### **Principal activities and business review**

The principal activity of the company during the year was, and will continue to be, the provision of digital cable, fixed-line telephony, broadband internet and other telecommunication services as well as running some of the telecommunication services over which they are provided

The company is a wholly owned subsidiary undertaking of Virgin Media Inc (Virgin Media) which is itself a wholly owned subsidiary of Liberty Global plc (Liberty Global)

The Virgin Media Inc consolidated group (the group) operates under the Virgin Media brand in the United Kingdom (U K )

The group provides digital cable, broadband internet, fixed-line telephony and mobile services in the U K to both residential and business-to-business (B2B) customers. The group is one of the U K 's largest providers of residential digital cable, broadband internet and fixed-line telephony services in terms of the number of customers. The group believes its advanced, deep-fibre cable access network enables us to offer faster and higher quality broadband services than our digital subscriber line, or DSL, competitors. As a result, it provides our customers with a leading, next-generation broadband service and one of the most advanced interactive TV services available in the U K market.

The group provides mobile services to our customers using a third-party network through an MVNO arrangement.

In addition, through the Virgin Media Business brand, the group offers a broad portfolio of B2B voice, data, internet, broadband and managed services solutions to small businesses, medium and large enterprises and public sector organisations in the U K.

At 31 December 2014, the group provided services to approximately 5.0 million residential cable customers on its network. The group is also one of the largest mobile virtual network operators by number of customers, providing mobile telephony services to 2.1 million contract mobile customers and 1.0 million prepaid mobile customers over third party networks. At 31 December 2014, 84% of residential customers on the group's cable network received multiple services and 66% were "triple-play" customers, receiving broadband internet, digital cable and fixed-line telephony services from the group.

Liberty Global is the largest international cable company with operations in 14 countries. At 31 December 2014, Liberty Global's market-leading triple-play services are provided through next-generation networks and innovative technology platforms that connected 27 million customers subscribing to 56 million television, broadband internet and telephony services. ## Strategic Report (continued)

### Year ended 31 December 2014

#### Key performance indicators (KPI's)

The company's key financial and other performance indicators for the year are considered below

	2014	2013	Comments
Turnover (£000)	26,631	26,038	Turnover has increased by 2.3%, primarily due to an increase in the number of broadband internet, digital cable and telephony subscribers, and selective price increases
Operating profit before exceptional items (£000)	5,298	3,430	Operating profit before exceptional items has increased by 54.5%, primarily due to a decrease in administrative expenses, driven by a decrease in management recharges from fellow group undertakings, and an increase in turnover

Selected statistics for residential cable customers served by the company at 31 December 2014 and 31 December 2013 are shown in the table below

	2014	2013
Products		
Digital cable	32,500	32,200
Fixed-line telephone	36,000	35,300
Broadband internet	36,900	35,800
Total	105,400	103,300
Total customers	40,000	39,400
Products per customer	2.64	2.62

Accordingly, a subscriber who receives both telephone and digital cable services counts as two products. Products may include subscribers receiving some services for free or at a reduced rate in connection with promotional offers.

The company reported a decrease in net current liabilities and an increase in net assets for the year ended 31 December 2014 as a result of normal operations. During the year, no new external finance was arranged and there was no movement in the called up equity share capital of the company. Operations were financed through the company's inter-company balances with fellow group undertakings.

## Notes to the Financial Statements

Year ended 31 December 2014

### 1. Accounting policies

A summary of the principal accounting policies is set out below. All accounting policies have been applied consistently, unless noted below.

#### **Basis of accounting**

The financial statements have been prepared under the historical cost convention in accordance with the Companies Act 2006, and applicable UK accounting standards.

