Strategic report

The Directors present their strategic report for the year ended 31 December 2021.

Principal activity

The Company is a contract research organisation (CRO) focussed primarily on providing outsourced early stage drug discovery services to a global customer base of pharmaceutical and biotech companies. The Company is a limited company incorporated and domiciled within the UK.

Business Review

In 2021 the Company achieved revenue of £51.0m (2020: £45.3m) and gross profitability of £5.3m (2020: £6.8m). The Company reported profit before tax of £0.2m (2020: £3.8m). The Company also continued to generate cash securing £3.3m (2020: £7.2m) from operations. The Company's robust liquidity position has been achieved with zero debt.

The overall growth in revenues was 12.6% and amounted to £5.7m. Gross margin was 10% for 2021.

The profitability in the year was effected by the write down of goodwill of £1,049k and the expansion of its infrastructures at its sites in Abingdon in the UK. As part of the expansion, a new *in vitro* biology team has been established in the year. There were significant upfront costs associated with this – recruiting and training the team – with income expected to flow in the future, from this investment. In addition, investment in new Chemistry labs in the year has increased the depreciation costs, impacting the margin, but is expected to have positive future impact on the gross margin.

2021 was therefore a year of continuing investments in the capacity and capabilities of the Company, with future outlook in mind.

Looking to this outlook, for the past decade, the global pharmaceutical industry has been struggling with declining efficiency in introducing new products to the market. As a result, pharmaceutical companies of all sizes have been and continue to be under pressure to re-evaluate and adjust their business strategies. In particular by accessing innovative technologies such as AI and ML and pursuing innovative treatment modalities, such as personalised medicine, cell therapy and gene therapy. Moreover, there is an increased focus on early prediction parameters to determine the success or failure of new drugs. In order to access innovation in a capital –efficient manner, industry players increasingly rely in external sources, expertise and capacity.

The Evotec group believes that market demand for external innovation will continue to drive demand for its assets and services, facilitate additional collaboration opportunities and potentially improve the volume and terms of partnerships that the Evotec group is able to secure. The Evotec group is convinced that this trend will increase the likelihood of strategic, integrated, long-term collaborations and drive the Company's continued growth.

The Directors have a strong understanding of the current performance of the Company and are confident of the outlook going forward. Details of the results of the year are set out in the statement of income on page 15.

Strategic report (continued)

Principal risks and uncertainties

In common with all businesses, the Company faces certain risks and uncertainties. Apart from general economic risks that are discussed in more detail in note 18 (Financial instruments), the business is subject to risks more specific to the pharmaceutical industry.

The last few years have seen increased interest by big pharmaceutical companies in finding ways to reduce the costs inherent in drug discovery. This provides both opportunity for the Company as an established contract research organisation (CRO) with a strong track record and competitive cost base but also risk in that the developing strength of CROs in low cost countries and regions such as south east Asia, India and South America provide an increasingly realistic option for outsourcing of early stage research.

The Company continues to be well positioned to manage this competition risk, being recognised as a respected brand representing the highest quality of early drug discovery research available to the market. The Company has built a strong reputation through a history of achieving technically challenging results for its customers. Furthermore the Company is increasingly being seen as a critical component of the customers internal drug discovery program with a significant influence in the direction of many of their early stage pipeline candidates.

The Company is also subject to a degree of customer risk. The risk exists that the Company can be exposed to a significant reduction in revenues, should a customer terminate its contract. This risk is managed at group level through the gradual build-up of new business so that when a major contract is completed there is current customer demand to increase outsourcing contracted levels.

Analysis of financial key performance indicators

The Company measures its performance on a number of key performance indicators, including revenue, gross margin, profit before tax and cash generation as well as the strength of the sales order book going forward. Across the year the Company has seen growth in its underlying revenues and made a significant operating profit for the reasons outlined above. The Company continues to have confidence in the future and anticipates stability in both of these key indicators in 2022 at the underlying operations level. The Company continues to be cash generative and the 2022 sales order book is showing a strong position against budget.

Strategic report (continued)

Streamlined Energy and Carbon Reporting

Our Environment:

Evotec (UK) is a part of the Evotec SE Group. Evotec SE in December 2020 signed the pledge to the Science Based Targets initiative (SBTi) and is now officially listed as one of the companies committed to the transition to a low-carbon economy; to set targets for reducing greenhouse gas emissions in alignment with the goals of the Paris Agreement – to limit global warming to well-below 2°C above pre-industrial levels and pursue efforts to limit warming to <1.5°C.

What does this mean?

During 2021 the Company has continued to invest in energy saving technologies in our existing facilities; including LED lighting, Variable Air Volume (VAV) controllers on our laboratory fumehood extracts and a new high efficiency variable burner controlled boiler. In addition to this, our scientists delivered a 'shut the sash' campaign which has been communicated to their peers to reinforce the environmental importance of this simple behaviour.

However the most significant change took place in our newest facility; Building 95 which was acquired as a shell and core in January 2021, and the design was modified from conventional gas heating, to Air Source Heat Pumps to make the building entirely electric. Whilst currently under construction, when operational (June 2022) this building will accommodate over 200 people, and this design will avoid 800tCO₂e annually.

When comparing 2020 with 2021, the energy consumed (kWh) increased by 11.3% from 10,430 MWh in 2020, to 11,608 MWh in 2021, yet carbon emissions (tCO₂e) reduced by >63%. This is due to a further reduction in the Governments Electrical conversion factor from 2020-21 and sourcing renewable energy. In addition the tCO₂e per £m and per employee have both reduced due to the ongoing growth of the business, which has seen the headcount increase from 417 to 470 and our leased footprint increase from 21,179m² to 25,187m².

Greenhouse Gas (GHG) Emissions:

We report emissions as defined by the GHG protocol as follows:

Scope 1 (Direct emissions from controlled or owned sources – which includes those from combustion of fuel and operation of facility)

Scope 2 (Indirect emissions from generation of purchased energy)

Scope 3 (Other indirect emissions – Business travel)

Greenhouse Gas Emissions	kWh (2020)	t CO ₂ e (2020)	Revenue £m (2020)	t CO ₂ e per £m revenue (2020)	t CO ₂ e per employee (2020)
Scope 1	4,716,473	953			
Scope 2	5,714,057	1,442			
Total Emissions (Scope 1&2)	10,430,530	2,395	£45.264	52.9	5.7
Scope 3		2.5			

Greenhouse Gas Emissions	kWh (2021)	t CO ₂ e (2021)	Revenue £m (2021)	t CO ₂ e per £m revenue (2021)	t CO ₂ e per employee (2021)
Scope 1	4,875,484	1,180			
Scope 2	5,767,081	344			
Total Emissions (Scope 1&2)	11,608,160	1,524	£50.957	29.9	3.2
Scope 3		1.7			

Strategic report (continued)

Note 1: One of our Facilities comprises shared space, thus energy purchased (Electric & Gas) defined as Scope 2 with consumption (kWh) calculated on % leased space for last 12 billed months.

