Eastern Power Networks plc (the "Company") is a wholly owned subsidiary of the UK Power Networks group (the "Group"). The vision of the Group sets the direction and guides the decisions that are taken by the Company.

The Group's vision is to be a leading performer in the electricity distribution industry through being:

- · an employer of choice;
- a respected and trusted corporate citizen including delivering high quality services to the Group's customers; and
- sustainably cost efficient.

The principal values which define how the Group expects its employees to behave and how the Group wants to be perceived by its stakeholders are:

- Integrity
- Respect
- · Continuous improvement
- Responsibility
- · Diversity and inclusiveness
- Unity

The Group's vision and values are discussed in more detail on pages 24 to 25.

## **Business model**

The Company distributes electricity to approximately 3.6 million homes and businesses in the East Anglia / North London area via a network of underground cables and overhead lines, taking power from National Grid at high voltage and transforming it down to lower voltage before delivery to customer premises.

The Company's objectives are to:

- maintain the safety and reliability of the electricity network;
- · efficiently connect new customers to the electricity network, including power generators;
- · restore supply as quickly as possible to customers who experience interruption;
- innovate to continually improve efficiency and the service provided to customers;
- facilitate a low-carbon environment by investing in assets, processes and initiatives that enable low carbon technology to be connected to the network;
- · extend and upgrade the network to meet the future needs of customers; and
- · keep costs to customers as low as possible.

## **Business model continued**

The key performance indicators used to measure progress against the Company's safety, efficiency and customer service objectives are discussed on pages 7 to 9.

## The Group includes:

- three electricity distribution businesses: Eastern Power Networks plc, South Eastern Power Networks plc and London Power Networks plc;
- a management business: UK Power Networks (Operations) Limited;
- · a transport services provider: UK Power Networks (Transport) Limited;
- a groundworks services provider: UK Power Networks (South East Services) Limited; and
- a contracting business which manages a number of private networks and infrastructures: subsidiaries of UK Power Networks Services Holdings Limited.

The Company employs no staff (2020: none). Staff are employed by UK Power Networks (Operations) Limited, which operates the distribution network on the Company's behalf with the support of UK Power Networks (Transport) Limited and UK Power Networks (South East Services) Limited.

The Company has an important contribution to make in supporting the UK's transition to a low carbon economy. This is discussed on page 14 and 15.

The Company operates within a regulated environment with the major part of the Company's revenue being set as part of a price control review by the industry regulator, the Office of Gas and Electricity Markets ("Ofgem" or "the Regulator"). Each price control provides for the licensed distributor to earn a level of "allowed" revenue. The total amount of allowed revenue takes into account a number of factors including the capital expenditure plans of the business, an efficient level of operating costs, the cost of financing the business as well as a return on the regulated asset value.

In addition to allowed revenues the Company collects income to cover the cost of connecting new customers to the network. Connections work which can only be carried out by the Company, for technical and safety reasons or as defined by the Regulator, is referred to as "non contestable" and is charged at cost to the customer. Work that other providers can undertake is referred to as "contestable" and is charged to the customer at a 4% (2020: 4%) regulated margin except in market segments where UK Power Networks has passed a competition test set by the Regulator in which case the price regulation is removed.

The Company's performance is benchmarked against other licensed DNOs with the most efficient networks establishing an 'efficient frontier' or standard against which other DNOs are evaluated. Ofgem sets allowances and a regime of potential incentives and penalties based on the detailed assessment of business plans submitted by the DNOs. The income streams of the Company are considered to be stable, giving the business a lower risk profile which is reflected in the allowed rate of return on the regulated asset value.

## **Business model continued**

#### Price Control RIIO-ED1

The current price control RIIO-ED1 applies for an eight year period from 1 April 2015 to 31 March 2023 and determines the allowed revenue the Company is able to collect from its customers and the outputs the Company is required to deliver, until 2023. RIIO stands for "Revenues driven by Incentives, Innovation and Outputs".

Allowed revenue covers the cost of operating and maintaining the network through an "in year" allowance for regulatory expenditure plus the regulatory return and regulatory depreciation on that regulatory expenditure which enters the Regulatory Asset Base, pass-through costs, incentives, tax, and pensions. The Company has the opportunity to outperform the allowed revenue either by delivering its agreed outputs at a cost below the regulatory cost allowances or through its performance against the RIIO-ED1 incentive mechanisms.

The RIIO model identifies six output categories with a range of incentive mechanisms attached:

- Safety: The provision of a safe network in compliance with Health and Safety Executive (HSE) safety standards. In this category there is a strong reputational incentive and the penalty of fines if standards are breached.
- Customer service: DNOs are incentivised to think about their customers' needs and how best to
  engage with them through the Broad Measure of Customer Service ("BMCS") which incorporates
  measures of customer satisfaction, customer complaints and stakeholder engagement.
- Social Obligation: The Regulator expects the DNOs to develop a specific strategy to improve the service to vulnerable customers which feeds into the BMCS.
- Network availability and reliability: Incentive mechanisms to improve the performance of the network, the most important of which is the Interruptions Incentive Scheme ("IIS") based on the number of customer minutes lost and the number of customer interruptions measured against DNO specific targets.
- Connections: There are strong incentives for the DNOs to focus on improving the service of connecting customers to the network. As well as the BMCS, RIIO-ED1 has a "time to connect" incentive to reduce customer waiting times and an engagement incentive to encourage the DNOs to understand and satisfy the particular needs of a broad range of their customers.
- Environmental performance: There is an allowance for undergrounding of overhead lines in Areas
  of Outstanding Natural Beauty and National Parks continues, as well as the requirement for the
  DNOs to report their Business Carbon Footprint (BCF) in annual league tables. DNOs are
  incentivised to integrate carbon and other environmental considerations within their day-to-day
  business through reputational environmental reporting requirements.

The business plan for RIIO-ED1 lays out the Company's commitments to deliver measurable outputs against specific targets, within the six categories listed above. Progress in achieving these targets is reported in an annual RIIO-ED1 Business Plan Commitment report, the most recent of which was published in October 2020 for the year ended 31 March 2020 (available on the Group's website at www.ukpowernetworks.co.uk/internet/en/about-us/business-plan). The report examines the progress relating to 77 commitments and indicates whether specific annual outputs have been achieved and if the Group's three DNOs are on target to meet their eight year output objectives.

## Review of the business

The revenues of the Company are subject to the regulatory price control framework set by Ofgem which provides economic incentives to maximise operating, capital and financing efficiencies. The Directors aim to optimise shareholder returns through the safe operation of and efficient investment in the network, while seeing that the business delivers high levels of customer service and operates within the boundaries of the price control allowances.

The allowed revenue is calculated to finance an efficient level of operating costs, a capital expenditure programme and deliver a return on investment on the regulatory asset value. The DNOs have an opportunity to outperform the allowed return through the delivery of efficiencies beyond the regulatory cost allowances and through other performance based incentive mechanisms. Such outperformance delivers benefits to customers and creates value for shareholders.

## Key areas of focus are:

- outperforming the cost allowances set by Ofgem through the delivery of sustainable efficiencies;
- improving network performance by reducing the number and average length of power interruptions and outperforming the targets set by Ofgem; and
- improving the levels of customer service across key points of the business.

The Company contributed to the Group being named "Network of the Year" at the Network Awards 2020 for its industry-leading performance in safety, reliability and innovation. In addition the Group was ranked first on the Singapore Power Smart Grid Index in a study of 85 utilities across 37 countries. The Index measures the progress that utilities have made against seven key metrics: customer satisfaction and environment; green energy; security; monitoring and control; data analytics; supply reliability and distributed energy resources integration.

# Response to the COVID-19 pandemic

The Company's response to the pandemic is discussed in the context of the Group as a whole because strategies have been developed and applied on a Group-wide basis. Business resilience and well developed business continuity plans have enabled the Group to sustain its operational and financial performance during the COVID-19 pandemic. With a primary focus on the safety and welfare of employees and customers, the Group has continued to achieve its main objective of delivering safe and reliable electricity supplies.

The Group has closely monitored the evolving pandemic situation and followed Government guidelines to minimise the risk to customers and members of the public and to safeguard staff in their role as key workers. Measures taken to mitigate the risks arising from the pandemic include:

- clear regular communications to inform staff of the latest developments and guidelines.
- use of Personal Protective Equipment ("PPE") and specific safety procedures for field staff entering premises with occupants that may be self isolating due to a COVID-19 infection or shielding.
- facilitating working from home to limit contact between staff members and with members of the public.
- social distancing arrangements, temperature checks and hygiene practices to create "COVID-19 secure" work environments at operational and office sites.

## Response to the COVID-19 pandemic continued

The Company's capital projects were impacted by reduced levels of activity during the initial lockdown period in March and April 2020. A recovery phase was initiated during May 2020 on a prioritised basis, to resume the work that had been paused in the previous months. By June 2020, operational activities were back up to full capacity. Over the winter, the Group adapted to the changing lockdown restrictions and maintained its operations at near normal levels using the safe work methods developed during the early stages of the pandemic. A large proportion of office staff worked from home but all offices remained open for those staff who needed to be on site to work effectively.

Although the domestic demand for electricity increased during the lockdowns, the suspension of activities by many businesses, resulted in an overall reduction in units distributed. The annual tariff increases within the price control resulted in higher turnover compared to the prior year, despite the reduction in volumes.

The Company has not made use of any of the COVID-19 support schemes established by Government. A number of smaller energy suppliers facing cash flow challenges as a result of the crisis, were granted extended payment terms in a support scheme initiated by Ofgem. This allowed certain of the Company's debtors to spread payments over 7 months from April 2020 to March 2021 but did not have a material effect on the Company's cash flows.

As set out on page 11 the Company continues to monitor the COVID-19 pandemic as a principal risk.

## Financial performance for the year ended 31 March 2021

Turnover has increased from £652.1m in the prior year to £670.0m, mainly driven by tariff increases within the regulatory price control. However there was an overall reduction in distribution volumes of 4.1% as a result of lower demand for electricity from businesses during the COVID-19 lockdowns.

Earnings before interest, taxation, depreciation and amortisation (EBITDA) have increased from £468.2m to £470.6m due to higher turnover partially offset by an increase in operating costs.

Profit after tax for the financial year has reduced from £207.1m to £164.0m reflecting a rise in finance costs due to changes in the fair value of derivative swap instruments. This effect is partially offset by higher EBITDA and a reduction in the tax charge from the prior year which included the deferred tax impact of the tax rate increase from 17% to 19%.

Gross capital expenditure on tangible assets was £349.4m, a reduction of £23.0m compared to the prior year due to lower work volumes in response to the COVID-19 pandemic. This expenditure relates primarily to improvements to the electricity network. Capital expenditure net of customer contributions decreased by £14.1m.

## Key performance indicators (KPIs)

The key performance indicators used by the Board of Directors in their monitoring of the performance of the Company focus on the areas of safety, network performance and reliability, customer service and financial performance.

#### Safety

The Ğroup's top priority is the safety of employees, contractors and the general public. The safety performance of the Group as a whole is reviewed in the Group's annual report and financial statements. Lost time incidents ("LTIs"), defined as the number of injuries to employees or contractors which result in lost time of one day or more, is a key safety measure. The Group recorded 5 LTIs in the year ended 31 March 2021 which is an increase on the 2 LTIs recorded in the prior year, but remains an industry-leading safety performance. The circumstances of each LTI are reported and investigated in detail with the aim of preventing the recurrence of such incidents. Findings from the investigations are used to improve training and safety procedures as well as raise awareness across the organisation.

## **Network performance**

The principal measures used to assess network performance are customer minutes lost ("CMLs") and customer interruptions ("CIs"). CMLs are the average length of time customers are without power for three minutes or longer and represent availability of supply. CIs, the number of interruptions per 100 customers, are an indicator of network reliability. The table below shows a reduction in CMLs compared to the prior year but an increase in CIs. The Company remains ahead of targets set by Ofgem.

|  | Year ended<br>31 March<br>2021 | Year ended<br>31 March<br>2020 |
|--|--------------------------------|--------------------------------|
| * Customer Minutes Lost per customer (CMLs)      | 32.4                           | 33.8                           |
| * Customer Interruptions per 100 customers (CIs) | 44.1                           | 43.7                           |

<sup>\*</sup> The CMLs and CIs disclosed above exclude the impact of exceptional weather events (as defined by Ofgem) and are provisional, pending Ofgem's annual review. The comparatives have been restated to reflect any changes resulting from Ofgem's prior year assessment.

#### **Customer satisfaction**

Ofgem measures customer satisfaction of all the DNOs and this is one of the most important measures of performance. The customer satisfaction survey captures customers' experiences of the services provided by the DNOs, for interruptions, minor connections and general enquiries. The Company's average score has improved from 92% in the prior year to 93% in the current year and remains well above the industry-wide target of 82%.

# Financial key performance indicators

The Company's key financial performance indicators are set out in the table below.

| Cinemaint leave months were an action to the  |   | Year ended<br>31 March<br>2021 | Year ended<br>31 March<br>2020 |
|---|---|--------------------------------|--------------------------------|
| Financial key performance indicators  Turnover (£m)  EBITDA (£m)  Profit after tax (£m)  Gross capital expenditure on tangible assets (£m)  Capital expenditure on tangible assets net of |   | 670.0                          | 652.1<br>468.2<br>207.1        |
|   | 1 | 670.0<br>470.6                 |                                |
|   |   | 164.0                          |                                |
|   |   | 349.4                          | 372.4                          |
| customer contributions received (£m)  |   | 251.1                          | 265.2                          |
|   |   |                                |                                |
|   |   | As at<br>31 March<br>2021      | As at<br>31 March<br>2020      |
| Regulatory asset value (RAV) (£m)   | 2 | 2,841.5                        | 2,773.5                        |
| RAV gearing   | 3 | 66%                            | 68%                            |

<sup>1</sup> EBITDA is a non-statutory measure, and is calculated by adding back amortisation and depreciation to operating profit (also explained in subsequent paragraphs).

<sup>2</sup> RAV is the Regulatory Asset Value of the business. The 31 March 2021 RAV presented is provisional at the date the accounts are signed. Discussion with Ofgem may result in RAV being increased or decreased. The prior year comparatives have been restated to reflect the latest agreed position.

<sup>3</sup> RAV gearing is the ratio of net debt (as defined within certain of the Company's covenant arrangements), to the RAV.

