Directors' Report

The Directors present their report and the Company financial statements of ENGIE Supply Holding UK Limited (the "Company") for the year ended 31 December 2021.

Principal activities

The principal activity of the Company is that of a holding company.

Results and dividends

The results for the year, after taxation, amounted to a loss of £16,000 (2020: profit of £3,775,000). During the year the Company neither made, declared or paid any dividends (2020 – same). Of the results for the year, all is attributable to the members of the Company.

Going Concern

The directors have, at the time of approving the financial statements, a reasonable expectation that the Company has adequate resources to continue in operational existence for the period to 30 June 2024. They therefore continue to adopt the going concern basis of accounting in preparing the financial statements.

Base case projections were prepared and reviewed at an ENGIE Energy Supply UK divisional level including the Company and its subsidiaries as it is this group which collectively transacts the energy supply activities for ENGIE S.A. in the UK. Cash balances are maintained at a divisional level and cash is held both within bank accounts and on reserve at ENGIE S.A. subsidiary ENGIE Treasury Management.

Both the Company and the division have no external debt. An internal divisional overdraft facility provided by ENGIE Treasury Management for up to £400m is committed until 30 June 2024.

The Company has also arranged a letter of support of £361m available to 30 June 2024 provided by the ultimate parent company ENGIE S.A, with the £361m value having been calculated based on a worst case scenario. This facility is not currently in use and is regarded as readily available cash by the directors for the purpose of the going concern assessment.

The division trades gas and electricity with ENGIE Global Markets, a wholly owned subsidiary of ENGIE S.A. A margin call agreement is in place between ENGIE Global Markets and the division to cover both parties from exposures resulting from unsettled trades. The margin call operates in both directions, i.e. the cash balance could favour either party depending on the polarity of the aggregate exposure. Whenever the margin call favours ENGIE Global Markets, the division is required to place cash with ENGIE Global Markets. The division has a facility provided by its ultimate parent company ENGIE S.A. to assist the division in meeting the cash requirements of the facility up to a value of £671m which is committed up to and including 30 June 2024. The directors are confident this will enable the division to continue to meet its obligations.

A base case projection has been prepared by the directors for the period to 30 June 2024, with the key assumptions being:

Operating cashflows: Operating cashflows have been projected on the assumption that the division will continue its existing commercial activities over the review period with no material changes to the division's systems, processes and people. Consumption levels of supply customers and divisional sales performance are assumed to have materially recovered to levels observed before Covid 19.

Working capital cashflows: Working capital cashflows have been projected on the assumption that the division will maintain its existing credit terms with both customers and suppliers. The timing of ongoing indirect tax cashflows including VAT and Climate Change Levy are assumed to remain unchanged.

Financing cashflows: the division has no external debt at the present date and is assumed to remain free of external debt over the review period.

Directors' Report (continued)

Going concern (continued)

Investment cashflows: a modest level of capital investment equivalent to 2 months' worth of operating costs is assumed during the review period. The investments assumed relates to maintenance of the division's IT systems. It is assumed that no disposals will take place during the period. No dividend payments are forecast in the going concern period.

Consideration has been given to climate change impacts and the current geopolitical circumstances in respect of Russia and Ukraine, and these are not considered to impact the Company during the going concern period.

The base case indicates the division has a substantial level of headroom liquidity to continue its operations for the period

The directors have reviewed a downside projection which represents a plausible worst-case scenario. This downside projection assumes a 50% increase in debtor days, 25% increase in unbilled revenues and includes a 50% headroom on supplier security requirements. In this downside scenario the headroom liquidity is equivalent to 4 months' worth of operating costs.

As part of the plausible worst-case scenario, to quantify the margin call cash requirements it was assumed that the supply portfolio grows by 20% and that the prevailing energy prices persist to the end of 2023 and then fall to the lowest levels seen for the last five years.

Under the plausible worst-case scenario considered by the directors, despite lower levels of cash headroom, the directors believe the business will continue to operate normally throughout the period under review.

The directors have also performed a reverse stress test to assess the level of unforeseen cash requirements that the division could withstand before it would experience liquidity issues over the period to 30 June 2024. The directors consider the level of unforeseen cash requirements necessary to create liquidity issues for the Company as implausible.