Scope & Methodology:

As Evotec (UK) is a part of Evotec (SE) we will adhere to the recommendations of the SBTi, which requires emissions reporting and tracking according to the internationally accepted GHG Protocol Corporate Accounting and Reporting Standard. The process of setting targets will be conducted in the course 2022.

Until these targets are established, in an effort to reduce our CO2 footprint, we have started to collect emissions data. Evotec's (UK) GHG emissions (CO2 Scope 1 and Scope 2 related to consumption of electricity and natural gas) decreased from 2,395 tonnes of CO2 per year in 2020, to 1,524 in 2021.

In October 2020 Evotec changed energy suppliers, and opted for our Electrical consumption to be sourced from renewable energy. Thus we have guarantees of origin certificates to demonstrate that our supplier has purchased or generated the equivalent amount of electricity from renewable energy sources and as such can report a market-based emissions factor, as part of the GHG Protocol, of zero grams CO2 per kWh. This reduction was not applied to quarter 4 in 2020, but has been applied to 2 of our large laboratory buildings for the entirety of 2021) thus explaining the significant reduction in scope 2 emissions.

The Scope 1 emissions are yet to include fugitive emissions from intentional / unintentional losses. Likewise, Scope 3 emissions thus far, are limited to mileage claimed for Business use of a private car, whereby car size and fuel type were unknown thus Average size and unknown fuel type values were used. Going forward we will look to include Water (supply & treatment) and Waste disposal.

Conversion factors for UK electricity, gas and other emissions are those published by the department for Business, Energy and Industrial Strategy. It should be noted that the electricity factor changed for each reporting year, and the relevant factor has been applied respectively to each year.

The reporting period corresponds to Evotec's 2021 financial year, which is the period from 01 January 2021 to 31 December 2021.

Section 172 (1) statement

In accordance with Section 172 (1) the directors act in a way they consider in good faith would be the most likely to promote the success of the company for the benefit of its members as a whole, and in doing so have regard (amongst other matters) to:

- a) The likely consequences of any decisions in the long term
- b) The interest of the company's employees
- c) The need to foster the company's business relationships with suppliers, customers and others
- d) The impact of the company's operations on the community and the environment
- e) The desirability of the company maintain a reputation for high standards of business conduct and
- f) The need to act fairly as between members of the company.

The board of directors is collectively responsible for ensuring that the Company's operations are aligned to our internal values and to focus on the short and long term strategically important decisions and activities of the company, including considering how the Company will act fairly with all key stakeholders. These stakeholders include our workforce, customers and suppliers.

Our Workforce

The Company's success is strongly connected to our employee's success based on their engagement and their own growth within their career with us. As a fast and continuously growing company on a long-term, we strive as employer to offer an attractive working environment which is carrying our three values, Innovation, Entrepreneurship and Collaboration

Strategic report (continued)

within our ONE Evotec culture focusing on the enablement and growth for and with our employees.

Human Resources (HR) is one of our Global Functions within the Enabling Functions at Evotec, reporting directly to the CEO since 2018. Global HR is responsible for the company-wide aligned approaches and standards, processes and regulations on all people and organisational development matters with specialized Centers of Expertise (CoE), Global Strategic HR Business Partnering as well as Global HR Operations with all local HR Teams in all countries where we have operations. The dynamic growth of the group requires a scalable organisation, and Global HR was therefore the first fully digitalised division, employing Workday as a people information system. Workday ensures that people processes are globally aligned and consistent within the Evotec Group. To evaluate our performance, we consider different KPIs related to our workforce, including but not limited to: overall headcount, turnover rate, recruitment counts, average FTE, year-end FTE, average total workforce, permanent workforce at the end of the financial year, non-permanent workforce at the end of the financial year, number of permanent employees hired, number of permanent employee departures, share of total workforce located in the country of the company headquarters, average age of the workforce, among others.

Our Customers

The vast majority of the Company's revenues is generated through alliances with Pharma and biotech companies. Of vital importance is the quality of its drug discovery solutions and its performance within its customer alliances and overall customer satisfaction.

Performance in this regard was measured on an overall Evotec SE group level by reference to capturing and analysing relevant indicators such as the total number, growth and size of customer alliances, the percentage of repeat business, average contract duration, new customer acquisition and the status of the company's sale and order book.

Our Suppliers

The quality and continuity of the Company's supplier relationships are key assets that are highly significant to the Company's success.

Our suppliers need to be assured they are treated fairly, and most importantly paid on time for the goods they supply to us.

The Company has identified key metrics, such as the percentage of payments made within payment terms and the average number of days before a supplier is paid following receipt of invoices, to monitor performance and identify any areas of improvement.

Directors' report

The Directors present their annual report and the audited financial statements of Evotec (UK) Limited (the Company), company registration number 2674265, for the year ended 31 December 2021. These financial statements have been prepared under International Financial Reporting Standards as adopted by the EU ('Adopted IFRS').

Research and development

The Company carries out research and development in connection with the principal activity of providing services to customers. The majority of the activities pursued by the Company are part of customers' research and development programs. In addition, internal research expenditure is incurred in order to develop technologies, processes and drug discovery programs and generally maintain and enhance the Company's services offering. Some research is also undertaken to investigate internal discovery programs with the intention of partnering these at a very early stage.

Financial instruments

The Company periodically enters into derivative contracts including foreign currency forward contracts. The objective of these transactions is to reduce the risk of exchange rate fluctuations of its foreign-currency-denominated cash flows. The Company does not enter into derivative contracts for trading or speculative purposes. No such contracts were in existence at 31 December 2021 or 31 December 2020.

Dividends paid

The directors do not recommend payment of a dividend for the year ended 31 December 2021 (2020: £nil).

Market value of land and buildings

The Company owns no land or buildings. In the opinion of the Directors, the value in use of the leasehold improvements put in place by the Company exceeds the book values of these assets at 31 December 2021.

Political and charitable donations

The Company made charitable donations of £nil during the year (2020: £nil). There were no political donations in the year (2020: £nil).

