## MANAGING DIRECTOR'S STATEMENT

### Performance

The board is pleased to report another good set of financial results. Revenue increased by 9.3 per cent to £282.4 million, reflecting allowed price increases of 8.2 per cent above inflation. Operating profit before the impact of restructuring costs increased to £152.5 million, up 19.0 per cent on last year, primarily reflecting the increase in revenue and overall decreases in operating costs.

United Utilities Electricity continued to focus on maintaining the integrity, security and safety of its electricity distribution network and outputs are in line with its five year delivery plan. During the year the business replaced or refurbished 221 kilometres of overhead lines and replaced 95 kilometres of underground cables. It also replaced or refurbished 428 switchgear units and replaced 223 transformers in the twelve month period.

Electricity supplies were available for 99.99 per cent of the time during the financial year ended 2006, sustaining the business's high level of performance in managing the network to maintain constant supplies for consumers. All the overall standards of performance set by the Gas and Electricity Markets Authority were achieved. Under the regulatory interruptions incentive scheme, United Utilities Electricity has been set network performance targets for the number and duration of customer supply interruptions. The average number of interruptions per 100 consumers per annum was 49.8\*, out-performing the regulatory target for the year of 57.2. The average number of minutes for which consumers were without supply was 47.5\*, beating the regulatory target for the year of 59.8 minutes. (Figures in this paragraph denoted by \* are unaudited by Ofgem at the date of this report).

### Stakeholders

We are committed to listening and responding to the needs of our different stakeholders: employees, customers, investors, regulators and our commercial partners. Understanding their requirements and then managing and reporting our performance is central to how we run our business. The cornerstone of this approach is our employees and I should like to thank all our employees for their continuing commitment and hard work.

### The future

United Utilities Electricity maintains its strategic focus to improve efficiency and quality of service and we are well placed to build on our current successes. We are on track to deliver continued performance improvement for all our stakeholders during the period to 2010.

Charlie Cornish  
Managing Director

## OPERATING AND FINANCIAL REVIEW

### NATURE OF THE BUSINESS

#### Business Overview

United Utilities Electricity PLC is a public limited Company registered in England and Wales. The principal activity of the Company and of United Utilities Electricity Group ("the Group") is the operation of electricity distribution assets.

United Utilities Electricity PLC is a subsidiary of United Utilities PLC. The activities of United Utilities Electricity PLC are controlled through the United Utilities North West division. This division also controls the water and wastewater assets owned by United Utilities Water PLC in north west England. Besides the operation of electricity distribution assets, United Utilities PLC Group ("the UU Group") is one of the largest operators of water and wastewater systems in the UK. The UU Group also operates a gas network and provides multi-utility metering and connections services. It is also a leading provider of outsourced business services and technology solutions.

The Group owns the distribution network which carries electricity from the National Grid along power lines to consumers' premises on behalf of the electricity supply companies who are United Utilities Electricity's customers. The income derived from the distribution business depends in part on changes in the demand for electricity by consumers in north west England. Demand for electricity is affected by such factors as growth and movements in population, social trends, economic and business growth or decline, changes in the mix of energy sources used by consumers, weather conditions, energy efficiency measures and other factors. The electricity distribution business is a regulated business in which the average increase in charges, which a Company may impose in any year, is capped by the electricity regulator (as described in more detail below). Accordingly, profit derived from the distribution business also depends upon efficiency, achieved by reducing and controlling costs, and providing high standards of service. Key performance measures for the business relate to quality of supply.

Electricity supplies were available for 99.99 per cent of the time during the financial year ended 2006, sustaining the business's high level of performance in managing the network to maintain constant supplies for consumers. All the overall standards of performance set by the Gas and Electricity Markets Authority (the 'electricity regulator') were achieved. Under the regulatory interruptions incentive scheme, United Utilities Electricity has been set network performance targets for the number and duration of customer supply interruptions. The average number of interruptions per 100 consumers per annum was 49.8\*, out-performing the regulatory target for the year of 57.2. The average number of minutes for which consumers were without supply was 47.5\*, beating the regulatory target for the year of 59.8 minutes. (Figures in this paragraph denoted by \* are unaudited by Ofgem at the date of this report).

#### Economic Regulation

The electricity industry is regulated under the Electricity Act 1989 (the 'Electricity Act'), the Utilities Act 2000 (the 'Utilities Act') and the Energy Act 2004 (the 'Energy Act') by the Gas and Electricity Markets Authority (GEMA). GEMA governs and acts through the Office of Gas and Electricity Markets ('Ofgem'). The Electricity Act, as amended by the Utilities Act, requires all companies distributing electricity to be licensed unless they are covered by an exemption. Economic regulation pursuant to these licences is the responsibility of GEMA. GEMA also exercises powers under UK competition legislation, most significantly the Competition Act 1998 and the Enterprise Act 2002.

The government awarded electricity distribution licences in 2001. The licences continue in force for an indefinite period, subject to potential termination rights as set out below. United Utilities Electricity holds an electricity distribution licence that authorises it to distribute electricity anywhere in the country. Under that licence, United Utilities distributes electricity across its distribution system covering an area in north west England comprising 2.3 million consumer premises. Licence conditions can be modified by GEMA either with the agreement of the licensee (or, in the case of standard conditions, with the agreement of the requisite proportion of licensees) or following reference to the Competition Commission for a decision on public interest grounds. The licence can be terminated on 25 years' notice given by the Secretary of State.

## OPERATING AND FINANCIAL REVIEW

GEMA regulates electricity distribution charges by capping the average charges that a Company can impose in any year. GEMA conducts a periodic review and sets price caps every five years. This price cap is set by reference to inflation as measured by the retail price index in the UK plus an adjustment factor known as 'X' which is specific to each Company and which can vary for each year of the review period. The size of a Company's X factor (which can be positive, negative or zero) reflects the scale of its capital investment programme, its cost of capital and its operational and environmental obligations, together with scope for it to improve its efficiency. The last periodic review was completed at the end of 2004 and covers the period from 1 April 2005 to 31 March 2010. For the 2005-10 review period, United Utilities Electricity was allowed a real (excluding inflation) price increase of 8.2 per cent in 2005/06 followed by constant real prices thereafter.

'Price cap' regulation in the industry is performance-based. Companies are incentivised to be efficient, both in terms of their operating costs and in the implementation of their capital expenditure programme. The benefit of any efficiency savings achieved through effective management is retained by the companies for a period of up to five years, after which time the benefit is passed to customers via the price setting process. The cost of any under-performance due to poor management is borne by the companies. An incentive scheme was introduced by GEMA in April 2002 which provided greater focus on three specific service areas: number of interruptions to customers' supplies; length of those interruptions; and quality of the telephone response to customers. GEMA consulted on its approach to the incentive scheme as part of the price control review, including the form of the scheme, targets and associated costs. It was agreed that the distribution network operators' performance in those areas would continue to be incentivised. Under the scheme, United Utilities Electricity is subject to annual rewards and penalties depending upon its performance against pre-specified targets. Both rewards and penalties under the incentive scheme are capped at 3.0 per cent of annual revenues.

### Environmental regulation

All electricity companies have a general duty under the Electricity Act to have regard to the desirability of environmental preservation and conservation and the protection of Sites of Special Scientific Interest when they formulate proposals for development. United Utilities Electricity may be required to carry out an environmental assessment when it intends to lay cables, construct overhead lines or carry out any other development in connection with its licensed activities. In response to discussions with environmental organisations in United Utilities Electricity's operating area, and with the backing of Ofgem, the Company has undertaken work to assess the cost of converting from overhead cables to underground cables in designated areas on aesthetic grounds. There is a small allowance of £5 million allowed by Ofgem for such work over the period 2005-10.

United Utilities Electricity, in common with all other UK electricity companies, owns and operates pressure-assisted high voltage cables. These cables are either filled with nitrogen gas or an insulating liquid. United Utilities operate both types, having 620km of the latter type of cable. Cables of the latter type are pressurised with a light 'oil' type fluid. In the main the fluid is biodegradable, although some older cables are pressurised with a variety of fluid that is not. The potential for loss into the environment of the fluid, due to leaks or third party damage, is recognised nationally by all electricity companies and the Environment Agency (EA). In order to mitigate the effects of any losses, United Utilities Electricity is party to a national code of practice agreement with the EA. In the last five years, the Company has worked to minimise losses into the environment and has reduced annual loss to around 25kl from a high of 48kl in 2000 – 2001. As part of the monitoring system, United Utilities Electricity has developed and implemented a new software-based management system to identify and categorise leakage allowing rapid deployment of resources to protect the environment.

The possibility that electric and magnetic fields (EMFs) may cause adverse health effects has been a topic of debate and research for many years. Over the last 20 years, major research programmes throughout the world have explored whether EMFs have an adverse impact on health. A large epidemiological study – the UK Childhood Cancer Study – reported in December 1999 that there was "no evidence that exposure to magnetic fields associated with the electricity supply in the UK increases risk for childhood leukaemia, cancers of the nervous system, or any childhood cancer". International bodies such as the World Health Organisation and the International Agency for Research on Cancer and, in the UK, the National Radiological Protection Board (NRPB) have investigated this issue and have

## OPERATING AND FINANCIAL REVIEW

concluded that there is no established causal link between EMFs and ill health. The NRPB was the body with statutory responsibility for advising on EMFs until April 2005 when it was subsumed into the Health Protection Agency (HPA), which has taken on its radiation protection functions.

In March 2001, the NRPB published a review of the state of the science and concluded "for the vast majority of children in the UK there is now considerable evidence that the EMF levels to which they are exposed do not increase the risk of leukaemia or other malignant disease". However, it also noted that the possibility remains that intense and prolonged exposure to magnetic fields can increase the risk of leukaemia in children but the epidemiological evidence is currently not strong enough to justify a firm conclusion that such fields cause leukaemia in children. In the spirit of the precautionary approach, the NRPB published in May 2003 a consultation document on how to limit exposure to EMFs and, in particular, on whether the UK should adopt the more stringent exposure guidelines of the International Commission on Non-Ionizing Radiation Protection (ICNIRP). In March 2004, the NRPB recommended that the ICNIRP guidelines should be adopted. Most recently, a report published by the Childhood Cancer Research Group (CCRG) strengthened the evidence that childhood leukaemia rates are slightly higher near power lines, but leaves the question of what causes this more confused than before, stating that: "There is no accepted biological mechanism to explain the epidemiological results; indeed, the relation may be due to chance."

The independent Advisory group on Non-ionising Radiation (AGNIR), which reports to the Board of the HPA, has issued several reports relating to EMFs, considering their possible link with an increased risk of cancer, including childhood leukaemia. AGNIR consider there to be insufficient newly published research that would, at present, justify the development of any update to the 2001 NRPB report.

United Utilities Electricity, in line with other Energy Networks Association (ENA) member companies, carries out its activities in accordance with Health Protection Agency guidance. The ENA is the trade association for electricity companies in the UK. The ENA and its member companies are committed to responsible behaviour in the light of the scientific evidence, including considering any appropriate precautionary actions. United Utilities Electricity believes that present evidence does not justify any change in the electricity industry's operating practices, or the everyday utilisation of electricity by its customers, but United Utilities Electricity keeps this under review and looks to the Health Protection Agency and UK government for advice on the issue.

## RESOURCES

### People

Good industrial relations remain a priority for United Utilities Electricity. The Group continues to recognise and work in partnership with trade unions. A statement of principles governs the approach to labour relations across the Group. 99 per cent of employees within the Group are represented by trade unions for collective bargaining purposes under the terms of a voluntary collective agreement, underpinned by the 'Together in Partnership' agreement. This Partnership is continuing to develop and is now being supported by joint training programmes, which have been very well received. The relationships with key union players are maturing and the Group has received positive feedback from the unions on the partnership approach.

United Utilities Electricity remains committed to maintaining high standards of health and safety in every area of its business. The Group's health and safety aims and objectives are integrated into the business planning processes. Progress is monitored regularly at all levels throughout the business.

The Group is committed to improving its employees' skills through training and development and nurturing a culture in which employees feel valued. The Group encourages employees to work to their full potential and respects the dignity and rights of every employee and supports them in performing various roles in society. The Group is equally committed to involving employees through open and regular communications about business developments and issues of general interest, both formally and informally.

## OPERATING AND FINANCIAL REVIEW

The Group is committed to fulfilling its obligations in accordance with the Disability Discrimination Act 1995 and best practice. The Group gives equal consideration to applicants with disabilities in its employment criteria and will modify equipment and working practices wherever it is safe and practical to do so, both for new employees and for those employees that are disabled during the course of their employment. Additionally, the Group is committed to providing full support and appropriate training for employees who become disabled during the course of their employment so that they can continue to work in a position appropriate to their experience and abilities.

### Operating facilities

As at 31 March 2006, the Group's facilities included 13,525 kilometres of overhead lines, 42,930 kilometres of underground cables (operating at 132 kilovolts, 33 kilovolts, 25 kilovolts, 11 kilovolts, 6.6 kilovolts and 400/230 volts), 18,100 ground mounted substations and 16,730 pole mounted transformers. The Group holds wayleaves which entitle it to run lines and cables through and across private land and in some circumstances these can be terminated by the landowner or occupier upon notice pursuant to the Electricity Act. However, the Group has statutory rights to seek the compulsory retention of a wayleave if termination is sought by the landowner/occupier.

In addition to the properties described above, the Group occupies various non-operational properties consisting primarily of offices, depots, warehouses and workshops. These are either owned by the Company or leased. It is anticipated that the Company will be able to negotiate renewals of any expiring leases, or relocate the relevant facilities, without having a material adverse impact on the Company.

