Notes to the Financial Statements for the year ended 31st December 2010

1 Accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below

(a) Basis of accounting

These financial statements have been prepared on a going concern basis under the historical cost convention, the accounting policies set out below, which have been applied consistently, and in accordance with the Companies Act 2006 and applicable UK Accounting Standards

(b) Foreign currency transactions

Foreign currency transactions are booked in local currency at the exchange rate ruling on the date of the transaction, or at the forward rate if hedged by forward exchange contract. Foreign currency monetary assets and liabilities are translated into local currency at rates of exchange ruling at the balance sheet date, or at the forward rate. Exchange differences are included in operating profit. On consolidation, assets and liabilities of the overseas branches are translated into Sterling at rates of exchange ruling at the balance sheet date. Exchange adjustments arising when the opening net assets and profits for the year retained by the branch are translated into Sterling are recorded in reserves.

(c) Revenue

Revenue is recognised in the profit and loss account when goods or services are supplied to, or made available for collection by, external customers or other Group subsidiaries against orders received. In addition, where no supply of goods have been made on contracts which reserve the right to use production capacity, revenue is released on a periodic basis over the life of the contract. Turnover represents the net invoice value after the deduction of discounts given at the point of sale, and accruals for estimated future rebates and returns. The methodology and assumptions used to estimate rebates and returns are monitored regularly in the light of historical information and past experience. Value added tax and other sales taxes are excluded from revenue.

(d) Expenditure

Expenditure is recognised in respect of goods and services received when supplied in accordance with contractual terms. Provision is made when an obligation exists for a future liability in respect of a past event and where the amount of the obligation can be reliably estimated. Advertising expenditure is charged to the profit and loss account as incurred. Shipment costs on inter-company transfers are charged to cost of sales. Restructuring costs are recognised in respect of the direct expenditures of a business reorganisation where the plans are sufficiently detailed and well advanced, and where appropriate communication to those affected has been undertaken at the balance sheet date.

(e) Tangible fixed assets

Tangible fixed assets are stated at historic purchase cost less provisions for depreciation or impairment. Cost includes the original purchase price of the asset and the costs attributable to bringing the asset to its working condition for its intended use.

The costs of acquiring and developing computer software for internal use and internet sites for external use are capitalised as a tangible fixed asset where the software or site supports a significant business system and the expenditure leads to the creation of a durable asset

Depreciation is calculated to write off the cost of tangible fixed assets, in equal annual instalments over their expected useful lives. The normal expected useful lives of the major categories of tangible fixed assets are

Plant and machinery 3 to 10 years
Fixtures and equipment 3 to 10 years
Motor vehicles 4 years
Computer software 3 years

On disposal of a tangible fixed asset, the cost and related accumulated depreciation are removed from the financial statements and the net amount, less any proceeds, is taken to the profit and loss account

(f) Impairment of fixed assets

The carrying values of fixed assets are reviewed for impairment when there is an indication that the assets might be impaired. Any provision for impairment is charged against profit in the year concerned.

(g) Leases

All leases are operating leases and the annual rentals are charged against profit on a straight-line basis over the lease term

(h) Stocks

Stocks are included in the financial statements at the lower of cost (including manufacturing overheads, where appropriate) and net realisable value. Cost is generally determined on a first in, first out basis

Notes to the Financial Statements for the year ended 31st December 2010 (continued)

(ı) Taxatior

Current tax is provided at the amounts expected to be paid applying tax rates that have been enacted or substantially enacted at the balance sheet date

The Company accounts for taxation which is deferred or accelerated by reason of timing differences which have originated but not reversed by the balance sheet date. Deferred tax assets are only recognised to the extent that they are considered recoverable against future taxable profits. Deferred tax on the retained earnings of overseas subsidiaries is only provided when there is a binding commitment to distribute past earnings in future periods.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse. Deferred tax liabilities and assets are not discounted

These costs are expected to be incurred over the period from 2007 to 2013.

The analysis of costs incurred under this programme in 2010 and 2009 is as follows

On 22 June 2010 the Chancellor announced that the main rate of UK corporation tax will reduce from 28% to 27% with effect from 1 April 2011. This tax change became substantively enacted in July 2010 and hence the effect of the change on the deferred tax balances has been included in the figures above.

On 23 March 2011 the Chancellor announced an additional 1% reduction in the main rate of UK corporation tax to 26% with effect from 1 April 2011. The effect of the change would create an additional adjustment of approximately £137k. This has not been reflected in the figures above as it was not substantively enacted at the balance sheet date.

Further changes to the rate are proposed to reduce the rate by one per cent per annum to 23 per cent by 1 April 2014, but have not yet been substantively enacted and therefore are not included in the figures above

The overall effect of the further changes from 27 per cent to 23 per cent, if these applied to the deferred tax balance at 31 December 2010, would be to reduce the deferred tax asset by approximately £547,000