Procedure and practice on payment of creditors

The Company does not follow any code or statement on payment practice but values its relationships with its many suppliers and the Company's policy is to pay amounts due for settlement in accordance with the negotiated terms of trade.

Employment policies

The Directors are committed to maintaining and developing communication and consultation processes with employees. Employees are encouraged to be involved directly in the performance of the Company through a performance-related bonus scheme, long term incentive schemes, performance reviews and training and development opportunities. It is the policy of the Company that there should be no unfair discrimination in recruiting and promoting staff, including applicants who are disabled.

Directors' report (continued)

Directors and Directors' interests

The Directors who held office during the year were as follows:

Craig Johnstone
Werner Lanthaler
Enno Spillner
Christophe Muller

None of the Directors who held office at the end of the financial year had any notifiable interest in the shares of the Company. The interests of the Directors who are remunerated by the Company in shares, share options or long term incentive schemes of the parent company have these interests disclosed in the notes to these accounts.

Going Concern

At 31 December 2021, the Company has net assets of £39.7m and cash balances of £17.4m. The Directors consider that it is appropriate to prepare the financial statements on a going concern basis, due to the entity being profitable, possessing sufficient cash reserves and its assets exceeding its liabilities.

The directors have prepared cash flow forecasts for the company from the date of approval of the 2021 financial statements through to 31 July 2023 ("the going concern period"). These forecasts reflect an assessment of current and future market conditions and their impact on the company's future cash flow performance. The forecasts have been sensitized for a reduction in revenue through to 31 July 2023. The forecasts have also been reverse stress tested by significantly reducing revenue to the end of the review period. The forecasts indicate the company would still have sufficient cash to continue.

In assessing whether the going concern basis is appropriate the directors have taken account of all available information about the future up to and including 31 July 2023, which is at least 12 months from the date of approval of these financial statements. Accordingly, they continue to adopt the going concern basis in preparing the annual financial statements.

Directors' liabilities

The company has granted an indemnity to one or more of its directors against liability in respect of proceedings brought by third parties, subject to the conditions set out in section 234 of the Companies Act 2006. Such qualifying third party indemnity provision remains in force as at the date of approving the directors' report.

Disclosure of information to auditor

The Directors who held office at the date of approval of this Directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor are unaware; and each Director has taken all the steps that he ought to have taken as a Director to make himself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

STATEMENT OF DIRECTORS' RESPONSIBILITIES

The directors are responsible for preparing the Directors' report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with IFRSs as adopted by the EU and applicable law.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRSs as adopted by the EU; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

Independent auditor's report to the members of Evotec (UK) Limited

Opinion

We have audited the financial statements of Evotec (UK) Limited for the year ended 31 December 2021 which comprise the Statement of Income, Statement of Comprehensive Income, the Statement of Financial Position, the Statement of Changes in Equity, the Statement of Cash Flows, and the related notes 1 to 26, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and UK adopted international accounting standards.

In our opinion, the financial statements:

- give a true and fair view of the company's affairs as at 31 December 2021 and of its profit for the year then ended;
- have been properly prepared in accordance with UK adopted international accounting standards; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of 12 months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern.

Independent auditor's report to the members of Evotec (UK) Limited (continued)

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the strategic report and directors' report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit

Independent auditor's report to the members of Evotec (UK) Limited (continued)

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities statement set out on page 10, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the company and determined that the most significant relate to the reporting framework (International Accounting Standards and Companies Act 2006), the relevant tax compliance regulations in the United Kingdom, Data Protection Act 1998, Health and Safety at Work Act 1974, UK Bribery Act, Equality Act and Anti-Money Laundering Regulations.
- We understood how Evotec (UK) Limited is complying with those frameworks by making enquiries of those charged with governance and management to understand how the company maintains and communicate its policies and procedures in these areas. Our audit procedures were designed to either corroborate or provide contrary evidence, the results of which were followed up appropriately. We understood the potential incentive and ability to override controls. We considered management's attitude and tone from the top to embed a culture of honesty and ethical behaviour whereby a strong emphasis is placed on fraud prevention which may reduce opportunities for fraud to take place.

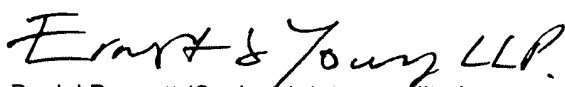

Independent auditor's report to the members of Evotec (UK) Limited (continued)

- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by meeting with management within various parts of the business to understand where they considered there was susceptibility to fraud. We considered the controls that the company has established to address risks identified, or that otherwise prevent, deter and detect fraud; and how senior management monitors those programs and controls. Where the risk was higher, which we determined to be within revenue recognition and revenue cut-off, we performed incremental audit procedures to address the identified fraud risk. These procedures included the deployment of tailored criteria to identify contracts that may carry a heightened risk. Selected contracts were reconciled to source evidence which substantiated appropriate revenue recognition.
- Based on this understanding we designed our audit procedures to identify noncompliance with such laws and regulations. Our procedures involved a review of board minutes to identify any noncompliance with laws and regulations, assessment of financial statement disclosures to ensure compliance with relevant standards, the involvement of tax specialists to assess compliance with tax regulations and enquiries of management and those charged with governance.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Cash and cash equivalents at 1 January 2021		24,383	22,960
Cash and cash equivalents at 31 December 2021		17,443	24,383

Notes *(continued)*
(forming part of the financial statements)

1) Summary of significant accounting policies

The Company is a private Company limited by shares, registered in England and Wales. The address of the registered office is 114 Innovation Drive, Milton Park, Abingdon, Oxfordshire, OX14 4RZ.

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the Company's financial statements.

a) Basis of preparation

The financial statements have been prepared in accordance with the historical cost convention and comply with International Financial Reporting Standards (IFRSs) and its interpretations as issued by the International Accounting Standards Board (IASB) as adopted by the European Union (EU).

The Company, as a wholly owned subsidiary of Evotec SE, is exempt by virtue of IAS 27 paragraph 8 and section 400 of the Companies Act 2006 from the requirement to prepare consolidated accounts. These financial statements present information about the Company as an individual undertaking and not about its group. The consolidated financial statements of Evotec SE, within which the Company is included, can be obtained from the address given in note 26.

The preparation of financial statements requires the Directors to make estimates and assumptions that affect the reported amounts of assets and liabilities as well as disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual outcomes could differ from those estimates.

