Accounts

The director presents his report and accounts for the year ended 31 March 2008

Directors' responsibilities

Company law requires the directors to prepare accounts for each financial year, which give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing those accounts, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the accounts; and
- prepare the accounts on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the accounts comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Director

Notes to the Accounts
for the year ended 31 March 2008

1 Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost convention and in accordance with applicable accounting standards. The director considers that it is inappropriate to adopt, and has not adopted, the going concern basis in preparing these accounts. However, each item of finished goods is unique and, in current markets the director cannot, with reasonable certainty, determine that the net realisable value of each item is greater than its carrying value.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation, which is calculated on a straight line basis over their expected useful lives at the following annual rates:

Fixtures, fittings and equipment	20%
Plant and machinery	10%

Stocks

Stock is valued at the lower of cost and net realisable value. The estimated net realisable value of stock that has not been sold within two years of manufacture is reduced thereafter by one third annually. Cost comprises direct materials, direct labour and an appropriate proportion of manufacturing overheads.

Goodwill

Purchased goodwill has previously been included in intangible assets and has been amortised over its estimated useful life.

2 Turnover

Turnover attributable to geographical markets outside the United Kingdom amounted to nil % (2007 nil %).