Having carefully considered the base case, downside projection, current trading and trends since the year end, and the letter of support and confirmations received from ENGIE S.A., the directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the period to 30 June 2024. Therefore, the directors continue to adopt the going concern basis of accounting in preparing the financial statements.

Directors

The directors who served during the year ended 31 December 2021 and subsequently were:

G R Leith (appointed 8 February 2022) K A Dibble (resigned 7 February 2022) R J Wells (appointed 1 July 2021) V Verbeke (appointed 1 July 2021)

A M Pollins (resigned 30 June 2021)

N E Lovett (resigned 30 June 2021)

Directors' and officers' liability insurance

The Company has made qualifying third party indemnity provisions for the benefit of its directors, which were made during the year and remain in force at the date of this report, to indemnify them against certain liabilities which they may incur in their capacity as directors or officers of the Company, including liabilities in respect of which the Company is itself unable to provide an indemnity by virtue of Section 232 of the Companies Act 2006. These arrangements were in place in the previous reporting year.

Employees

The Company has no employees. Activities of the Company are performed by employees of its subsidiary company ENGIE Power Limited and the costs of such activities are not recharged to ENGIE Supply Holding UK Limited. These arrangements were in place in the previous reporting year.

Directors' Report (continued)

Financial Instruments

The Company does not have any financial instruments other than cash and short-term debtors and creditors (2020 – same).

Auditor

The auditor will be deemed to be reappointed and Ernst & Young LLP will therefore continue in office.

Directors' statement as to disclosure of information to the auditor

The directors who were members of the board at the time of approving the directors' report are listed on page 2.

Each of the persons who is a director at the date of approval of this report confirms that:

- so far as the director is aware, there is no relevant audit information of which the Company's auditor is unaware; and
- the director has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s418 of the Companies Act 2006.

By order of the Board,

-DocuSigned by:

R J Wells

Director

27th June 2023

Directors' Responsibilities Statement

The directors are responsible for preparing the Directors' Report, Strategic Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the directors are required to:

- · select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether Financial Reporting Standard 101 Reduced Disclosure Framework has been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Strategic Report

The directors present their Strategic Report for the year ending 31 December 2021.

Business Review

ENGIE Supply Holding UK Limited's main activity is that of a holding company for six companies (see note 10). The three trading subsidiaries of ENGIE Supply Holding UK Limited, being ENGIE Power Limited, ENGIE Gas Limited and ENGIE Gas Shipper Limited, supply gas and electricity to industrial and commercial end-users.

The combined business trades in the UK B2B energy market as ENGIE. ENGIE aims to operate a friendly, customer-focused service, with a transparent approach to building commercial relationships that last. The business offers a portfolio of gas and electricity products suitable for all businesses, large and small.

The results for the year, after taxation, amounted to a loss of £16,000 (2020: profit of £3,775,000) a decrease on the previous year. The Company has not traded in the period. The year on year movement was due to profit recognised in 2020 as a result of the liquidation of ENGIE Shotton Limited.

The net assets of the Company at the end of 2021 were £57,377,000 (2020: £57,393,000). The year on year movement on net assets was due to the losses for the year.

Future Developments

Based on the results achieved this year and with careful consideration of the impact of COVID-19 on the year ended December 2021 and recovery of supply customers consumption levels coinciding with the easing of government restrictions, the Directors remain confident in the future prospects of the Company.

The Energy Supply UK division business is constantly developing the services and products to meet the changing needs of our customers and the evolving energy environment.

Statement of corporate governance arrangements

The Company along with its subsidiaries forms the ENGIE Energy Supply UK division ("Energy Supply UK"), and report to the ENGIE Global Energy Management (GEM) Management team and Board.

Purpose and leadership

All Energy Supply UK companies share the common purpose 'to act to accelerate the transition towards a carbon-neutral economy', under the leadership of ENGIE Group Executive Committee. ENGIE's ambition is to become the world leader in the zero-carbon transition "as a service" for our customers. In the UK, this purpose and ambition is articulated as 'making zero carbon happen' for customers which is achieved through combining energy, services and regeneration activities for the benefit of individuals, businesses and communities.