## Financial key performance indicators continued

#### **EBITDA**

The EBITDA measure excludes the effect of interest, taxation, depreciation and amortisation from earnings and thus reflects the operational performance of the business. It is also the basis for certain of the Company's covenant metrics. The closest statutory measure is operating profit which is reconciled to EBITDA as follows:

|   | Year ended<br>31 March<br>2021 | Year ended<br>31 March<br>2020 |
|---|--------------------------------|--------------------------------|
| Operating profit (£m)  Depreciation of tangible fixed assets (£m) | 311.3                          | 315.8                          |
|   | 144.6                          | 138.6                          |
| Amortisation of intangible assets (£m)                            | 14.7                           | 13.8                           |
| EBITDA (£m)   | 470.6                          | 468.2                          |

Operating profit is presented in the profit and loss statement. Depreciation and amortisation are disclosed in note 5 to the financial statements. Removing the effect of depreciation and amortisation from operating profit provides a clearer measure of operating efficiencies within the business and enables comparison with industry peers.

## Capital expenditure

Gross capital expenditure is a measure of the Company's investment in the electricity distribution network during the year. Capital expenditure net of customer contributions, as calculated in the table below, is also monitored because the contributions received from customers as payment for connections to the network, are directly attributable to those network assets.

|  | Year ended<br>31 March<br>2021 | Year ended<br>31 March<br>2020 |
|--|--------------------------------|--------------------------------|
| Gross capital expenditure on tangible assets (£m)      | 349.4                          | 372.4                          |
| Less: Customer contributions received in the year (£m) | (98.3)                         | (107.2)                        |
| Capital expenditure net of customer contributions (£m) | 251.1                          | 265.2                          |

Gross capital expenditure on tangible assets is disclosed in note 10 to the financial statements and customer contributions received are disclosed in note 20 to the financial statements.

## **RAV** gearing

The proportion of debt measured against the Regulatory Asset Value of the business indicates the capacity of the business to source additional finance. This is a key metric for the Company's covenant arrangements with pension trustees and providers of finance and is monitored on a regular monthly basis. The RAV gearing ratio at 31 March 2021 of 66% (2020: 68%) is within the pension and bank covenant targets.

## Risk identification and management

There are a variety of mechanisms in place to manage the Company's risks. The Group has an embedded risk awareness culture to understand and manage significant business risks. The risk management framework sets out policies, procedures and responsibilities designed to assess, mitigate, monitor and report risks.

A subcommittee of the Group Board, the Risk Management and Compliance committee, oversees the risk management function and makes annual assessments of changes to significant risks and the effectiveness of the risk management processes.

Control procedures have been implemented throughout the Group to mitigate the risks identified. Compliance with internal controls is monitored through three lines of defence being:

- · management control;
- · oversight and challenge; and
- assurance provided by the Internal Audit function and third party assurance providers.

The Group's system of risk management and internal control is described in more detail on pages 29 to 31.

## Principal risks and uncertainties

As well as the opportunities the Group has to grow and develop its business, certain risks and uncertainties are faced in achieving its objectives. The Group's principal risks and uncertainties, and a summary of actions to mitigate them, are set out below.

There are no significant changes compared to the prior year except that COVID-19, previously identified as an emerging risk, is now established as part of the Top 10 risks in the Group's risk register and described below:

## Risk

## Mitigation

#### **COVID 19**

Inadequate response to the COVID-19 pandemic could result in a failure in the Company's performance (e.g. power outages at key facilities, safety incidents, poor customer service and/or breach of licence conditions) resulting in significant financial and reputational damage and a less engaged and committed workforce.

The COVID-19 risk is continually monitored using guidance from Public Health England, the Department of Business, Energy and Industrial Strategy (BEIS), and Ofgem. Employees are provided with updates on a regular basis via email, a dedicated information site on the intranet and frequent video briefings and Q&A sessions by the Chief Executive Officer. There are regular consultations with Trade Union Representatives.

The changing risk and response is under constant review by senior management in three main forums: the Incident Leadership team, the Organisational Resilience Leadership team and the Strategic Operational team. Mitigating measures include:

Scenario planning to stress test the business continuity plans for each business unit.

Adapting work practices, safety procedures and training to protect employees in the workplace and where they come into contact with members of the public or contractors. Measures include providing appropriate PPE to field staff, splitting operational teams to ensure social distancing, re-organising operational sites and offices in line with COVID safety government guidelines.

Review and reprioritisation of work on the network as required, in response to the changing risks. This includes recovery plans to monitor work back-logs against strategic targets and resume work as quickly as possible if projects are impacted by the pandemic.

Additional support measures for vulnerable customers.

Monitoring by senior management of key performance areas which could be impacted by COVID-19 e.g. network safety and performance, customer satisfaction levels, employee health and absenteeism, PPE allocation, adherence to new policies and procedures, financial impacts.

#### Risk

## Mitigation

## Health and safety incidents

There is a risk that a fatality or serious injury occurs involving a member of staff, a contractor, a member of the public or a third party. Any such incident could lead to a prosecution or a fine and have an adverse impact on the reputation of the Company.

The Group aims to create and foster a culture in which safety is the highest priority in the minds of everyone who works at UK Power Networks. The Group runs a range of programmes and initiatives, such as its Be Bright Stay Safe campaign, aimed at staff and those outside of the Group, to promote safety and make them aware of potential hazards and how to operate in hazardous situations.

The Group actively monitors, measures and investigates safety incidents, including near misses, and seeks to learn from each one.

## Major outage of network assets

There are significant risks associated with network assets where failure could result in a loss of supply of electricity to customers. Customer service continuity/quality of supply are important regulatory requirements and performance in these areas can result in financial penalties. Any significant incident could cause adverse publicity and impact negatively on the reputation of the Company.

The reliability of the Company's network is a key performance indicator and is closely monitored by the Company. Investment in the network is prioritised to those projects which are likely to have a beneficial impact on reliability, and the Company strives to continually innovate to improve the ways in which it identifies and manages the risk of outages. The Group has a well developed plan for dealing with storms and other major weather events, and has extended that planning activity to other potentially damaging events such as a pandemic flu event.

Through its risk management activities, the Group has become the first DNO to achieve level 4 from the Cabinet Office Emergency Planning College assessment for Organisational Resilience based on BS 65000:2014 Guidance on Organisational Resilience.

#### Risk

#### Mitigation

#### Cyber security breach

A cyber security breach which results in a failure of the Company's core systems, applications or associated IT processes could have a significant impact in a number of areas. Business operations could be affected and if the breach or failure is related to control systems, the Company's ability to operate the network could be impacted. Data breaches could result in legal or regulatory non-compliance with resulting financial penalties and reputational damage.

A Cyber Security Improvement Programme operates to reduce risks, strengthen controls and maintain compliance with changes in standards and legislation. The Group focuses its activities in this area across three domains: operating a cyber security management system; maintaining cyber hygiene; and proactively testing resilience. All security policies and standards are closely aligned to ISO 27001 and are compliant with the requirements of applicable legislation. The Group operates a training programme to see that all its staff are aware of cyber risks and know how to minimise and manage those risks, as well as how to respond in the event of a suspected breach.

## Regulatory environment

The prices which can be charged for the use of the Company's networks are determined in accordance with the Regulator approved price controls. The current price control, RIIO-ED1, comes to an end in March 2023 when a new price control RIIO-ED2 will come into force. The methodology for pricing in RIIO-ED2 is not yet known and could result in lower financial returns in future years as a result of RIIO-ED2.

Industry regulation is set by Ofgem who operate independently of the DNOs, and therefore there is limited ability for the Group to directly mitigate this risk. However the Group regularly engages with Ofgem directly and through formal consultation processes, and with other industry bodies in various forums, to ensure the Group's interests are represented in industry discussions.

## Funding and liquidity risk

The Company's financing requirements are partially met through bonds and bank lending facilities.

The Company has established a Treasury Committee, a sub-committee of the Group Board, which oversees the setting of treasury policy and guidelines, and seeks to ensure that treasury risks are identified and managed.

## Risk Mitigation

## Funding and liquidity risk (continued)

There is a risk that the Company is not able to access funding at acceptable rates, either through changes in market conditions or through a downgrade in the credit rating of the Company, or through breaching covenants on existing facilities.

The Company monitors its financial position carefully on a regular basis, including the use of detailed financial projections that assess funding requirements and performance against credit metrics and covenants of the Company. The Company has spread its debt maturities over a number of years in order to reduce the concentration of funding risk in any one financial year.

More details of the Company's approach to dealing with financial risks are shown on page 15 and 16.

# Non-compliance with regulatory requirements

The electricity industry is subject to extensive regulatory obligations with which the Company must comply. Non-compliances can result in financial penalties and have a negative reputational impact.

The Group operates a Regulatory Compliance programme which seeks to ensure that regulatory risks and obligations are understood, with controls and processes in place to meet regulatory compliance requirements and to manage risks of non-compliance.

#### The challenge of climate change

Climate change is having, and will continue to have, a significant impact on the electricity industry in which the Company operates, in particular on public policy, customer behaviours, regulatory frameworks, financial performance and public opinion. This creates both risks and opportunities in relation to future performance.

The Company's strategy forms part of the Group's strategy which is to make a significant contribution to the UK's transition to a low carbon economy by investing in infrastructure and enabling new technologies. Key areas of focus include:

- Connecting increasing volumes of renewable energy (such as wind and solar) to the network.
   Forecasts indicate that by 2030 80% of homes on the Group's network will be powered by renewables.
- Facilitating Electric Vehicle uptake. The Group is supporting the roll out of Electric Vehicle infrastructure. By 2030 4.5 million Electric Vehicles are forecast to be using charge points on the Group's network.
- Heat decarbonisation. The Group's strategy to facilitate the deployment of low carbon heating systems is to: provide data and evidence to support government policy in this area; to provide excellent service to customers wishing to connect low carbon heating solutions; and to prepare its networks for the new demands of electrified heating.

## The challenge of climate change continued

It is anticipated that electricity storage technology will become more important as the need for greater flexibility increases. The role of the Company is expected to transform from being a Distribution Network Operator ("DNO") which manages the network to a Distribution System Operator ("DSO") which is proactive and enables a smart, flexible system that responds to customer needs.

Innovation is central to achieving the Company's strategy. The Group seeks new ways to improve what it does for customers by identifying, developing and applying smart solutions to make the network more efficient, greener, safer and more reliable. Through its innovation team and smart grid teams the Group is working towards 'a smart grid for all', in order to make the most of the opportunities arising from the new electricity landscape and to deliver a smart grid that enables customers and communities to benefit from a decentralised, decarbonised and digitised electricity system.

Other environmental activities include the reduction of pollution through replacement of fluid filled cables and the control and mitigation of losses from equipment containing oil and the greenhouse gas Sulphur Hexafluoride.

The Group's annual report sets out in more detail how climate related risks and opportunities are governed, the Board's strategy for responding to climate change, it's risk management activities, and the use of metrics and targets to measure progress against the Group's strategy.

## Financial risk management objectives and policies

The Company is financed by a combination of equity and retained profits, bonds and bank lending facilities. The Company's funding and liquidity are managed within a framework of documented treasury policies and guidelines.

At 31 March 2021 the Company had net debt of £2.020.9m (2020: £1,899.4m) comprising £1,938.5m (2020: £1,657.7m) in bonds and loans from the European Investment Bank of £287.5m (2020: £286.7m) offset by cash balances of £205.1m (2020: £45.0m).

The Company's principal financial assets are its cash balances, trade and other receivables and loans to Group undertakings.

The Company's activities expose it to a number of financial risks, the most important of which are interest rate risk, credit risk and liquidity risk.

#### Interest rate risk

The interest rate exposure on the Company's debt is partially hedged in order to provide the desired mix of fixed, floating and index linked interest rates to achieve a balanced debt portfolio with a similar profile to that of the cost of debt allowance within Ofgem's price control. The use of financial derivatives is governed by the Group's treasury policies which provide written principles on the use of financial derivatives to manage interest rate risks. The Group does not use derivative financial instruments for speculative purposes.

## Financial risk management objectives and policies continued

## Credit and liquidity risk

The Company's credit risk is primarily attributable to its trade receivables. The amounts presented in the balance sheet are net of an impairment allowance for expected credit losses. The credit risk on liquid funds and financial instruments is limited because the counterparties are large recognised banks with investment grade credit-ratings assigned by international rating agencies. The Company does not have a significant concentration of credit risk, with exposure spread over a large number of counterparties and customers.

The Company generates cash primarily from Use of System charges which are payable within 14 days of the demand for payment. Payments are received in advance from customers requiring connection to the network, and suppliers and contractors are paid in accordance with negotiated terms. Other principal cash outflows include interest, taxation and dividends. The Company plans its working capital requirements to take account of expected cash inflows and outflows.

Liquidity risk is managed by spreading debt maturities over a range of dates which provides comfort that the Company is not subject to excessive financing risk in any one year. The Company is able to raise finance in financial markets supported by cash flows generated by the Regulatory Asset Value which in part determines the level of allowed revenue that may be recovered. The Company is required by the distribution licence to maintain an investment grade credit rating.

#### **Pension commitments**

A significant proportion of the Group's employees are members of two funded defined benefit pension schemes: the UK Power Networks Group of the Electricity Supply Pension Scheme (the UKPN Group Scheme); and the UK Power Networks Pension Scheme (the UKPNPS). Both defined benefit schemes are closed to new members. A defined contribution pension scheme, introduced in 2011, is open to all new employees. There is automatic enrolment to the scheme in the first month of employment but employees do have the choice to opt out.

The Company's share of the Group's defined benefit pension obligations accounted for under FRS 102 at 31 March 2021 amounts to a surplus of £34.2m (2020: surplus of £26.8m) in the UKPN Group scheme and a deficit of £69.7m (2020: deficit of £20.7m) in the UKPNPS scheme.

Funding levels are monitored annually and a funding schedule is formally agreed between the Group and the trustees every three years based on the most recent triennial actuarial valuation. The latest funding schedule, based on the triennial valuation as at 31 March 2019, was agreed in June 2020. These contribution rates are considered sufficient to eliminate funding deficits over the next five years.

#### **Taxation**

The Company operates entirely within the United Kingdom and is subject to all the main charges which fall under UK legislation. These include corporation tax, VAT, national insurance, regulatory licence fees, local authority fees (such as road permits issued under the New Roads and Streetworks Act) and relevant rates.

The Company has a significant long term capital expenditure programme which generates a charge against taxable profit through capital allowances. The timing of the tax relief on these allowances has the effect of delaying the payment of corporation tax and giving rise to a deferred tax liability.

At 31 March 2021 the Company's net deferred tax liability was £203.8m (2020: £211.1m).