#### **Fundamental accounting concept**

After making suitable enquiries and obtaining the necessary assurances from Virgin Media Inc, a wholly owned subsidiary of Liberty Global plc and the intermediate holding company which heads the Virgin Media group, that sufficient resources will be made available to meet any liabilities as they fall due should the company's income not be sufficient, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. As with any company placing reliance on other group entities for financial support, the directors acknowledge that there can be no certainty that this support will continue although at the date of approval of these financial statements they have no reason to believe that it will not do so. On this basis the directors believe that it remains appropriate to prepare the financial statements on a going concern basis.

#### **Cash flow statement**

The company is exempt from publishing a cash flow statement as permitted by FRS 1 "Cash flow statements (revised 1996)", as it is a wholly owned subsidiary of its ultimate parent company.

#### **Turnover**

Turnover represents the value of services provided, stated net of value added tax and discounts, and is attributable to continuing activities, being the provision of digital cable, fixed-line telephony, broadband internet and other telecommunication services and to run certain of the telecommunication systems over which they are provided. Turnover is all derived from operations in the United Kingdom and is recognised as the services are provided to customers. The directors consider this to be a single class of business.

#### **Tangible fixed assets**

Depreciation is provided on all tangible fixed assets, other than land, so as to write off the cost of a tangible fixed asset on a straight line basis over the expected useful economic life of that asset as follows:

Network assets	3 - 30 years
Other fixed assets	
- Freehold property	30 years
- Leasehold property	period of lease
- Other	3 - 12 years

No depreciation is provided on freehold land.

The carrying values of tangible fixed assets are reviewed for impairment when events or changes in circumstances indicate that the carrying value may not be recoverable.

#### **Capitalised labour**

Labour relating to the design, construction and development of the network, capital projects, and related services have been capitalised. Depreciation of capitalised labour is provided on a straight-line basis over 15 years or the life of the relevant assets.

### 1. Accounting policies *(continued)*

#### Deferred tax

Deferred tax is recognised, as appropriate, in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions

- provision is made for deferred tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold, and

- deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date

#### Classification of shares as debt or equity

The company has financial instruments in the form of preference shares. As a condition of the shares there is a contractual obligation to accrue for dividends, regardless of performance. As this condition is potentially unfavourable the preference shares have been classified in the Balance Sheet as financial liabilities, rather than equity, in accordance with FRS 25 "Financial Instruments: Disclosure and Presentation".

Finance payments associated with financial liabilities are dealt with as part of interest payable and similar charges.

#### Trade and other debtors

Trade and other debtors are stated at their recoverable amount. Provision is made when the amount receivable is not considered recoverable and the amount is fully written off when the probability for recovery of a balance is assessed as being remote.

#### Future accounting pronouncements

From 1 January 2015 the company will be required to adopt FRS 101 or FRS 102.

### 2. Operating profit (*continued*)

The group's inter-company funding arrangements are managed centrally. Recoverability of inter-company receivables is assessed annually. The provision for non-recoverability may increase or decrease as a result of that review. Based on the impairment review of inter-company indebtedness as at 31 December 2014, the directors concluded that no change in the provision against amounts due from group undertakings was required (2013 - release of £91,000).

The directors received no remuneration for qualifying services as directors of this company. All directors' remuneration is paid by and disclosed in the financial statements of Virgin Media Limited.

Certain expenses are specifically attributable to the company. Where costs are incurred by other group companies on behalf of the company, expenses are allocated to the company on a basis that, in the opinion of the directors, is reasonable.

### 3. Staff costs

The company does not have any directly employed staff but is charged an allocation of staff costs by the group. Details of staff numbers and staff costs of the group are disclosed in the group accounts of Virgin Media Finance PLC.

The tax assessed on the profit on ordinary activities for the year is lower than (2013 - lower) the standard rate of corporation tax in the UK of 21.49% (2013 - 23.25%). The differences are explained below

### Factors affecting current and future tax charges

A further reduction to 20% (effective from 1 April 2015) was substantively enacted on 2 July 2013. This will reduce the company's future current tax charge accordingly. The deferred tax assets have been calculated using the enacted rate of 20% (2013 - 20%).