Directors responsibilities

Whilst the boards of directors do not apply any specific code of corporate governance, the directors are confident that the alternative arrangements, which have been in place and were operational throughout the financial year, are sufficient to ensure effective management of the Company and the Energy Supply UK division and interaction with its members and stakeholders. These alternative arrangements consist of a combination of the following:

- a board of directors, composed of directors with in-depth knowledge of the Company and the sectors it operates in;
- clearly documented delegations of authorities governing the performance of both day to day and key activities;
- oversight and guidance by an "Executive Team" of which all the officers of the Company form
 part, that oversees ENGIE's activities in the UK and which sets the strategy for the long-term
 success of the division;

Statement of corporate governance arrangements (continued)

Opportunity and risk

Risk and opportunity management is owned at the highest level of the business; the directors have an Energy Supply UK risk committee which reviews UK risks and the measures taken to mitigate these. The committee identifies environmental and societal issues and transforms them into opportunities for the business as well as managing environmental, social and governance (ESG) risks associated with the Company's activities that relate to the environment, local and international acceptability, health and safety, human resources management, ethics and governance.

Within the Company, individual contracts are required to produce contract-specific aspects and impacts registers which identify risks and opportunities and include mitigation measures. Any activities that are deemed significant post-mitigation must have further actions identified and implemented to manage the associated risks.

Remuneration

The ENGIE board of directors remuneration is reviewed by the remuneration committee and was deemed to be fair, proportionate and timely in relation to corporate performance, in comparison with peers and in ratio with employees' pay and benefits.

The salary of all Executives in the UK is set by the parent company, ENGIE S.A., and aims to support long-term success by linking in bonus, salary increases and long-term incentives to a set number of financial and managerial targets, along with a view on market positioning. The same approach to bonus and salary is used for employees below the executive level (where eligible).

Stakeholder relationships and engagement

When managing stakeholder relationships, all activity adheres to ENGIE's Ethics Policy and Gifts and Hospitality Policy, with governance from an Energy Supply UK level Ethics Officer.

Directors' statement of compliance with duty to promote the success of the company (under section 172 (1) of the companies act 2006)

The directors view the Energy Supply UK companies' key stakeholders to be the environment and community, customers, employees, regulators, government, and suppliers.

The directors' actions are also guided by ENGIE's core values: Bold, Open, Caring and Demanding, which help define the Energy Supply UK companies' strategies and targets.

The directors monitor the performance of the Energy Supply UK companies' against annual objectives.

The directors utilise a full range of communication channels managed at a divisional level to engage with stakeholders. These include face to face meetings, forums and events, reports and other written materials, as well as through public relations activity, targeted digital content and social media.

Environment and community

ENGIE Group's 1,000 employees in the UK are actively engaged in the transition to net zero carbon, through the operation of low carbon infrastructure, and helping business customers to reduce energy consumption, and green their supply. The Company's directors see benefit in reducing the direct environmental impacts of its operations, as well as in supporting its customers in efforts to drive lower carbon outcomes. In 2021, Energy Supply UK reduced its total gross emissions (tCO2e) attributable to Scope 1 (direct emissions from owned or controlled sources) and Scope 2 (indirect emissions from the generation of purchased electricity, steam, heating and cooling consumed) by 34%.

Directors' statement of compliance with duty to promote the success of the company (under section 172 (1) of the companies act 2006) (continued)

Customers

The directors recognise that maintaining positive relationships with customers is a major driver to performance in the sector, ensuring strong levels of retention and providing broader business opportunities. The directors directly engage with Energy Supply UK key customers at a strategic level in order to build partnerships, understand changing requirements and help to improve Energy Supply UK's products and services. The directors also work to ensure that the culture of Energy Supply UK has a strong customer focused ethos, investing in its systems and people to continually improve the customer experience.

Providing excellent customer service is a key focus for Energy Supply UK. Industrial and Commercial customers have a designated account manager who ensures the customers are on an appropriate product and ensure that bills are understood. Advice is also provided to customers directly and via webinars, on industry and regulatory developments.

The main Energy Supply UK Customer Service team is situated in Newcastle and consists of frontline advisors, team leaders and an operations manager. All teams have their own individual targets and objectives whilst across Customer Service there are "Customer First KPI's" which are monitored and measured throughout each month.

