#### Notes to the abbreviated accounts

#### Year ended 30 April 2005

#### 1. Accounting policies

#### **Basis of accounting**

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective June 2002).

#### Consolidation

In the opinion of the directors, the company and its subsidiary undertakings comprise a small group. The company has therefore taken advantage of the exemption provided by Section 248 of the Companies Act 1985 not to prepare group accounts.

#### Development costs, patents and trademarks

Development costs incurred on specific projects are capitalised when recoverability can be assessed with reasonable certainty, and are amortised in line with expected sales arising from the projects on a straight line basis. All other development costs are written off in the period of expenditure.

The nature of the products is becoming computer based, leading to potentially shorter useful working lives. The life cycles of the products will be reviewed and written off over a shorter period where appropriate.

#### Amortisation of intangible assets

Amortisation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows:

Development expenditure Patents and trademarks

- 3 - 5 years - 3 years

#### Fixed assets

All fixed assets are initially recorded at cost.

#### Depreciation

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows:

Freehold Property

- Over 50 years

Motor vehicles, plant and machinery

20% - 25% straight line

An amount equal to the excess of the annual depreciation charge on revalued assets over the notional historical cost depreciation charge on those assets is transferred annually from the revaluation reserve to the profit and loss reserve.

#### Stocks

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

#### Work in progress

Work in progress is valued on the basis of direct costs plus attributable overheads based on normal level of activity. Provision is made for any foreseeable losses where appropriate. No element of profit is included in the valuation of work in progress.

#### Deferred taxation

Provision is made, under the liability method, to take account of timing differences between the treatment of certain items for accounts purposes and their treatment for tax purposes. Tax deferred or accelerated is accounted for in respect of all material timing differences.
