is only recognised when there is objective evidence of an impairment.

Debtors and creditors with no stated interest rate and receivable or payable within one year are recorded at transaction price. Any losses arising from impairment are recognised in the Statement of Total Comprehensive Income in sales, general and administration costs. At the end of each reporting period, the company assesses whether there is objective evidence of impairment of any financial assets that are measured at cost or amortised cost. If there is objective evidence of impairment, the company recognises an impairment loss in profit or loss immediately.

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or it transfers the financial asset and substantially all the risks and rewards of ownership of the assets to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of the ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Notes to the financial statements

at 31 December 2020

2. Summary of significant accounting policies (continued)

Financial instruments (continued)

Financial liabilities

Equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the entity after deducting all of its financial liabilities.

Basic financial liabilities including trade and other payables and interest bearing loans and borrowing, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the liability is measured at the present value of the future payments discounted at a market rate of interest.

Basic financial liabilities, other than short term payables, are subsequently carried at amortised cost, using the effective interest rate method. The effective interest rate amortisation is included in interest payable and similar expenses in the income statement.

Short term trade and other payables with no stated interest rate which are payable within one year are recorded at transaction price.

Where the contractual terms of share capital do not have any terms meeting the definition of a financial liability then this is classed as an equity instrument. Dividends and distributions relating to equity instruments are debited directly to equity.

Impairment of assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount in order to determine the extent of the impairment loss. An asset's recoverable amount is the higher of an asset's or cash generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

Impairment losses on continuing operations are recognised in the income statement in those expense categories consistent with the function of the impaired asset.

For assets where an impairment loss subsequently reverses, the carrying amount of the asset or cash generating unit is increased to the revised estimate of its recoverable amount, not to exceed the carrying amount that would have been determined, net of depreciation, had no impairment losses been recognised for the asset or cash generating unit in prior years. A reversal of impairment loss is recognised immediately in the income statement, unless the asset is carried at a revalued amount when it is treated as a revaluation increase.

Loan stock

Loan stock which is a basic financial instrument is initially recorded at the present value of future payments discounted at a market rate of interest. Subsequently, it is measured at amortised cost using the effective interest method.

Notes to the financial statements

at 31 December 2020

3. Critical accounting estimates and judgements

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. These can affect the amounts recognised in the financial statements for assets, liabilities, revenues and expenses, as well as issues with regards to contingent liabilities.

The estimates and assumptions that are deemed by the Board to be the most important for an understanding of the financial statements are discussed below.

Impairment of investments, property, plant and equipment

The Company tests whether any of its investments have suffered any impairment. The carrying value of the asset in the financial statements is compared to the recoverable amount of the investment at the year end. Recoverable amount is determined based on the greater of fair value less costs to sell or value in use.

Other fixed assets are depreciated or amortised over their estimated useful lives to their estimated residual values. Both the estimated useful life and the residual value are reviewed at least at each financial year-end.

Stock

Stock is valued at the lower of cost and net realisable value. Due allowance is made for obsolete and slow-moving items by consulting with persons who are experts in this field as to the most likely value of such items. However, a change in demand or a new innovation subsequent to the publishing of these financial statements could change such judgements. Stock obsolescence provision at 2020 year-end is £1,404,000 (2019 – £1,293,000).

Accounts receivable

The Company has a highly sophisticated process for managing debtors including the credit limits offered to customers. All customers are given a risk assessment rating on a quarterly or bi-annual basis and all receivables balances are reviewed at year end for collectability. Any individual receivable for which collection is considered improbable – based on objective evidence – is provided for, however without knowing all individual circumstances of a customer, the actuality could differ from this judgement. Accounts receivable provision at 2020 year-end is £141,000 (2019 – £636,000).

Income taxes

The Company makes a provision for corporation tax based on estimates of certain matters. If the final determination of HMRC differs from such estimates, then the difference will impact the period during which the determination is made. There are no uncertain tax positions at year end.