Employee involvement and engagement

The directors believe in the importance of an engaged and well-motivated employee base in achieving our overall business objectives. Employee involvement in Energy Supply UK is encouraged, and engagement levels are tracked through regular employee surveys. Achieving a shared purpose and common awareness on the part of all employees of the financial and economic factors affecting the company plays a material role in improving its performance.

The directors regularly communicate with Energy Supply UK employees on matters of concern to them, and consult with them or their representatives, in order that their views are considered where company developments may affect their interests. This is achieved through regular meetings between management and elected employee representatives, company-wide web presentations, leadership blogs, intranet news articles and mails to employees' home addresses.

Energy Supply UK also encourages the involvement of employees to optimise company and ENGIE group performance through wider employee share ownership utilising the group's Link Employee Share Purchase Plan.

Energy Supply UK offers and actively promotes development opportunities at all levels. There are focussed programmes for the highest potential talent, which are aligned to the succession planning process. Succession plans and pools for business-critical roles are regularly reviewed, developing internal and external development plans to ensure a sustainable pipeline of talent.

Regulators and Government

Energy Supply UK operates in a highly regulated market, which is subject to a regular flow of government policy consultations, and regulatory developments. Depending on their nature, policy and regulatory changes may provide opportunities or pose risk to Energy Supply UK's operations.

The directors place strong emphasis on compliance with regulations, including with the terms of its relevant licences, and understands the need to demonstrate good performance to, and foster good relationships with, Ofgem, the industry regulator, government, and industry code administrators.

Energy Supply UK has a designated Regulation Director who is responsible for a proactive engagement plan with these stakeholders to facilitate those relationships and understand the expectations that are critical to the business.

This includes regular meetings with the Department for Business, Energy & Industrial Strategy ("BEIS") investor relations, direct involvement in key industry change proposals, responses to policy and regulatory consultations, and engagement with relevant trade associations. The directors regularly attend senior level meetings with BEIS and Ofgem.

Directors' statement of compliance with duty to promote the success of the company (under section 172 (1) of the companies act 2006) (continued)

Suppliers

ENGIE's suppliers are fundamental to the running of the business from both an operational and regulatory perspective. Energy Supply UK complies with the payment policies and performance regulations introduced by the government in April 2017 which involves submitting supplier payment data on a half-yearly basis.

Although this is the regulatory requirement, the results of the payment performance are monitored by the Company and used to set objectives to encourage ongoing improvement.

The directors maintain high standards of business conduct by ensuring that activities of the Energy Supply UK companies of ENGIE are in line with ENGIE's Ethics Charter, policies and codes of conduct. The overarching Ethics Charter includes a zero tolerance for all forms of corruption and is supplemented with a range of more specific policies and practical guidelines which deal with areas such as supplier relationships, conflicts of interest and gifts and hospitality. All Board members have received training in this respect.

Long term consequences of decisions made in year

No material principal decisions were taken in 2021 that impact either the strategic direction of the Company or the major stakeholders of the Company.

Principal Risks and Uncertainties

The ENGIE Energy Supply UK division's key risks are energy price volatility, COVID-19, credit risk, non-performance of information systems, political or regulatory change and non-compliance, climate change risk, reputation risk, business disruption, failing to attract, retain and motivate staff, project risk, and Brexit.

Energy price volatility

Exposure within Energy Supply UK to energy price risk is minimised by restricting quotation validity to limited underlying market price movements and by hedging sales with purchases at the point of contract acceptance. Electricity forward contracts are used to fix the price of future physical flows and thus provide greater certainty on future revenues and costs.

COVID-19

With regard to the COVID-19 pandemic, Government regulations have continued to change as the pandemic has evolved however this has not had a material impact on the Companies working practices. During the year the Company implemented a variety of prevention measures to mitigate the transmission risk of COVID-19 in its operational sites namely: social distancing, use of personal protective equipment and promoting working from home were possible.

The Directors continue to monitor COVID-19 risks with the forecasts that have been prepared in order to assess the future results of the business.

Credit Risk

The Company's credit and liquidity risk is principally attributed to amounts owed from fellow group and subsidiary companies. The Energy Supply UK division operates a cash pooling facility which allows the Company to draw down funds against these balances when required to meet its obligations.