## Subsequent events after 31 March 2021

Important events which have occurred since the end of the financial year are as follows:

- On 21 May 2021 the 20% share of the Group ultimately held by Li Ka-Shing Foundation Limited (incorporated in the British Virgin Islands) was transferred to CK Asset Holdings Limited, a company incorporated in the Cayman Islands (refer to notes 22 and 23).
- The corporation tax rate increase from 19% to 25% with effect from 1 April 2023, within the Finance Bill 2021, was substantively enacted on 24 May 2021. Remeasuring the 31 March 2021 deferred tax liability at the new rate of 25% will result in a charge of £64.4m to the profit and loss account in the next financial year ended 31 March 2022. The rate increase has no effect on the tax charge for the year ended 31 March 2021 (refer to notes 8 and 23).

## Factors likely to affect future development and performance

The following trends and factors are expected to influence the future financial position and performance of the Company.

#### COVID-19

There is still uncertainty in predicting the full extent and duration of the COVID-19 impact on the business. The Company's business model has been stress tested to understand the impact under several severe but plausible downside scenarios, as discussed in the Going Concern statement on pages 19 and 20.

The Directors' continued assessment is that the effects of the COVID-19 pandemic are a temporary disruption which are not expected to have a material effect on the long term financial position and prospects of the Company. However COVID-19 remains on the risk register as part of the top ten risks as discussed on page 11.

#### Workforce renewal programme

The Company benefits from various recruitment and training programmes designed to develop the UK Power Networks workforce to meet the future resource requirements of the distribution business.

The recruitment and training of technically skilled staff is promoted through graduate and engineering development programmes, apprentice schemes and a smart metering traineeship.

Due to the large number of staff working on the distribution network, management training is important for safety, quality of work and efficiency and is sourced either internally through the Human Resources function or through third-party suppliers. The Group has this year launched a leadership academy which is a structured training programme for around 600 middle managers who will work towards a Chartered Management Institute diploma in leadership and management.

## Factors likely to affect future development and performance continued

#### Innovation

The Group has a dedicated innovation team seeking to deliver solutions in the following areas:

- Improving the performance of the network in terms of safety, reliability and efficiency. Projects aim to deliver measurable impacts on for example customer interruptions (CIs), customer minutes lost (CMLs), carbon emissions and safety performance.
- Enabling low carbon technologies like electric vehicles, renewable energy and energy storage.
   Projects aim at improving network access through reducing time and cost to connect low carbon load, generation, and storage technologies.
- Developing the Company's future capabilities as a Distribution System Operator to deliver a secure, reliable low carbon energy system that addresses its customers' evolving needs.

## RIIO-ED2 (1 April 2023 to 31 March 2028)

The challenge of the next price control, RIIO-ED2, will be focused around maintaining affordability for customers in light of the new demands of connecting low carbon technologies and increased generation to the distribution network. The Group aims to make a positive contribution to the design of the price control. The Company's draft RIIO-ED2 business plan was submitted to OFGEM on 1 July 2021 and will be subject to review and further consultation, with final determination scheduled for December 2022.

#### Key long-term objectives

The key long-term issues considered beyond 2021 are summarised below:

- Continued high performance in safety, network reliability, customer satisfaction and stakeholder engagement.
- Facilitating distributed energy resource deployment e.g. Electric vehicles, storage, to enable the net zero transition.
- Seeing that customers in vulnerable circumstances are not left behind in the energy transition.
- · Developing the Company's digital and data analytics capability.
- Embedding organisational resilience to strengthen the Company's response to major events such as storms or pandemics.
- Developing and delivering the Company's RIIO-ED2 social contract.
- · Delivering sustained growth in the Connections business.

## Going concern

The Company's business activities together with details regarding its risk management policies and its future development, performance and position are set out in the preceding paragraphs of this Strategic Report. Further detail in respect of its financial instruments and hedging activities are included in the relevant notes to the financial statements.

In considering the going concern basis in preparing the financial statements the Directors have taken the Company's annual budget and long term strategic plan into account as well as the following factors:

- The Company profitably operates the regulated electricity distribution network in the East Anglia / North London area. The revenue of the Company is regulated by Ofgem via established price control mechanisms providing a stable and predictable source of cash flows.
- The Company is funded by debt with an average maturity of six years and has access to a
  revolving credit facility of £210.0m until at least 2024 which was undrawn at the balance sheet
  date. Total borrowings (excluding derivatives) amounted to £2,226.0m (2020: £1,944.4m) of which
  £400.3m (2020: £nil) was short term.
- The Company has the ability to access external debt markets supported by cash generated by its
  operations. In June 2020 the Company raised additional finance through the issue of a £300m
  sterling bond which carries interest at 1.875% and matures in 2035. In December 2020 access to
  the revolving credit facilities was increased from £105m to £210m and extended to 2024 with
  options to extend to 2026.
- As required by its electricity distribution licence the Company maintains an investment grade credit rating. This, together with the Company's track record of raising finance during the year, provides comfort to the Directors that the Company is able to access capital markets when required.
- At 31 March 2021 the Company had a net current liability position of £54.9m which reflects the £400m sterling bond due to mature in September 2021. The Company is in the process of negotiating further debt arrangements to be drawn in 2021.
- The Directors are confident that, in addition to the anticipated refinancing, the Company has sufficient resources to meet its obligations as they fall due, which include cash reserves of £205.1m, the undrawn £205.0m revolving credit facility and access to Group loans through pooled treasury arrangements.

Although the COVID-19 pandemic has had an impact on distribution volumes and progress on capital projects the Company has felt the effects of the pandemic less than many other businesses in the UK. There has been no significant decline in revenues, the Company has not required any funding support from the government and the adverse economic climate has not resulted in an increase in debtors. The Company has continued to support customers and provide a safe and reliable electricity network throughout the lockdowns. The Directors have applied sensitivities to the Company's forecasts with a central case that anticipates a recovery of distribution volumes and the majority of the Company's activities to previous levels, within the next twelve months. In addition, forecasts have been stress tested with different scenarios including higher costs due to major storms, a volume driven reduction in revenues arising from further COVID-19 lock downs or similar events, unexpected operational or capital expenditure required in response to safety incidents and higher levels of bad debt in the COVID-19 economic climate.

## Going concern continued

The forecast modelling has shown that the Company will remain profitable over the next 12 months, under all reasonable scenarios, and there is considerable headroom in lending facilities and covenants (comprising gearing and interest cover measures) which underpins the going concern assumption on which these financial statements have been prepared. The stress tests in the forecast modelling indicate that, even in the pandemic impacted economic environment, the decline required in the Company's financial performance to result in a covenant breach, is remote. The Directors closely monitor cash conversion and covenants, and there are a number of mitigating actions including delay in capital expenditure and deferral of discretionary dividend payments within the control of the Group.

The Company's forecasts and projections, taking account of reasonably possible changes in trading performance, demonstrate that the Company will be able to operate within its credit facilities. The Company has delivered a strong financial and operational performance during the year. While there remains uncertainty, the Directors' assessment is that the pandemic is not expected to have a material impact on the Company's financial position and prospects in the medium to long term. The Directors are satisfied that the Company has adequate resources to continue operating for the foreseeable future and on this basis the principle of a going concern has been adopted in the preparation of the financial statements.

## Section 172 (1) statement

The Directors are aware of their duties under Section 172(1) of the Companies Act 2006, which requires them to act in the way which they consider, in good faith, would be most likely to promote the success of the Company for the benefit of its members as a whole and in doing so have regard (amongst other matters) to:

- a) the likely consequences of any decision in the long term;
- b) the interests of the Group's employees;
- c) the need to foster the Company's business relationships with suppliers, customers and others;
- d) the impact of the Company's operations on the community and the environment;
- e) the desirability of the Company maintaining a reputation for high standards of business conduct; and
- f) the need to act fairly as between members of the Company.

The Company operates in an industry characterised by long term investment in the future to ensure a sustainable energy supply for customers. The consequences of the Company's strategy over the long term are considered in its long term business plans and projections, including a detailed business plan agreed with Ofgem at the start of each price control period, and the Company's own five year projections which are updated annually. Further information on the factors likely to affect future performance and how the Company responds to them can be found on pages 17 to 18.

The Company actively engages with its stakeholders on a regular basis in order to identify trends and developments, inform policies and procedures, and re-align its strategy. The Company has identified its key stakeholders as: the Group's employees, customers, suppliers, the communities affected by the Company's operations, the regulator and shareholders. Further information about how the Company has regard to the interests of these stakeholders, and how it fosters good business relationships with them, can be found on pages 32 to 35.

## **EASTERN POWER NETWORKS PLC**

## STRATEGIC REPORT FOR THE YEAR ENDED 31 MARCH 2021

# Section 172 (1) statement continued

As described on pages 24 and 25, the Company's vision is to be a respected and trusted corporate citizen, operating within a set of values which are designed to promote high standards and fair and ethical behaviour.

Approved by the Board on 14 July 2021 and signed on its behalf by:

Basil Scarsella

Director

Newington House 237 Southwark Bridge Road London SE1 6NP United Kingdom

## **DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2021**

The Directors present their Annual Report including the Audited Financial Statements of the Company for the year ended 31 March 2021.

Details of the Company's financial risk management objectives and policies, future developments, going concern and the Section 172 statement on the duties of the Directors are included in the Strategic Report and form part of this report by cross reference.

#### **Dividends**

Dividends of £57.0m (2020: £92.8m) were paid during the year.

#### **Political contributions**

The Company made no political contributions during the year (2020: £nil).

#### **Business relationships**

The Company has identified its key stakeholders as: employees of the Group, customers, suppliers, the communities affected by the Company's operations, the regulator and shareholders. Further information about how the Group has regard to the interests of these stakeholders, and how it fosters good business relationships with them, can be found on pages 32 to 35.

## **Directors of the Company**

The Directors who held office during the year and subsequently were as follows:

Andrew John Hunter (Chairman)

Hing Lam Kam

Neil Douglas McGee

Hok Shan Chong (resigned 21 May 2021)

**Basil Scarsella** 

Charles Chao Chung Tsai

Loi Shun Chan

Mei Fan Ngan (resigned 21 May 2021)

**Duncan Nicholas Macrae** 

Kee Ham Chan

Chi Tin Wan

**Christopher Clarke** 

Paul Jeffery

None of the Directors had a service contract with the Company in the current or prior year.

The Company has made qualifying third party indemnity provisions for the benefit of its directors which were made during the year and remain in force at the date of this report.

#### **EASTERN POWER NETWORKS PLC**

## **DIRECTORS' REPORT FOR THE YEAR ENDED 31 MARCH 2021**

#### **Disclosure of information to Auditor**

Each of the persons who is a director of the Company at the date of approval of this Annual Report confirms that:

- so far as the Director is aware, there is no relevant audit information of which the Company's auditor is unaware; and
- the Director has taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s418 of the Companies Act 2006.

#### Auditor

Deloitte LLP have expressed their willingness to continue in office as Auditor and a resolution to reappoint them will be proposed at the Annual General Meeting.

Approved by the Board on 14 July 2021 and signed on its behalf by:

Basil Scarsella Director

The Company has adopted the Wates Corporate Governance Principles for Large Private Companies, as issued by the Financial Reporting Council (FRC), 2018.

The Company is a wholly owned subsidiary of UK Power Networks Holdings Limited and forms part of the UK Power Networks Holdings Group (the "Group"). The Group operates a range of governance principles and practices on a group-wide basis, which are adopted and implemented by its subsidiaries, including the Company, to the extent they are relevant to their operations.

The Companies (Miscellaneous Reporting) Regulations 2018 requires the Company to make a statement in relation to which corporate governance code it has adopted, and how it has adopted that code. The purpose of this report is to set out how corporate governance principles have been applied to the Company in the context of the Group. Relevant disclosures are included below in this Report on Corporate Governance, in the Statement of Directors' Responsibilities, in the Directors' Report and in the Strategic Report.

## Principle 1 - Purpose and Leadership

Purpose, vision and values

The Company has a clear public purpose: to deliver electricity to the East of England. The Group has articulated the vision and values to which the Company aspires in fulfilling its purpose, and these are set out below.

The vision of the Group is to be consistently the leading Distribution Network Operator through being:

## an employer of choice:

- · the safest, with an exemplary safety record
- · an organisation that employees are proud to work for
- embracing diversity
- · an appropriately skilled workforce for both today and the long term

## a respected and trusted corporate citizen:

- · the most reliable networks
- the most satisfied customers
- the most innovative
- · the most socially and environmentally responsible
- · meeting the needs of vulnerable customers, both now and in the future
- enabling the low-carbon transition for all as the leading UK Distribution System Operator

## sustainably cost efficient:

- · the lowest cost electricity distributor
- · deliver on commitments in a collaborative way
- delivering profitable growth in the Connections business

#### Principle 1 - Purpose and Leadership continued

The values of the Group underpin what the Company does. They define how the Company expects its representantives to behave and how the Company wants to be perceived by its stakeholders and those who come into contact with the business. The Company has adopted these values as follows:

**Integrity:** The Company will do what it says it will do and build trust and confidence by being honest to colleagues, partners and customers.

Respect: The Company will treat partners and customers in the way in which the Company would want to be treated.

Continuous improvement: The Company is committed to learning, development, innovation and achievement.

Responsibility: The Company will act in an ethical, safe and socially/environmentally aware manner.

**Diversity and inclusiveness:** The Company recognises and encourages the value which difference can bring.

**Unity:** The Group is stronger together and this comes from a shared vision, a common purpose and a supportive and collaborative working environment.

The Board are committed to seeing that the vision and values are embedded in the Group, and reiterate them regularly. Internal bonus and incentive targets are based on the achievement of the vision, measuring both financial and non-financial metrics. The Group also operates a Living our Values award system, which promotes and recognises employees who demonstrate the values in their work.

Through open discussion, the vision and values are reviewed internally, and from time to time are modified to reflect the changing environment in which the Group operates. This is done through feedback from the annual employee survey, engagement with trade unions, and regular senior leadership forums.

## Principle 2 - Board composition

The Board comprises the Chief Executive Officer ("CEO") of the Group, ten Directors appointed to represent the shareholders (including two alternate Directors) and two Sufficiently Independent Directors ("SIDs") appointed to comply with regulatory licence conditions. The Board of the Company is identical to the Board of the Group with the exception of the two SIDs who are not members of the Board of the Group but do attend Group Board and Board Committee meetings, and an additional alternate director in the parent company. The role of the SIDs as defined by the Regulator is to mitigate the risk that Directors with executive roles within the wider ownership group could become conflicted at times of crisis.

The Board is the principal decision-making forum for the Company and the Group. It has overall responsibility for leading and controlling the Group as well as the financial and operational performance of the Company. The positions of the Chairman of the Board and CEO are held by separate individuals with a view to maintaining effective segregation of duties between management of the Board and the day-to-day management of the Company.

## Principle 2 - Board composition continued

The CEO of the Group is the only Executive Board member. The other directors do not hold executive roles and therefore maintain an acceptable level of independence from the executive management of the Company. As such, the appointment of an independent Chairman is not deemed necessary.

