1. The first step in the process is to identify the problem. This involves gathering information about the situation and determining what needs to be solved.

100

The first two studies were conducted by researchers at the University of Michigan, who found that people who had been exposed to violence during childhood were more likely to have experienced trauma than those who had not. The third study was conducted by researchers at the University of California, Los Angeles, who found that people who had been exposed to violence during childhood were more likely to have experienced trauma than those who had not.