## PRINCIPAL RISKS AND UNCERTAINTIES

The board is responsible for the Group's system of internal controls and for reviewing its effectiveness. Each year management review all controls, including financial, operational and compliance controls and risk management procedures. The internal control system is designed to manage, rather than to eliminate, the risk of failure to achieve the Group's business objectives and can only provide reasonable, and not absolute, assurance against material misstatement or loss.

The key features of the internal control system are:

- a control environment with clearly defined organisation structures operating within a framework of policies and procedures covering every aspect of the business;
- comprehensive business planning, risk assessment and financial reporting procedures; including the annual preparation of detailed operational budgets for the year ahead and projections for subsequent years;
- a bi-monthly board review of financial and non-financial performance to assess progress towards objectives;
- regular monitoring of risks and control systems throughout the year, supported by the use of risks and issues databases;
- a self-certification process, whereby management are required to confirm that the system of internal control is operating effectively;
- a UU Group internal audit function provides independent scrutiny of internal control systems and risk management procedures;
- a bi-monthly risk management forum attended by senior management at which key risks are scrutinised;
- an annual risk assessment exercise involving self-assessment by management of all business risks in terms of impact, likelihood and control strength and an objective challenge of that assessment by the internal audit team;
- health and safety performance reviews carried out by our in-house safety professionals in addition to the normal health and safety risk assessment and management processes carried out within each of the operating businesses;

## OPERATING AND FINANCIAL REVIEW

- centralised treasury operations operating within defined limits and subject to regular reporting requirements and internal audit reviews; and
- established procedures, set out in a UU Group internal control manual, for planning, approving and monitoring major capital expenditure, major projects which includes short and long-term project budgets, risk evaluation, detailed appraisal and review procedures, defined authority levels and post-investment performance reviews.

There are a number of potential risks and uncertainties that could have a material impact on the Group's long term performance.

### **Revenue of the group's regulated business is substantially influenced by the regulator, which could adversely affect profitability**

The revenue and profitability of the Group is substantially influenced by price limits established every five years by the regulator. The price review for the Group covering the five-year period commencing on 1 April 2005 was determined by the regulator in November 2004. The Group has accepted this determination and has not exercised its right to appeal adverse price determinations to the Competition Commission.

An adverse price determination may occur as a result of a number of factors, including an inadequate allowed cost of capital or unrealistic regulatory assumptions concerning operating expenses, required capital expenditure and revenue forecasts. Scope to re-open these price controls within the charging period is limited. Specific re-opening provisions have been made, with effect from 1 April 2005, in relation to uncertain costs associated with specified provisions of the Electricity Safety, Quality and Continuity Regulations 2002 (or amending / replacement regulations), the New Roads and Street Works Act 1991 and the Traffic Management Act 2004.

### **Failure to deliver the capital investment programmes**

The Group requires significant capital expenditure for additions to, or replacement of, plant and equipment for its facilities and networks. The price limits set by Ofgem take into account the level of capital expenditure expected to be incurred during the relevant five-year price review period and the associated funding costs. Historically, the Group has financed the expenditures from cash flows from operations and from debt financing. There can be no assurance that cash flows from operations will not decline, or that additional debt financing or other sources of capital will be available to meet these requirements.

### **Failure to deliver operational performance or cost savings implicit in the regulatory review**

Operating cost savings to be achieved during the current five-year regulatory period are implicit in the regulatory review. To assist the achievement of these operating cost savings a business change programme is underway. If the operating cost savings are not achieved, or the business change programme is not delivered, then the Group's profitability would suffer. Similarly, if operational performance were to deteriorate, this may be reflected by less favourable outcomes from future price reviews and the Group's profitability would suffer.

### **Environmental regulations could increase the Group's costs**

Various government environmental protection and health and safety laws and regulations govern the electricity distribution business. These laws and regulations establish, amongst other things, standards for quality of electricity supply, which affect the Group's operations. In addition, the Group is required to obtain various environmental permissions from regulatory agencies for its operations. The Group endeavours to comply with all regulatory standards. Should the Group fail to comply, it would face fines imposed by the courts or otherwise face sanction by the regulators.

## OPERATING AND FINANCIAL REVIEW

### Service interruptions

In addition to the capital investment programmes, the Group controls and operates the electricity distribution network and undertakes maintenance of the associated assets with the objective of providing a continuous service. Historically, there have been interruptions to the supply of services, such as the incident in January 2005 affecting Cumbria and Lancashire, when a storm severely damaged the electricity network supply to 250,000 customers, but the majority of interruptions relate to minor issues that are rectified promptly. However, the failure of a key asset could cause a more significant interruption to the supply of services (in terms of duration or number of customers affected), which may have an adverse effect on the Group's operating results or financial position.

### Pension scheme obligations may require the Group to make additional contributions to the schemes

The Group participates in a number of pension schemes. The schemes are funded defined benefit schemes and the assets of the schemes are held in trust funds independent of Group finances. These schemes are controlled on a United Utilities PLC Group level. The Group increased pension contribution rates to the United Utilities Pension Scheme and the United Utilities Group of the Electricity Supply Pension Scheme in 2003/04 and the results of the full actuarial valuation resulted in further increases being required to the United Utilities Pension Scheme and the United Utilities Group of the Electricity Supply Pension Scheme from 1 April 2005. A one-off lump sum contribution of £79.6 million was made by the Group on 31 March 2005. This contribution was calculated to equal the value of the Group's funding obligations to the schemes for the next five years (based on the actuarial valuation as at 31 March 2004) and represents advance payment of certain employer contributions which would have been made to the schemes during that period. As a consequence the Group's proportion of the schemes were estimated to have a combined pre-tax obligation of £1.8 million as at 31 March 2006, compared to a pre-tax obligation of £35.0 million at 31 March 2005. However, the Group continues to monitor the funding of the schemes and cannot guarantee that during the next five years further contributions will not be required to eliminate continuing shortfalls in the schemes. This may adversely affect the financial position of the Group. Should long-term investment returns remain lower than the rate assumed by the actuaries in their pension scheme valuations, or interest rates reduce further leading to an increased deficit, the profitability of the Group may be further adversely affected and the Group required to increase its contributions to eliminate this under-funding. Currently, anticipated future pensions contributions and a proportion of existing pension scheme deficits are recoverable through the price limits established by Ofgem.

### Operating risk

Managing the Group's businesses is dependent upon the ability to process a large number of transactions efficiently and accurately. Operational risk and losses can result from fraud, employee errors, failure to properly document transactions or to obtain proper internal authorisation, failure to comply with regulatory requirements and business principles, resource shortages, equipment failures, natural disasters or the failure of external systems. Although the Group has implemented risk controls and loss mitigation actions, and substantial resources are devoted to developing efficient procedures and to staff training, it is only possible to be reasonably, but not absolutely, certain that such procedures will be effective in controlling each of the operational risks faced by the Group.

## LONG TERM STRATEGY, BUSINESS OBJECTIVES AND PERFORMANCE

United Utilities Electricity PLC's strategy is to outperform its regulatory contract (effective April 2005) pursuant to which the Company operates the electricity distribution network.

The key objectives of United Utilities Electricity are to:

- deliver improved customer service through more efficient processes, systems and higher first time resolution;
- deliver sustainable operating and capital expenditure efficiencies; and
- enable its people to achieve their full potential.

## OPERATING AND FINANCIAL REVIEW

Good progress has already been made in meeting the efficiency challenges set by Ofgem. Successful delivery of the capital investment programme is vital and the partnership framework approach that has been developed will help to optimise the Company's performance. The current strategy is to target customer service and operational performance improvement. Overall the Company's progress means that it has a strong platform from which to develop.

Our progress on our strategic objectives is monitored by the Board of Directors by reference to key performance indicators. Performance in 2005/06 against these measures is set out in the table below, together with the prior year performance data.

## Key performance indicators

	2006	2005
<i>Financial</i>		
	£282.4m	£258.4m
Operating profit before restructuring credit of £ 0.6m		
(2005: cost £8.7m)	£152.5m	£128.2m
Profit before tax	£103.0m	£82.1m
Gearing <sup>(1)</sup>	47%	63%
Interest cover <sup>(2)</sup>	3.3 times	3.4 times
Capital expenditure	£142.0m	£150.8m
<i>Non-financial</i>		
Average minutes for which customers were without supply <sup>(3)</sup>	47.5	51.5
Customer interruptions per 100 customers <sup>(4)</sup>	49.8	47.0
Electricity supply availability	99.99%	99.99%

<sup>(1)</sup> Gearing is measured as borrowings net of cash and short-term deposits divided by total capital employed. Total capital employed is shareholders' equity plus borrowings net of cash and short-term deposits.

<sup>(2)</sup> Interest cover is the number of times the net finance expense before the impact of IAS 39 is covered by operating profit from continuing operations before restructuring costs and the impact of IAS 39.

<sup>(3)</sup> The minutes of supply lost per customer is an Ofgem measure calculated by taking the sum of the customer minutes lost for all restoration stages for all incidents and dividing by the number of connected customers as at 30 September each year. The 2006 figure is still to be audited by Ofgem. The 2005 figure excludes an exceptional storm experienced in January 2005.

<sup>(4)</sup> 2006 figure is unaudited by Ofgem at the date of this report.

## OPERATING AND FINANCIAL REVIEW

### Financial Review

Revenue increased by 9.3 per cent to £282.4 million in 2005/06, largely due to an allowed real price increase of 8.2 per cent in the year. Operating profit (excluding the impact of exceptional restructuring costs in 2004/05) increased by 19.0 per cent to £152.5 million in 2005/06, primarily reflecting the increase in revenue and overall reductions in operating costs. Capital investment for the year was £142.0 million (2004/05: £150.8 million). This is within the regulatory allowance for the year and reflects the re-phasing of expenditure from the first year of the capital programmes to future years. Capital expenditure is likely to peak at around £150.0 million in the fourth year of the five-year programme.

The most significant transaction undertaken by the Company with its shareholder was an equity injection of £160.0 million on 22 March 2006 (generated via the second stage of a rights issue by United Utilities PLC that raised a total of £508 million in the period).

### Dividend and dividend policy

Following the introduction of 'IAS10 – Events after the Balance Sheet Date', the Company no longer recognises a proposed final dividend in its current year figures (see note 1(a)). In 2005/06, United Utilities Electricity dividends recognised in the period were £50.8 million. This figure represents a dividend payment relating to the financial year 2004/05 of £39.1 million, and an interim payment in 2005/06 of £11.7 million.

The Company's dividend policy is to distribute the theoretical maximum consistent with the 5 year regulatory contract. The earnings available for distribution comprise the return on equity assumed by the regulatory contract plus or minus any out-performance or under-performance over the period of the contract. Annual distributions are based on this policy.

### Business Performance

United Utilities Electricity continued to focus on maintaining the integrity, security and safety of its electricity distribution network and outputs are in line with its five-year delivery plan. During the year, the business replaced or refurbished 221 km of overhead lines and replaced 95 km of underground cables. It also replaced or refurbished 428 switchgear units and replaced 223 transformers in the 12 month period.

### Business Impacts

To ensure that higher levels of performance continue to be achieved following the acceptance of Ofgem final price determinations in December 2004, initiatives have been put in place to improve efficiency and reduce cost:

- there has been increased focus on work planning, scheduling and field force productivity, and a new mobile communications system has been implemented; and
- a number of transformation initiatives have been developed, which are primarily focused around implementing a range of business process changes to improve the way the business operates; and
- the Group is continuing to increase its focus on service and performance levels, and new programmes and initiatives are being introduced to link remuneration and performance for all staff; and
- additionally, UU Group has a number of initiatives in place to leverage its increasing size and achieve additional efficiencies, particularly in the area of procurement.

The capital investment partnership framework approach is now embedded into the business. A range of integrated work teams have been set up to help reduce project management costs. A new project and investment management system to support delivery of the capital programmes is now up and running and benefits have also been realised through relocation of activities, shared systems and greater collaboration through the supply chain.

## OPERATING AND FINANCIAL REVIEW

### CAPITAL STRUCTURE

#### *Liquidity and resources*

The Group's primary source of liquidity is cash generated from its ongoing business operations. As reflected in the cashflow statement on page 24, in the financial year ended 31 March 2006, net cash generated from the Group's operating activities was £64.4 million, compared with £90.0 million in 2004/05. The electricity regulator has established price increase limits to 2010 which will provide certainty for a large majority of the Group's revenues from ongoing operations, providing both a stable and a predictable source of funds.

#### *Treasury policy*

United Utilities PLC's treasury function operates with the delegated authority of, and under policies approved by, the United Utilities Electricity PLC board. The treasury function does not act as a profit centre and does not undertake any speculative trading activity. It seeks to ensure that sufficient funding is available to meet foreseeable needs and maintains reasonable headroom for contingencies. Long term borrowings are structured or hedged to match earnings, which are largely in sterling, indexed to inflation and subject to regulatory price reviews every five years. Exposure to interest rate movements for the following 12 months is largely eliminated at the start of each financial year using short-term hedges. The credit quality of counterparties and individual aggregate exposures are reviewed annually.

#### *Debt financing*

Moody's Investor Service rates the credit of United Utilities Electricity PLC as A2 on a long-term basis with a stable outlook and P-1 on a short-term basis. Equivalent ratings published by Standard and Poor's Rating Services are A-long-term with a stable outlook and A-2 short-term. The Group's borrowings net of cash and short-term deposits of £521.6 million at 31 March 2006 comprised £553.8 million of bonds, £90.1 million of loans from the European Investment Bank (EIB – the Group's largest debt investor), £6.6 million of bank loans and other borrowings and £8.1 million of bank overdrafts offset by £137.0 million of cash and short-term deposits.