The financial statements are presented in Great British pounds sterling, the Company's functional currency, with the primary statements and tables within the notes being presented in Great British pounds sterling rounded to the nearest thousand.

b) Going Concern

At 31 December 2021, the Company has net assets of £39.7m and cash balances of £17.4m. The Directors consider that it is appropriate to prepare the financial statements on a going concern basis, due to the entity being profitable, possessing sufficient cash reserves and its assets exceeding its liabilities.

The directors have prepared cash flow forecasts for the company from the date of approval of the 2021 financial statements through to 31 July 2023 ("the going concern period"). These forecasts reflect an assessment of current and future market conditions and their impact on the company's future cash flow performance. The forecasts have been sensitized for a reduction in revenue through to 31 July 2023. The forecasts have also been reverse stress tested by significantly reducing revenue to the end of the review period. The forecasts indicate the company would still have sufficient cash to continue.

In assessing whether the going concern basis is appropriate the directors have taken account of all available information about the future up to and including 31 July 2023, which is at least 12 months from the date of approval of these financial statements. Accordingly, they continue to adopt the going concern basis in preparing the annual financial statements.

Determination of fair values:

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes as noted in the accounting policies below.

Notes (continued)
(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

Impact of new accounting standards and recent accounting pronouncements

First time adoption of new accounting standards in the Financial Year 2021

Standards/Interpretation	Description	Effects
IFRS 9, IAS39 and IFRS 7, IFRS 4 and IFRS 16	Interest Rate Benchmark Reform – phase 2 Modification of financial assets, financial liabilities and leasing liabilities, requirements regarding accounting and disclosure of hedging relationships under application of IFRS 7	No material effects
IFRS 16	COVID-19-Related Rent Concessions: The amendments provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the COVID-19 pandemic. The amendment was intended to apply until 30 June 2021, but as the impact of COVID-19 pandemic is continuing, on 31 March 2021, the IASB extended the period of application of the practical expedient to 30 June 2022. The amendment applies to annual reporting periods beginning on or after 1 April 2021.	No effects

Changes in Accounting Policies with Mandatory application in the Financial Year 2021

In its April 2021 Update, the IFRS IC published an agenda decision clarifying how to calculate the obligation relating to certain defined benefit plans under which the retirement benefit is (i) contingent on the employee being employed by the entity at the time of retirement; (ii) capped at a specified number of years of service; and (iii) linked to the employee's length of service at the date of retirement. In that decision, the IFRS IC took the view that the obligation should be recognised only over the years of service preceding the date of retirement in respect of which the employee generates entitlement to the benefit. There is no effect on the Company from this decision.

Recent Accounting Pronouncements, not yet adopted

The following standards and interpretations published by the IASB are not yet mandatory because they have not been endorsed by the EU yet, or the date of their first mandatory application has not yet been reached and they have not been adopted by Evotec at an early stage:

Notes *(continued)*
(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

c) Revenue

Revenue represents the amounts (excluding value added tax) derived from the provision of goods and services to customers during the year.

d) Revenue recognition

Revenue is recognised when the relevant risks and rewards of ownership associated with services sold are transferred to the customer and it is probable that the economic benefits associated with the transaction will flow to the Company based upon the performance requirements of the respective agreements and that the revenue can be reliably measured regardless of when the payment is being made and collectability is reasonably assured. The company assesses collectability based on a number of factors, including past transaction history with the customer and the customer's credit-worthiness. Evotec (UK) Limited's revenues include service fees, FTE-based research payment and revenues for deliverable kind of services and milestone fees.

Revenues generated from service contracts or FTE-based research contracts are recognised as the services are rendered. Payments for contracted services, which are paid in advance are recorded as deferred revenue until earned.

Deliverable kind of contracted services are recorded as revenue upon delivery. Payments for deliverable kind of contracted services in advance are recorded as deferred revenue until delivery.

Revenue contingent upon the achievement of certain milestones is recognised in the period the milestone is successfully achieved. This typically occurs when the Company's contract partner agrees that the requirements stipulated in the agreement have been met.

e) Research and development expenditure

Expenditure on research and development is capitalised or expensed depending on whether the expenditure incurred falls under the classifications of research or development expenditure given by IAS 38.

Where there is inherent uncertainty that research and development work completed will generate probable future economic benefits, and therefore the work does not meet all the requirements laid down in IAS 38 to capitalise the costs incurred as development costs, the costs are expensed as incurred.

Where the work completed is development work and can be shown to generate probable future economic benefits where supported by the resources available to the Company as outlined in paragraphs 57 to 64 of IAS 38 then the development expenditure associated is capitalised as an intangible asset and is amortised as appropriate. Capitalised development expenditure is stated at cost less accumulated amortisation and impairment losses.

The Company elects to claim the Research and Development Expenditure Credit (RDEC) and records the credit to other operating income.

f) Taxation

Current taxation is the expected taxation credit or payable on the taxable income or loss for the year, using taxation rates enacted or substantially enacted at the statement of financial position date, and any adjustments to the taxation payable or credit in respect of previous years.

Deferred taxation is provided, without discounting, using the statement of financial position method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

A deferred taxation asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred taxation assets are reduced to the extent that it is no longer probable that the related tax benefits will be realised.

Notes *(continued)*
(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

Current and deferred taxation movements are recognised directly in the statement of comprehensive income as part of the net profit or loss for the period, except where the tax arises from a transaction that is accounted for directly in equity and is therefore likewise recognised directly in the equity of the Company.

g) Property, plant and equipment

Items of property, plant and equipment are stated at cost, as the cost of acquisition or development cost, less accumulated depreciation and impairment losses. The cost assigned to the asset includes, where relevant, the cost of the asset, direct labour and other costs involved in bringing the asset into working condition, and the initial estimate of the costs of dismantling and removing the asset and restoring the site on which it is located.

Where parts of an item of property, plant and equipment have materially different useful economic lives, they are accounted for as separate items of property, plant and equipment.

The Company recognises in the carrying value of an item of property, plant and equipment the cost of replacing part of such an item when that cost is incurred if it is probable that the future economic benefits embodied with the item will flow to the Company and the cost of the item can be reliably measured. All other costs are recognised in the statement of comprehensive income as expenses as incurred.

Depreciation is provided by the Company to write off the cost less the estimated residual value of tangible assets on a straight line basis over their estimated useful economic lives as follows:

Buildings and leasehold improvements	-	Shorter of related lease term and estimated useful life
Plant and machinery	-	5 years
Fixtures, fittings, tools and equipment	-	3 - 5 years

h) Impairment of property, plant and equipment and intangible assets

The Company reviews property, plant and equipment and intangible assets (including goodwill) for impairment, to determine the recoverable amount in accordance with IAS 36. An impairment review is performed at least annually for intangible assets with indefinite useful lives or in the case of assets with definite useful lives, whenever events or changes in circumstances indicate that the carrying amount of an asset or a group of assets may not be recoverable.

