REPORT OF THE DIRECTORS

for the year ended 31 December 1999

Year 2000

An issue affecting businesses is the inability of many computer systems to process the year 2000 and beyond. The Company's ultimate parent established a global process to address the problems in 1996. Objectives were established to deal with all aspects of the problem, covering business computer systems, plant floor systems, buildings, suppliers, dealers, vehicle components and end user computing. The company has been involved in all projects relevant to its operations. Globally, all of the goals set for 1998 were completed and it is expected that all systems will be fully compliant by the third quarter 1999. A global committee is co-ordinating the set up of contingency plans and implementing pre-emptive strategies. There remains risks to the company such as the inability of a supplier to be able to supply goods, service or energy. The detailed contingency plans were developed during the first quarter of 1999 and are now in the process of being validated.

As a result of group registration for VAT purposes, the company is contingently liable for VAT liabilities arising in other companies in the Jaguar Group.

Note 13:

Pensions

The Company participates in the contracted-out externally funded defined benefit group pension arrangements of Jaguar Limited, the Jaguar Pension Plan (the Plan). The assets of the Plan are held in a trust and kept separately from those of the Company.

The pension cost is assessed over the group as a whole and is charged to the profit and loss account so as to spread the cost of pension over employees' working lives with the Company. The pension cost for the year was £11.0m (1998: £11.1m)

The cost of the Plan was assessed in accordance with the advice of the consulting actuaries to the Plan, Bacon & Woodrow, using the Projected Unit Method. The latest actuarial assessment of the Plan was at 5 April 1999, which assumed a 6% per annum rate of return on investments, a 4.5% per annum rate of increase in pensionable earnings, a 3% per annum rate of increase in pensions in excess of Guaranteed Minimum Pensions (GMPs), and a 3% per annum rate of increase on GMPs accruing from April 1998.

At the date of the last actuarial assessment of the Plan, the market value of the assets was £650m, and the actuarial value of the assets was equivalent to 104.0% of the actuarial value of the past service liabilities. This excess has arisen primarily from investment returns being higher than assumed and pay and pension being lower than assumed.