#### *Shorter-term liquidity*

Short-term liquidity requirements are met from the Group's normal operating cashflow. Further liquidity is provided by cash and short-term deposit balances, the Group's US\$1.5 billion euro commercial paper programme, supported by committed bank facilities and committed but undrawn long-term credit facilities. Cash and short-term deposit balances were £137.0 million at 31 March 2006, compared with £ nil at 31 March 2005.

Bank overdrafts and temporary borrowings, which are repayable in less than one year, were £14.7 million at 31 March 2006, compared with £6.3 million at 31 March 2005. The weighted average rate of interest on bank overdrafts was 5.50 per cent (2004/05: 5.75 per cent). The Group had available unutilised committed bank facilities of £75.0 million (2004/05: £75.0 million), of which £30 million expires within one year (2004/05: £25.0 million), £20.0 million expires after one year but in less than two years (2004/05: £30.0 million), and the remaining £25.0 million expires in more than two years (2004/05: £20.0 million). Although unutilised during the financial year ended 31 March 2006, the US\$1.5 billion euro commercial paper programme still provides for the periodic issuance of notes by United Utilities Electricity. United Utilities Electricity has entered into £75.0 million of credit facilities, as noted above, used primarily as support for the US\$1.5 billion euro commercial paper programme.

#### *Longer-term liquidity*

The Group has effective access to the international debt capital markets through its €5 billion medium-term note programme which provides for the periodic issuance by United Utilities Electricity of debt instruments on terms and conditions determined at the time that the instruments are issued. This programme does not represent a funding commitment, with funding only becoming committed when debt securities have been successfully issued. The currencies in which borrowings are held are disclosed in note 17 to the financial statements.

## OPERATING AND FINANCIAL REVIEW

The Group arranged £25.0 million of new five-year medium-term committed bank facilities. The Group's term loans were £643.9 million at 31 March 2006, compared with £629.1 million at 31 March 2005. Amounts repayable after more than five years comprise bank and other loans repayable between 2011 and 2053. Fixed interest rates, for amounts after more than five years, are at 8.875 per cent on £553.8 million (2004/05: £539.1 million) and are at floating rates on £90.1 million (2004/05: £90.0 million) of these loans.

### *Interest rate and foreign currency management*

The Group manages interest rate exposure by seeking to match financing costs as closely as possible with the revenues generated by its assets. The Group uses a combination of interest rate swaps, futures and funding instruments to hedge exposure to interest rate volatility. The Group's use of derivative instruments relates directly to underlying indebtedness; no speculative or trading transactions are undertaken. The proportion of borrowings at effective fixed rates of interest for a period greater than one year is set in conjunction with the level of floating rate borrowings and projected regulatory revenues that are exposed to inflationary adjustments (index linked). In addition, the Group aims to manage its short-term budgetary commitments by ensuring that the majority of floating rate interest is fixed for periods of less than one year through the use of exchange traded financial futures. The Group has limited exposure to foreign currency exchange rate movements. Interest rate management and funding policies are set by the board.

In order to hedge the interest cost implicit in the regulatory contract, the Group fixes interest rates for the duration of each five-year review period by typically swapping fixed rate debt to floating at the time of issue and then swapping back to fixed rate at the outset of each five-year regulatory contract period. IAS 39 'Financial Instruments: Recognition and Measurement' limits the use of hedge accounting, thereby increasing the potential volatility of the income statement. However, this has no cash flow impact and the effect of IAS 39 should broadly balance out over the 2005-10 period.

### *Summary*

The board has reviewed the business plan and considers that the Group has sufficient liquidity to meet the anticipated financial commitments for the next 12 months. In total, at 31 March 2006, unutilised committed facilities of £45.0 million expiring in more than one year, together with cash and short-term deposits of £137.0 million provide substantial pre-funding for the Group.

## ACCOUNTING ISSUES

### **International Financial Reporting Standards**

The financial statements for the year ended 31 March 2006 have been prepared in accordance with International Financial Reporting Standards (IFRS). These results, and prior period comparisons, are consistent with IFRS, with the exception of IAS 39 which has been applied prospectively from 1 April 2005. Reconciliation between IFRS and UK accounting standards is provided in note 28 of the financial statements.

## CRITICAL ACCOUNTING POLICIES

The Group prepares its consolidated financial statements in accordance with accounting principles consistent with IFRS as adopted for use in the European Union (EU) including International Accounting Standards (IAS) and interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC). As such, the Group is required to make certain estimates, judgements and assumptions that it believes are reasonable based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented.

## OPERATING AND FINANCIAL REVIEW

On an ongoing basis, the Group evaluates its estimates using historical experience, consultation with experts and other methods considered reasonable in the particular circumstances. Actual results may differ significantly from the estimates, the effect of which is recognised in the period in which the facts that give rise to the revision become known.

The Group's accounting policies are detailed in the consolidated financial statements. The following paragraphs detail the policies the Group believes to have the most significant impact on the annual results under IFRS.

### Carrying value of long-lived assets

The Group's accounting policy for property, plant and equipment (PPE) is detailed in the accounting policies section of the consolidated financial statements. The carrying value of PPE under IFRS as at 31 March 2006 was £1,713.7 million. Additions to PPE totalled £141.2 million and the depreciation charge was £52.5 million in the year ended 31 March 2006. The estimated useful economic lives of PPE are based on management's judgement and experience. When management identifies that actual useful lives differ materially from the estimates used to calculate depreciation, that charge is adjusted prospectively. Due to the significance of PPE investment to the Group, variations between actual and estimated useful lives could impact operating results both positively and negatively, although historically, few changes to estimated useful lives have been required.

In accordance with IFRS, the Group is required to evaluate the carrying values of PPE for impairment whenever circumstances indicate in management's judgement, that the carrying value of such assets may not be recoverable. An impairment review requires management to make subjective judgements concerning the cashflows, growth rates and discount rates of the cash-generating units under review.

### Revenue recognition

Under IFRS, the Group recognises revenue generally at the time of delivery and when collection of the resulting receivable is reasonably assured. Should management consider that the criteria for revenue recognition are not met for a transaction, revenue recognition would be delayed until such time as the transaction becomes fully earned. Payments received in advance of revenue recognition are recorded as deferred revenue. The Group raises bills and recognises revenue in accordance with its entitlement to receive revenue in line with the limits established by the periodic regulatory price review processes. The customers of the business are the electricity supply companies that utilise United Utilities Electricity's distribution network to distribute electricity from generators to the end consumer. The receivable billed is dependent upon the volume of electricity distributed, including estimates of the units distributed to customers. The estimated usage is based on historic data, judgement and assumptions. Operating revenues are gradually adjusted to reflect actual usage in the period over which the meters are read.

### Accounting for provisions and contingencies

The Group is subject to a number of claims incidental to the normal conduct of its business, relating to and including commercial, contractual and employment matters, which are handled and defended in the ordinary course of business. The Group routinely assesses the likelihood of any adverse judgements or outcomes to these matters as well as ranges of probable and reasonably estimated losses. Reasonable estimates involve judgements made by management after considering information including notifications, settlements, estimates performed by independent parties and legal counsel, available facts, identification of other potentially responsible parties and their ability to contribute and prior experience. In accordance with IFRS, a provision is recognised when it is probable that an obligation exists for which a reliable estimate can be made of the obligation after careful analysis of the individual matter. The required provision may change in the future due to new developments and as additional information becomes available. Matters that either are possible obligations or do not meet the recognition criteria for a provision are disclosed, unless the possibility of transferring economic benefits is remote.

## OPERATING AND FINANCIAL REVIEW

### Retirement benefits

United Utilities Group PLC operates two defined benefit schemes, one of which has a defined contribution section, which are independent of the Group's finances. Actuarial valuations of the schemes are carried out as determined by the trustees at intervals of not more than three years. Under IFRS, the pension cost under IAS 19 is assessed in accordance with the advice of a firm of actuaries based on the latest actuarial valuation and assumptions determined by the actuary. The assumptions are based on information supplied to the actuary by the Company, supplemented by discussions between the actuary and management. The assumptions are disclosed in note 20 of the financial statements. The operating results are affected by the actuarial assumptions used. These assumptions include investment returns on the schemes' assets, discount rates, pay growth and increases to pensions in payment and deferred pensions and may differ from actual results due to changing market and economic conditions and longer or shorter lives of participants.

### Derivatives and borrowings

The Group's default treatment is for borrowings to be carried at amortised cost, whilst derivatives are recognised separately on the balance sheet at fair value with movements in those fair values reflected through the income statement. This has the potential to introduce considerable volatility to both the income statement and balance sheet. Therefore, for fair value hedges, changes in the recognised value of hedged debt that are attributable to the hedged risk are adjusted through the income statement. In the case of cashflow hedges, movements in the fair value of derivatives are deferred within reserves until they can be recycled through the income statement to offset the future income statement effect of changes in the hedged risk. In order to apply this treatment, it must be demonstrated that the derivative has been, and will continue to be, an effective hedge of the hedged risk within the debt item. Changes in the fair value of all derivatives are recognised in the income statement, except for derivatives that are designated and effective in terms of cashflow hedging relationships, in which case the gains and losses are deferred in equity. The Group applies the fair value option through profit or loss where the complexity of the swaps means that they are disallowed from being allocated in a hedge relationship despite there being significant fair value offset between the hedged item and the derivative itself. This area is considered to be of significance due to the magnitude of the Group's level of borrowings.

## RESEARCH AND DEVELOPMENT

The Company undertakes research primarily to provide improved standards of service to customers, together with continuing improvements in business efficiency. Research and development within the Group's electricity network aims to deliver financial, supply quality, environmental and safety improvements to customers and is supported under the Innovation Funding Incentive introduced by Ofgem. The Group is a member of a number of collaborative research programmes including EA Technology Limited which addresses common issues that face the electricity industry. The Group also undertakes specific projects with these and other research and development providers, manufacturers and with universities. Research and development expenditure by the Group was £0.7 million in the year ended 31 March 2006 (2004/05: £0.1 million).

### POST BALANCE SHEET EVENTS

There were no events arising after the balance sheet date that require recognition or disclosure in the financial statements for the year ended 31 March 2006.

## OPERATING AND FINANCIAL REVIEW

### FORWARD LOOKING STATEMENTS

This report contains certain forward-looking statements with respect to the financial condition, results of operations and business of the Group. Statements that are not historical facts, including statements about the board's beliefs and expectations, are forward-looking statements. Words such as 'expects', 'anticipates', 'intends', 'plans', 'believes', 'seeks', 'estimates', 'potential', 'reasonably possible', 'targets' and variations of these words and similar expressions are intended to identify forward-looking statements which are based on current plans, estimates and projections, and therefore investors should not rely on them. Forward-looking statements speak only as of the date they are made, and the Group undertakes no obligation to update publicly any of them in light of new information or future events. The Group may also make written and/or oral forward-looking statements, in the annual report to shareholders, in proxy statements, in offering circulars and prospectuses, in press releases and other written materials and in oral statements made by officers, directors or employees to third parties, including financial analysts. Forward-looking statements involve inherent risks and uncertainties. The Group cautions investors that a number of important factors could cause actual results to differ materially from those anticipated or implied in any forward-looking statements. These factors include: (i) the effect of, and changes in, regulation and government policy; (ii) the effects of competition and price pressures; (iii) the ability of the Group to achieve cost savings and operational synergies; (iv) the ability of the Group to service its future operations and capital requirements; (v) the timely development and acceptance of new products and services by the Group; (vi) the effect of technological changes; and (vii) the Group's success in managing the risks of the foregoing. The Group cautions that the foregoing list of important factors does not address all the factors that could cause results to differ materially.

## DIRECTORS' REPORT

The directors present their report and the audited financial statements of the United Utilities Electricity PLC Group (the 'Group') for the year ended 31 March 2006.

### Profit and dividends

The results for the year, set out in the income statement on page 21, show that revenue for the year ended 31 March 2006 increased to £282.4 million (2005 - £258.4 million), an increase of 9.3 per cent over the previous year. Profit for the year after tax was £77.3 million (2005 - £79.3 million).

An interim dividend of £11.7 million was paid in March 2006 for the year ended 31 March 2006 (2005 - £19.9m), and a final dividend for the year ended 31 March 2005 of £39.1 million was paid in the year (2005 - £38.1 million)

### Business Review and Principal Activities

The Company is a wholly owned subsidiary of United Utilities PLC. The Company's principal activity is the operation of electricity distribution assets. The distribution of electricity is regulated by the terms of the Company's Electricity Distribution Licence granted under the Electricity Act 1989 and monitored by the Gas and Electricity Markets Authority. There have not been any significant changes in the Company's principal activities in the year under review. The directors are not aware, at the date of this report, of any likely major changes in the Company's activities in the next year.

During the year, share capital to the value of £160.0 million was issued.

There are no significant events since the balance sheet date that are required to be disclosed.

The Managing director's review and the operating and financial review on pages 3 to 16 report on the Company's activities during the year and on likely future developments. A summary of key performance indicators can be found in the operating and financial review. The directors, in preparing the operating and financial review, have not sought to comply with the ASB's 2006 Reporting Statement on operating and financial reviews.

### Principal risks and uncertainties

Principal risks and uncertainties are discussed as part of the Operating and Financial Review previously contained in this document.