Disputes

The Company can be party to disputes and legal proceedings in the ordinary course of business. Management consults with legal experts in relation to legal disputes, and other experts both internal and external for other disputes in the ordinary course of business. Any dispute that is deemed to have a likely ultimate negative impact on the financial statements is provided at the best estimate of the cost to the Company. Such amounts are reviewed regularly.

Dilapidation costs

An estimate has been made of the cost to restore the Company's leasehold properties to their original conditions on lease termination and such cost provided for over the term of the lease. Whilst Chartered Surveyors have advised the Company in this calculation, there will be some variation when the actual cost is incurred.

Notes to the financial statements

at 31 December 2020

4. Turnover

Turnover represents the amounts derived from the sale of goods supplied by the Company, net of value added tax and trade discounts. All turnover arises from continuing operations. An analysis of turnover, destination by geographical market has not been provided on the grounds that, in the opinion of the Directors, it would be seriously prejudicial to the interests of the Company.

5. Operating Profit

This is stated after charging/(crediting):

	2020 £000	2019 £000
Wages and salaries	15,245	15,497
Social security costs	1,645	1,674
Defined pension contributions	493	463
Total Staff costs	17,383	17,634
Depreciation of owned assets	356	371
Operating lease charges – land and buildings	2,120	2,120
Operating lease charges – plant and machinery	–	3
Write down of inventory	44	91
Foreign exchange loss/(gain)	(1,216)	4,154
Audit fees payable to the Company's auditors	89	80

6. Directors' remuneration

Certain directors' remuneration has been borne by the Company's immediate parent undertaking Future Electronics Management Services Limited. The directors do not believe that it is practicable to apportion this amount between their services as directors of the Company and their services as directors of the fellow subsidiary companies. The directors participate in the Company's defined contribution scheme on the same terms as other employees.

The remuneration is disclosed within the immediate parent undertaking's financial statements. The total remuneration paid to the directors in the parent undertaking's financial statements is £383k (2019 – £426k).

7. Staff

The average monthly number of employees, including the directors, during the year was as follows:

	2020	2019
Sales	46	53
General and administration	287	295

Notes to the financial statements

at 31 December 2020

8. Interest income and expense

	2020	2019
	£000	£000
Interest receivable and similar income		
Bank interest receivable	374	858
Total interest received and similar income	<u>374</u>	<u>858</u>
Interest payable and similar charges		
Bank interest payable	(287)	(1,131)
Interest payable to group companies	(2,305)	(2,153)
Total interest payable and similar charges	<u>(2,592)</u>	<u>(3,284)</u>
	2020	2019
	£000	£000
Net finance cost		
Interest income	374	858
Interest expense	(2,592)	(3,284)
Net finance cost	<u>(2,218)</u>	<u>(2,426)</u>

9. Tax

(a) Tax on profit ordinary activities

The tax charge is made up as follows:

	2020	2019
	£000	£000
Current tax:		
Tax expense included in profit or loss		
UK corporation tax charge on profits for the year	302	369
Adjustments in respect of prior periods	(40)	33
Total current tax	<u>262</u>	<u>402</u>
Total deferred tax	<u>(21)</u>	<u>97</u>
Tax on profit on ordinary activities	<u>241</u>	<u>499</u>

Notes to the financial statements

at 31 December 2020

9. Tax (continued)

(b) Factors affecting tax charge for the year

The tax assessed for the year is lower (2019 – lower) than the standard rate of corporation tax in the UK of 19.00% (2019 – 19.00%). The differences are explained below:

	2020 £000	2019 £000
Profit on ordinary activities before tax	12,891	13,906
Tax on ordinary activities multiplied by standard rate of corporation tax in the UK of 19.00% (2019 – 19.00%)	2,449	2,642
<i>Effects of:</i>		
Income not subject to and expenses not deductible for tax	(2,181)	(2,285)
Depreciation in excess of capital allowances	12	12
Adjustment to tax charge in respect of prior periods	(39)	(9)
Other timing differences	-	139
Tax charge	241	499