An impairment loss is recognised if the carrying amount of an asset (or a group of assets when considering a cash generating unit) exceeds its recoverable amount which is the higher of its fair value less costs to sell or value in use. The value in use for an asset or cash generating unit is calculated by estimating the net present value of future cash flows arising from that asset or cash generating unit. The discount rate used to calculate the value in use is determined to reflect the risks inherent for each asset or cash generating unit. The evaluation of the net cash flow of the further use is based on a midrange or where applicable long range forecast. Management judgement is necessary to estimate discounted future cash flows.

Any impairment loss is reported as a separate component of operating expenses in the statement of comprehensive income. An impairment of property, plant and equipment and intangible assets excluding goodwill is reversed if there has been a change in the estimates used to determine the value in use leading to an increase in value for a previously impaired asset or group of assets as one cash generating unit. It is reversed only to the extent that the asset's or the group of assets carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been previously recognised. Impairments of goodwill are not reversed.

Notes *(continued)*
(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

i) Investments

Investments in subsidiary companies are disclosed at cost.

Other unquoted investments are disclosed at their fair value, or, where this cannot reasonably be established, at cost less impairment (see note j).

j) Impairment of investments

Where management identify uncertainty over the carrying value of an investment, the investment is impaired to a prudent estimate of its net realisable value. Where this cannot be reliably ascertained and there is doubt over the value of the investment it is impaired down to zero. The carrying value of investments is reviewed annually at each statement of financial position date.

Where material to the accounts impairments of investments are disclosed separately in the statement of comprehensive income under the statutory heading to which they relate.

k) Other intangible assets

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. Goodwill also includes contingent consideration, which is included at fair value and used in calculating the residual goodwill. Acquisition costs are expensed.

Other intangible assets that are acquired by the Company are stated at cost less accumulated amortisation and less accumulated impairment losses (see note g).

Amortisation is charged to the statement of comprehensive income on a straight-line basis over the estimated useful lives of intangible assets unless such lives are indefinite. Other intangible assets with an indefinite useful life and goodwill are systematically tested for impairment at each statement of financial position date. Other intangible assets are amortised from the date they are available for use. Customer lists are amortised over 3 years. Developed technology is amortised over 7 years.

l) Foreign currencies

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates - GBP ('the functional currency'). Transactions in foreign currencies are recorded using the rate of exchange ruling at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are re-translated using the rate of exchange ruling at the statement of financial position date and the gains or losses on translation are included in the statement of comprehensive income.

Non-monetary assets and liabilities measured at fair value and denominated in foreign currencies are translated using the rate of exchange ruling at the dates on which fair value is determined and the gains or losses on translation are included in the statement of comprehensive income (see notes 6 and 7).

m) Employee benefits

i) Defined contribution pension plan: The Company operates a defined contribution pension scheme. The assets of the scheme are held separately from those of the Company in an independently administered fund. The amount charged in the statement of comprehensive income represents the employer contributions payable to the scheme in respect of the accounting period.

ii) Share-based payment transactions: Evotec SE, the parent of the Company, runs a stock option programme and a share performance plan that allows certain employees of the Company to acquire shares of the parent company. The cost of the equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model. When the grant is made, the cost of the grant for all years is initially booked to unearned compensation on share options in equity, with a corresponding entry on additional paid in capital on share options in equity.

Notes *(continued)*
(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

The costs are recognised in the statement of comprehensive income, together with a corresponding increase in unearned compensation on share options in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefits expense. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest.

No expense is recognised for awards that do not ultimately vest, except for equity-settled transactions for which vesting is conditional upon a market or non-vesting condition. These are treated as vested irrespective of whether or not the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied. When the terms of an equity-settled award are modified, the minimum expense recognised is the expense had the terms not been modified, if the original terms of the award are met. An additional expense is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification.

n) Inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses. Work in progress and finished goods costs are taken as production costs, which include an appropriate proportion of attributable overheads.

In the statement of financial position inventories are valued at standard cost, which approximates to historical cost determined on a first in, first out basis, and this value is used for the costs of goods sold in the statement of comprehensive income.

o) Long-term contracts

Once the outcome of a long-term collaboration or service contract can be estimated reliably, contract revenue and expenses are recognised in the statement of comprehensive income in proportion to the stage of completion of the contract. The stage of completion is derived from the proportion of fixed revenue that has been earned.

The amount of profit attributable to the stage of completion of a long-term contract is recognised only when the outcome of the contract can be foreseen with reasonable certainty.

Provision is made for losses anticipated on a contract as soon as they are foreseen.

Contract work in progress is stated at costs incurred, less those transferred to the statement of comprehensive income, after deducting foreseeable losses.

Amounts recoverable on contracts are included in receivables and represent revenue recognised in excess of payments on account.

Deferred revenue on contracts is included in liabilities and represents payments on account in excess of revenue recognised to date.

p) Trade and other receivables

Trade and other receivables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses.

The fair value of trade and other receivables is estimated as the present value of future cash flows, discounted at the market rate of interest at the statement of financial position date if the effect is material. Doubtful receivable provisions are established based upon the difference between the receivable value and the estimated net collectible amount. Trade and other receivables held in foreign currencies are treated under the policy laid down in accounting policy l.

Notes *(continued)*

(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

q) Cash and cash equivalents

Cash and cash equivalents comprise cash balances and short-term deposits. The fair value of cash and cash equivalents is estimated as its carrying amount where the cash is repayable on demand.

r) Trade and other payables

Trade and other payables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method.

The fair value of trade and other payables is estimated as the present value of future cash flows, discounted at the market rate of interest at the statement of financial position date if the effect is material. Amounts held in foreign currencies are treated under the policy laid down in accounting policy l.

s) Provisions

A provision is recognised in the statement of financial position when the Company has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, the provision is determined by discounting the expected future cash flow that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

t) Financial assets and liabilities

Financial assets and liabilities held for purposes of short-term profit are classified as held for trading and recognised at fair value; subsequent to initial recognition they are re-valued to their fair value at each statement of financial position date. Any difference between carrying value and the fair value is immediately recognised in the statement of comprehensive income. Financial assets and liabilities are recognised/de-recognised within the financial statements at their settlement date.