The Board and Board committees meet on a regular basis to oversee the management of the Group as a whole and where appropriate to consider and act on matters pertaining to individual subsidiary companies. A total of five meetings of the Board were held during the year with eleven to thirteen directors present, including at least one representative of each shareholder.

## Principle 3 - Directors' responsibilities

The Board is responsible to the Shareholders for the performance of the Company in both the short and the longer term and seeks to balance competing objectives in the best interests of the Company with the objective of enhancing shareholder value.

The powers of the Directors have been set out in the Company's Articles of Association. To ensure good corporate governance the Board has adopted a formal corporate governance statement and has clearly defined terms of reference setting out matters reserved for the Board.

The Directors make active contributions to the affairs of the Board and the Board acts in the best interests of the Company. Furthermore, the Board has established formal committees with specific responsibilities to assist in the execution of its duties and to allow detailed consideration of complex issues. Below the Board, executive responsibility rests with the CEO Basil Scarsella and the Executive Management Team ("EMT"). The CEO and EMT operate within the Delegations of Authority, governance structure and terms of reference defined in the Company's Corporate Governance Framework, which outlines the governance structure within the Company.

#### Governance and control environment

The Board is collectively responsible for the oversight of the management of the Group and the Company. The Board has determined those decisions that require approval by the Board and the delegation of authority for those decisions that do not.

The Company Secretary is responsible to the Board for ensuring that Board procedures are followed and for ensuring that the Board is briefed on relevant legislative, regulatory and corporate governance developments and that the Board has regard to them when making decisions.

In order to assist the Board in fulfilling its oversight responsibilities, five Board sub-committees have been created with the following terms of reference:

The Audit Committee assists the Board with its responsibilities for financial reporting, maintaining
an effective system of internal control and internal and external audit processes. Using risk
assessment methodology and taking into account the Company's activities, Internal Audit
determines the annual audit programme which is approved and monitored by the Audit Committee.
The Audit Committee also reviews the arrangements by which staff of the Group may raise
concerns in confidence about possible improprieties and monitors any investigations into concerns
raised.

## Principle 3 - Directors' responsibilities continued

- The principal responsibilities of the Remuneration Committee include making recommendations to the Board on the Group's policies and structure in relation to the remuneration of senior management and employees of the Group, by reference to corporate goals and objectives resolved by the Board from time to time.
- The Treasury Committee oversees the treasury strategy, policy and procedure and seeks to
  ensure that all treasury risks are identified, measured and controlled in a manner consistent with
  corporate strategy and treasury policy.
- The Risk Management and Compliance Committee assists the Board with its responsibilities in relation to risk management and to oversee compliance with obligations determined by statute, legislation, regulation, contract or agreement. The Board is responsible for approval of the risk management strategy while management is responsible for implementing the Board's strategy and for developing policies and procedures to identify, manage and mitigate risks across the business.
- The Nominations Committee recommends Sufficiently Independent Directors ("SIDs") for appointment to the Boards of the Distribution companies. The Committee selects the candidates based on the criteria defined by condition 43A of the distribution licence which requires the SIDs to have a sufficient level of independence from the executive management of the Company and the shareholder companies.

The Nominations Committee meets when required, the Remuneration Committee meets at least once annually and the other committees at least three times annually. A chairman is elected at each meeting by the relevant committee. During the year the Remuneration Committee held one meeting and the Audit, Treasury, Risk Management and Compliance committees each held three meetings. A quorum was present at each meeting.

A further Board subcommittee has been established in relation to the preparation of and Board assurance over the RIIO-ED2 business plan. This committee has held monthly meetings since June 2020.

Each committee's performance, constitution and terms of reference are reviewed annually to ensure that they are operating effectively. The Company Secretary acts as a secretary for each committee.

The EMT comprises the CEO of the Group and Directors for each of the distinct business areas, or Directorates. In order to assist the EMT in fulfilling their responsibilities, committees with delegated authority for defined matters have been established. The Senior Management Team within each Directorate has defined responsibilities which allow for effective operations to achieve the Group's objectives. Lines of responsibility and levels of authority are formally defined.

# Integrity of financial information

The consolidated financial statements of the Group and its subsidiaries (including the Company) are prepared by the central financial reporting team based on results submitted by each Directorate. Each Directorate is supported by an appropriately qualified finance team who provide advice to the EMT Directors and Managers and liaise with the central financial reporting team on such matters as the application of accounting policies, procedures and internal controls. The role of the central financial reporting team includes liaising with the shareholders regarding such matters as accounting policies, planning for changes in reporting requirements and to ensure that these are communicated effectively to the Directorates. There is regular dialogue between the central financial reporting team and the finance teams supporting the Directorates to ensure there is appropriate understanding of these requirements.

# Principle 3 - Directors' responsibilities continued

## Integrity of financial information continued

The Directorates are accountable for the review and approval of the monthly management accounts prior to submission to the central financial reporting team who then undertake further reviews and challenge. The monthly accounts of each Directorate are reviewed during EMT meetings. Consolidated year to date financial information is presented at Board meetings attended by the CEO and the Finance Director. The annual report and accounts of the Company and of the Group are presented to the Audit Committee, or a subcommittee thereof, prior to approval by the Board.

#### External audit

The Audit Committee is responsible for overseeing the effectiveness of the external audit process and ensuring that appropriate measures are taken to safeguard the independence and objectivity of the external auditor.

The Audit Committee reviews the scope and general extent of the external auditor's annual audit, seeking confirmation from the external auditor that no limitations have been placed on the scope or nature of their audit procedures.

At the completion of the annual external audit the Audit Committee reviews with management and the external auditor the annual financial statements and related notes, financial information and discussion to be included in the annual report. The results of the audit and the audit report are reviewed and enquiries are made as to whether there have been any material disagreements with management. The Audit Committee meets with the external auditor without members of management being present at least twice a year to discuss any matters that the external auditor or the Audit Committee believe should be discussed privately.

The Audit Committee reports its findings to the Board in respect of the effectiveness of the external audit process and significant issues considered in relation to financial statements and how these were addressed. On this basis, it advises the Board on whether the Annual Report and financial statements taken as a whole represent a fair, balanced and understandable view to shareholders and therein recommends the approval of the financial statements.

## Independence and objectivity of external auditor

The Audit Committee reviews annually with management the fee arrangements and terms of reference with the external auditor. In particular the nature and extent of non-audit services provided is reviewed with reference to the approved framework within the Group's Corporate Governance Policy.

For each audit period a formal written statement is provided by the external auditor setting out all relationships between the external auditor and the Group. Any proposed appointment of ex-employees of the external audit firm to senior management positions with the Company is subject to consent by the Audit Committee.

The lead external audit engagement partner is rotated at least every five years, the last rotation being for the 31 March 2017 year ended audit engagement.

## Principle 4 - Opportunity and Risk

The Group's Corporate Governance Framework Policy, which outlines the governance structure within the Group and its subsidiaries including the Company, is supported by the Risk, Control and Compliance Policy and underlying procedures. The Risk, Control and Compliance Policy, in place throughout the reporting period, defines the framework in which the Company:

- proactively identifies risks to its strategy, objectives, business developments and processes and implements internal controls to mitigate these;
- explores the effectiveness of those controls in mitigating the risks through internal audit and other monitoring mechanisms;
- reactively monitors incidents, errors and breaches to identify control failures and determine areas for improvement; and
- develops contingency arrangements for business continuity and emergency incidents.

## Internal control

The Board (through the Audit Committee) is responsible for the Company's system of internal control and for reviewing its effectiveness. The Company's system of internal control and the risk management process help to safeguard the Company's assets. However, the Board recognises that such a system can only provide reasonable and not absolute assurance against material misstatement or loss.

#### Risk identification and control

The Company operates a structured risk and control assessment process which is overseen by the EMT, supported by risk review meetings conducted by the Senior Management Team within each business Directorate.

The role of the Directorate risk review meetings is to assess new risks, review existing risks and monitor control improvement actions. Each identified risk is defined and assessed by the risk owner. This includes an assessment of the likelihood of the risk occurring and the associated impact, key mitigating controls, and an assessment of the adequacy of those controls. Where appropriate control improvement actions are defined.

Significant risks and delivery of control improvement actions are monitored and reported to the Executive and Senior Management Teams on a regular basis, and actively managed by the designated risk owners.

## Internal control framework

Control procedures have been implemented throughout the Company and are designed to achieve complete and accurate accounting for financial transactions, to safeguard the Company's assets and for compliance with laws and regulations. These control procedures form the Integrated Management System; a controlled framework of policy and procedural documentation. Control procedures are subject to regular review and formal ratification and approval. As part of the Integrated Management System, procedural implementation and compliance is subject to regular monitoring.

The Board of Directors has established the scope of the internal audit function which is responsible for reviewing the effectiveness of the Company's systems of internal control and reports to the Audit Committee of the Board.

## Principle 4 - Opportunity and Risk continued

#### Internal audit

The Internal Audit function has responsibility for providing independent assurance to the CEO and the Audit Committee as to the effectiveness of the policies, procedures and standards which constitute the system of internal control, including; risk management; corporate governance; and compliance with relevant laws and regulations. Internal Audit has a direct reporting line to the Audit Committee.

The relationship between Internal Audit and management requires management to be primarily responsible for ensuring that the systems of internal control are implemented and operated so as to provide reasonable assurance that the objectives of the business will be met and that the risks or threats to the business are mitigated. In addition to providing independent review, the Internal Audit function provides advice and guidance to management on the appropriateness of internal control mechanisms and systems.

The Audit Committee reviews and approves the scope of Internal Audit's work plan for the year and monitors progress against the work plan. The Audit Committee reviews major findings by the internal auditors and the status of Management actions to address the conditions reported in completed audits.

## Monitoring and corrective action

The Group has established structured performance monitoring to measure achievement against the strategy and objectives of the Group. The structured approach includes a combination of quantitative metrics and qualitative analysis to ensure areas for improvement are promptly identified and addressed.

In order to monitor compliance with internal controls, the Group operates a 'three lines of defence' approach.

- First line of defence management control. Management undertake monitoring of their processes
  to satisfy themselves that the defined controls operate economically, effectively and efficiently; and
  that key risks are identified and assessed;
- Second line of defence oversight and challenge. There are designated functions and committees
  in place to test and challenge the effective operation of controls. These include central functions
  and committees established by the EMT; and
- Third line of defence assurance. Assurance is provided by the Internal Audit function and external audits and accreditation exercises conducted by third party assurance providers.

Identified control weaknesses and corrective actions are reported to the Executive and Senior Management Teams and monitored monthly. Significant weaknesses in internal control are reported to the EMT and, if appropriate, to the Audit Committee.

## Principle 4 - Opportunity and Risk continued

Effectiveness review of internal control

The Group continuously makes improvements to the system of internal control through structured review of the Integrated Management System and other targeted control reviews.

CK Infrastructure Holdings Limited and Power Assets Holdings Limited require that the Group provides an annual report on the quality of the internal control system covering key business processes and outlining, where necessary, material control weaknesses. In forming a view of the quality of the systems of internal control, the EMT consider: audit findings; compliance review findings; risks with controls assessed as sub-optimal; and status of corrective actions related to these areas.

These assessments enable the Group to identify areas where attention is required to improve the system of internal control, business performance and operating effectiveness.

#### **Principle 5 - Remuneration**

The Company has no employees of its own, however it relies on the employees of other Group companies to deliver its services.

The Group has formed a Remuneration Committee, whose principal responsibilities include making recommendations to the Board on the Group's policies and structure in relation to the remuneration of senior management and the employees of the Group by reference to corporate goals and objectives resolved by the Board from time to time. The Remuneration Committee is formed by members of the Board including one of the SIDs, and meets on at least an annual basis.

The Group has clear remuneration structures that are designed to reward good performance, attract the best talent, and are aligned to the achievement of the Group's vision and values.

One of the key ways that employees are incentivised is through the Company Incentive Plan (employee bonus scheme), which is applicable to all the Group's employees. Sixty per cent of the Company Incentive Plan is based on the Group's achievement of key aspects of its vision, including safety, reliability, customer service and cost efficiency. The management population also has a target relating to employee engagement. The remaining forty per cent of the Company Incentive Plan is based on achievement of individual and team annual objectives which are designed to support the Group's vision.

The Group targets are shared by all employees, including the Executive and Senior management teams, in order to reinforce a common sense purpose across the Group. The balance for the EMT is seventy-five per cent on the Group's achievement and twenty-five percent on individual objectives. The Group also operates a long term incentive plan for its EMT to promote achievement of sustainable, good long term performance.

The remuneration of directors is disclosed in note 6 of the financial statements.

## Principle 6 - Stakeholder Relationships and Engagement

The stakeholders of the Company are consistent with the stakeholders from across the rest of the Group. Although the Company has no employees of its own, it considers the employees of other Group companies to be key stakeholders and therefore participates in the engagement activities that the Group undertakes.

The Group actively engages with its stakeholders on a regular basis in order to identify trends and developments, inform policies and procedures, and re-align its strategy. The Group has identified the following as its key stakeholders, and has described below how it seeks to engage with them: employees, customers, suppliers, the community and its environment, the regulator and the shareholders.

## Group Employees

The Group recognises that its employees are fundamental to the achievement of its objectives and to its longer term success, and has articulated being an Employer of Choice as one of the three pillars to its vision. A diverse workforce, with a range of backgrounds, abilities, skills and experience, is considered to be vital to achieving the best outcomes.

Accordingly the Group places considerable value on the engagement and involvement of its workforce, through a variety of activities and initiatives including:

- A comprehensive annual employee engagement survey by an external survey provider "Best Companies" in which employees provide their views on key matters pertinent to the success of the Group and their own engagement. The results of the survey continue to improve and this year the Group achieved a top rating of 3 stars in recognition of exceptional levels of employee engagement. Feedback indicated that Leadership, Fair Deal and Wellbeing were key areas ofstrength. Shorter monthly polls are conducted on samples of employees across the organisation, as a supplement to the annual survey.
- The Group has featured on the Sunday Times Top 25 Best Big Companies To Work For list since 2013, achieving sixth position nationally in the last survey published in May 2021.
- The EMT actively engage with more than 4,000 employees face to face, via monthly roadshows
  tosites across the Group (or during the COVID-19 pandemic via video conferencing), in which the
  workforce hear about the Group's performance and are able to direct questions to the EMT.
- The Group issues communications to employees through a range of channels, including a monthly
  'team brief' in which employees hear about the Group's achievement against its objectives, and
  view a video address from the CEO. Other communications include Group-wide magazine
  publications, intranet sites, emails and social media forums.
- Employee representatives are consulted regularly on a wide range of matters affecting the current and future interests of employees through dedicated employee engagement forums.
- The values of Diversity and Inclusiveness are key considerations in the Group's recruitment, training and communication programmes. Training is provided to senior and middle managers on how unconscious biases affecting the way people are treated, can be overcome. Diversity Champions are appointed to act as role models for diversity and equality within the business. Through various forums, employees are asked to share their views on diversity and inclusiveness in the work place and make recommendations for improvement. Achieving the National Equality Standard (NES) accreditation and 3rd place in the 2020 Inclusive Companies list reflects the Group's intent and commitment toward becoming a truly diverse and inclusive workplace.