Principal Risks and Uncertainties (continued)

Non-performance of information systems

The impact of systems failure is mitigated by ensuring system and application requirements are approved and managed in an appropriate manner and maintaining a disaster recovery solution. The Energy Supply UK Regulatory Affairs team monitor and provide active participation in consultation on legislative changes within the industry and the ensuring compliance with all relevant legislation.

Political or regulatory change and non-compliance

Energy Supply UK operates in a highly regulated market, which is subject to a continuous flow of government policy interventions, and regulatory developments. Depending on their nature, policy and regulatory changes may provide opportunities or pose risk to Energy Supply UK's operations.

The Energy Supply UK Regulatory Affairs team monitor and provide active participation in consultation on legislative changes within the industry and the Company ensures compliance with all relevant legislation.

Climate change risk

In order to help the Company monitor and manage its exposure to climate change risk, the Company includes a climatic component to our stress tests looking at our downstream risks, as well as an increased focus on monitoring our intermittency risk from our solar and wind upstream contracts

Reputation risk

ENGIE SA Group instruction manuals set out the policies and procedures with which the UK subsidiaries are required to comply. The directors' are responsible for ensuring that the UK companies observe and implement the policies and procedures set out in the manual which is regularly reviewed and updated.

Business disruption

The Company has a business continuity plan ready to be implemented in response to a critical business event.

An Internal Control Review Project combined with a Continuous Improvement Programme was in place throughout the year. The combination of these two initiatives is the documentation of policies, procedures and key processes throughout the business with the objective of achieving a greater level of control, process consistency, efficiency and improvement.

Failing to attract, retain and motivate staff

Energy Supply UK has defined process relating to recruitment, selection and appraisal and seeks to invest in the future of employees by ensuring their development needs are identified through a personal development plan. Succession planning is in place identifying where our areas of risk exist and how we would bridge roles at risk.

Project risk

There is a comprehensive budgeting system in place with an annual budget approved locally by the leadership team and also centrally by ENGIE SA. Management information systems provide the leadership team and Directors with relevant and timely reports that identify significant deviations from approved plans and include regular re-forecasts for the year, in order to facilitate timely analysis and appropriate decisions and actions.

Principal Risks and Uncertainties (continued)

Brexit

On the 31 December 2020 the UK withdrew from the EU Single Market and Customs Union and this poses a risk due to changes to the activities of customers which may be affected by the withdrawal. However, to date the Company has not observed any material adverse impacts to customer activities as a result of the withdrawal. The Company engages directly with customers, and employs a Regulation Director who has regular contact with government bodies, to ensure that any impacts, both direct and indirect, on the business is known as soon as possible and necessary steps are taken to mitigate potential risk.

27th June 2023

Independent Auditor's Report

to the members of ENGIE Supply Holding UK Limited

Opinion

We have audited the financial statements of ENGIE Supply Holding UK Limited for the year ended 31 December 2021 which comprise the Profit and Loss Account, the Statement of Comprehensive Income, the Balance Sheet, the Statement of Changes in Equity and the related notes 1 to 15, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 101 "Reduced Disclosure Framework (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the company's affairs as at 31 December 2021 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period to 30 June 2024.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the company's ability to continue as a going concern.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Independent Auditor's Report (continued)

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic Report and the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the Strategic Report and Directors' Report have been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic Report or Directors' Report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- · certain disclosures of directors' remuneration specified by law are not made; or
- · we have not received all the information and explanations we require for our audit.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement set out on page 6, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Independent Auditor's Report (continued)

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the
 company and determined that the most significant are those that relate to the reporting
 framework (United Kingdom Accounting Standards including FRS 101 "Reduced Disclosure
 Framework") and the relevant direct and indirect tax compliance regulations in the United
 Kingdom.
- We understood how the company is complying with those frameworks by making enquiries of management. We corroborated our enquiries through our review of board minutes, review of correspondence with the relevant authorities and consideration of the results of our audit procedures across the company.
- We assessed the susceptibility of the company's financial statements to material misstatement, including how fraud might occur by assessing the risk of fraud absent of controls, and then identifying controls which are in place at an entity level and whether the design of these controls is sufficient for the prevention and detection of fraud, utilising internal and external information to perform our fraud risk assessment. We considered the risk of fraud through management override and considered the design and implementation of controls at the financial statement level to prevent this, as well as incorporating data analytics across manual journal entries in our audit approach.
- Based on this understanding we designed our audit procedures to identify non-compliance with
 the laws and regulations identified in the paragraphs above. Our procedures involved: journal
 entry testing, with a focus on journals meeting our defined risk criteria based on our
 understanding of the business; enquiries of company management; and challenging the
 assumptions and judgements made by management by reading third party evidence wherever
 possible. We also involved internal specialists as appropriate.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

