PRINCIPAL RISKS AND UNCERTAINTIES

From the perspective of the Company, the principal risks and uncertainties are integrated with the principal risks of Smiths Group plc and are not managed separately. NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 JULY 2009

1 ACCOUNTING POLICIES

Basis of preparation

The accounts have been prepared in accordance with the Companies Act 2006 and all applicable accounting standards in the United Kingdom (UK GAAP)

These accounts have been prepared on a going concern basis and under the historical cost convention

The Directors consider that the Company continues to rely on the support of its parent Company. The parent Company has given assurances that adequate resources will be made available to the Company to ensure that it will continue in operation for the foreseeable future. Therefore, the Directors have continued to adopt the going concern basis in preparing the accounts.

These financial statements are presented in pounds sterling because that is the currency of the primary economic environment in which the Company operates

Financial assets

Financial assets are initially recognised at transaction price when the Company becomes party to contractual obligations. The transaction price used includes transaction costs unless the asset is being fair valued through the profit and loss account.

The classification of financial assets depends on the purpose for which the assets were acquired Management determines the classification of an asset at initial recognition and re-evaluates their designation at each reporting date. Assets are classified as loans and receivables, or financial assets where changes in fair value are charged (or credited) to the profit and loss account.

The subsequent measurement of financial assets depends on their classification. Loans and receivables are measured at amortised cost using the effective interest method. Financial assets where changes in fair value are charged (or credited) to the profit and loss account are subsequently measured at fair value. Realised and unrealised gains and losses arising from changes in the fair value of the 'financial assets at fair value through profit and loss' category are included in the profit and loss account in the period in which they arise

Financial assets are derecognised when the right to receive cash-flows from the assets has expired or has been transferred, and the Company has transferred substantially all of the risks and rewards of ownership

Financial liabilities

Borrowings are initially recognised at the fair value of the proceeds, net of related transaction costs. These transaction costs and any discount or premium on issue are subsequently amortised under the effective yield method through the profit and loss account as interest over the life of the loan, and added to the liability disclosed in the balance sheet. Related accrued interest is included in the borrowings figure.

Borrowings are classified due within one year unless the Company has an unconditional right to defer settlement of the liability for at least one year after the balance sheet date

Current taxation

The tax on profit on ordinary activities includes amounts paid or received for Group relief in respect of tax losses claimed and surrendered in the current period. All current tax liabilities have been assumed by Smiths Group plc, the ultimate parent Company
