Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. 1 Accounting policies

The financial statements have been prepared under the historical cost convention.

The following principal accounting policies have been applied:

Cash flow statement

The Financial Reporting Standard for Smaller Entities (effective April 2008) does not require the preparation of a cash flow statement. Accordingly, the company has not prepared one.

Goodwill

Goodwill arising on an acquisition of a trade is the difference between the fair value of the consideration paid and the fair value of the assets and liabilities acquired. Positive goodwill is capitalised and amortised through the profit and loss account over the directors' estimate of its useful economic life which ranges from 5 years.

Negative goodwill is released to the profit and loss account in the periods in which the fair values of the non-monetary assets purchased are recovered, whether through depreciation or sale.

The profit or loss on disposal of a business includes any goodwill arising on acquisitions which was previously eliminated against reserves.

Turnover

Turnover represents sales to external customers at invoiced amounts less value added tax or local taxes on sales.

Depreciation

Depreciation is provided to write off the cost, less estimated residual values, of all tangible fixed assets, except for investment properties and freehold land, evenly over their expected useful lives. It is calculated at the following rates:

Plant and machinery	- straight line over 3 - 5 years
---------------------	----------------------------------

Stocks

Stocks are valued at the lower of cost and net realisable value. Cost is based on the cost of purchase on a first in, first out basis. Net realisable value is based on estimated selling price less additional costs to completion and disposal.

Leased assets

Where assets are financed by leasing agreements that give rights approximating to ownership (finance leases), the assets are treated as if they had been purchased outright. The amount capitalised is the present value of the minimum lease payments payable over the term of the lease. The corresponding leasing commitments are shown as amounts payable to the lessor. Depreciation on the relevant assets is charged to the profit and loss account over the shorter of estimated useful economic life and the period of the lease.

Lease payments are analysed between capital and interest components so that the interest element of the payment is charged to the profit and loss account over the period of the lease and is calculated so that it represents a constant proportion of the balance of capital repayments outstanding. The capital part reduces the amounts payable to the lessor.

All other leases are treated as operating leases. Their annual rentals are charged to the profit and loss account on a straight-line basis over the term of the lease.

Pension costs

Contributions to the company's defined contribution pension scheme are charged to the profit and loss account in the year in which they become payable.

2 Turnover

Turnover arises solely within the United Kingdom.