Originated loans and long-term debt liabilities are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing assets and borrowings are stated at amortised cost with any difference between cost and redemption value being recognised in the statement of comprehensive income over the period of the instrument on an effective interest basis. Fair value, which after initial recognition is determined for disclosure purposes only, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the statement of financial position date. For finance leases the market rate of interest is determined by reference to similar lease agreements.

u) Derivative financial instruments

Derivative financial instruments are recognised on their trade date at cost and subsequently re-measured to their fair value.

The derivatives employed by the Company, while providing effective economic hedges under the Company's policies, do not qualify for hedge accounting. Changes in the fair value of any of these derivative instruments are recognised immediately in the statement of comprehensive income.

A derivative embedded in a non-derivative host contract by way of holding a trading or non-trading contract in a currency that is not the functional currency of any of the parties to the contract and is also not a currency routinely presented for commercial transactions of this nature around the world and is also not a currency commonly used in contracts to purchase and sell non-financial items in the economic environment in which the transaction takes place is separated out, where material, and disclosed separately at its fair value at the statement of financial position date.

Where the Company enters into financial guarantee contracts to guarantee the indebtedness of other companies within the group, the Company considers these to be insurance arrangements and accounts for them as such. In this respect, the Company treats the guarantee contract as a contingent liability until such time as it becomes probable that the Company will be required to make a payment under the guarantee.

Notes (continued)

(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

v) Use of estimates

The preparation of the accompanying financial statements requires management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses during the reporting period.

Estimates and assumptions affect the following subjects:

- Impairment testing (Note 12)
- Deferred tax asset (note 19)
- Share options (Note 23)
- Lease terms and discount rate (note 24)
- Provisions (Note 20)

Actual results could differ from estimates. Estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are made prospectively in the period in which the estimates are revised.

w) Leases

The Company recognises and measures all leases (excluding short-term leases and leases of low-value assets) using a single model.

Right-of-use assets

The company recognises right-of-use assets at the commencement date (i.e. the point in time the underlying leased asset is available for use). Right-of-use assets are measured at cost less any accumulated depreciation and any accumulated impairment losses, and adjusted for re-measurement of lease liabilities. The cost of the right-of-use assets include the amount of lease liabilities recognised, initial direct costs incurred and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease term and the estimated useful lives of the assets as follows:

Right-of-use assets relating to buildings	-	1 – 22 years
---	---	--------------

If legal ownership of the leases asset transfers to the Company at the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the leased asset.

Lease Liabilities

At the commencement date of the lease, the Company recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees.

Variable lease payments that do not depend on an index or a rate are recognised as expenses in the period in which the even or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses an incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is re-measured if there is a modification to the lease, a change in the lease term, a change in the lease payments (e.g. changes to future payments resulting from a change in an index or rate used to determine such lease payments) or a change in the assessment of an option to purchase the underlying asset.

Notes (continued)
(forming part of the financial statements)

1) Summary of significant accounting policies (continued)

Short-term leases and leases of low-value assets

The Company applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e. those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). The Company also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered to be low-value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

2) Revenues

Revenues recognised during the year analysed by significant category were as follows:

	2021 £000	2020 £000
Contracted research fees for goods and services	50,957	45,264
Milestone revenues	-	-
	<u>50,957</u>	<u>45,264</u>

3) Staff numbers and costs

The number of persons employed by the Company (including Directors) at the year end, analysed by category was as follows:

	Number of employees	
	2021	2020
Directors	1	1
Administration	57	46
Production, research and development	403	365
Marketing	9	5
	<u>470</u>	<u>417</u>

The aggregate payroll costs of the employees outlined above were as follows:

	2021 £000	2020 £000
Wages and salaries	20,657	17,055
Social security costs	2,395	2,268
Contribution to defined contribution pension plans	1,217	926
Share-based compensation	637	565
	<u>24,906</u>	<u>20,814</u>

Notes *(continued)*
(forming part of the financial statements)

4) Research and development costs

All costs incurred in relation to research and development have been recognised in the statement of income in the year as research and development expense. No costs have been capitalised as development costs as the criteria for recognition laid down by IAS 38 and referred to in note 1d above are not met.

	2021 £000	2020 £000
Internal research costs expensed	552	320
	<u>552</u>	<u>320</u>

5) Auditor's remuneration

Auditor's remuneration in the year

	2021 £000	2020 £000
Audit of financial statements pursuant to legislation	50	52
	<u>50</u>	<u>52</u>

The auditor has provided no other services to the Company in the year (2020: £nil).

6) Other operating income

	2021 £000	2020 £000
Cost recharges to group companies	6,126	6,095
Grant income	65	2

Factors that may affect future taxation charges

In the March 2021 budget, it was announced that the corporation tax rate would increase from 19% to 25% in April 2023.

All amounts are calculated at the tax rates at which the timing differences are expected to reverse. The average of the rates used to calculate the deferred tax liability is 23% (2020: 19%).

Notes (continued)
(forming part of the financial statements)

12) Intangible assets (continued)

The company has tested the goodwill for impairment based on the net book values as of 31 December 2021. The impairment test is based on a discounted cash flow model. In the table below, the assumptions for the discounted cash flow model used in the impairment test in the fourth quarter of 2021, the post-tax discount rate considering the risks and rewards of the activities used in the impairment test and the growth rate for determining the terminal value, are specified:

	Euprotec
Denominated in	GBP
Basis for cash flow model	MRP
Post-tax discount rate	7.03%
Growth rate for terminal value	0.0%

MRP = Mid Range Plan 2022-2027

In 2022 the Company recorded a goodwill impairment of £1,048k as a result of the impairment test. The impairment tests and the relating estimated cash flows are based on past experience and expectations for the future. In addition, the following key assumptions were used in the models:

- The estimates of revenues were based on knowledge of overall market conditions combined with specific expectations of customer growth and product performance.
- Cost estimates were developed using the 2021 budgeted cost base projected forward for volume increases, mix changes, specific investments and inflationary expectations.
- The exchange rates and interest rates used were based on current market expectations and predictions.

13) Inventories

Trade payables due to group undertakings	442	297
Other taxes and social security	580	2,323
Other payables	105	18
Current lease liabilities	2,358	1,857
Accrued expenses and deferred income	2,107	2,153
	9,041	10,366

All of the trade and other payables above are payable within one year.

Non-current lease liabilities	29,148	30,962
	<u> </u>	<u> </u>
Total trade and other payables	38,189	41,328
	<u> </u>	<u> </u>

17) Corporation taxation

At 31st December 2021 corporation taxation of £4,876k (2020: £3,795k) is receivable and the amount is included within Other receivables and accrued revenue (note 14).