### Research and development

The Group is committed to developing innovative, cost-effective and practical solutions for providing high quality services and standards to our customers, and for the benefit of the wider community and the development of the business. It seeks to take as part of this process maximum advantage of wide-ranging expertise, abilities and facilities within the Group.

### Employees

Employees are key to achieving the business strategy and enhancing shareholder value and as such the Group remains committed to maintaining high standards of health and safety in every area of its business.

The Group is committed to improving its employees' skills through training and development and nurturing a culture in which employees feel valued. The Group encourages employees to work to their full potential and respects the dignity and rights of every employee and supports them in performing various roles in society. The Group also challenges prejudice and stereotyping.

The Group is committed to fulfilling its obligations in accordance with the Disability Discrimination Act 1995 and best practice. As an equal opportunities employer, the Group gives equal consideration to applicants with disabilities in its employment criteria and will modify equipment and working practices wherever it is safe and practical to do so, both for new employees, and for those employees that are disabled during the course of their employment. Additionally, the Group is committed to providing full support and appropriate training for employees who become disabled during the course of their employment so they can continue to work in a position appropriate to their experience and abilities.

The Group believes that share ownership is an effective way of strengthening employees' involvement in the development of the business and bringing together their interests and those of the shareholders. It offers employees an opportunity to build up a shareholding in the ultimate parent company United Utilities PLC.

**DIRECTORS' REPORT (continued)****Policy on the payment of creditors**

The policy is normally to pay suppliers according to agreed terms of business. These terms are agreed upon entering into binding contracts and the Group seeks to adhere to the payment terms provided the relevant goods and services have been supplied in accordance with the contracts. The Group and Company had 43 days of purchases outstanding at the end of the financial year (2005 - 49 days).

**Directors**

The directors of the Company during the year ended 31 March 2006 are set out below. All were directors for the whole year except where otherwise indicated.

J E Roberts\* Chairman (and Chief Executive, United Utilities PLC) (resigned 31 March 2006)

S G Batey\*

S Beaumont (resigned 5 July 2006)

M Beesley

M J Boxall

K M Budinger (resigned 31 October 2005)

E Cooke

C Cornish\*

G Dixon

\*Director, United Utilities PLC

Details of directors' interests in the share capital of United Utilities PLC are set out in note 9 to the accounts or in the accounts of United Utilities PLC where appropriate.

At no time during the year did any director have a material interest in any contract or arrangement which was significant in relation to the Group's business.

**Directors' and officers' insurance**

The Company maintains an appropriate level of directors' and officers' insurance whereby directors are indemnified against liabilities to third parties to the extent permitted by the Companies Act.

**Directors' responsibilities in respect of the preparation of the financial statements**

The directors are responsible for preparing the statutory report and the financial statements. The directors are required to prepare financial statements for the company in accordance with International Financial Reporting Standards (IFRS). Company Law requires the directors to prepare such financial statements in accordance with IFRS, the Companies Act 1985, and article 4 of the International Accounting Standard (IAS) Regulation.

IAS 1 requires that the financial statements present fairly for each financial year the company's financial position, financial performance and financial cash flows. This requires the faithful representation of the effects of the transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the International Accounting Standards Board's 'Framework for the preparation and presentation of Financial Statements'. In virtually all circumstances, a fair presentation will be achieved by the compliance with all applicable IFRS.

In preparing the Statutory Financial Statements, the directors are required to:

- properly select and apply accounting policies;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information; and
- provide additional disclosures when compliance with the specific requirements in IFRS is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial performance.

**DIRECTORS' REPORT (continued)**

The directors confirm that the financial statements comply with the above requirements. The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy the financial position of the company and to enable them to ensure that the statutory financial statements comply with the Companies Act 1985. They have a general responsibility for the system of internal control and for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities

**Information given to auditors**

Each of the persons who is a director at the date of approval of this report confirms that:

(1) so far as the director is aware, there is no relevant audit information of which the Company's auditors are unaware; and

(2) the director has taken all the steps that he/she ought to have taken as a director in order to make himself/herself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s234ZA of the Companies Act 1985.

**Independent Auditor**

A resolution to reappoint Deloitte & Touche LLP as the auditor of the Company will be proposed at the forthcoming Annual General Meeting.

**Registered address**

**Martin Beesley**  
**Finance Director 28 July 2006**

**INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF  
UNITED UTILITIES ELECTRICITY PLC**

We have audited the group and company financial statements of United Utilities Electricity PLC for the year ended 31 March 2006 which comprise the consolidated income statement, the consolidated and company balance sheets, the consolidated and company statements of recognised income and expense, the consolidated and company cashflow statements and the related notes 1 to 32. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

As described in the statement of directors' responsibilities, the company's directors are responsible for the preparation of the financial statements in accordance with applicable United Kingdom law and International Financial Reporting Standards (IFRSs) as adopted for use in the European Union. Our responsibility is to audit the financial statements in accordance with relevant United Kingdom legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view, in accordance with the relevant financial reporting framework, and are properly prepared in accordance with the Companies Act 1985 and Article 4 of the IAS Regulation. We report to you whether in our opinion the information given in the directors' report is consistent with the financial statements. We also report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions.

We read the directors' report and the other information contained in the annual report for the above year as described in the contents section and consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the financial statements.

**Basis of audit opinion**

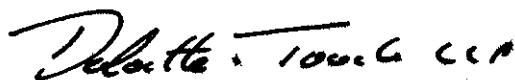

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the circumstances of the company and the group, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion, we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the group and individual company financial statements give a true and fair view, in accordance with IFRSs as adopted for use in the European Union, of the state of the group's and company's affairs as at 31 March 2006 and of the profit of the Group for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies Act 1985 and Article 4 of the IAS Regulation; and
- the information given in the directors' report is consistent with the financial statements.

Cash and cash equivalents at end of the year	15	128.9	128.9	(1.9)	(1.9)

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****1. ACCOUNTING POLICIES**

The principal accounting policies adopted in the preparation of these financial statements are set out below:

**a) Basis of preparation**

The financial statements have been prepared for the first time in accordance with International Financial Reporting Standards (IFRS) as adopted for use in the European Union (EU), including International Accounting Standards (IAS) and Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC). Results for the comparative periods have been restated under IFRS as adopted for use in the EU.

IFRS, as adopted by the EU, differs in certain respects from IFRS as issued by the International Accounting Standards Board (IASB). However, the considered financial statements for the periods presented would be no different had the Group applied IFRS as issued by the IASB. References to IFRS hereafter should be construed as references to IFRS as adopted by the EU.

The financial statements have been prepared on the historical cost basis, except for the revaluation of financial instruments, investment properties and certain property, plant and equipment.

The preparation of financial statements, in conformity with generally accepted accounting principles under IFRS, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from these estimates.

The disclosures required by IFRS 1 'First-time Adoption of International Financial Reporting Standards' concerning the transition from UK GAAP (United Kingdom generally accepted accounting practice) to IFRS are given in note 28.

**b) Basis of consolidation**

The Group financial statements consolidate the financial statements of the Company and entities controlled by the Company (its subsidiaries), made up to 31 March each year.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

**Subsidiaries**

Control is achieved where the Company has the power to govern the financial and operating policies, generally accompanied by a shareholding of more than one half of the voting rights, of an invested entity so as to obtain benefits from its activities. On acquisition, the assets and liabilities and contingent liabilities of a subsidiary are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognised as goodwill. Any deficiency of the cost of acquisition below the fair values of the identifiable net assets acquired is credited to profit and loss in the period of acquisition. All intra-Group transactions, balances, income and expenses are eliminated on consolidation.

**Associates**

An associate is an entity over which the Group, either directly or indirectly, is in a position to exercise significant influence by participating in, but not controlling, the financial and operating policies of the entity. Associates are accounted for using the equity method. Losses of an associate in excess of the Group's interest in the associate are not recognised, except to the extent that the Group has incurred obligations in respect of the associate. Unrealised profits and losses recognised by the Group on transactions with an associate are eliminated to the extent of the Group's interest in the associate concerned.

## NOTES TO THE ACCOUNTS

### For the year ended 31 March 2006

#### 1. ACCOUNTING POLICIES (continued)

##### c) Intangible assets

Intangible assets are measured initially at cost and are amortised on a straight-line basis over their estimated useful lives. Carrying amount is reduced by any provision for impairment where necessary.

Amortisation periods for categories of intangible assets are:

Computer software 3-10 years

##### d) Property, plant and equipment

Property, plant and equipment comprises operational structures and other assets (including properties, overground plant and equipment and electricity operational assets).

##### Operational structures

Infrastructure assets are depreciated by writing off their deemed cost less the estimated residual value, evenly over their useful lives, which range from 15 to 80 years. Employee costs incurred in implementing the capital schemes of the Group are capitalised within operational structure assets.

##### Other assets

All other property, plant and equipment is stated at historical cost less accumulated depreciation.

Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

Freehold land and assets in the course of construction are not depreciated. Other assets are depreciated by writing off their cost less their estimated residual value evenly over their estimated useful lives, based on management's judgement and experience, which are principally as follows:

Buildings 30-60 years

Operational assets 5-80 years

Fixtures, fittings, tools and equipment 3-40 years

Vehicles 3-10 years

Depreciation methods, residual values and useful lives are re-assessed annually and, if necessary, changes are accounted for prospectively.

The gain or loss arising on the disposal or retirement of an asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in income.

##### e) Impairment of tangible and intangible assets

Intangible assets with definite useful lives and property, plant and equipment are reviewed for impairment at each reporting date to determine whether there is any indication that those assets may have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where the asset does not generate cashflows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****1. ACCOUNTING POLICIES (continued)**

The recoverable amount is the higher of fair value less costs to sell, and value in use. Value in use represents the net present value of expected future cashflows discounted on a pre-tax basis using a rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cashflows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. Impairment of non-current assets is recognised in the income statement within operating costs.

Where an impairment loss subsequently reverses, it is recognised in the income statement and the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but not so as to exceed the carrying amount that would have been determined had no impairment loss been recognised in prior years.

**f) Financial instruments****To 31 March 2005****Debt instruments**

New borrowings were stated at net proceeds received after deduction of issue costs. The issue costs of debt instruments were amortised at a constant rate over the life of the instrument.

**Interest rate swaps and financial futures**

Interest rate swap agreements and financial futures were used to manage interest rate exposure. Instruments designated as a hedge of a debt instrument were accounted for on an accruals basis, with amounts payable or receivable in respect of those instruments recognised as adjustments to interest expense of the designated liability.

Realised gains and losses that occurred from the early termination of such instruments designated as a hedge were deferred and amortised to interest expense over the period of the hedged position, to the extent that the originally designated liability remained outstanding. In order to have qualified for hedge accounting, the notional amount of the Group's interest rate swaps and financial futures must not have exceeded the amount of its existing variable rate debt and must have changed the interest rate characteristics of the underlying debt, while the contractual maturities cannot have exceeded the maturities of the debt.

**From 1 April 2005 (upon adoption of IAS 39 'Financial Instruments: Recognition and Measurement')**

Financial assets and financial liabilities are recognised on the Group's balance sheet when the Group becomes a party to the contractual provisions of the instrument.

**Cash and cash equivalents**

In the consolidated cashflow statement and related notes, cash and cash equivalents includes cash at bank and in hand, deposits, other short-term highly liquid investments which are readily convertible on initial investment into known amounts of cash within three months and which are subject to an insignificant risk of change in value.

**Financial investments**

Investments (other than fixed deposits) are recognised and derecognised on a trade date and are initially measured at fair value, including transaction costs. Investments are classified as either held-to-maturity, held-for-trading, loans and receivables or available-for-sale. Held-to-maturity investments and loans and receivables are measured at amortised cost. Held-for-trading and available-for-sale investments are measured at subsequent reporting dates at fair value. Where securities are held for trading purposes, gains and losses arising from changes in fair value are included in net profit or loss for the period. For available-for-sale investments, gains and losses arising from changes in fair value are recognised directly in equity, until the security is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognised in equity is included in the net profit or loss for the period.

## NOTES TO THE ACCOUNTS

### For the year ended 31 March 2006

#### 1. ACCOUNTING POLICIES (continued)

##### Trade receivables

Trade receivables are stated at nominal value less allowances for estimated irrecoverable amounts.

##### Trade payables

Trade payables are stated at their nominal value.

##### Financial liabilities and equity

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

##### Equity instruments

Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

##### Bank borrowings

Interest-bearing bank loans and overdrafts are recorded at the proceeds received, net of direct issue costs. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are accounted for on an amortised cost basis to the income statement using the effective interest method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

##### Derivative financial instruments and hedge accounting

Interest rate swap agreements and financial futures are used to manage interest rate exposure. The Group does not use derivative financial instruments for speculative purposes.

All financial derivatives are recognised in the balance sheet at fair value. Changes in the fair value of all derivative financial instruments are recognised in the income statement within finance expense as they arise, except for derivatives that are designated and effective in terms of cashflow hedging relationships, in which case the gains and losses are deferred in equity.

Where hedge accounting has not been applied, the Group may elect to designate a financial liability at inception as fair value through profit or loss provided the financial liability meets the conditions specified in IAS 39 'Financial Instruments: Recognition and measurement'. Where possible, hedge accounting is applied.

##### Fair value hedges

For an effective hedge of an exposure to changes in the fair value, the hedged item is adjusted for changes in fair value attributable to the risk being hedged with the corresponding entry in profit or loss. Gains or losses from remeasuring the derivative are recognised in profit or loss.

