

COMPANY No. 2435910

114 MARINE PARADE (BRIGHTON) LIMITED

DIRECTORS REPORT

The Directors hereby submit the Annual Report and Accounts of the Company for the period 01-04-95 to 31-03-96.

The Directors of the Company during the financial year and their interest in the shares of the Company were:-

Mr P A Whitehouse (Basement flat)	No. of Shares 13
Ms S Parker (Flat 7)	No. of Shares 13
Mr J Roberts (Flat 6)	No. of Shares 13
Mr D A Adamson (Flat 5)	No. of Shares 13
Mr A Millar (Flat 4)	No. of Shares 13
Mr D Webb (Flat 3)	No. of Shares 13
Ms D Zdzienski (Flat 2)	No. of Shares 13
Miss P Toomey (Flat 1)	No. of Shares 13

During the above financial year, the Company has been dormant within the meaning of the Companies Act, 1985, Section 252, there having been no significant accounting transactions of the Company required to be entered in its accounting records. Any expenses have been met by the Directors personally.

BALANCE SHEET at 31st March 1996

ASSETS 104
LIABILITIES NIL

Authorised Share Capital - 104 Shares of £1.00

SHARE CAPITAL ISSUED AND FULLY PAID

104 Ordinary Shares of £1.00

Signed.....for and on behalf of all Directors

D A ADAMSON Joint position of Company Secretary / Director

• *Journal of the American Medical Association*, 2000; 284: 1039-1044

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Lichtenthaler and Sponholz (1980). The total chlorophyll content was determined by the method of Arar and Johnson (1977). The carotenoid content was determined by the method of Lichtenthaler and Sponholz (1980). The total carotenoid content was determined by the method of Arar and Johnson (1977). The total protein content was determined by the method of Lowry et al. (1951). The total lipid content was determined by the method of Bligh and Dyer (1959). The total carbohydrate content was determined by the method of Dubois and Gilles (1950). The total nucleic acid content was determined by the method of Burton (1956). The total ash content was determined by the method of AOAC (1970). The total water-soluble carbohydrate content was determined by the method of Dubois and Gilles (1950). The total water-soluble protein content was determined by the method of Lowry et al. (1951). The total water-soluble lipid content was determined by the method of Bligh and Dyer (1959). The total water-soluble nucleic acid content was determined by the method of Burton (1956). The total water-soluble ash content was determined by the method of AOAC (1970).

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971) using a Shimadzu 1601 UV-Visible Spectrophotometer.

the β phase of the polymer. The β phase is the most important phase in the polymer, as it is the phase that is most responsible for the mechanical properties of the polymer. The β phase is the phase that is most responsible for the mechanical properties of the polymer.

1. *Phragmites australis* (Cav.) Trin. ex Steud.

1. *Chlorophyll a* and *Chlorophyll b* were determined by the method of Arar and Collins (1971) using a Shimadzu 1601 UV-Visible Spectrophotometer. The concentration of chlorophyll was expressed in $\mu\text{g mL}^{-1}$.

• *Chlorophyll a* (Chl a) is the primary photosynthetic pigment in all photosynthetic organisms. It is a green pigment that absorbs light energy in the blue and red regions of the visible spectrum. Chl a is found in the thylakoid membranes of chloroplasts in plants and algae, and in the cytoplasm of photosynthetic bacteria.

1. *Chrysomelids* (100%)