Notes (continued)
(forming part of the financial statements)

18) Financial instruments

Fair values

The carrying values for each class of financial assets and financial liabilities in the statement of financial position, which are given below, are not considered to be materially different to their fair values, due to their short term nature. The basis for calculating fair values, where applicable, is set out in the accounting policy notes:

	Carrying amount	Carrying amount
	2021 £000	2020 £000
IFRS 9 categories of financial instruments:		
Cash and cash equivalents (note 15)	17,443	24,383
Other receivables at amortised cost (note 14)	15,401	13,187
	—	—
Total financial assets	32,844	37,570
	—	—
Trade and other payables at amortised cost (note 16)	(38,189)	(41,328)
	—	—
Total financial liabilities	(38,189)	(41,328)
	—	—
Total financial instruments	(5,345)	(3,758)
	—	—

The Company analyses financial instruments carried at fair value by valuation method. The different levels have been defined as follows:

- Level 1: assets and liabilities quoted in active markets where a fair value is readily available
- Level 2: derivatives where the fair value is determined based on techniques for which all significant inputs are observable, either directly or indirectly.
- Level 3: inputs for the asset or liability that are not based on observable market data, for example financial guarantee contracts.

The fair value of financial assets and financial liabilities (not carried at fair value) equates to the carrying amount as reflected in the statement of financial position and notes thereto.

Exposure to credit, liquidity and market risk arises in the normal course of the Company's business.

All assets and liabilities are considered to be level 1.

Notes (continued)
(forming part of the financial statements)

18) Financial instruments (continued)

Credit risk:

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers and investment securities.

Financial instruments that may subject the Company to concentrations of credit and liquidity risk consist primarily of cash, cash equivalents and accounts receivable. The Company continually monitors its position with, and the credit quality of, the financial institutions which are counterparts to its financial instruments, and does not anticipate non-performance. There is considered to be minimal credit risk in relation to cash and cash equivalents of £17,443k (2020: £24,383k).

It is the Company's policy to monitor accounts receivable balances and chase late payments. The carrying amount of financial assets represents the maximum credit exposure. Therefore, the maximum exposure to credit risk at the statement of financial position date was £32,844k (2020: £37,570k) being the total of the carrying amount of financial assets shown in the table above.

The maximum exposure to credit risk for trade receivables at the year-end by geographic region was:

	2021 £000	2020 £000
North America	471	794
UK group undertakings	764	282
US group undertakings	13	7
European group undertakings	<u>3,670</u>	<u>3,120</u>
	4,918	4,203

The maximum exposure to credit risk for trade receivables at the year-end by type of customer was:

	2021 £000	2020 £000
Third party customers	471	794
Group undertakings	<u>4,447</u>	<u>3,409</u>
	4,918	4,203

The ageing of trade receivables at the year-end was:

	2021 £000	2020 £000
Not past due	4,910	4,115
Past due 0-30 days	8	4
Past due 31-120 days	1	84
Past 120 days	<u>-</u>	<u>-</u>
	4,918	4,203

Notes (continued)
(forming part of the financial statements)

18) Financial instruments (continued)

All of the trade receivable balances are held with customers with good credit history. As such no impairment of these balances is considered necessary.

Liquidity risk:

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

The Company has cash balances at year end totalling £17,443k (2020: £24,383k) and therefore liquidity is not seen as a significant risk for the business. The Company is cash generative and has no debt at year end (2020: £nil). As such it is in a strong liquid position able to meet supplier payment terms without the need to identify new sources of financing.

Market risk:

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments

Market risk – foreign currency risk:

The Company has a certain portion of its revenues in US dollars necessitating the need to manage its total currency exposure. The risk attached to adverse currency movements is managed through the forecasting of all foreign currency revenues and where appropriate spot transfer when the rate is deemed favourable.

The Company's exposure to foreign currency risk is as follows. This is based on the carrying amount for monetary financial instruments except derivatives.

31 December 2021			
	Euro £000	US Dollar £000	Total £000
Cash and cash equivalents	790	4,270	5,060
Trade receivables	1	475	476
Trade payables	(436)	(216)	(652)

Trade payables	(646)	(446)	(1,092)
	<hr/>	<hr/>	<hr/>
Net exposure	4,387	6,090	10,477
	<hr/>	<hr/>	<hr/>

Notes (continued)
(forming part of the financial statements)

18) Financial instruments (continued)

Sensitivity analysis

A 10 percent weakening/strengthening of the following currencies against pound sterling at 31 December 2021 would have increased/(decreased) equity and profit or loss by the amounts shown below. This calculation assumes that the change occurred at the statement of financial position date and had been applied to risk exposures existing at that date.

This analysis assumes that all other variables, in particular other exchange rates and interest rates, remain constant. The analysis is performed on the same basis for 31 December 2020.

10% weakening:

	Equity		Profit or loss	
	2021 £000	2020 £000	2021 £000	2020 £000
Euro	(36)	(439)	(36)	(439)
USD	(453)	(609)	(453)	(609)

10% strengthening:

	Equity		Profit or loss	
	2021 £000	2020 £000	2021 £000	2020 £000
Euro	36	439	36	439
USD	453	609	453	609

Capital management

The group actively manages its funds to primarily ensure liquidity and principal preservation while seeking to maximise returns. Evotec's cash, available-for-sale and held to maturity investments are made in liquid and low risk categories.

	<u> </u>	<u> </u>	<u> </u>

Notes (continued)
(forming part of the financial statements)

20) Provisions for liabilities and charges (continued)

Decommissioning

The decommission costs provision relates to estimated costs for the restoring of the research buildings at the end of their lease term. A provision has been made against these costs based on the future obligation to restore the area of the research buildings at the end of the lease.

Social security contributions on share options

This provision for social security contributions on share options is calculated based on the number of options outstanding at the reporting date that are expected to be exercised. The provision is based on the market price of the shares at the reporting date which is the best estimate of the market price at the date of exercise.