At 31 December 2021

1. Authorisation of financial statements and statement of compliance with IFRSs

The financial statements of ENGIE Supply Holding UK Limited (the "Company") for the year ended 31 December 2021 were authorised for issue by the board of the Directors on 27th June 2023 and the balance sheet was signed on the board's behalf. ENGIE Supply Holding UK Limited is a private limited company incorporated and domiciled in England & Wales.

Basis of Preparation

The financial statements have been prepared in accordance with FRS101 "Reduced Disclosure Framework" and interpretations in force at the reporting date.

The Company meets the definition of a qualifying entity under FRS 100 (Financial Reporting Standard 100) issued by the Financial Reporting Council. The financial statements have therefore been prepared in accordance with FRS 101 (Financial Reporting Standard 101) 'Reduced Disclosure Framework' as issued by the Financial Reporting Council.

The Company has taken advantage of the following disclosure exemptions under FRS 101:

- (a) the requirements of IFRS 7 Financial Instruments: Disclosures
- (b) the requirement in paragraph 38 of IAS 1 'Presentation of Financial Statements' to present comparative information in respect of:
 - (i) paragraph 79(a)(iv) of IAS 1;
- (c) the requirements of paragraphs 10(d), 10(f), 39(c) and 134-136 of IAS 1 Presentation of Financial Statements;
- (d) the requirements of IAS 7 Statement of Cash Flow€(e) the requirements of paragraph 17 of IAS 24 Related Party Disclosures;
- (f) the requirements in IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a Group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member; and
- (g) the requirements of paragraphs 134(d)-134(f) a€135(c)-135(e) of IAS 36 Impairment of Assets.

Where required, equivalent disclosures are given in the Group accounts of ENGIE SA. The Group accounts of ENGIE SA are available to the public and can be obtained as set out in note 15.

The principal accounting policies adopted by the Company are set out in note 2.

The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for the assets.

The Company financial statements are presented in Pounds Sterling because that is the currency of the primary economic environment in which the Company operates and all values are rounded to the nearest thousand Pounds Sterling (£'000) except when otherwise indicated.

The Company is a subsidiary of its ultimate parent ENGIE SA. It is included within the consolidated financial statements of ENGIE SA which are publicly available and is therefore exempt from the requirement to prepare consolidated accounts.

At 31 December 2021

1. Authorisation of financial statements and statement of compliance (continued)

Going concern

The directors have, at the time of approving the financial statements, a reasonable expectation that the Company has adequate resources to continue in operational existence for the period to 30 June 2024. They therefore continue to adopt the going concern basis of accounting in preparing the financial statements.

Base case projections were prepared and reviewed at an ENGIE Energy Supply UK divisional level including the Company and its subsidiaries as it is this group which collectively transacts the energy supply activities for ENGIE S.A. in the UK. Cash balances are maintained at a divisional level and cash is held both within bank accounts and on reserve at ENGIE S.A. subsidiary ENGIE Treasury Management.

Both the Company and the division have no external debt. An internal divisional overdraft facility provided by ENGIE Treasury Management for up to £400m is committed until 30 June 2024.

The Company has also arranged a letter of support of £361m available to 30 June 2024 provided by the ultimate parent company ENGIE S.A, with the £361m value having been calculated based on a worst case scenario. This facility is not currently in use and is regarded as readily available cash by the directors for the purpose of the going concern assessment.

The division trades gas and electricity with ENGIE Global Markets, a wholly owned subsidiary of ENGIE S.A. A margin call agreement is in place between ENGIE Global Markets and the division to cover both parties from exposures resulting from unsettled trades. The margin call operates in both directions, i.e. the cash balance could favour either party depending on the polarity of the aggregate exposure. Whenever the margin call favours ENGIE Global Markets, the division is required to place cash with ENGIE Global Markets. The division has a facility provided by its ultimate parent company ENGIE S.A. to assist the division in meeting the cash requirements of the facility up to a value of £671m which is committed up to and including 30 June 2024. The directors are confident this will enable the division to continue to meet its obligations.