#### Principle 6 - Stakeholder Relationships and Engagement continued

## Employees continued

- Each employee undertakes performance reviews with their managers, in which their performance against objectives is reviewed and discussed and personal development opportunities and training identified.
- The Group holds an "Investors in People" platinum accreditation which recognises its commitment to excellence in people management, an achievement obtained by only 2% of companies globally.

#### Customers

Customer engagement helps build a sustainable business, as it anchors the Group to the needs and expectations of its customers and shapes its long-term vision and objectives. The Group engages with its customers through a programme of events, forums and focus groups along with other communications such as newsletters and media campaigns.

An important source of customer feedback is an industry survey of 300 customers a week, which feeds into Ofgem's Broad Measure of Customer Satisfaction. This is supplemented by an additional feedback mechanism in which customers give almost instant feedback on the service they have received.

The Group has enhanced its service to customers in the following ways:

- Detailed analysis of data from various perspectives such as network performance, geography, and the particular customer experience or circumstances to provide greater insight into what drives customer satisfaction.
- Improved, tailored communication with the customer throughout their journey with the Company including the use of technology in the form of a Customer App.
- Better collaboration between different parts of the business so that the customer receives a joined up level of service at all points of contact from call centre staff to engineers in the field.

The Company has achieved high customer satisfaction scores of 93% in the current year and 92% in the prior year (refer to page 7). A Group wide campaign has been launched to help drive the culture of improving customer service even further. The campaign involves formal review by senior management of major complaints or service failings to understand what went wrong and how changes can be implemented. These learning points are shared with employees in regular team briefs together with examples of best practice where excellent feedback has been received from customers.

In addition to achieving high customer satisfaction scores, the Group was ranked in the top 10 companies in terms of complaint handling in the 2020 UK Customer Satisfaction Index ("UKCSI"), which benchmarks customer satisfaction.

## Principle 6 - Stakeholder Relationships and Engagement continued

#### Suppliers

Good relationships with suppliers are key to delivering value efficiently and effectively.

The Group operates an established procurement function which seeks to ensure fair and ethical dealings with its suppliers, and has put in place policies and practices, such as:

- The Group has published guidance to suppliers, both current and prospective, on how to operate
  in accordance with the UK Power Networks vision, values, and standards. It outlines its approach
  to business ethics and sustainable procurement and clarifies the standards and behaviours it
  expects to be adopted throughout the supply chain.
- UK Power Networks assesses its suppliers through a pre-qualification platform Achilles Utilities Vendor Database ("UVDB"). As an industry-recognised risk management framework, Achilles UVDB provides a fair, open and transparent means of supplier selection for potential tender opportunities.
- The Group is a signatory to the Prompt Payment Code, which sets standards for payment practices and best practice, working towards adopting 30 day payment terms as the norm, and to avoid any practices that adversely affect the supply chain.
- The Group has formed an alliance model with key strategic partners to promote closer working relationships and common practices on shared projects.

## Community and Environment

As a network operator the Group recognises that its activities can have an impact on the communities and surrounding area where the Group operates. Being a respected and trusted corporate citizen is a key part of the Group's vision and it works closely with communities and their representatives to identify areas where it can play an active, beneficial role.

The Group regularly engages with local community groups, councils, businesses and customers through a programme of events and forums to obtain feedback. The Group also undertakes an intensive programme of engagement with such groups when it is forming its business plan for a new price control period. The feedback from these interactions result in initiatives and commitments which the Group delivers as part of its business plan.

The Group maintains a Priority Services Register ("PSR") which, in the event of a power cut, allows it to deliver specific support to customers living in vulnerable circumstances. Many different services are offered to the approximately 1.9 million customers on the PSR ranging from personal calls with information updates, to hot meals, and even alternative accommodation or a mobile generator.

As part of the response to the COVID-19 pandemic, the Group led a collaboration between eight utility firms to donate £0.5m to 21 community foundations, distributing fast funding to local charities, including local food banks, volunteer centres, food delivery services and outreach programmes for those at risk of isolation. In addition the Group's £300,000 Power Partner scheme was repurposed to help people struggling to pay their energy bills while out of work and at home due to lockdown restrictions.

The Group's Green Action Plan which was launched in 2019 and is developing over time, sets out targets for reducing the Group's impact on the environment in relation to for example waste, water usage, carbon emissions, air and noise pollution and biodiversity.

#### CORPORATE GOVERNANCE STATEMENT FOR THE YEAR ENDED 31 MARCH 2021

### Principle 6 - Stakeholder Relationships and Engagement continued

The regulator, Ofgem

The Group is regulated by Ofgem which determines its strategy on a range of matters.

The Group regularly engages with Ofgem through formal consultation processes, and with other industry bodies in various forums, to share information, to ensure the Group understands its obligations as set out by Ofgem, and to ensure the Group's interests are represented in industry discussions.

As part of its response to the COVID-19 crisis the Company participated in a scheme initiated by Ofgem to provide support to smaller energy suppliers facing cash flow challenges in the difficult economic climate. The scheme allowed a number of the Company's debtors to spread payments over 7 months between September 2020 and March 2021.

Currently, the Group is actively engaged with Ofgem in its preparations for the next price control, RIIO-ED2.

### Shareholders

The Group is wholly owned by a consortium of three parties. The support and engagement of the Group's shareholders is vital to the success of the business in reaching its long term objectives.

The Group's shareholders are represented on the Board of Directors, and as such receive regular reporting on financial and operational matters, and are directly involved in strategic decision making.

#### STATEMENT OF DIRECTORS' RESPONSIBILITIES

The Directors acknowledge their responsibilities for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing these financial statements, the Directors are required to:

- · select suitable accounting policies and apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Directors confirm to the best of their knowledge that:

- the Financial Statements, prepared in accordance with the applicable set of accounting standards, give a true and fair view of the assets and liabilities, financial position and profit of Eastern Power Networks plc as at 31 March 2021; and
- the Strategic Report and the Directors' Report include a true and fair view of the development and performance of the business and the financial position of Eastern Power Networks plc, together with a description of its principal risks and uncertainties.

Approved by the Board on 14 July 2021 and signed on its behalf by:

Basil Scarsella **Director** 

#### Report on the audit of the financial statements

#### 1. Opinion

In our opinion the financial statements of Eastern Power Networks plc (the 'company'):

- give a true and fair view of the state of the company's affairs as at 31 March 2021 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland"; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements which comprise:

- the profit and loss account;
- · the statement of comprehensive income;
- · the balance sheet;
- · the statement of changes in equity;
- · the cash flow statement; and
- the related notes 1 to 23.

The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice).

#### 2. Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the financial statements section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the 'FRC's') Ethical Standard as applied to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. The non-audit services provided to the company for the year are disclosed in note 5 to the financial statements. We confirm that the non-audit services prohibited by the FRC's Ethical Standard were not provided to the company.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### 3. Summary of our audit approach

### Key audit matters

The key audit matters that we identified in the current year were:

- · Accuracy of cost classification; and
- · Accuracy of financial instruments.

|                                     | Within this report, key audit matters are identified as follows:   |
|-------------------------------------|--|
|                                     | Newly identified   |
|                                     |  |
|                                     | Similar level of risk  |
|                                     | Decreased level of risk  |
| Materiality                         | The materiality that we used in the current year was £17.5 million which was determined on the basis of approximately 7.5% of profit before tax. |
| Scoping                             | Audit work to respond to the risks of material misstatement was performed directly by the audit engagement team.                                 |
| Significant changes in our approach | Our approach is consistent with the prior year and we have not identified any new key audit matters.   |

### 4. Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Our evaluation of the directors' assessment of the company's ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the relevant controls relating to the going concern process;
- Understanding the financing facilities available to the Company, including the associated covenants;
- Assessing all bank covenants and facility expiry dates, and recalculating current and forecast covenant compliance;
- Obtaining an understanding of the going concern forecast prepared by Management, including the downside scenarios as well as evaluating any plan for future actions;
- Testing the mathematical accuracy of the model used to prepare the going concern forecast;
- Challenging the key assumptions, including forecast revenue and capital expenditure cash flows, on
  which the assessment is based and evaluating the consistency of assumptions with other assumptions
  within the going concern assessment as well as related assumptions used in other areas;
- Evaluating Management's assessment of the impact of Covid-19 within the forecast;
- Assessing the level of headroom in the forecast, with regard to both liquidity and debt covenant tests;
- Assessing the outcome of the reverse stress testing performed by Management;
- Assessing whether any additional facts or information has become available since the date Management made its assessment; and
- Evaluating the appropriateness of the going concern disclosures in the financial statements.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

#### 5. Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified. These matters included those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

# 5.1. Accuracy of cost classification (\*)

### Key audit matter description

The company continues to have an extensive capital investment programme. To meet the requirements of FRS 102.17 Property Plant and Equipment ("PP&E"), it is important that network costs are appropriately classified as either capital or operating expenditure in nature. In the year, the company capitalised £344.4 million (2020: £368.6 million) in relation to network assets.

The classification of activities between capital (additions or enhancements to network assets) and operating expenditure (maintenance or network repair) is impacted by judgements undertaken by management. Management's judgements pertain to the cost drivers that form part of the cost classification model, that determine the expenditure classification as part of the overall capitalisation policy, as well as a degree of complexity surrounding the allocation of network costs using a range of network cost drivers. Due to the judgements and complexity pertaining to these cost drivers, we have identified the accuracy of cost classification to be a key audit matter as well as potential fraud risk. We identify this key audit matter as a potential fraud risk as management might be incentivised to fraudulently overstate capital expenditure and understate operating expenditure, in the determination of the cost drivers that underpin the classification of expenditure.

The classification of costs have been disclosed in the accounting policies in Note 2, Note 3 and in Note 10 to the financial statements.

### How the scope of our audit responded to the key audit matter

We performed the following procedures:

- Tested relevant controls over the application of the policy in relation to classification of expenditure;
- Assessed whether the Group's accounting policies in relation to capitalisation comply with FRS 102.17 Property, Plant and Equipment;
- Tested the implementation of these policies through critically assessing the capital nature of a sample of projects against the capitalisation policy and then for a sample of cost transactions assessing whether the costs capitalised agreed to respective project purchase invoices;
- Assessed the proportion of capitalised overhead costs using historical comparisons and expected changes based on enquiry and our sector knowledge;
- Challenged and assessed the assumptions and judgements made by management in relation to cost drivers used for each cost category as well as consistency with the prior year and challenged any changes made in the
- Tested the cost allocation model and the outcome of the year-end cost review with particular emphasis on overhead capitalisation;
- Tested the integrity and mechanics of the cost allocation model to assess

the mathematical accuracy of the model; and

Assessed the appropriateness of the Company's disclosures of its capitalisation policy, including the judgement involved in assessing expenditure as capital and the judgement relating to the allocation of overhead cost.

#### **Key observations**

The results of our procedures were satisfactory and on the basis of these we concluded the classification of costs is appropriate.

# 5.2. Accuracy of Financial Instruments

### Key audit matter description

As at 31 March 2021 the company had total borrowings (fixed and variable rates) of £2,226.0 million (2020: £1,944.4 million). The company mitigates the exposure to interest rate risk, exchange rate risk and inflation risk with risk management activities including the use of complex derivatives including interest rate and RPI swaps.

Hedge accounting treatment is by its nature complex and requires the exercise of judgement by management to determine that the financial instruments can be accounted for and designated within a hedging relationship. Due to the complexity in employing hedge accounting as well as the judgements undertaken, we have identified the accuracy of financial instruments as a key audit matter.

At the year end, the company had derivative financial assets of £27.4 million (2020: £42.0 million) and derivative financial liabilities of £311.2m million (2020: £306.0 million). The treatment of derivative financial instruments and hedge accounting is disclosed in the accounting policies in Note 2 as well as in Notes 14 and 15 to the financial statements.

### How the scope of our audit responded to the key audit matter

We performed the following procedures:

- Obtained an understanding of the relevant controls related to the hedging of financial instruments process;
- Tested all aspects of the accounting for financial instruments, including the documentation of the hedge effectiveness testing performed as well as the ongoing treatment followed for all derivative instruments;
- Worked with internal financial instruments specialists to challenge the appropriateness of the hedge documentation, eligibility of designations and challenge of the hedge effectiveness testing; and
- For new swaps and hedges implemented in the year, we tested documentation to confirm the instruments have been accounted for appropriately.

### **Key observations**

The results of our procedures were satisfactory and on the basis of these we conclude the accuracy of financial instruments is appropriate.

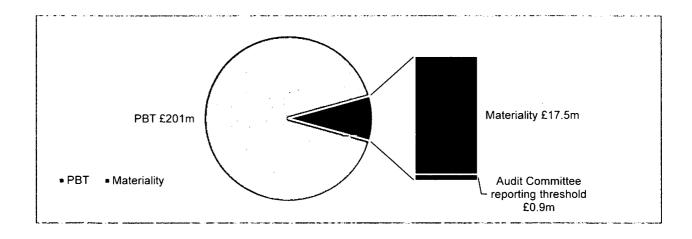

### 6. Our application of materiality

### 6.1. Materiality

We define materiality as the magnitude of misstatement in the financial statements that makes it probable that the economic decisions of a reasonably knowledgeable person would be changed or influenced. We use materiality both in planning the scope of our audit work and in evaluating the results of our work.

Based on our professional judgement, we determined materiality for the financial statements as a whole as follows:

| Materiality                       | £17.5 million (2020: £18.1 million)   |
|-----------------------------------|---|
| Basis for determining materiality | Approximately 7.5% of profit before tax (2020: 7.5% of profit before tax)   |
| Rationale for the benchmark       | As a profit-making entity, profit before tax is a key metric used by users of the financial statements.   |
| applied                           | We conducted an assessment of which line items we understand to be the most important to investors and analysts by reviewing the Company's communications to shareholders and lenders, as well as the communications of peer companies. This assessment resulted in us considering the financial statement line item above. |

### 6.2. Performance materiality

We set performance materiality at a level lower than materiality to reduce the probability that, in aggregate, uncorrected and undetected misstatements exceed the materiality for the financial statements as a whole. Performance materiality was set at 70% of materiality for the 2021 audit (2020: 70%). In determining performance materiality, we considered the following factors including, our ability to rely on internal controls across a number of areas of the audit, assessment of the Company's control environment, the impact of Covid-19 on the control environment, the stability of the business, the outcome of our risk assessment process, the low number of corrected and uncorrected misstatements identified in prior years, management's willingness to correct errors identified and the stability of the finance team.