Where changes in the fair value of a derivative differ to changes in the fair value of the hedged item attributable to the risks being hedged, the hedge ineffectiveness is recorded in the income statement within finance costs. Hedge accounting is discontinued prospectively when the hedging instrument is sold, terminated or exercised, where the hedge relationship no longer meets the criteria for hedge accounting in accordance with IFRS, or where the hedge designation is revoked. Any adjustment that has been recognised to the hedged item, for which the effective interest rate is used, is amortised to the income statement and is based on the recalculated effective interest rate at the time at which amortisation commences.

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****1. ACCOUNTING POLICIES (continued)****Cashflow hedges**

Changes in the fair value of derivative financial instruments that are designated and effective as hedges of future cashflows are recognised directly in equity and the ineffective portion is recognised immediately in the income statement. For hedges that do not result in the recognition of a non-financial asset or liability, amounts deferred in equity are recognised in the income statement in the same period in which the hedged item affects net profit or loss. Hedge ineffectiveness is recognised directly in the income statement within finance costs. Hedge accounting is discontinued when the hedge designation is revoked, the hedging instrument expires or is sold, terminated, or exercised, or no longer qualifies for hedge accounting. At that time, any cumulative gain or loss on the hedging instrument recognised in equity is retained in equity until the forecast transaction occurs. If a hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in equity is transferred to net profit or loss for the period.

**Financial assets and liabilities designated at fair value through profit or loss**

The Group applies this designation where the complexity of the swaps means that they are disallowed from being allocated in a hedge relationship despite there being significant fair value offset between the hedged item and the derivative itself. The otherwise inconsistent accounting treatment that would have resulted allows the Group to satisfy the criteria for this designation. The treatment of financial assets and liabilities designated at fair value through profit and loss is consistent with the Group's documented risk management strategy.

**g) Borrowing costs and finance income**

All borrowing costs and finance income are recognised in the income statement in the period in which they are accrued.

**h) Construction contracts**

Where the outcome of a construction contract can be estimated reliably, costs are recognised by reference to the stage of completion of the contract activity at the balance sheet date, as measured by the proportion that contract costs incurred for work performed to date bear to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that they have been agreed with the customer.

Where the outcome of a construction contract cannot be estimated reliably contract costs are recognised as expenses in the period in which they are incurred.

**i) Operating profit**

Operating profit is stated after charging operating expenses but before investment income and finance expense.

**j) Taxation**

The tax expense represents the sum of the tax currently payable and deferred tax.

**Current taxation**

Current tax, including UK corporation tax and foreign tax, is based on the taxable profit for the period and is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted at the balance sheet date. Taxable profit differs from the net profit as reported in the income

## NOTES TO THE ACCOUNTS

### For the year ended 31 March 2006

#### 1. ACCOUNTING POLICIES (continued)

statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

##### Deferred taxation

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are provided, using the liability method, on all taxable temporary differences at the balance sheet date. Such assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the temporary timing differences are expected to reverse based on tax rates and laws that have been enacted or substantially enacted at the balance sheet date.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer more likely than not that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax is charged or credited in the income statement, except when it relates to items charged or credited to equity, in which case the deferred tax is also dealt with in equity.

#### k) Employee benefits

##### Pension obligations

The Group participates in two defined benefit pension schemes, operated by United Utilities PLC, which are independent of the Group's finances, for the substantial majority of its employees. Actuarial valuations of the schemes are carried out as determined by the pension scheme trustees using the projected unit credit method at intervals of not more than three years, the rates of contribution payable and the pension cost being determined on the advice of the actuaries, having regard to the results of these valuations. In any intervening years, the actuaries review the continuing appropriateness of the contribution rates.

Defined benefit assets are measured at fair value while liabilities are measured at present value. The difference between the two amounts is recognised as a surplus or obligation in the balance sheet.

The cost of providing pension benefits to employees relating to the current year's service and the difference between the expected return on scheme assets and interest on scheme liabilities are included within the income statement within employee costs.

All actuarial gains and losses as at 1 April 2004, the date of transition to IFRS, were recognised in full. All future actuarial gains and losses are recognised outside the income statement in retained earnings and presented in the statement of recognised income and expense.

In addition, the Group also operates defined contribution pension schemes. Payments are charged as employee costs as they fall due. The Group has no further payment obligations once the contributions have been paid.

##### Share-based compensation arrangements

The United Utilities PLC Group operates equity-settled, share-based compensation plans in the shares of United Utilities PLC. In accordance with the transitional provisions, IFRS 2 'Share-based Payments' has been applied to all grants of equity instruments after 7 November 2002 that were unvested as of 1 April 2004.

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****1. ACCOUNTING POLICIES (continued)**

The United Utilities PLC Group issues equity-settled share-based payments to certain employees. Equity-settled share-based payments are measured at fair value at the date of grant. The fair value determined at the grant date is expensed on a straight-line basis over the vesting period, based on estimates of the number of options that are expected to vest. Fair value is based on both simulation and binomial models, according to the relevant measures of performance.

At each balance sheet date, the United Utilities PLC Group revises its estimate of the number of options that are expected to become exercisable with the impact of any revision being recognised in the income statement, and a corresponding adjustment to equity over the remaining vesting period. The proceeds received net of any directly attributable transaction costs are credited to share capital (nominal value) and share premium when the options are exercised.

United Utilities Electricity PLC is recharged the amount expensed under IFRS 2 that relates to United Utilities Electricity PLC employees.

**l) Provisions**

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation, and the amount can be reliably estimated.

Expenditure that relates to an existing condition caused by past operations that does not contribute to current or future earnings is expensed.

**m) Revenue recognition**

Revenue represents the fair value of the income receivable in the ordinary course of business for the distribution of electricity during the year, exclusive of value-added tax.

The Group recognises revenue generally at the time of delivery and when collection of the resulting receivable is reasonably assured. Payments received in advance of revenue recognition are recorded as deferred revenue.

**n) Contributions**

Contributions receivable in respect of property, plant and equipment are treated as deferred income, which is credited to the income statement over the estimated economic lives of the related assets.

**o) Leases**

Operating lease rentals are charged to the income statement on a straight-line basis over the period of the lease.

**p) Critical accounting policies and key sources of estimation uncertainty**

In the process of applying the Group's accounting policies, the Group is required to make certain estimates, judgements and assumptions that it believes are reasonable based upon the information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented.

On an ongoing basis, the Group evaluates its estimates using historical experience, consultation with experts and other methods considered reasonable in the particular circumstances. Actual results may differ significantly from the estimates, the effect of which is recognised in the period in which the facts that give rise to the revision become known.

The following paragraphs detail the policies the Group believes to have the most significant impact on the annual results under IFRS.

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****1. ACCOUNTING POLICIES (continued)****Carrying value of long-lived assets**

The carrying value of property, plant and equipment (PPE) as at 31 March 2006 was £1,713.7 million. Additions to PPE totalled £141.2 million and the depreciation charge was £52.5 million in the year ended 31 March 2006. The estimated useful economic lives of PPE are based on management's judgement and experience. When management identifies that actual useful lives differ materially from the estimates used to calculate depreciation, that charge is adjusted prospectively. Due to the significance of PPE investment to the Group, variations between actual and estimated useful lives could impact operating results both positively and negatively, although historically, few changes to estimated useful lives have been required.

The Group is required to evaluate the carrying values of PPE for impairment whenever circumstances indicate, in management's judgement, that the carrying value of such assets may not be recoverable. An impairment review requires management to make subjective judgements concerning the cashflows, growth rates and discount rates of the cash-generating units under review.

**Revenue recognition**

The Group recognises revenue generally at the time of delivery and when collection of the resulting receivable is reasonably assured. Should management consider that the criteria for revenue recognition are not met for a transaction, revenue recognition would be delayed until such time as the transaction becomes fully earned. Payments received in advance of revenue recognition are recorded as deferred revenue.

The customers of the electricity distribution business are the electricity supply companies that utilise United Utilities Electricity's distribution network to distribute electricity from generators to the end consumer. The receivable billed is dependent upon the volume of electricity distributed, including estimates of the units distributed to customers. The estimated usage is based on historic data, judgement and assumptions. Operating revenues are gradually adjusted to reflect actual usage in the period over which the meters are read.

**Provision for doubtful receivables**

At each balance sheet date, the Company and each of its subsidiaries evaluate the collectability of trade receivables and record provisions for doubtful receivables based on experience. These provisions are based on, amongst other things, comparisons of the relative age of accounts and consideration of actual write-off history. The actual level of receivables collected may differ from the estimated levels of recovery, which could impact operating results positively or negatively. As at 31 March 2006, the Group's gross trade receivables were £15.1 million and the provision for doubtful receivables was £0.6 million.

**Accounting for provisions and contingencies**

The Group is subject to a number of claims incidental to the normal conduct of its business, relating to and including commercial, contractual and employment matters, which are handled and defended in the ordinary course of business. The Group routinely assesses the likelihood of any adverse judgements or outcomes to these matters as well as ranges of probable and reasonably estimated losses. Reasonable estimates involve judgements made by management after considering information including notifications, settlements, estimates performed by independent parties and legal counsel, available facts, identification of other potentially responsible parties and their ability to contribute, and prior experience. A provision is recognised when it is probable that an obligation exists for which a reliable estimate can be made of the obligation after careful analysis of the individual matter. The required provision may change in the future due to new developments and as additional information becomes available. Matters that either are possible obligations or do not meet the recognition criteria for a provision are disclosed, unless the possibility of transferring economic benefits is remote.

**Retirement benefits**

The Group participates in two defined benefit schemes operated by United Utilities PLC one of which has a defined contribution section, which are independent of the Group's finances. Actuarial valuations of the schemes are carried out as determined by the trustees at intervals of not more than three years. The pension cost under IAS 19 is assessed in accordance with the advice of a firm of actuaries based on the latest actuarial valuation and assumptions.

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****1. ACCOUNTING POLICIES (continued)**

determined by the actuary. The assumptions are based on information supplied to the actuary by the Company, supplemented by discussions between the actuary and management. The assumptions are disclosed in note 20. Operating results are affected by the actuarial assumptions used. These assumptions include investment returns on the schemes' assets, discount rates, pay growth and increases to pensions in payment and deferred pensions and may differ from actual results due to changing market and economic conditions and longer or shorter lives of participants.

**Derivatives and borrowings**

The Group's default treatment is for borrowings to be carried at amortised cost, whilst derivatives are recognised separately on the balance sheet at fair value with movements in those fair values reflected through the income statement. This has the potential to introduce considerable volatility to both the income statement and balance sheet.

Therefore, for fair value hedges, changes in the recognised value of hedged debt that are attributable to the hedged risk are adjusted through the income statement. In the case of cashflow hedges, movements in the fair value of derivatives are deferred within reserves until they can be recycled through the income statement to offset the future income statement effect of changes in the hedged risk. In order to apply this treatment, it must be demonstrated that the derivative has been, and will continue to be, an effective hedge of the hedged risk within the debt item. Changes in the fair value of all derivatives are recognised in the income statement, except for derivatives that are designated and effective in terms of cashflow hedging relationships, in which case the gains and losses are deferred in equity. The Group applies the fair value through profit or loss option where the complexity of the swaps means that they are disallowed from being allocated in a hedge relationship despite there being significant fair value offset between the hedged item and the derivative itself. This area is considered to be of significance due to the magnitude of the Group's level of borrowings.

**Recently issued accounting pronouncements**  
**International Financial Reporting Standards**

At the date of authorisation of these financial statements, the following relevant standards and interpretations were in issue but not yet effective. The directors anticipate that the adoption of these standards and interpretations will have no material impact on the Group's financial statements. The directors anticipate that the Group will adopt these standards and interpretations on their effective dates.

IAS 1 Amendment – Capital disclosures, is effective for periods commencing on or after 1 January 2007

IAS 39 Amendment – Cashflow hedge accounting of forecast intra Group transactions, issued in April 2005, is effective for periods commencing on or after 1 January 2006

IAS 39 Amendment – The fair value option, issued in June 2005, is effective for periods commencing on or after 1 January 2006

IAS 39 Amendment – Financial guarantee contracts, issued in August 2005 is effective for periods commencing on or after 1 January 2006

IFRS 7 Financial instruments: Disclosures, issued in August 2005, is effective for periods commencing on or after 1 January 2007

IFRIC 1 Changes in existing decommissioning, restoration and similar liabilities

IFRIC 2 Members' shares in cooperative entities and similar instruments

IFRIC 4 Determining whether an arrangement contains a lease, issued in December 2004, is effective for periods commencing on or after 1 January 2006

IFRIC 5 Rights to interests arising from decommissioning, restoration and environmental rehabilitation funds

IFRIC 6 Liabilities arising from participating in a specific market-waste electrical and electronic equipment

IFRIC 8 Scope of IFRS 2, issued in January 2006, is effective for periods commencing on or after 1 May 2006

IFRIC 9 Reassessment of embedded derivatives, issued in March 2006, is effective for periods commencing on or after 1 June 2006

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**2. REVENUE**

	2006 £m	2005 £m
Revenue	282.4	258.4
	<u>282.4</u>	<u>258.4</u>

All revenue is generated from the distribution of electricity.