A base case projection has been prepared by the directors for the period to 30 June 2024, with the key assumptions being:

Operating cashflows: Operating cashflows have been projected on the assumption that the division will continue its existing commercial activities over the review period with no material changes to the division's systems, processes and people. Consumption levels of supply customers and divisional sales performance are assumed to have materially recovered to levels observed before Covid 19.

Working capital cashflows: Working capital cashflows have been projected on the assumption that the division will maintain its existing credit terms with both customers and suppliers. The timing of ongoing indirect tax cashflows including VAT and Climate Change Levy are assumed to remain unchanged.

Financing cashflows: the division has no external debt at the present date and is assumed to remain free of external debt over the review period.

Investment cashflows: a modest level of capital investment equivalent to 2 months' worth of operating costs is assumed during the review period. The investments assumed relates to maintenance of the division's IT systems. It is assumed that no disposals will take place during the period. No dividend payments are forecast in the going concern period.

Consideration has been given to climate change impacts and the current geopolitical circumstances in respect of Russia and Ukraine, and these are not considered to impact the Company during the going concern period.

The base case indicates the division has a substantial level of headroom liquidity to continue its operations for the period.

At 31 December 2021

1. Authorisation of financial statements and statement of compliance (continued)

Going concern (continued)

The directors have reviewed a downside projection which represents a plausible worst-case scenario. This downside projection assumes a 50% increase in debtor days, 25% increase in unbilled revenues and includes a 50% headroom on supplier security requirements. In this downside scenario the headroom liquidity is equivalent to 4 months' worth of operating costs.

As part of the plausible worst-case scenario, to quantify the margin call cash requirements it was assumed that the supply portfolio grows by 20% and that the prevailing energy prices persist to the end of 2023 and then fall to the lowest levels seen for the last five years.

Under the plausible worst-case scenario considered by the directors, despite lower levels of cash headroom, the directors believe the business will continue to operate normally throughout the period under review.

The directors have also performed a reverse stress test to assess the level of unforeseen cash requirements that the division could withstand before it would experience liquidity issues over the period to 30 June 2024. The directors consider the level of unforeseen cash requirements necessary to create liquidity issues for the Company as implausible.

Having carefully considered the base case, downside projection, current trading and trends since the year end, and the letter of support and confirmations received from ENGIE S.A., the directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for the period to 30 June 2024. Therefore, the directors continue to adopt the going concern basis of accounting in preparing the financial statements.

At 31 December 2021

2. Accounting policies

· Critical Accounting judgements and key sources of estimation uncertainty

The preparation of the Company's financial statements requires the directors to make judgments, estimates and assumptions that affect the reported amounts of assets and liabilities, and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The directors confirm that due to the nature of the Company, no critical accounting judgements have been required or undertaken during the financial year-ended 31 December 2021. Similarly it is confirmed that no significant assumptions or estimates have been made, during the preparation of the financial statements for the year-ended 31 December 2021.

Significant accounting policies

Financial Assets

Initial recognition and measurement

All financial assets are recognised initially at cost plus directly attributable transaction costs. The measurement basis is determined by reference to the contractual cash flow characteristics of the financial asset.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are carried at amortised cost using the effective interest (EIR) method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance revenue in the income statement. The losses arising from impairment are recognised in the profit and loss in other operating expenses.

For receivables from fellow group and subsidiary companies, a 12-month expected credit loss (ECL) allowance is recorded on initial recognition. If there is subsequent evidence of a significant increase in the credit risk of an asset, the allowance is increased to reflect the full lifetime ECL. If there is no realistic prospect of recovery, the asset is written off.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments.

De-recognition of financial assets

The financial assets (or, where applicable a part of a financial asset or part of a Group of similar financial assets) is derecognised when (i) the rights to receive cash flows from the asset have expired or (ii) the Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

At 31 December 2021

2. Accounting policies (continued)

Significant accounting policies (continued)

Financial Assets (continued)

Impairment of financial assets

IFRS 9 requires an expected credit loss (ECL) model to be applied to the financial assets. The expected credit loss model requires the Company to account for expected losses as a result of credit risk on initial recognition of financial assets and to recognise changes in those expected credit losses at each reporting date.

Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount in order to determine the extent of the impairment loss. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or Groups of assets. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimate of future cash flows have not been adjusted. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses on continuing operations are recognised in the profit and loss account in those expense categories consistent with the function of the impaired asset.

For assets where an impairment loss subsequently reverses, the carrying amount of the asset or cash generating unit is increased to the revised estimate of its recoverable amount, not to exceed the carrying amount that would have been determined, net of depreciation, had no impairment losses been recognised for the asset or cash generating unit in prior years. A reversal of impairment loss is recognised immediately in the profit and loss account.

Management consider the impairment of non-financial assets to be a critical accounting judgement.

Financial Liabilities

Initial recognition and measurement

All financial liabilities are recognised initially at cost and in the case of loans and borrowings, plus directly attributable transaction costs.

Purchases or sales of financial liabilities that require delivery of liabilities within a time frame established by regulation or convention in the marketplace are recognised on the trade i.e., the date that the Company commits to purchase or sell the liabilities.

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss includes financial liabilities held for trading and financial liabilities designated upon initial recognition at fair value through profit or loss. Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term.

Interest bearing loans and borrowings

Obligations for loans and borrowings are recognised when the Company becomes party to the related contracts and are measured initially at the fair value of consideration received less directly attributable transaction costs.

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method.

At 31 December 2021

2. Accounting policies (continued)

Significant accounting policies (continued)

Financial Liabilities (continued)

Interest bearing loans and borrowings (continued)

Gains and losses arising on the repurchase, settlement or otherwise cancellation of liabilities are recognised respectively in finance revenue and finance cost.

De-recognition of financial liabilities

A liability is generally derecognised when the contract that gives rise to it is settled, sold, cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, such that the difference in the respective carrying amounts together with any costs or fees incurred are recognised as profit or loss.

Cash at bank and in hand

Cash at bank and in hand deposits in the balance sheet comprise cash at banks and in hand and short-term deposits with an original maturity of three months or less.

Intercompany cash sweep

The Company operates an intercompany cash sweep with a group undertaking whereby daily cash inflows are sent and cash outflows drawn down leaving an overnight bank balance of zero. The outstanding balance of transfers is recorded with the intercompany counterparty and available for use by the Company on a continual basis.

Income taxes

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted by the balance sheet date.

Deferred income tax is recognised on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements, with the following exceptions:

Where the temporary difference arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss; and deferred income tax assets are recognised only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, carried forward tax credits or tax losses can be utilised.

Deferred income tax assets and liabilities are measured on an undiscounted basis at the tax rates that are expected to apply when the related asset is realised or liability is settled, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Income tax is charged or credited to other comprehensive income if it relates to items that are charged or credited to other comprehensive income. Similarly, income tax is charged or credited directly to equity if it relates to items that are credited or charged directly to equity. Otherwise income tax is recognised in the profit and loss account.

Interest income

Interest income is recognised as interest accrues using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to its net carrying amount.

Investments in subsidiaries

Investments in subsidiaries are stated at cost less, where appropriate, provisions for impairment.

At 31 December 2021

2. Accounting policies (continued)

Significant accounting policies (continued)

Dividends received

Dividend income is recognised in profit or loss on the date on which the Company's right to receive payment is established

Dividends paid

Dividends are recognised in the accounts in the year in which they are paid, or in the case of a final dividend when approved by the shareholders.

3. Operating loss

The operating loss is stated after charging:

Fees payable to the auditor and their associates for the audit of the Company's annual accounts were £1,444 (2020: £1,444). Fees are paid on the Company's behalf by a group undertaking and recharged to the Company.

There were no fees payable to the auditor for non-audit services (2020: Nil).

4. Staff costs

Staff who perform services for the Company are employed by ENGIE Power Limited and their costs are not recharged to ENGIE Supply Holding UK Limited.

This arrangement was in place for the previous financial year.

5. Director's remuneration

No remuneration was paid by ENGIE Supply Holding UK Limited to Directors during the years ended 31 December 2021 and 31 December 2020 in respect of services to the Company. Directors who perform services for the Company are employed and remunerated by other Group companies, the total remuneration apportioned to the Company for services rendered is £15,000.