### 6.3. Error reporting threshold

We agreed with the Audit Committee that we would report to the Committee all audit differences in excess of £0.9 million (2020: £0.9 million), as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds. We also report to the Audit Committee on disclosure matters that we identified when assessing the overall presentation of the financial statements.

#### 7. An overview of the scope of our audit

#### 7.1. Scoping

Our audit was scoped by obtaining an understanding of the company and its environment, including wider UK Power Networks Holdings group-wide controls, and assessing the risks of material misstatement at the company and group level. All the audit work is performed directly by the engagement audit team.

#### 7.2. Our consideration of the control environment

We have taken a controls reliance approach in performing our audit of the balances that have a higher volume of transactions namely:

- Cost classification for the Network Assets;
- DUoS (Distribution Use of System) revenue; and
- Operating expenses

We have taken a substantive audit approach on all other areas not mentioned above.

The wider UK Power Networks Holdings group controls environment that the company is included within contains a number of IT systems, applications and tools used to support business processes and reporting.

We performed testing of General IT Controls ("GITCs") of the accounting system, typically covering controls pertaining to user access management, change management as well as controls over key reports generated from the accounting system and it's supporting infrastructure (database and operating system).

Our procedures enable us to place reliance on IT controls pertaining to the accounting system. In the current year, we could not rely upon specific automated controls of the DUoS revenue billing system due to system changes, and instead altered the nature, timing and extent of our procedures to mitigate the risk.

### 8. Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained in the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated.

If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

#### 9. Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

#### 10. Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

### 11. Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

#### 11.1. Identifying and assessing potential risks related to irregularities

In identifying and assessing risks of material misstatement in respect of irregularities, including fraud and non-compliance with laws and regulations, we considered the following:

- the nature of the industry and sector, control environment and business performance including the design of the company's remuneration policies, key drivers for directors' remuneration, bonus levels and performance targets;
- results of our enquiries of management, internal audit, internal legal counsel and the Audit Committee about their own identification and assessment of the risks of irregularities;
- any matters we identified having obtained and reviewed the company's documentation of their policies and procedures relating to:
  - identifying, evaluating and complying with laws and regulations and whether they were aware of any instances of non-compliance;
  - detecting and responding to the risks of fraud and whether they have knowledge of any actual, suspected or alleged fraud;
  - the internal controls established to mitigate risks of fraud or non-compliance with laws and regulations;
- the matters discussed among the audit engagement team and relevant internal specialists, including financial instruments, valuations, pensions, and IT specialists regarding how and where fraud might occur in the financial statements and any potential indicators of fraud.

As a result of these procedures, we considered the opportunities and incentives that may exist within the organisation for fraud and identified the greatest potential for fraud in the Accuracy of Cost Classification. In common with all audits under ISAs (UK), we are also required to perform specific procedures to respond to the risk of management override.

We also obtained an understanding of the legal and regulatory framework that the company operates in, focusing on provisions of those laws and regulations that had a direct effect on the determination of material amounts and disclosures in the financial statements. The key laws and regulations we considered in this context included the UK Companies Act, Listing Rules, pensions legislation, and tax legislation.

In addition, we considered provisions of other laws and regulations that do not have a direct effect on the financial statements but compliance with which may be fundamental to the company's ability to operate or to avoid a material penalty. These included the company's compliance with the Ofgem licence requirements.

### 11.2. Audit response to risks identified

As a result of performing the above, we identified the Accuracy of Cost Classification as a key audit matter related to the potential risk of fraud. The key audit matters section of our report explains the matter in more detail and also describes the specific procedures we performed in response to that key audit matter.

In addition to the above, our procedures to respond to risks identified included the following:

- reviewing the financial statement disclosures and testing to supporting documentation to assess compliance with provisions of relevant laws and regulations described as having a direct effect on the financial statements;
- enquiring of management, the audit committee and in-house legal counsel concerning actual and potential litigation and claims;
- performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud;
- reading minutes of meetings of those charged with governance, reviewing internal audit reports and reviewing correspondence with HMRC; and
- in addressing the risk of fraud through management override of controls, testing the appropriateness of
  journal entries and other adjustments; assessing whether the judgements made in making accounting
  estimates are indicative of a potential bias; and evaluating the business rationale of any significant
  transactions that are unusual or outside the normal course of business.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members including internal specialists, and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

### Report on other legal and regulatory requirements

#### 12. Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and the directors' report have been prepared in accordance with applicable legal requirements.

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified any material misstatements in the strategic report or the directors' report.

### 13. Matters on which we are required to report by exception

والمراجع المناطق المراجع المرا

#### 13.1. Adequacy of explanations received and accounting records

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not received all the information and explanations we require for our audit; or
- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns.

We have nothing to report in respect of these matters.

#### 13.2. Directors' remuneration

Under the Companies Act 2006 we are also required to report if in our opinion certain disclosures of directors' remuneration have not been made.

We have nothing to report in respect of this matter.

#### 14. Other matters which we are required to address

#### 14.1. Auditor tenure

Following the recommendation of the audit committee, we were appointed by the board in 1999 and were reappointed following an audit tender in 2017 to audit the financial statements for the year ending 31 March 2018 and subsequent financial periods. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 23 years, covering the years ending 31 December 1999 to 31 March 2021.

### 14.2. Consistency of the audit report with the additional report to the Audit Committee

Our audit opinion is consistent with the additional report to the audit committee we are required to provide in accordance with ISAs (UK).

#### 15. Use of our report

Maklan Claro

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Makhan Chahal, ACA (Senior statutory auditor)

#### 1 General information

Eastern Power Networks plc (the "Company") is incorporated in the United Kingdom under the Companies Act. The Company is a private company limited by shares and is registered in England and Wales.

The principal activities of the Company and the nature of the Company's operations are set out in the Strategic Report on pages 2 to 21.

The address of its registered office is: Newington House 237 Southwark Bridge Road London SE1 6NP United Kingdom

### 2 Accounting policies

The principal accounting policies adopted by the Company are set out below. They have all been applied consistently throughout the current and prior year.

The financial statements have been prepared under the historical cost convention, modified to include certain items at fair value, and in accordance with Financial Reporting Standard 102 (FRS 102) issued by the Financial Reporting Council (FRC).

The functional currency of the Company is pounds sterling because that is the currency of the primary economic environment in which the Company operates.

Certain exemptions are allowed in the financial statements on the basis that the Company meets the definition of a "qualifying entity" under FRS 102, being:

"a member of a group where the parent of that Group (UK Power Networks Holdings Limited) prepares publicly available consolidated financial statements which are intended to give a true and fair view and the member (the Company) is included in the consolidation."

The Company has taken the exemption not to disclose related party transactions with other wholly owned members of the Group.

#### Going concern

As discussed in the Strategic Report the Directors have, at the time of approving the financial statements, a reasonable expectation that the Company has adequate resources to continue operating for the foreseeable future. Therefore they continue to adopt the going concern basis of accounting in preparing the financial statements.

#### 2 Accounting policies (continued)

### Intangible assets - IT software and development costs

IT software acquired from third parties is included at cost and amortised in equal annual instalments over an expected useful life of 4 to 8 years.

IT development expenditure is written off, except where the Directors are satisfied as to the technical, commercial and financial viability of individual projects. In such cases, the identifiable expenditure is capitalised as an intangible asset and amortised over the period during which the Company is expected to benefit. This period is between 4 to 8 years.

Provision is made for any impairment to the carrying values of intangible assets.

#### **Tangible assets**

Tangible assets are stated at cost, net of depreciation and provision for impairment. The cost of tangible assets includes directly attributable incremental costs incurred in their acquisition and installation. The carrying values of tangible fixed assets are reviewed for impairment when events or changes in circumstances indicate the carrying value may not be recoverable.

#### **Depreciation**

Depreciation is provided on all tangible fixed assets other than freehold land, at rates calculated to write off the cost of each asset on a straight-line basis over its expected useful life, as follows:

| Asset class                            | Depreciation   |
|--|----------------|
| Network overhead and underground lines | 45 to 60 years |
| Other network plant and builidings     | 20 to 60 years |
| Furniture, fixtures and equipment      | 4 to 8 years   |
| Vehicles                               | 5 to 10 years  |

Assets in the course of construction are carried at cost less any recognised impairment loss. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

Customer contributions toward the cost of network assets are credited to the balance sheet as deferred income on receipt, and amortised to revenue over the expected useful lives of the relevant assets. The Company has an ongoing obligation to maintain these assets so it is appropriate to recognise the benefit over the same period which the assets depreciate.

### **Borrowing costs capitalised**

Borrowing costs which are directly attributable to the construction of tangible fixed assets are capitalised as part of the cost of those assets. The commencement of capitalisation begins when both finance costs and expenditures for the asset are being incurred and activities that are necessary to get the asset ready for use are in progress. Capitalisation ceases when substantially all the activities that are necessary to get the asset ready for use are complete.

#### 2 Accounting policies (continued)

#### Tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly within the same component of other comprehensive income.

Current tax, including UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Unrelieved tax losses and other deferred tax assets are recognised only to the extent that, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is provided for gains on disposal of fixed assets that have been rolled over into replacement assets only where, at the balance sheet date, there is a commitment to dispose of the replacement assets with no likely subsequent rollover or available capital losses. Provision is made for gains on re-valued fixed assets only where there is a commitment to dispose of the re-valued assets and the attributable gain can neither be rolled over nor eliminated by capital losses.

Deferred tax is measured on an undiscounted basis using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date and that are expected to apply to the reversal of the timing difference.

#### **Pension**

The Company has obligations under defined benefit pension arrangements operated by the Group.

For defined benefit schemes the amounts charged to operating profit are the costs arising from employee services rendered during the period as well as the cost of plan introductions, benefit changes, settlements and curtailments. They are included as part of staff costs. The net interest cost on the net defined benefit liability is charged to profit or loss and included within finance costs. Remeasurement comprising actuarial gains and losses and the return on scheme assets (excluding amounts included in net interest on the net defined benefit liability) are recognised immediately in other comprehensive income.

The defined benefit schemes are funded, with the assets of the schemes held separately from those of the Group, in separate trustee administered funds. Formal actuarial valuations are undertaken by independent qualified actuaries at least triennially. Actuaries also provide valuations at each balance sheet date using a roll forward of member data from the most recent triennial valuation and reflecting updated financial and demographic assumptions. Pension scheme assets are measured at fair value and liabilities are measured using the projected unit method and discounted at a rate equivalent to the current rate of return on a high quality corporate bond or equivalent currency and term to the scheme liabilities.

#### 2 Accounting policies (continued)

#### **Provisions**

Provisions are recognised when the Company has an obligation at the reporting date as a result of a past event, it is probable that the Company will be required to settle that obligation and a reliable estimate can be made of its amount. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the balance sheet date, taking into account risks and uncertainties. Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

#### **Financial instruments**

The Company has elected to apply Section 11.2c of FRS 102, which allows the recognition and measurement provisions of the International Financial Reporting Standard IFRS 9 'Financial Instruments' with the disclosure and presentation requirements of Sections 11 and 12 of FRS 102.

The Group adopted the Amendments to IFRS 9 in respect of Interest Rate Benchmark Reforms ("IBOR Reforms") early, with effect from 1 April 2019. The Company is exposed to LIBOR within its hedge accounting relationships, which is subject to these reforms. The amendments provide temporary relief to allow hedge accounting to continue for affected hedges during the period of uncertainty before the hedged items or hedging instruments affected by the current interest rate benchmarks, are amended as a result of the on-going IBOR Reforms.

Financial assets and financial liabilities are initially recognised at fair value, when the Company becomes a party to the contractual provisions of the instrument. Subsequent measurement is either at amortised cost or fair value depending on the classification of the instrument.

Amortised cost is calculated as:

The amount at which the financial asset or liability is measured at initial recognition;

Less: The principal repayments;

Plus: The cumulative amortisation using the effective interest method of any difference between the intial amount and the maturity amount. The effective interest rate exactly discounts estimated future cash flows through the expected life of the instrument back to the initial carrying amount recognised. Discounting is omitted where the effect of discounting is immaterial;

Less: Any loss allowance in respect of financial assets.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is a quoted price in an active market. When quoted prices are unavailable, the price of a recent transaction for a similar asset provides evidence of fair value as long as there has not been a significant change in economic circumstances or a significant lapse of time since the transaction took place. If the market is not active and recent transactions of a similar asset on their own are not a good estimate of fair value, the fair value is estimated using a discounted cash flow approach.

### 2 Accounting policies (continued)

#### Financial assets

After initial recognition at fair value the financial assets held by the Company are subsequently measured as follows:

#### Financial asset

### Unlisted investments, trade and other receivables

Derivatives not designated as hedging instruments

Derivatives designated as hedging instruments

### Subsequent measurement

At amortised cost less impairment

- At fair value through profit or loss
- Hedge accounting at fair value

The impairment loss allowance on financial assets is calculated as the expected credit loss over the lifetime of the debt using the IFRS 9 simplified approach. The Group has established a provision matrix derived from historical credit loss experience adjusted for forward looking factors specific to the debtors and the economic environment.

Cash and cash equivalents comprise cash in hand, and demand deposits and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

### Financial liabilities and equity

#### Equity instruments

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement. An equity instrument is any contract which grants the holder a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

### Financial liabilities

After initial recognition at fair value the financial liabilities held by the Company are subsequently measured as follows:

### **Financial liability**

### Borrowings, trade and other payables

Derivatives not designated as hedging instruments

Derivatives designated as hedging instruments

#### Subsequent measurement

At amortised cost using the effective interest rate method

At fair value through profit or loss

\* Hedge accounting at fair value

Other than derivative financial liabilities there are no financial liabilities which are mandatorily required to be measured at fair value through profit or loss under IFRS 9. The Company has not elected to measure any financial liabilities at fair value through profit or loss.

<sup>\*</sup> Derivatives and hedging accounting are discussed in subsequent paragraphs.

<sup>\*</sup> Derivatives and hedging accounting are discussed in subsequent paragraphs.

#### 2 Accounting policies (continued)

#### Offsetting of financial instruments

Financial assets and liabilities are only offset in the balance sheet when there is a legally enforceable right to set off the recognised amounts and the Company intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

### **Derecognition of financial instruments**

A financial asset is derecognised when the right to receive cash flows from the asset have expired or the Company has transferred its right to receive cash flows from the asset, to a third party. A financial liability is derocognised when the Company's obligations are discharged, cancelled or expire.