**3. OPERATING PROFIT**

The following items have been included in arriving at the Group's operating profit:

	2006 £m	2005 £m
<b>Employee benefits expense</b>		
Employee costs (see note 4)	21.2	30.8
<b>Depreciation and amortisation expense</b>		
Depreciation of property, plant and equipment		
Owned assets (see note 11)	52.5	56.5
Investment property (see note 12)	0.3	0.3
Amortisation of intangible assets and contributions		
Software (see note 10)	2.7	3.7
Consumer contributions (see note 23)	(6.6)	(6.2)
<b>Other income</b>		
Profit on disposal of property, plant and equipment	1.5	2.5
Profit on disposal of investment property	0.5	-
<b>Other operating costs</b>		
Restructuring (credit) / cost	<u>(0.6)</u>	<u>8.7</u>

Included within restructuring costs for 2005 is an additional amount of pension costs to the value of £5.1 million.

During the year, the Group obtained the following services from the Group's auditors, at costs detailed below:

	2006 £m	2005 £m
<b>Audit services</b>		
Statutory audit	0.1	0.1
Audit related regulatory reporting	<u>-</u>	<u>-</u>

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**4. DIRECTORS AND EMPLOYEES**

Directors' remuneration

	<b>2006</b>	<b>2005</b>
	<b>£m</b>	<b>£m</b>
Salaries	0.3	0.3
Benefits	0.1	0.1
Bonus	0.1	0.1
Share-based payments	0.1	0.1
	<u>0.6</u>	<u>0.6</u>

**Employee costs**

	<b>2006</b>	<b>2005</b>
	<b>£m</b>	<b>£m</b>
Wages and salaries	46.8	50.9
Social security costs	4.1	4.4
Pension costs (see note 20)	7.8	8.1
	<u>58.7</u>	<u>63.4</u>
Capital schemes and charges against provisions	<u>(37.5)</u>	<u>(32.6)</u>
Charged to the income statement	<u>21.2</u>	<u>30.8</u>

Included within restructuring costs for 2005 is an additional amount of pension costs to the value of £5.1 million.

**Average number of employees during the year (full-time equivalent)**

	<b>2006</b>	<b>2005</b>
	<b>Number</b>	<b>Number</b>
Licensed multi-utility operations	<u>1,305</u>	<u>1,459</u>

**5. INVESTMENT INCOME**

	<b>2006</b>	<b>2005</b>
	<b>£m</b>	<b>£m</b>
Interest receivable	3.6	7.4
Profit on disposal of subsidiary (see note 30)	0.3	-
	<u>3.9</u>	<u>7.4</u>

## NOTES TO THE ACCOUNTS

For the year ended 31 March 2006

## 6. FINANCE EXPENSE

	2006 £m	2005 £m
Fair value loss on debt and derivative instruments	3.5	-
Interest payable on bank borrowings	48.7	41.5
Interest payable to Group undertakings	1.8	3.3
	<u>54.0</u>	<u>44.8</u>

## 7. TAXATION

	Group 2006 £m	Group 2005 £m
<b>Current tax:</b>		
UK corporation tax	23.8	(5.3)
Prior year	0.4	(25.7)
<b>Deferred tax (note 21)</b>		
Current year	6.0	33.8
Prior year	(4.5)	-
	<u>25.7</u>	<u>2.8</u>

Corporation tax is calculated at 30 per cent (2005: 30 per cent) of the estimated assessable profit for the year.

The table below reconciles the notional tax charge at the UK corporation tax rate to the effective tax rate for the year:

	2006 £m	2006 %	2005 £m	2005 %
Profit before tax	103.0	-	82.1	-
Tax at the UK corporation tax rate of 30%	30.9	30.0	24.6	30.0
Prior years' tax adjustments	(4.1)	(4.0)	(25.7)	(31.3)
Non-taxable (income)/expense	(1.1)	(1.1)	3.9	4.8
	<u>25.7</u>	<u>25.0</u>	<u>2.8</u>	<u>3.5</u>

In addition to the amount charged to the income statement, deferred tax relating to actuarial gains/(losses) on defined benefits schemes of £10.7 million charge (2005: £1.7 million credit) and adjustments due to the adoption of IAS32 and 39 of £3.0 million (2005: nil) was also charged to the statement of recognised income and expense.

## NOTES TO THE ACCOUNTS

### For the year ended 31 March 2006

#### 8. DIVIDENDS

Amounts recognised as distributions to equity holders in the year comprise:

	2006 £m	2005 £m
Final dividend for the year ended 31 March 2005 at 8.2 pence per share (2004: 24.3 pence)	39.1	38.1
Interim dividend for the year ended 31 March 2006 at 7.4 pence per share (2005: 12.7 pence)	11.7	19.9
	<u>50.8</u>	<u>58.0</u>

The proposed final dividends for the year ended 31 March 2006 and 31 March 2005 were subject to approval by equity holders of the Company and, hence, have not been included as a liability in the financial statements at 31 March 2006 and 31 March 2005 respectively.

#### 9. DIRECTORS AND THEIR INTERESTS

The aggregate emoluments of the directors in 2006 amounted to £525,290 (2005: £367,920). Emoluments comprise salaries, fees, taxable benefits and the value of short-term incentive awards. The emoluments of J E Roberts and S G Batey are not included in the aggregate emoluments figures. The emoluments of these two directors are disclosed in the accounts of United Utilities PLC. The emoluments of the highest paid director (E Cooke) in 2006 in respect of services to the Company amounted to £188,899 (2005 - M J Boxall £104,591).

Four long-term incentive awards vested in the year ended 31 March 2006 (year ended 31 March 2005 was £nil). Information relating to long-term incentive awards is contained in the accounts of United Utilities PLC. With the exception of M J Boxall and G Dixon, all directors are members of, and contribute to, the United Utilities Pension Scheme, which is an exempt approved pension scheme with defined benefit and defined contribution sections of membership. It contains sections which are open to all eligible employees. The defined benefit scheme provides an entitlement on normal retirement of age 60 equal to between 1/30<sup>th</sup> and 1/45<sup>th</sup> of pensionable earnings for each completed year of service. The maximum pension is two thirds of pensionable earnings. Early retirement is possible from the age of 50 if the Company agrees. All other directors are members of defined benefit pension schemes.

M J Boxall and G Dixon are members of, and contributes to, the Electricity Supply Pension Scheme, a defined benefit scheme which provides on normal retirement at the age of 60 a pension equal to 1/80<sup>th</sup> of pensionable earnings for each completed year of service (plus 3/80<sup>th</sup> cash). Early retirement is possible from the age of 50 if the Company agrees.

The Finance Act 1989 restricts the pension's benefits that can be paid by these schemes to directors who joined the Company after 1 June 1989 because the earnings cap limits pensionable earnings for calculating benefits. The Company has put in place separate arrangements for some of the executive directors affected, the effect of which is to provide for them the same total pension benefits as for those executives who are not limited by the cap. These arrangements are unfunded.

The pension contributions for the highest paid director for 31 March 2006 (E Cooke) was £15,502 (2005: M J Boxall £30,420). The accrued pension at 31 March 2006 for the highest paid director (E Cooke) was £273,529 (2005: M J Boxall £599,358).

At 31 March 2006 and 2005, or date of appointment, the directors and their families had the following interests, all of which were beneficial interests, in the ordinary and A shares and options to subscribe for ordinary and A shares and options to subscribe for ordinary shares in United Utilities PLC. The interests of J E Roberts, S G Batey and C Comish in United Utilities PLC are disclosed in that Company's accounts.

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**9. DIRECTORS AND THEIR INTERESTS (continued)**

2005/2006	At 31 March 2006			At 31 March 2005			
	Ordinary shares	Executive option scheme options	Employee sharesave options	Ordinary shares	A shares	Executive options	Employee sharesave options
S Beaumont	10,758	27,258	2,909	10,185	-	27,547	2,909
M Beesley	6,769	578	465	5,299	456	14,494	1,178
M J Boxall	3,006	-	950	2,224	-	-	1,351
K M Budinger	1,213	-	-	-	-	-	1,213

At 31 March 2006, had the property, plant and equipment other than investment property of the Group been carried at historical cost less accumulated depreciation and accumulated impairment losses, their carrying amount would have been approximately £1,533.9 million (2005: £1,477.8 million).

The revaluation surplus is disclosed in note 26. The revaluation surplus arose following a directors' revaluation of operational assets and non operational land and buildings in 1997.

At 31 March 2006, the Group had entered into contractual commitments for the acquisition of property, plant and equipment amounting to £29.1 million (2005: £91.5 million).

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**13. OTHER INVESTMENTS (continued)**

**Group and Company**

Other investments	Description of holding	Proportion held	Nature of business
ESN Holdings Limited	Ordinary shares of £1 each	6.20%	Investment Company
National Grid PLC	Ordinary shares of 11.76p each	Negligible	Energy distribution

**Group and Company**

Associated undertaking	Description of holding	Proportion held	Nature of business
Nor.Web Limited	Ordinary shares of £1 each	50%	Dormant

**Group**

Other investment	Description of holding	Proportion held	Nature of business
United Utilities Investment Partnership LLP	Members share	2.40%	Investment business

**14. INVENTORIES**

	Group 2006 £m	Company 2006 £m	Group 2005 £m	Company 2005 £m
Raw materials and consumables	3.4	3.4	3.6	3.6

**15. CASH AND CASH EQUIVALENTS**

	Group 2006 £m	Company 2006 £m	Group 2005 £m	Company 2005 £m
Cash at bank and in hand				
Short term bank deposits	137.0	137.0	-	-
Bank overdrafts	(8.1)	(8.1)	(1.9)	(1.9)
	128.9	128.9	(1.9)	(1.9)

Cash and cash equivalents comprise cash at bank and other short-term highly liquid investments with a maturity of three months or less, net of bank overdrafts which are payable on demand.

The effective interest rate on short term deposits was 4.50 per cent (2005: 4.49 per cent) and these deposits have an average maturity of 22 days.

The bank overdrafts and temporary borrowings are repayable in less than one year. The weighted average rate of interest on bank overdrafts and temporary borrowings was 5.50 per cent (2005: 5.75 per cent).

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**16. TRADE AND OTHER RECEIVABLES**

	<b>Group 2006 £m</b>	<b>Company 2006 £m</b>	<b>Group 2005 £m</b>	<b>Company 2005 £m</b>
Trade receivables	14.5	14.5	4.4	4.4
Amounts owed by Group undertakings	12.5	9.1	40.2	7.1
Amounts owed by subsidiary undertakings	-	-	-	8.1
Prepayments and accrued income	27.4	27.2	23.5	23.5
	<u>54.4</u>	<u>50.8</u>	<u>68.1</u>	<u>43.1</u>

Trade receivables do not carry interest and are stated net of allowances for doubtful receivables of £0.6 million (2005: £2.6 million) estimated by management based on known specific circumstances, past default experience and their assessment of the current economic environment.

The Group has no significant concentration of credit risk with exposure spread over a large number of customers. The average credit period taken on sales is 18.7 days (2005: 6.2).

The directors consider that the carrying amount of trade and other receivables approximates their fair value.

**17. BORROWINGS**

	<b>Group 2006 £m</b>	<b>Company 2006 £m</b>	<b>Group 2005 £m</b>	<b>Company 2005 £m</b>
Bank overdrafts	8.1	8.1	1.9	1.9
Bank loans and other loans	650.5	698.2	629.1	689.5
	<u>658.6</u>	<u>706.3</u>	<u>631.0</u>	<u>691.4</u>
The borrowings are repayable as follows:				
Within one year	14.7	62.4	6.3	66.7
From one to two years	-	-	4.4	4.4
From two years to three years	-	-	4.4	4.4
From three years to four years	-	-	4.4	4.4
From four years to five years	-	-	4.5	4.5
After five years	643.9	643.9	607.0	607.0
	<u>658.6</u>	<u>706.3</u>	<u>631.0</u>	<u>691.4</u>

Included within this analysis by the Group and Company are amounts included as owed to Group undertakings of £6.6 million (2005: £12.8 million – Company only) and amounts owed to subsidiaries by the Company of £47.7 million (2005: £47.6 million) all of which are included as Trade and other payables (see note 19).

The Group considers the following financial instruments to be significant:

	<b>Maturity</b>	<b>Carrying value £m</b>
Financial instruments		
£450m 8.875% notes	25-Mar-26	553.8

On total borrowings, before the impact of derivative instruments, interest rates are at 8.875 per cent on £553.8 million (2005: £539.1 million) and are at floating rates on £104.8 million (2005: £104.7 million).

# NOTES TO THE ACCOUNTS

## For the year ended 31 March 2006

### 17. BORROWINGS (continued)

#### Bank overdrafts

Bank overdrafts are repayable on demand. The weighted average rate of interest on bank overdrafts was 5.50 per cent (2005: 5.75 per cent).

#### Term loans

Amounts repayable on term loans after more than five years, before the impact of derivative instruments, comprise loans repayable between 2011 and 2026. Interest rates are at 8.875 per cent on £553.8 million (2005: £517.0 million) and are at floating rates on £90.1 million (2005: £90.0 million).

The weighted average rate of interest on term loans, before the impact of derivative instruments, was 8.20 per cent (2005: 8.20 per cent).

The Group had available unutilised committed bank facilities of £75.0 million (2005: £75.0 million). Of the amounts unutilised, £30.0 million expires within one year (2005: £25.0 million), £20.0 million expires after one year but in less than two years (2005: £30.0 million), and the remaining £25.0 million expires in more than two years (2005: £20.0 million).

The fair values of the Group's financial instruments are shown in note 18.