21) Called-up share capital

	2021 £000	2020 £000
Authorised share capital		
60,000,000 (2020: 60,000,000) ordinary shares of 10p each	6,000	6,000

Balance at 31 December 2021	<u>8,650</u>	<u>(1,218)</u>	<u>27,859</u>	<u>35,291</u>

*The additional paid-in capital reflects the fair value of share options and share performance plan awards held at the statement of financial position date and issued during the year. The Company employees are awarded options to purchase shares or share performance plan awards entitling them to shares in Evotec SE, the parent of the Company, under the terms disclosed in note 23. The unearned compensation relates to that portion of the share options or share performance plan awards that have been awarded to employees but have yet to be earned by them under the terms of the related agreements as outlined in note 23. The additional paid-in capital and unearned compensation together form the share-based payment reserve

Notes *(continued)*
(forming part of the financial statements)

23) Employee benefits

Pension scheme

The Company operates a defined contribution Group Personal Pension Plan (GPPP) and makes contributions to employees' own schemes. The pension charge for the year represents contributions payable by the Company to the fund (and to employees' own pension schemes) and amounted to £1,217k (2020: £926k).

Contributions amounting to £12k (2020: £202k) were payable to the fund managers at the year end and are included in trade and other payables (note 16).

Share-based payment transactions

Long term incentive scheme

To further incentivise executives via variable long-term incentive compensation, the Annual General Meeting in June 2020, June 2017, and June 2015 approved the respective contingent capital necessary to support the Restricted Share Plan 2020 ("RSP 2020") as well the Share Performance Plan 2017 ("SPP 2017"), 2015 ("SPP 2015"). Under these plans, Restricted Share Awards ("RSA") may be granted to a level of 1,200,000 bearer shares ("RSP 2020") and Share Performance Awards ("SPA") may be granted to a level that may result in up to 6,000,000 bearer shares (SPP 2017), 6,000,000 bearer shares (SPP 2015) of Evotec SE being issued at maturity to key employees. Each RSA grants one subscription right to shares of the Company while each SPA grants up to two subscription rights to shares of the Company, each of which in turn entitles the holder to subscribe for one share of the Company.

SPAs under SPP 2017 are exercised automatically within 10 trading days after the four-years holding period, whereas RSAs under RSP 2020 and SPAs under SPP 2015 can be exercised at the earliest after a vesting period of four years after the date of their grant but no later than five years after the respective grant. After five years RSAs are exercised automatically. The holder has to contribute € 1.00 per share at the date of issue.

RSAs under RSP 2020 can only be exercised, if and to the extent that performance targets are achieved in a single of four consecutive calendar years. These performance targets consist of Evotec's group adjusted EBITDA. The Supervisory Board of Evotec SE determines annually key performance indicators for each individual tranche of awards at the grant date. The Restricted Share Plan RST 2020 is subject to certain restrictions regarding issuing periods and the allocation of the grants to members of the Management Board of Evotec SE and other key employees.

SPAs under SPP 2017 can only be exercised, if and to the extent that two specified and equally weighted key performance indicators are achieved in a single of four consecutive calendar years. These performance targets consist of Evotec SE's share price and "total shareholder return", which is derived by comparison with the return of the TecDax index. The Supervisory Board determines annually key performance indicators for each individual tranche of awards at grant date. The Share Performance Plan SPP 2017 is subject to certain restrictions regarding issuing periods and the allocation of the grants to members of the Management Board and other key employees.

SPAs under SPP 2015 can only be exercised, if and to the extent that key performance indicators are achieved within a performance measurement period of three years. These performance indicators consist of service conditions relating to certain key financial figures (e.g. revenue- and income-related indicators) of the Company as well as certain share-based measurements (e.g. Evotec SE's share price). The Supervisory Board determines annually key performance indicators for each individual tranche of awards at grant date. The Share Performance Plans SPP 2015 are subject to certain restrictions regarding issuing periods and the allocation of the grants to members of the Management Board and other management members. If a member of the Management

23) Employee benefits (continued)

Board of Evotec SE leaves the company during the performance measurement period, they are entitled to receive proportionate Share Performance Awards dependent on the achievement of the key performance indicators. The selected key employees generally do not have this entitlement.

A summary of the status of the Share Performance Plans as of 31 December 2021 and 2020 and the changes during the year then ended is presented as follows:

	Weighted average exercise price (€ per share)	Number of Share Performance awards (SPAs)
Brought forward at 1 January 2021	1.00	214,200
Forfeited during the year	1.00	(21,962)
Exercised during the year	1.00	(101,900)
Granted during the year	1.00	51,790
Lapsed during the year	-	-
Carried forward at 31 December 2021	1.00	142,128

	Weighted average exercise price (€ per share)	Number of Share Performance awards (SPAs)
Brought forward at 1 January 2020	1.00	449,530
Forfeited during the year	1.00	(2,829)
Exercised during the year	1.00	(260,905)
Granted during the year	1.00	28,404
Lapsed during the year	-	-
Carried forward at 31 December 2020	1.00	214,200

The fair value of the grant of share performance awards was estimated on the date of grant using a Monte-Carlo-Simulation model with the following assumptions:

Date of grant:	22 October 2021	28 May 2021	1 February 2021
Risk-free interest rate in %	(0.43)	(0.57)	(0.78)
Volatility of Evotec share in %	35.0	40.0	42.0
Volatility of TecDax index in %	-	-	29.0
Fluctuation in %	0.0 – 5.0	0.0 – 5.0	0.0 – 5.0
Price in Euros	1.00	1.00	1.00
Share price at grant date in Euros	44.98	35.49	32.25
Market value of TecDax index at grant date in Euro	-	-	3,375.67
Fair value of SPA	43.96	34.47	36.65

Notes (continued)
(forming part of the financial statements)

23) Employee benefits (continued)

Date of grant:	29 October 2020	15 January 2020	15 January 2019	15 January 2018
Risk-free interest rate in %	(0.85)	(0.55)	(0.46)	(0.25)
Volatility of Evotec share in %	40.0	37.0	54.0	51.0
Volatility of TecDax index in %	-	18.0	22.0	13.0
Fluctuation in %	5.0	0.0 – 5.0	0.0 – 5.0	0.0 – 5.0
Price in Euros	1.00	1.00	1.00	1.00
Share price at grant date in Euros	22.92	23.39	18.83	14.35
Market value of TecDax index at grant date in Euro	-	3,099.05	2,478.06	2,663.91
Fair value of SPA	21.89	25.28	20.84	15.94

The performance measurement period for all grants started on 1 January of the corresponding year. The expected dividend yield is zero. The expected life is 4 years for the vesting periods starting in January and February, and 5 years for the vesting periods starting in May and October. The base for the expected volatility are the historic volatilities of the year before the grant date.

Evotec SE's stock option plan result in compensation expense in the financial accounts of the Company of £658k (2020: £557k) for the long-term incentive scheme. These amounts were initially reflected in unearned compensation, a component of stockholders' equity.