#### **Derivative financial instruments**

The Company uses derivative financial instruments to reduce exposure to interest rate and inflation rate movements. The Company does not hold or issue derivative financial instruments for speculative purposes. Interest rate and cross currency swaps are entered into for the purpose of managing the interest rate and currency risk associated with the borrowing requirements of the Company. Inflation linked swaps are used to economically hedge the exposure of the Company's regulated revenues to movements in inflation. Amounts payable or receivable in respect of the swap instruments are recognised within net finance costs in the profit and loss account.

Derivatives are initially recognised at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each balance sheet date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. The Company designates certain derivatives as either hedges of the fair value of recognised assets or liabilities or firm commitments (fair value hedges) or hedges of highly probable forecast transactions (cash flow hedges). This accounting treatment is discussed below under hedge accounting.

A derivative with a positive fair value is recognised as a financial asset and a derivative with a negative fair value is recognised as a financial liability. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and it is not expected to be realised or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

#### **Hedge accounting**

The Company designates certain derivatives as hedging instruments within cash flow hedge and fair value hedge relationships. At the inception of the hedge relationship, the Company formally designates and documents the hedge relationship. The documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the Company will assess whether the hedging relationship meets the hedge effectiveness requirements (including the analysis of sources of hedge ineffectiveness and how the hedge ratio is determined).

#### 2 Accounting policies (continued)

#### Hedge accounting continued

A hedging relationship qualifies for hedge accounting if it meets all of the following effectiveness requirements:

- There is "an economic relationship" between the hedged item and the hedging instrument;
- The effect of credit risk does not "dominate the value changes" that result from that economic relationship; and
- The hedge ratio of the hedging relationship is the same as that resulting from the quantity of the hedged item that the Company actually hedges and the quantity of the hedging instrument that the Company actually used to hedge that quantity of hedged item.

Note 15 sets out details of the fair values of the derivative instruments used for hedging purposes.

#### Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss. Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods in which the hedged item affects profit or loss or when the hedging relationship ends.

Hedge accounting is discontinued when the Company revokes the hedging relationship, the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. Any gain or loss accumulated in equity at that time is reclassified to profit or loss when the hedged item is recognised in profit or loss. When a forecast transaction is no longer expected to occur, any gain or loss that was recognised in other comprehensive income is reclassified immediately to profit or loss.

#### Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in fair value of the hedged item attributable to the hedged risk are recognised in the line related to the hedged item in profit or loss. Hedge accounting is discontinued when the Company revokes the hedging relationship, the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item is then amortised to profit or loss over the remaining term of the hedged item.

#### 3 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in note 2, the Directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The following paragraphs consider the critical judgements and key sources of estimation uncertainty that may have a significant effect on the amounts recognised in the financial statements.

### Critical judgements in applying the Company's accounting policies

Carrying value of property, plant and equipment

Tangible fixed assets as disclosed in note 10 represent over 75% of the Company's total asset base. The carrying value of the Network asset of £5,266.9m (2020: £5,062.0m) is impacted by management's judgement in the following areas:

- the classification of activities undertaken on the electricity network as either repair and maintenance to be expensed or improvements to be capitalised; and
- the allocation of operational overheads and non-operational support costs to capital using a range of cost drivers.

The nature of costs to be included for capitalisation is a key judgement within the Network asset carrying value and is based on an analysis of the activities directly attributable to capital work.

#### Key sources of estimation uncertainty

Valuation of defined benefit obligation

The defined benefit obligation is estimated by calculating the net present value of future cash flows from the pension schemes projected many years into the future. Assumptions of future inflation rates, life expectancy, the rate of salary and pension increases are set with reference to market and economic conditions in consultation with an independent qualified actuary. The assumptions are reviewed on an ongoing basis to reflect market and demographic changes and the actual experience of the pension schemes.

Estimated future cash flows are discounted at a rate set by reference to market yields on high quality corporate bonds. Advice is taken from the actuary to determine a discount rate which falls within the norms of wider market practice.

### 3 Critical accounting judgements and key sources of estimation uncertainty (continued)

### Key sources of estimation uncertainty continued

Details of the defined benefit schemes and the assumptions used to estimate the defined benefit obligation are set out in note 19. The sensitivity analysis below indicates how changes in the significant assumptions might affect the amount of pension obligations recognised at 31 March 2021.

|                          | Change in assumption | Impact o        | on scheme liabilities |
|--------------------------|----------------------|-----------------|-----------------------|
|                          |                      | UKPN Grp        | UKPNPS                |
|                          |                      | 2021            | 2021                  |
|                          |                      | £m              | £m                    |
| Discount rate            | +/- 0.50%            | -7.0% to 8.2%   | -13.9% to 16.9%       |
| RPI inflation            | +/- 0.50%            | 7.2% to -6.3%   | 12.9% to -11.5%       |
| Life expectancy          | +/- 3 years          | 16.4% to -16.3% | 10.7% to -10.5%       |
| Rate of salary increases | +/- 0.50%            | 0.6% to -0.6%   | 4.1% to -3.7%         |

At 31 March 2021 the Company's share of scheme liabilities was valued at £729.0m (2020: £617.0m) for the UKPN Group scheme and £229.9m (2020: £153.8m) for the UKPNPS Scheme, in accordance with FRS 102 (as disclosed in note 19).

### 4 Turnover

Turnover for the year ended 31 March 2021 was £670.0m (2020: £652.1m), stated net of value added tax, arising entirely in the United Kingdom and attributable to the continuing activity of electricity distribution and the invoice value of other goods and services provided. This includes an estimate of the sales value of units distributed to customers between the date of the last meter reading and the year end. It also includes the annual impact of contributions from customers towards the cost of connections to the network. This income is initially deferred to the balance sheet and then amortised to turnover over the expected useful lives of the related network assets. During the year this amounted to £44.4m (2020: £42.0m).

### 5 Operating profit

Arrived at after charging:

|  | 2021  | 2020  |
|--|-------|-------|
|  | £m    | £m    |
| Depreciation of tangible fixed assets                      | 144.6 | 138.6 |
| Amortisation of intangible assets                          | 14.7  | 13.8  |
| Operating lease rentals - land and buildings               | 0.5   | 0.5   |
| (Profit)/loss on disposal of property, plant and equipment | (0.2) | 0.2   |

#### **Auditor's remuneration**

The amount payable to Deloitte LLP was £72,800 (2020: £57,500) in respect of audit services and £50,100 (2020: £47,500) in respect of non-audit services. The non-audit services are audit related assurance services which include agreed upon procedures performed on behalf of the Regulator and the review of the half year accounts.

### Staff costs

The Company had no employees in either the current or prior year.

#### 6 Directors' remuneration

In 2014 the Company appointed two "Sufficiently Independent Directors" (SIDs) to comply with licence requirements. Their total remuneration for the year in return for service on the Boards of the Group's three distribution companies was as follows:

#### **Directors' remuneration**

|                                       | 2021<br>£ | 2020<br>£ |
|---------------------------------------|-----------|-----------|
| Emoluments                            | 100,000   | 92,500    |
| Remuneration of highest paid director |           |           |
|                                       | 2021<br>£ | 2020<br>£ |
| Emoluments                            | 50,000    | 46,250    |

The directors' fees presented above are paid by UK Power Networks (Operations) Limited and recharged to the distribution companies, including the Company, using the same apportionment as for other central costs. The other directors of the Board did not receive any remuneration for services to the Company in the current or prior year.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2021

### 7 Finance costs (net)

|  |         |        |

# Capitalised interest

Finance costs have been capitalised to tangible fixed assets on the basis of a capitalisation rate of 3.9% (2020: 4.3%), which is the weighted average of interest rates applicable to the Company's general borrowings during the year. The cumulative amount of interest capitalised within the cost of tangible fixed assets amounts to £46.7m (2020: £44.9m).

| Deferred taxation                                     |             |             |
| Origination and reversal of timing differences        | (0.7)       | 13.0        |
| Adjustments in respect of prior years                 | 4.4         | (3.2)       |
| Effect of increase in tax rate on opening liability 1 |             | 21.0        |
| Total deferred taxation                               | 3.7         | 30.8        |
| Total tax charge                                      | 37.1        | 75.6        |

The total tax assessed for the year was lower (2020: higher) than the standard rate of 19% (2020: 19%) applied to profit before tax. The differences are reconciled below:

|   | 2021<br>£ m | 2020<br>£ m |
|---|-------------|-------------|
| Profit before tax                                     | 201.1       | 282.7       |
| Corporation tax at standard rate                      | 38.2        | 53.7        |
| Deferred tax expense relating to changes in tax rates | •           | 21.0        |
| Adjustments to current tax in respect of prior years  | (5.5)       | 4.1         |
| Adjustments to deferred tax in respect of prior years | 4.4         | (3.2)       |
| Total tax charge                                      | 37.1        | 75.6        |

 $<sup>^{1}</sup>$  In the prior year the deferred tax rate increased from 17% to 19%, increasing the tax charge by £21.0m.

## 8 Taxation (continued)

### Tax rate changes

The current tax rate applied during the year was 19% (2020: 19%) and deferred tax was calculated at 19% (2020: 19%) based on the standard rate of corporation tax substantively enacted at the reporting date.

Within the Finance Bill 2021 published on 11 March 2021, the standard rate of corporation tax is set to increase from 19% to 25% with effect from 1 April 2023. This rate increase was not yet substantively enacted at the reporting date 31 March 2021 and therefore has no effect on these financial statements. The enactment took place in the third reading of the Finance Bill 2021 on 24 May 2021 and as such is a non-adjusting post balance sheet event. Remeasuring the 31 March 2021 deferred tax liability at the new rate of 25% will result in a charge of £64.4m to the profit and loss account in the next financial year ended 31 March 2022.

### 9 Intangible assets

Network assets include land with a book value of £25.2m (2020: £24.8m) and assets in the course of construction of £49.3m (2020: £41.8m). Approximately £9.8m of the prior year assets under construction were completed during the current year (2020: £16.4m).

Non-network land and buildings comprises freehold buildings only.

The cost of connecting customers to the network is included within network assets above. Capital contributions received from customers as payment for connections work are credited to the balance sheet as deferred income and released to profit or loss over the expected useful life of the related assets. During the year income of £44.4m (2020: £42.0m) was recognised within turnover in respect of customer contributions.

Amounts owed to Group undertakings are interest free trade balances which are repayable on demand.

Deferred income falling due after one year comprises contributions received from customers as payment for connections work, the cost of which is capitalised to network assets. This income is released to turnover over the expected useful lives of the related network assets. Deferred income falling due within one year includes £46.9m (2020: £44.7m) relating to customer contributions, expected to be released to turnover within one year.

| £40m 0.25% Index Linked Bond due February 2025     | 45.8        | 45.3        |
| £35m 0.032% Index Linked Bond due October 2025     | 40.4        | 39.9        |
| £132.3m 8.5% Bond due March 2025                   | 132.0       | 131.9       |
| £250m 2.125% Bond due November 2033                | 247.4       | 247.2       |
| £300m 1.875% Bond due June 2035                    | 297.7       | -           |
| £350m 6.25% Bond due November 2036                 | 345.9       | 345.7       |
| £33.8m 1.035% JPY Bond due July 2038               | 33.6        | 33.6        |
| Exchange (gain)/loss adjustment on JPY bond        | (1.0)       | 3.6         |
| Adjustments for fair value hedge relationships     | 46.6        | 60.0        |
|  | 1,825.7     | 1,944.4     |
|  | 2,226.0     | 1,944.4     |

Borrowings are stated net of unamortised issue costs of £9.7m (2020: £8.1m) and include an unamortised net premium of £0.3m (2020: £0.8m) on the 4.75% bond and accretion of £18.8m (2020: £17.1m) on the index linked instruments. These balances together with the interest expense are allocated to the profit and loss account over the term of the debt.

The cumulative adjustment to the carrying amount of the bonds, arising from fair value hedge relationships with interest rate swaps, amounts to £46.6m (2020: £60.0m). This is presented on a separate line in the table above. The movement during the year comprises a fair value gain of £7.2m (2020: gain of £4.3m) relating to existing fair value hedge relationships and an amortisation adjustment of £6.2m (2020: £5.2m) relating to discontinued hedge relationships. The fair value adjustment amortises to profit or loss from the date of cessation of the fair value hedge until the maturity of the previously hedged debt.

### 13 Borrowings (continued)

In June 2020 the Company raised additional finance through the issue of a £300m sterling bond which carries interest at 1.875% and matures in 2035.

No security has been given over the assets of the Company in respect of the Company's borrowings.

### **Borrowing facilities**

The Company has access to an undrawn credit facility of £210.0m until March 2024 with the option to extend to 2026.

#### 14 Financial instruments

The carrying values of the Company's financial assets are summarised by category below:

| Financial assets   | Note | 2021<br>£ m | 2020<br>£ m |
|--|------|-------------|-------------|
| Measured at fair value and designated in an effective hedge relationship |      |             |             |
| Derivative financial assets  | 15   | 27.4        | 42.0        |
| Measured at amortised cost   |      |             |             |
| Loans receivable from Group undertakings                                 | 11   | 282.5       | 175.5       |
| Trade and other debtors, excluding prepayments and accrued income        | 11   | 79.7        | 77.3        |
|  |      | 389.6       | 294.8       |

### 14 Financial instruments (continued)

The carrying values of the Company's financial liabilities are summarised by category below:

|   |    | 2021<br>£m | 2020<br>£m |
|---|----|------------|------------|
| Financial liabilities   |    | <b></b>    |            |

|  | (311.2)          | (306.0)          |
|  | (283.8)          | (264.0)          |

Interest rate swaps and cross currency swaps are used to manage the interest rate risk and exchange rate risk on the Company's borrowings. Index linked swaps are used to partially hedge the RPI exposure on the Company's regulated income.

Under interest rate swap contracts, the Company agrees to exchange the difference between fixed and floating rate interest calculated on agreed notional principal amounts. A cross currency swap contract exchanges JPY amounts due on JPY denominated bond, with sterling values. Index linked contracts convert floating or fixed interest rates to RPI inflation linked rates.

The fair value of the swap instruments at the reporting date is determined by discounting the future cash flows implicit in the swaps. The discount rate is derived from forward interest rate and RPI curves adjusted for the Company's own credit risk in respect of swap liabilities and counterparty credit risk in respect of swap assets.

Interest payable and receivable on the swaps is settled on a net basis, annually or semi-annually.

### 15 Derivative financial instruments (continued)

The following tables and discussion detail the notional principal amounts, the fair values and remaining terms of swap contracts as at the reporting date.

