### STRATEGIC REPORT FOR THE YEAR ENDED 31 DECEMBER 2021

---

The Directors present their Strategic report on Cockpit Holdings Limited (the 'Company') for the year ended 31 December 2021.

#### Principal activities

The Company is a member of the WPP plc Group (the 'Group'). The Company's principal activity is to act as an investment holding company.

#### Future developments

The Directors do not envisage any major change to the nature of the business in the foreseeable future.

#### Business review

The Company made a profit for the year ended 31 December 2021 of £26,000 which will be transferred to reserves (2020: £nil profit or loss).

From April 2021, following an update to Group policy, the Company's syndicated banking arrangements with the Group have been restructured into 'zero balancing' pooling arrangements with a fellow Group company acting as the cash pool leader of these cash pools within the UK. All such receivables and/or payables shall be short term in nature and the Company, as a participant in the cash pooling arrangements, can transact as normal on its bank accounts, notwithstanding that any cash and/or overdraft will be held by the cash pool leader.

The Directors are of the opinion that the current level of activity and performance is sustainable, due to the positive financial position of the Company and will remain so for the foreseeable future. Further details are provided in the "Going concern and liquidity risk" section.

#### Dividends

The Company did not pay any dividend during current year or prior year (2020: £nil). No final dividend has been declared since the balance sheet date.

#### Going concern and liquidity risk

The Directors have assessed the ongoing business activities and the potential impact that the Covid-19 pandemic, Russian invasion of Ukraine and general global economic conditions may have on the liquidity, performance and financial position of the Company for at least the next 12 months from the date of signing the financial statements.

As the Company is primarily an investment holding company, there is no expected impact to the financial position of the Company as a result of Covid-19 or other general global economic conditions.

As at 31 December 2021, the Company has net current assets of £10,409,000 and net assets of £248,252,000 and can therefore meet its short and long-term obligations as they fall due.

After making enquiries, the Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for at least the next 12 months from the date of signing the financial statements. Additionally, the Company is a subsidiary of WPP plc and is supported by the overall WPP plc financing arrangements via the cash pooling arrangements.

The Directors therefore continue to adopt the going concern basis of accounting in preparing the financial statements.

### 2.4 Going concern

The Directors have assessed the ongoing business activities and the potential impact that the Covid-19 pandemic, Russian invasion of Ukraine and general global economic conditions may have on the liquidity, performance and financial position of the Company for at least the next 12 months from the date of signing the financial statements.

As the Company is primarily an investment holding company, there is no expected impact to the financial position of the Company as a result of Covid-19 or other general global economic conditions.

As at 31 December 2021, the Company has net current assets of £10,409,000 and net assets of £248,252,000 and can therefore meet its short and long-term obligations as they fall due.

Additionally, the Company is a subsidiary of WPP plc and is supported by the overall WPP plc financing arrangements via the cash pooling arrangements.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

---

#### 2. Accounting policies (continued)

##### 2.6 Foreign currency translation (continued)

At each period end foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined.

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

##### 2.7 Interest income

Interest income is recognised in profit or loss using the effective interest method.

##### 2.8 Taxation

Tax is recognised in profit or loss except that a charge attributable to an item of income and expense recognised as other comprehensive income or to an item recognised directly in equity is also recognised in other comprehensive income or directly in equity respectively.

The current income tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the balance sheet date in the countries where the Company operates and generates income.

##### 2.9 Investments in subsidiaries

Investments in subsidiaries are measured at cost less accumulated impairment.

##### 2.10 Investments in associates

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

Associates are held at cost less impairment.

##### 2.11 Trade and other receivables

Short term debtors are measured at transaction price, less any impairment. Loans receivable are measured initially at fair value, net of transaction costs, and are measured subsequently at amortised cost using the effective interest method, less any impairment.

Trade and other receivables are carried at original invoice amount less any provisions for doubtful debts.

Provisions are made where there is evidence of a risk of non-payment, taking into account ageing, previous experience and general economic conditions. When a trade or other receivable is determined to be uncollectable it is written off, firstly against any provisions available and then to the income statement.

### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2021

---

#### 2. Accounting policies (continued)

##### 2.11 Trade and other receivables (continued)

Subsequent recoveries of amounts previously provided for are credited to the income statement. Long-term receivables are discounted where the effect is material.

##### 2.12 Cash and cash equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are highly liquid investments that mature in no more than three months from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

##### 2.13 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new ordinary shares or options are shown in equity as a deduction, net of tax, from proceeds.

#### 3. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, the Directors are required to make judgements (other than those involving estimations) that have a significant impact on the amounts recognised and to make estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

##### Critical accounting estimates and assumptions

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are addressed below:

##### *Impairment of investments*

Investments in subsidiaries and associates are held at cost less accumulated impairment losses. Annual impairment tests are carried out to ascertain if the carrying value of investments are impaired. These tests comprise a comparison between the carrying value of investment in subsidiary and associates and the net asset value of the subsidiary and associates. In some instances, valuations of subsidiary companies and associates are prepared. Valuations for impairment tests are based on established market multiples or risk-adjusted future cash flows over the estimated useful life of the asset, where limited, discounted using appropriate interest rates.

The assumptions relating to future cash flows, estimated useful lives and discount rates are based on business forecasts and are therefore inherently judgemental. Future events could cause the assumptions used in these impairment tests to change with a consequent adverse effect on the future results of the Company.

In the opinion of the Directors there are no critical judgements that have been made in the process of applying the accounting policies.