Taking into account all derivative instruments, including those not designated as a hedge relationship, borrowings can be analysed as follows:

	Fixed rate borrowings			Floating rate borrowings		
	Weighted average interest rates %	Weighted average period for which rate is fixed years	At fixed interest rates £m	Weighted average interest rate %	At floating interest rates £m	Total £m
2006						
Sterling	7.05	9.8	535.0	4.67	123.6	658.6

	Fixed rate borrowings			Floating rate borrowings		
	Weighted average interest rates %	Weighted average period for which rate is fixed years	At fixed interest rates £m	Weighted average interest rate %	At floating interest rates £m	Total £m
2005						
Sterling	7.20	9.7	626.0	5.32	5.0	631.0

Debt items held at fair value through profit or loss:

	Carrying value £m	Interest rates/exchange rates £m	Credit risk £m	Total impact recognised in the income statement £m	Payable at maturity £m
£250m 8.875% due March 2026	358.9	(13.5)	(4.3)	(17.8)	250.0

# NOTES TO THE ACCOUNTS

## For the year ended 31 March 2006

### 17. BORROWINGS (continued)

#### Company

The Company has borrowings totalling £706.3 million (2005: £691.4 million), of which £62.4 million falls due within one year (2005: £66.7 million), is repayable on demand and is based on floating rates. The remaining loans totalling £643.9 million fall due after five years and have maturities and interest rates as follows:

£90.1 million matures in 2013 with interest charged at floating rates and £553.8 million with interest charged at 8.875 per cent matures in 2026.

As at 31 March 2005 the Company had borrowings, totalling £691.4 million of which £66.7 million fell due within one year, £62.3m was repayable on demand with interest charged at floating rates, £2.2m was repayable in September 2005 and a further £2.2m was repayable in March 2006, both with interest charged at 8.875 per cent. The remaining loans totalling £624.7 million had maturities and interest rates as follows:

£90.0 million maturing in 2013 had interest charged at floating rates and the remaining £534.7 million relates to loans maturing in 2026 with interest charged at 8.875 per cent.

#### Company

As at 31 March 2006, the Company held a total of £13.0 million of current derivative assets and £1.9 million of current derivative liabilities.

#### Financial instruments and risk management

The primary financial risk faced by the Group is interest rate risk.

The Board has reviewed and agreed policies for managing this risk, as summarised below. The Board has also approved all of the classes of financial instruments used by the Group. The Group's treasury function, which is authorised to conduct the day-to-day treasury activities of the Group, reports at least annually to the Board, which provide written principles on the use of financial derivatives.

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****18. FINANCIAL INSTRUMENTS (continued)**

All of the Group's activities involve analysis, acceptance and management of some degree of risk or combination of risks. The most important types of financial risk are credit risk, liquidity risk and market risk. Market risk includes foreign exchange, interest rate and equity price risks. The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls and to monitor the risks and limits continually by means of reliable and up-to-date systems. The United Utilities Group Audit Committee, under authority delegated by the United Utilities Group Board, formulates high level Group risk management policy, monitors risk and receives reports that allow it to review the effectiveness of the Group's risk management policies.

**Credit risk management**

Credit risk is the risk that financial loss arises from the failure of a customer or counterparty to meet its obligations under a contract. It arises principally from lending, trade finance, treasury and leasing activities. The Group has dedicated standards, policies and procedures to control and monitor all such risks.

**Liquidity management**

The Group maintains a strong liquidity position and manages the liquidity profile of its assets, liabilities and commitments so that cashflows are appropriately balanced and all funding obligations are met when due.

**Market risk management**

Market risk is the risk that movements in market rates, including foreign exchange rates, interest rates, equity and commodity prices will reduce the Group's income on the value of its portfolios. The management of market risk is undertaken using risk limits approved by the finance director under delegated authority.

The Group uses a variety of financial instruments, including derivatives, when raising finance for its operation in order to manage any exposure arising from funding activity.

The Group's activities expose it to the financial risks of changes in interest rates. The Group uses interest rate swap contracts and financial futures to hedge this exposure. The Group does not use derivative financial instruments for speculative purposes.

The counterparties to derivative instruments consist of financial institutions and other bodies with good credit ratings. Although the Group is potentially exposed to credit loss in the event of non-performance by counterparties, such credit risk is controlled through credit rating reviews of the counterparties and by limiting the total amount of exposure to any one party. The Group does not believe it is exposed to any material concentrations of credit risk.

The Group borrows in the major global debt markets at both fixed and floating rates of interest, using derivatives, where appropriate, to generate the desired effective interest basis.

Under an interest rate swap, the Group agrees with another party to exchange at specific intervals the difference between fixed rate and floating rate interest amounts calculated by reference to an agreed notional principal amount. The notional principal of these instruments reflects the extent of the Group's involvement in the instruments, but does not represent its exposure to credit risk, which is assessed by reference to fair value.

The Group makes no significant sales or purchases in currencies other than its functional currency. Accordingly, the Group has no material unhedged foreign currency exposures.

Financial instruments utilised by the Group can be summarised as follows:

***Interest rate swaps***

Interest rate swaps are used solely to manage floating rate borrowings in order to reduce the financial risk to the Group from potential future changes in medium-term interest rates.

***Financial futures***

Financial futures are used to manage the Group's exposure to possible future changes in short-term rates.

## NOTES TO THE ACCOUNTS

For the year ended 31 March 2006

## 18. FINANCIAL INSTRUMENTS (continued)

*Fair values of financial instruments*

The fair value of derivative instruments has been calculated by discounting the future cashflows of the individual contracts using the appropriate market interest rate and currency rates. Where interpolation occurs at points along the curve this can significantly affect the value given to these instruments. As such, changes in the frequency of points taken along the curve can affect the value of these instruments. In addition, any changes in the assumed rates input to these models could give rise to significant changes in value. The fair values of interest rate swaps exclude the related accrued interest receivables and payables which are shown in the balance sheet separately within trade and other payables and receivables.

Fair values have been estimated using the following methods and assumptions:

*Non-current investments*

The fair value of investments, for which there are no quoted market prices, approximates to their carrying value. The Company's long-term investments are detailed in note 13. The Group's unlisted investments are held at cost as their fair value cannot be reliably measured as they are not actively traded and the range of estimates is too wide. The carrying value of the Company's unlisted investments is £1.2 million (2005: £2.0 million).

*Current assets and liabilities*

Financial instruments included within current assets and liabilities (excluding cash and borrowings) are generally short-term in nature and accordingly their fair values approximate to their book values.

*Borrowings and non-equity interests (excluding foreign exchange contracts)*

The carrying values of cash and short-term borrowings and current asset investments approximate to their fair values because of the short-term maturity of these instruments. The fair value of long-term borrowings is estimated by discounting the future cashflows to net present values using appropriate market interest rates prevailing at the year end.

*Interest rate swaps*

The Group enters into interest rate swaps in order to manage its interest rate exposures.

The analysis in the table below illustrates the sensitivity of the market value of the Group's financial instruments to changes in interest rates. The analysis assumes an instantaneous 1.0 per cent (100 basis points) move in interest rates for all maturities and currencies from their levels at 31 March 2006 with all other variables held constant.

	Market value 31 March 2006 £m	+1% movement in interest rate £m	-1% movement in interest rate £m
<b>Interest rate movement</b>			
Long-term debt	(760.0)	78.0	(91.4)
Derivatives	11.1	(27.9)	34.6

*Hedges*

Achieving hedge accounting under IAS 39 'Financial Instruments: Recognition and Measurement' is based on measuring the effectiveness of the derivative as a hedge instrument as well as fulfilling hedge documentation rules. The effectiveness test compares the change in fair value of the designated derivative and the change in fair value of the hedged item to determine if this ratio falls within the permitted range of 80 per cent to 125 per cent. Any derivative that falls outside the permitted range is classified as held for trading. Gains or losses on the derivative are recognised immediately in the income statement except where the derivative is designated within an effective cashflow hedge relationship, in which case the gains and losses are deferred in equity and are recycled through the income statement at the time the hedged item is recognised in the income statement. Where a derivative does fall within the permitted range but is not 100 per cent effective, the ineffective element is recognised in the income statement immediately. Those derivative instruments that are not designated in a hedging relationship are classified as held for trading.

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**18. FINANCIAL INSTRUMENTS (continued)**

Where fair value hedges occur these hedges are managing interest rate risk in relation to financing.

Cashflow hedges relate to the management of cashflow on a particular floating rate loan over the regulatory period to 2010. The group largely manages all its financing cashflows over the observed five year regulatory period, however, the majority of these hedges did not qualify for hedge accounting as they would be overlaid onto transactions which are already within fair value hedge relationships

The Group has no regular way transactions, and has not pledged collateral in relation to any of its derivative instruments.

The fair value of the derivative financial instruments as at 31 March 2006 was as follows:

	Assets fair value £m	Liabilities fair value £m
<b>Current</b>		
Held for trading derivatives	13.0	(1.9)

Included in the above table is a liability relating to a cashflow hedge, the notional and fair value of which is inconsequential. Within the year ended 31 March 2006, a movement in the fair value of the derivative of £0.7 million was recognised and taken to reserves.

The notional value of the financial instruments as at 31 March 2006 was as follows:

	Cash instruments assets £m	Cash instruments liabilities £m	Derivative asset legs £m	Derivative liabilities legs £m	Total £m
Sterling	137.0	(540.0)	590.0	(679.0)	(492.0)

For the year ended 31 March 2005 the following are relevant as required by FRS 13 'Derivatives and other financial instruments: Disclosure':

Unrecognised gains and losses on financial assets and liabilities for which hedge accounting has been used at the balance sheet date are £1.9 million and £8.7 million respectively.

As at 31 March 2005 the Group anticipated that £0.5 million of these gains and £5.6 million of these losses would have been realised in the year ended 31 March 2006. Of the unrecognised gains and losses on hedges as at 1 April 2004 the net gain recognised in the income statement for the year ended 31 March 2005 was £4.1 million.

**19. TRADE AND OTHER PAYABLES**

	Group 2006 £m	Company 2006 £m	Group 2005 £m	Company 2005 £m
Trade creditors	8.0	7.9	7.5	7.5
Amounts owed to Group undertakings	30.8	30.9	31.1	36.6
Amounts owed to subsidiary undertakings	-	47.7	-	47.6
Other taxation and social security	4.4	4.4	8.1	8.1
Other creditors	6.4	6.4	12.0	12.0
Consumers' contributions	6.8	6.8	6.4	6.4
Refundable customer deposits	19.1	19.1	8.8	8.8
Accruals and deferred income	43.8	43.9	68.0	68.0
	119.3	167.1	141.9	195.0

Trade creditors principally comprise amounts outstanding for trade purchases and ongoing costs. The average credit period taken for trade purchases is 43 days (2005: 49 days).

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****19. TRADE AND OTHER PAYABLES (continued)**

Included within amounts owed by the Company to Group undertakings is £6.6 million (2005: £12.8 million) included in the borrowing analysis within note 17.

Included within amounts owed by the Company to subsidiary undertakings is £47.7 million (2005: £47.6 million) included in the borrowing analysis within note 17.

**20. RETIREMENT BENEFIT SCHEMES**

The Group participates in a number of pension schemes principally in the UK. The major schemes are funded defined benefit schemes – the United Utilities Pension Scheme (UUPS) and the United Utilities Group of Electricity Supply Pension Scheme (ESPS) (the ‘Schemes’), of which the ESPS is closed to new employees. UUPS also includes a defined contribution section which constitutes less than 0.5 per cent of the total asset value. The assets of these Schemes are held in trust funds independent of Group finances.

The last actuarial valuation of the Schemes were carried out as at 31 March 2004. These valuations have been updated to take account of the requirements of IAS 19 ‘Employee Benefits’ in order to assess the position at 31 March 2006 by projecting forward from 31 March 2004, and have been performed by an independent actuary, Mercer Human Resource Consulting.

The Group adopts an accounting policy of recognising actuarial gains and losses as they occur in the Statement of Recognised Income and Expense.

On 31 March 2005, the Group made lump sum payments of £8.6 million and £71.0 million to UUPS and ESPS respectively. The payments were in lieu of the estimated Company contributions that would have been payable for defined benefit members over the five years from 1 April 2005. Subject to the results of the actuarial valuations at 31 March 2007, Company contributions will resume from 1 April 2010. In the meantime, the Group will continue to pay contributions in respect of the defined contribution members and insurance premiums. Other payments will be made by the Group in accordance with the funding agreement between the Trustee and the Group.

The Group also participates in a series of unfunded, unapproved retirement benefit schemes operated by the UU Group. The cost of the unfunded, unapproved retirement benefit schemes is included in the total pension cost, on a basis consistent with IAS 19 and the assumptions set out below.

The total defined benefit pension cost for the year was £2.9 million (2005: £10.8 million), of which £Nil million is included within restructuring costs, (2005: £5.1 million) in respect of pension severance benefits. A pension obligation of £1.8 million is included in the balance sheet at 31 March 2006 (2005: obligation of £35.0 million). Information about the pension arrangements for executive directors is contained in note 9.