The deferred taxation (liability) / asset recognised in the financial statements is as follows:

	2020 £000	2019 £000
Depreciation in advance of capital allowances	14	22
Losses carried forward to future years	1	-
Other timing differences	(29)	(15)
Total	(14)	7

	£000
Provision brought forward as at 1 January 2020	7
Deferred tax charge / (credit) in the profit and loss account	(21)
Deferred tax charge / (credit) in other comprehensive income	-
Provision carried forward as at 31 December 2020	(14)

It is estimated that £6,000 of timing differences will reverse in the next 12 months after taking into account new originations in that period. This is mainly due to utilisation of capital allowances

In 2020, the deferred taxation (liability) / asset not recognised in the financial statements was as follows:

	2020 £000	2019 £000
Rate change on opening balances	9	-
Other timing differences	(214)	-
Total	(205)	-

Notes to the financial statements

at 31 December 2020

9. Tax (continued)

(c) Factors that may affect future tax charges

Reductions in the UK corporation tax main rate to 19% (effective from 1 April 2017) and 18% (effective from 1 April 2020) were enacted on 26 March 2016. In the Budget on 16 March 2016, the Chancellor announced a further reduction of the Corporation tax main rate to 17% (effective from 1 April 2020) which was enacted on 15 September 2016. These changes will reduce the Company's future tax charges accordingly. In March 2020, the Chancellor announced that the rate of Corporation tax (effective from 1 April 2020) would be 19% and would remain at 19% for the financial year beginning 1 April 2021.

On March 3rd 2021, the Chancellor announced in the Budget, that the headline rate of Corporation Tax would increase from 19% to 25%, with effect from 1 April 2023.

Finance Act 2021, gained Royal Assent on 10 June 2021, therefore these changes to the tax rate have not been reflected in these Financial Statements.

10. Tangible fixed assets

12. Stocks

	2020	2019
	£000	£000
Finished goods and goods for resale	187,958	196,180

Included within finished goods is £5.4m (2019 – £4.4m) of stock held on consignment.

Stocks recognised as an expense in the period were £634.2m (2019 – £619.2m).

13. Debtors

	2020	2019
	£000	£000
Trade debtors	155,344	143,580
Amounts owed by group undertakings	33,155	22,799
Corporation tax	1,928	819
Other debtors	6,621	7,926
Other taxes and social security costs	5,914	6,405
Prepayments	1,402	1,521
	204,364	183,050

Amounts owed by group undertakings are for the most part trading balances which are repayable on normal commercial terms and are non-interest bearing.

Provision for doubtful debts for the year was £141,000 (2019 – £636,000). A proactive approach to the identification and control of bad and doubtful debts is operated as well as a group insurance policy against uncollectable receivables. Provision for doubtful debts is the gross amount before any insurance claims.

Other debtors includes £140,000 relating to LTIPs, which are receivables falling due in excess of one year.

Notes to the financial statements

Other creditors	—	119
Accruals	27,398	28,003
	<u>84,224</u>	<u>153,725</u>

Amounts owed to group undertakings includes the intercompany loan stock of £75.5m from FE Luxfinco Services Sarl. It was unsecured and repayable on 31 December 2020 (fell due within one year in 2019.) Interest is payable at 2.29% per annum (2019 – 2.75%). This loan has subsequently been renegotiated and now expires at the end of 2022. The remaining balance represents for the most part trading balances which are repayable on normal commercial terms and are non-interest bearing. For those elements which remain outstanding for longer periods and assume the substance of financing, interest is charged at an arm's length rate, being 50 basis points above 12 month LIBOR for UK companies, 12 month Euribor for Eurozone companies and 12 month Applicable Federal Rate for other companies.

A £73k accrual is included within Accruals in relation to an ongoing legal claim (2019 – £69k), This increase in 2020 was due to the movement in the EUR to GBP exchange rate.

16. Creditors: amounts falling due after more than one year

	2020	2019