## Fair value hedge interest rate swaps

|                                | Average contract fixed interest rate |           | Notional principal value |             | Fair value  |             |  |

| Receive fixed / pay floating   |                                      |           |                          |             |             |             |  |
| 2 to 5 years                   | 7.1%                                 | 7.1%      | 258.0                    | 312.3       | 27.4        | 42.0        |  |

The fair value hedge interest rate swaps exchange fixed rate interest for floating rate interest as a hedge against the fair value risk on part of the Company's bond debt. The floating rate payable is six month LIBOR plus a margin of between 2.1% and 4.8% with maturation dates from 2024 to 2025.

Fair value gains of £6.8m (2020: gains of £0.7m) on the swaps were recognised in profit or loss during the year and fair value gains of £7.2m (2020: gains of £4.3m) adjusted to the carrying amount of the bonds as part of the hedge relationship.

In July 2020 the Company terminated a notional value of £54.3m from its fair value hedge swap contracts realising fair value gains of £7.9m on exit.

Fair value adjustments to the bonds relating to discontinued fair value hedge relationships, amortise to profit or loss over the remaining term of the bonds. The amortisation for the year resulted in a gain of £6.2m (2020: gain of £5.2m) to profit or loss.

| 5 years plus                                     | 3.0%                                 | 3.0% | 33.8       | 33.8 | (4.7)   | (0.5) |

The Company holds a cross currency swap to hedge the exchange rate exposure on its JPY 5 billion bond. The swap is designated as an effective cash flow hedge, exchanging the JPY principal and the JPY interest payments with equivalent values in Sterling until the maturity of the bond in July 2028.

During the year gains of £2.3m (2020: losses of £2.8m) were deferred to the cash flow hedge reserve and losses of £1.8m (2020: gains of £0.8m) deferred to the cost of hedging reserve (refer to note 17 for further detail). In addition hedge ineffectiveness of £0.3m (2020: £Nil) was charged to profit or loss and costs of hedging resulted in a gain of £0.2m (2020: gain of £0.2m) to profit or loss.

| Receive floating / pay fixed + RPI |         |         |                       |       |         |         |
| 5 years plus                       | -       | -       | 150.0                 | 150.0 | (161.0) | (158.8) |
|                                    |         |         | 470.0                 | 470.0 | (306.5) | (305.5) |

The Company uses RPI linked swap contracts to convert a portion of the fixed rate bond interest payable to an inflation linked rate. Although designed as an economic hedge against the RPI exposure of the Company's regulated income, these instruments are not designated in formal hedge accounting relationships. The index linked swaps receive a combination of fixed and floating rate interest and pay RPI linked interest. Maturities range from November 2036 to December 2041.

During the year fair value gains of £42.3m (2020: gains of £31.6m) were recognised in profit or loss together with an accretion charge of £7.2m (2020: £13.0m) and interest receivable of £6.6m (2020: £9.0m),

### 17 Called up share capital and reserves

Share capital: Allotted, called up and fully paid

|   | 2021<br>£ m | 2020<br>£ m |
|---|-------------|-------------|
| 251,513,142 ordinary shares at £0.50 each | 125.8       | 125.8       |

The Company has one class of ordinary shares which carry no right to fixed income.

#### Reserves

The share premium reserve contains the premium arising on issue of equity shares, net of issue expenses. The capital redemption reserve represents the value of historical repurchases of the Company's own capital. The profit and loss account represents cumulative profits or losses, including actuarial gains and losses on remeasurement of the net defined benefit pension iability, net of dividends paid.

## **Hedging reserves**

#### Cash flow hedge reserve

The cash flow hedge reserve represents the cumulative portion of gains and losses on hedging instruments deemed effective in hedging variable interest rate risk of recognised financial instruments or foreign exchange risk in firm commitments or highly probable forecast transactions. Amounts accumulated in this reserve are reclassifed to profit or loss in the periods in which the hedged item affects profit or loss or when the hedging relationship ends.

## Cost of hedging reserve

The Company holds a cross currency swap to hedge the foreign currency risk on the JPY denominated bond, within a designated cash flow hedge relationship.

In the valuation of cross currency interest rate swaps, spreads are applied to cash flows in currencies with perceived higher credit risk or lower liquidity. These are referred to as "currency basis spreads". As they only exist in the hedging instrument (the cross currency swap), IFRS 9 (within FRS 102 11.2c) does not allow inclusion of the currency basis spreads in the valuation of the hedged item (the foreign currency risk of the bond), in the assessment of hedge effectiveness. Due to this mismatch between the hedging instrument and the hedged item, fair value changes in these currency basis spreads lead to hedge ineffectiveness.

IFRS 9 (within FRS 102 11.2c) allows for the fair value changes in the currency basis spreads to be recorded in a separate cost of hedging reserve, through other comprehensive income, to the extent those changes are aligned with the hedged item. Excluding these movements from the hedge relationship helps to increase hedge effectiveness and mitigate volatility in profit or loss.

# 17 Called up share capital and reserves (continued)

# **Hedging reserves continued**

Movements in the hedging reserves in the current and prior year are shown below net of deferred tax:

|  | Cash flow<br>hedge<br>reserve<br>£ m | Cost of<br>hedging<br>reserve<br>£ m | Hedging<br>reserves<br>£ m |

| At 31 March 2021   | (1.6)                                | (1.1)                                | (2.7)                      |

## 18 Commitments and contingencies

Through the ordinary course of business the Company is party to various litigation, claims and investigations. The Directors do not expect the ultimate resolution of any these proceedings to have a material adverse effect on the Company's results of operations, cash flows or financial position.

# **Capital commitments**

The total amount contracted for but not provided in the financial statements was £42.2m (2020: £30.9m).

## Lease commitments

Total future minimum lease payments under non-cancellable operating leases are as follows:

|                              | 2021<br>£ m | 2020<br>£ m |

#### 19 Pension commitments

### Defined benefit pension schemes

The Company contributes to two funded defined benefit pension schemes operated by the Group:

#### The UK Power Networks Group of the ESPS (the UKPN Group) scheme

This scheme is an independent section of the Electricity Supply Pension Scheme "ESPS" which was formed in 1990 following privatisation of the Electricity Industry. The UKPN Group of the ESPS has been closed to new members since 1994.

#### The UK Power Networks Pension Scheme (UKPNPS)

The UKPNPS was formed from a number of legacy arrangements with membership dating back to 1994. It has been closed to new members since 2011.

Funding levels are monitored annually and a funding schedule is formally agreed between the Group and the trustees every three years based on the most recent triennial actuarial valuation. The latest funding schedule, based on the triennial valuation as at 31 March 2019, was agreed in June 2020 and became effective from 1 January 2021. These contribution rates are considered sufficient to eliminate funding deficits over the next five years.

A valuation under FRS 102 at the balance sheet date was provided by actuaries using rolled forward member data from the 31 March 2019 triennial valuation and reflecting updated financial and demographic assumptions. The defined benefit scheme assets and liabilities are assigned to participating entities using an allocation methodology based on employment records and attribution portions agreed with the industry regulator Ofgem.

# NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2021

# 19 Pension commitments (continued)

The key financial assumptions (% per annum) used to calculate scheme liabilities under FRS102 were:

|                                      | <b>2021</b><br>% | 2020<br>% |
|--------------------------------------|------------------|-----------|
| UKPN Group key financial assumptions |                  |           |
| Discount rate                        | 2.1              | 2.6       |

| Life expectancy at 65 for female currently aged 45 | 26            | 26            |

## 19 Pension commitments (continued)

The amounts recognised in the balance sheet in respect of the defined benefit schemes are as follows:

|   | UKPN Grp | UKPNPS  | Total   | Total   |
|---|----------|---------|---------|---------|
|   | 2021     | 2021    | 2021    | 2020    |
|   | £ m      | £ m     | £ m     | £ m     |
| Fair value of scheme assets Present value of defined benefit obligation | 763.2    | 160.2   | 923.4   | 776.9   |
|   | (729.0)  | (229.9) | (958.9) | (770.8) |
| Defined benefit pension scheme surplus/(deficit)                        | 34.2     | (69.7)  | (35.5)  | 6.1     |

In respect of the UKPN Group scheme, the Directors are of the view that the surplus is recoverable on the basis that a right of refund exists under the scheme rules, assuming the gradual settlement of the liabilities over time until all the members have left the scheme. Based on this view, the surplus is presented as a non-current asset within Debtors (note 11).

Amounts recognised in the profit and loss account in respect of the defined benefit schemes were as follows:

|  | UKPN Grp<br>2021<br>£ m | UKPNPS<br>2021<br>£ m | Total<br>2021<br>£ m | Total<br>2020<br>£ m |
|--|-------------------------|-----------------------|----------------------|----------------------|
| Current service cost   | (9.6)                   | (6.7)                 | (16.3)               | (20.4)               |
| Past service cost  | (0.4)                   | -                     | (0.4)                | (0.4)                |
| Reduction in scheme liabilities due to plan amendment<br>Net interest cost | 0.9                     | -<br>(0.3)            | 0.6                  | 2.8<br>(0.7)         |
|  | (9.1)                   | (7.0)                 | (16.1)               | (18.7)               |
| Recognised in other comprehensive  | , ,                     | , ,                   |                      |                      |
| income   | (7.4)                   | (50.9)                | (58.3)               | 35.6                 |
|  | (16.5)                  | (57.9)                | (74.4)               | 16.9                 |

Of the charge for the year a net expense of £16.7m (2020: £18.0m) has been included in distribution costs and net income of £0.6m (2020: £0.7m expense) included within net finance costs.

During the prior year a plan amendment was made by the trustees of the UKPN Group scheme which permitted members to exchange inflation-linked pension payments for initially higher, but non-escalating, pension payments. This resulted in an overall reduction of £2.8m to the present value of defined benefit obligations, credited to profit or loss.

## 19 Pension commitments (continued)

Movements in the present value of defined benefit obligations in the year were as follows:

|   | UKPN Grp<br>2021<br>£ m | UKPNPS<br>2021<br>£ m | Total<br>2021<br>£ m | Total<br>2020<br>£ m |
|---|-------------------------|-----------------------|----------------------|----------------------|
| At 1 April  | (617.0)                 | (153.8)               | (770.8)              | (849.3)              |
| Current service cost                                  | (9.6)                   | (6.7)                 | (16.3)               | (20.4)               |
| Past service cost                                     | (0.4)                   | -                     | (0.4)                | (0.4)                |
| Reduction in scheme liabilities due to plan amendment |                         | -                     | •                    | 2.8                  |
| Interest cost   | (15.6)                  | (3.6)                 | (19.2)               | (19.3)               |
| Actuarial (losses)/gains                              | (117.8)                 | (64.4)                | (182.2)              | 86.7                 |
| Benefits paid   | 31.4                    | (1.4)                 | 30.0                 | 29.1                 |
| At 31 March   | (729.0)                 | (229.9)               | (958.9)              | (770.8)              |

The actuarial loss (2020: gain) includes a net transfer in of scheme liabilities amounting to £29.7m (2020: £6.9m transfer out) to align the allocation of scheme liabilities across the Group to the attribution portions agreed with Ofgem.

Movements in the fair value of scheme assets in the year were as follows:

|   | UKPN Grp<br>2021<br>£ m | UKPNPS<br>2021<br>£ m | Total<br>2021<br>£ m | Total<br>2020<br>£ m |
|---|-------------------------|-----------------------|----------------------|----------------------|
| At 1 April  | 643.8                   | 133.1                 | 776.9                | 808.4                |
| Interest income   | 16.5                    | 3.3                   | 19.8                 | 18.6                 |
| Return on plan assets (excluding amounts included in net interest cost) | 110.4                   | 13.5                  | 123.9                | (51.1)               |
| Contributions by employer   | 9.7                     | 6.0                   | 15.7                 | 14.7                 |
| Deficit repair payments   | 14.2                    | 2.9                   | 17.1                 | 15.4                 |
| Benefits (paid)/received  | (31.4)                  | 1.4                   | (30.0)               | (29.1)               |
| At 31 March   | <u>763.2</u>            | 160.2                 | 923.4                | 776.9                |

The return on plan assets (excluding amounts included in net interest cost) includes a net transfer in of scheme assets amounting to £29.6m (2020: £6.1m transfer out) to align the allocation of scheme assets across the Group to the attribution portions agreed with Ofgem.

# 19 Pension commitments (continued)

The fair value of scheme assets is analysed as follows:

|                              | UKPN Grp<br>2021<br>£ m | UKPNPS<br>2021<br>£ m | Total<br>2021<br>£ m | Total<br>2020<br>£ m |

# 21 Related party transactions

The Company has taken an exemption under FRS 102 (section 33 2.2) not to disclose transactions with other wholly owned members of the Group. The Company qualifies for this exemption on the basis that it is a wholly owned subsidiary of a parent which prepares publicly available consolidated financial statements intended to give a true and fair view of the financial position and results of the group, and the Company is included within the consolidation.

### 22 Parent and ultimate parent undertaking

The Company's immediate parent is UK Power Networks Holdings Limited, incorporated in the United Kingdom and registered in England and Wales, at the following address:

Newington House 237 Southwark Bridge Road London SE1 6NP

UK Power Networks Holdings Limited is the parent of both the smallest and largest Group in which the Company's financial statements are consolidated. Copies of the financial statements of UK Power Networks Holdings Limited may be obtained from the Company Secretary at Energy House, Carrier Business Park, Hazelwick Avenue, Three Bridges, Crawley, West Sussex, RH10 1EX.

UK Power Networks Holdings Limited is owned by a consortium comprising:

- CK Infrastructure Holdings Limited 1 (40% shareholding);
- Power Assets Holdings Limited 2 (40% shareholding); and
- Li Ka-Shing Foundation Limited <sup>2</sup> (20% shareholding) until 21 May 2021. Subsequent to that date, this share was held by CK Asset Holdings Limited <sup>3</sup> (as disclosed in note 23).

In the Directors' opinion the Company has no single controlling party as it is jointly controlled by the consortium.

### 23 Subsequent events

### Change in ownership

On 21 May 2021 the 20% share of the Group held by Li Ka-Shing Foundation Limited (as disclosed in note 22 above) was transferred to CK Asset Holdings Limited, a company incorporated in the Cayman Islands.

#### Tax rate changes

The corporation tax rate increase from 19% to 25%, with effect from 1 April 2023, was substantively enacted in the third reading of the Finance Bill 2021 on 24 May 2021. Remeasuring the 31 March 2021 deferred tax liability at the new rate of 25% will result in a charge of £64.4m to the profit and loss account in the next financial year ended 31 March 2022. The rate increase has no effect on the tax charge for the year ended 31 March 2021.