The main financial assumptions used by the actuary were as follows:

	<b>At 31 March 2006</b>	<b>At 31 March 2005</b>
Discount rate	4.90%	5.40%
Expected return on assets	6.10%	6.60%
Pensionable salary growth - UUPS	3.75%	4.10%
Pensionable salary growth - ESPS	3.80%	4.30%
Pension increases	2.80%	2.80%
Price inflation	2.80%	2.80%

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**20. RETIREMENT BENEFIT SCHEMES (continued)**

As at 31 March 2006, the Company's share of the fair value of plan assets, together with the liabilities in the plans recognised in the balance sheet were as follows:

	Plan assets at 31 March 2006 %	Value at 31 March 2006 £m	Plan assets at 31 March 2005 %	Value at 31 March 2005 £m
Equities	66.6	493.9	63.7	402.2
Gilts	22.3	165.2	18.6	117.4
Bonds	11.0	81.5	14.9	94.1
Property	0.1	0.7	0.1	0.6
Cash	-	-	2.7	17.0
Total fair value of assets	100.0	741.3	100.0	631.3
Present value of liabilities		(743.1)		(666.3)
Net retirement benefit obligation		(1.8)		(35.0)

To develop the expected long-term rate of return on assets assumption, the Group considered the level of expected returns on risk-free investments, the historic level of the risk premium associated with the other asset class in which the portfolio is invested and the expectations for future returns of each asset class. The expected return for each asset class was then weighted based on the actual asset allocation to develop the expected long-term return on assets assumption for the portfolio. The actual return on plan assets for the schemes as a whole was £147.8 million (2005: £69.1 million).

Movements in the present value of the defined benefit obligations are as follows:

	2006 £m	2005 £m
At 1 April	(666.3)	(611.5)
Current service cost	(7.5)	(8.1)
Interest cost on plan obligations	(31.3)	(41.1)
Member contributions	(2.0)	(2.0)
Past service cost	(0.3)	(5.1)
Actuarial losses	(76.0)	(31.3)
Benefits paid	40.3	32.8
At 31 March	(743.1)	(666.3)

Movements in the fair value of the plan assets were as follows:

	2006 £m	2005 £m
At 1 April	631.3	506.8
Expected return on plan assets	36.2	43.5
Actuarial gains	111.6	25.6
Company contributions	0.5	86.2
Member contributions	2.0	2.0
Benefits paid	(40.3)	(32.8)
At 31 March	741.3	631.3

## NOTES TO THE ACCOUNTS

For the year ended 31 March 2006

## 20. RETIREMENT BENEFIT SCHEMES (continued)

The net pension expense before taxation recognised in the income statement in respect of the defined benefit schemes is summarised as follows:

	2006 £m	2005 £m
Current service cost	(7.5)	(8.1)
Past service cost	(0.3)	-
Past service cost - restructuring costs	-	(5.1)
Expected return on plan assets	36.2	43.5
Interest on plan obligations	(31.3)	(41.1)
	<u>(2.9)</u>	<u>(10.8)</u>
Net pension expense before taxation	<u>(2.9)</u>	<u>(10.8)</u>

The above amounts are all recognised in arriving at operating profit.

The reconciliation of the opening and closing balance sheet position is as follows:

	2006 £m	2005 £m
At 1 April	(35.0)	(104.7)
Expenses recognised in the income statement	(2.9)	(10.8)
Contributions paid	0.5	86.2
Actuarial gains/(losses) gross of taxation	35.6	(5.7)
	<u>(1.8)</u>	<u>(35.0)</u>

Actuarial gains and losses are recognised directly in the statement of recognised income and expense. At 31 March 2006, a cumulative gain of £29.9 million (2005: loss £5.7 million) had been recorded directly in the statement of recognised income and expense.

The history of the plan for the current and prior period is as follows:

	2006 £m	2005 £m
Experience adjustments on plan obligations	-	(8.1)
Experience adjustments on plan assets	111.6	25.6
Changes in assumptions	(76.0)	(23.2)
	<u>35.6</u>	<u>(5.7)</u>

**NOTES TO THE ACCOUNTS**  
**For the year ended 31 March 2006**

**21. DEFERRED TAX**

The following are the major deferred tax liabilities and assets recognised by the Group and Company, and the movements thereon, during the current and prior reporting periods.

	Group and Company			Total
	Accelerated tax depreciation £m	Retirement benefit obligations £m	Other £m	£m
At 1 April 2004	310.7	(31.4)	(21.2)	258.1
Charged to the income statement	30.7	22.6	(19.5)	33.8
Charged to equity for the year	-	(1.7)	-	(1.7)
At 31 March 2005	341.4	(10.5)	(40.7)	290.2
Charged to the income statement	(6.9)	(0.9)	9.3	1.5
Charged to equity for the year	-	10.7	3.0	13.7
At 31 March 2006	334.5	(0.7)	(28.4)	305.4

**22. PROVISIONS**

	Group and Company			Total
	Restructuring Provision £m	Other £m		£m
At 1 April 2005	3.6	0.6		4.2
Utilisation of provision	(2.8)	(0.1)		(2.9)
At 31 March 2006	0.8	0.5		1.3

**23. CONSUMER CONTRIBUTIONS**

Consumer contributions are those amounts received from a customer in respect of the provision of a new connection to the network.

Consumer contributions are amortised through the income statement over the lifetime of the relevant asset.

	Group £m	Company £m
At 1 April 2004	218.4	218.4
Additions during the year	15.8	15.8
Amortisation	(6.2)	(6.2)
At 31 March 2005	228.0	228.0
Additions during the year	31.3	31.3
Amortisation	(6.6)	(6.6)
At 31 March 2006	252.7	252.7
Amounts due in less than one year (see note 19)	6.8	6.8
Amounts due after more than one year	245.9	245.9
	252.7	252.7

## NOTES TO THE ACCOUNTS

For the year ended 31 March 2006

## 24. REFUNDABLE CUSTOMER DEPOSITS

Refundable customer deposits are those consumer contributions which have may be in part refundable dependable on contracted targets.

	Group 2006 £m	Company 2006 £m	Group 2005 £m	Company 2005 £m
Amounts due in less than one year (see note 19)	19.1	19.1	8.8	8.8
Amounts due after more than one year	6.1	6.1	13.1	13.1

## 25. SHARE CAPITAL

	Group and Company 2006 £	Group and Company 2005 £
<b>Authorised:</b>		
569,999,996 (2005: 249,999,996) ordinary shares of 50 pence each	284,999,998	124,999,998
4 'A' ordinary shares of 50 pence each	2	2
Special rights redeemable preference share of £1	1	1
	<u>285,000,001</u>	<u>125,000,001</u>
	<b>2006 £</b>	<b>2005 £</b>
<b>Allotted, called up and fully paid:</b>		
476,821,341 (2005: 156,821,341) ordinary shares of 50 pence each	238,410,671	78,410,671
4 'A' ordinary shares of 50 pence each	2	2
	<u>238,410,673</u>	<u>78,410,673</u>

The 'A' ordinary shares and the ordinary shares rank pari passu in all respects, save that dividends may be declared on one class of shares without being declared on the other.

During the year 320 million ordinary shares of 50 pence each were issued at par to United Utilities North West PLC, the Company's immediate holding Company.

## NOTES TO THE ACCOUNTS

**28. ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS**

From 1 January 2005, all European Union listed companies are required to prepare consolidated financial statements under International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (IASB) and endorsed by the European Union. Accordingly, the results for the year ended 31

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****28. ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS (continued)**

March 2006 have been prepared in accordance with IFRS accounting policies. The Group's previously reported results for the year ended 31 March 2005 have been restated, the date of transition to IFRS being 1 April 2004.

In accordance with International Financial Reporting Standard 1 'First-time Adoption of International Financial Reporting Standards' (IFRS 1), the Group's accounting policies under IFRS have been applied retrospectively at the date of transition, with the exception of a number of permitted exemptions. These are summarised below:

- The application of IAS 32 'Financial Instruments: Disclosure and Presentation' and IAS 39 'Financial Instruments: Recognition and Measurement' with effect from 1 April 2005;
- The application of IFRS 2 'Share-based Payment' to those share options granted after 7 November 2002 but which had not vested by 1 April 2004;
- The recognition, in full, of all actuarial gains and losses relating to pension schemes at 1 April 2004 and, prospectively, through the statement of recognised income and expense.

The major areas of impact of IFRS are summarised below:

**Defined benefit pension schemes****IAS 19 'Employee Benefits'**

The Group prepared its 2005 UK GAAP results in accordance with SSAP 24 'Accounting for Pension Costs', with FRS 17 'Retirement Benefits' transitional disclosures provided in the notes to the accounts. FRS 17 became fully effective for accounting periods beginning on or after 1 January 2005. The Group has not adopted FRS 17 and has moved directly to IAS 19.

Under SSAP 24, any pension scheme surplus or deficit identified at the most recent actuarial valuation is recognised gradually through the profit and loss statement over the average expected future working lifetime of current employees. The net pension cost under SSAP 24 therefore includes both the cost of providing an additional year of pension benefits to employees (regular cost) and an element of the surplus/deficit relating to previous years (variation). The difference between employer's contributions paid and the SSAP 24 net pension cost is recognised as a prepayment/accrual, resulting in a balance sheet position that does not necessarily reflect the actuarial position. Interest is calculated on this balance sheet entry and is also included within the net pension cost. In accordance with IAS 19, any legal and constructive obligation for post employment benefit plans must be immediately recognised as an asset or liability on the balance sheet. Where actual experience differs from the assumptions made at the start of a financial year, actuarial gains and losses will be recognised through the statement of recognised income and expense.

The adoption of IAS 19 increases the 2005 profit before tax by £5.9 million compared with UK GAAP.

The de-recognition of the UK GAAP SSAP 24 prepayment reduces net assets by £69.8 million (net of deferred tax). The SSAP 24 prepayment reflected the lump sum payment of £79.6 million (pre-tax) made at 31 March 2005. Net assets are then further reduced by the recognition of the IAS 19 deficit of £24.5 million (net of deferred tax).

**Deferred tax****IAS 12 'Income Taxes'**

The major impact of IAS 12 relates to discounting of deferred tax not being permitted. FRS 19 'Deferred Tax' permits, but does not require, a deferred tax asset or liability to be discounted and as a result the Group has been able to apply a policy of discounting its deferred tax liability. However, IAS 12 does not permit discounting in any circumstances. This is of particular significance to a utility business where any reversal of timing differences is likely to be deferred long into the future due to the long asset lives of network assets. The inability to discount results in an increase in the balance sheet deferred tax liability of £196.6 million at 31 March 2005 and consequently a reduction in net assets.

The deferred tax impacts arising from any other IFRS adjustments are included in the relevant sections.

**NOTES TO THE ACCOUNTS****For the year ended 31 March 2006****28. ADOPTION OF INTERNATIONAL FINANCIAL REPORTING STANDARDS (continued)****Dividends**

IAS 10 'Events After the Balance Sheet Date'

IAS 10 and SSAP 17 'Accounting for Post Balance Sheet Events' both distinguish 'adjusting events' from 'non-adjusting events' with similar definitions and applications. However, under IAS 10 dividends may not be recognised until they have been appropriately authorised and are no longer at the discretion of the entity. Therefore, if this occurs after the balance sheet date, the dividends are not recognised as a liability at the balance sheet date. However, they are disclosed in the notes to the accounts in accordance with IAS 1 'Presentation of Financial Statements'.

Dividends are no longer recognised within the income statement and are recorded directly within reserves. The final dividend of £39.1 million included with the UK GAAP financial statements for 2004/05 has been reversed at 31 March 2005, thereby increasing net assets.

**Accounting for derivatives**

IAS 39 'Financial Instruments: Recognition and Measurement'

The Group is taking the exemption offered by IFRS 1 to apply IAS 39 with effect from 1 April 2005 rather than 1 April 2004 (the date of transition). The comparative information for 2004/05 within the 31 March 2006 IFRS financial statements therefore reflects derivatives accounted for under UK GAAP applicable on 31 March 2005.

Under UK GAAP, debt is carried at its hedged amount and the fair values of derivatives are not recognised in the balance sheet. Under IAS 39, the default treatment is for debt to be carried at amortised cost, whilst derivatives are recognised separately on the balance sheet at fair value with movements in those fair values reflected through the income statement. This has the potential to introduce considerable volatility to both the income statement and balance sheet. Therefore, for fair value hedges, IAS 39 allows changes in the recognised value of hedged debt that are attributable to the hedged risk to be adjusted through the income statement. In the case of cashflow hedges, movements in the fair value of derivatives are deferred within reserves until they can be recycled through the income statement to offset the future income statement effect of changes in the hedged risk. In order to apply this treatment, it must be demonstrated that the derivative has been and will continue to be an effective hedge of the hedged risk within the debt item. Changes in the fair value of all derivatives are recognised in the income statement, except for derivatives that are designated and effective in terms of cashflow hedging relationships, in which case the gains and losses are deferred in equity.

As a result of IAS 39 being applied, the fair value of debt, derivatives and deferred income reduced by £11.2 million, deferred tax increased by £3.3 million and reserves increased by £7.2 million, at 1 April 2005.

**Investment properties**

IAS 40 'Investment Property'

Under IAS 40, a property that is held to earn rentals or for capital appreciation or both should be classified as investment property. The key change from UK GAAP (SSAP19) is that under IAS 40, properties owned by one Group entity, but let and occupied by another should be treated as investment properties.

Where a property is classified as an investment property it may be held at fair value or depreciated cost. The Group policy is to use the depreciated cost model, using fair values as deemed cost on initial adoption. The revaluation undertaken to determine the fair value of those assets now deemed investment properties has resulted in a decrease to net assets of £4.4 million compared with UK GAAP.

**Consolidated Statement of Cash Flows**

There were no material adjustments to the Consolidated Statement of Cash Flows on adoption of IFRS. Small movements attributed to the implementation of IAS 19 in relation to the Defined Benefit Schemes have affected the position of items within operating cash flows but the net overall effect is £ nil.

## NOTES TO THE ACCOUNTS

For the year ended 31 March 2006

## 29. RELATED PARTY TRANSACTIONS

**Group**

The Group receives and pays interest and recharges to other businesses in the United Utilities PLC Group, which are related parties, in the normal course of business.
