ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

The financial statements are prepared on a going concern basis on the grounds that such support as is required to enable the company to continue to trade will be received from the company's ultimate parent undertaking, Specsavers International Healthcare Limited.

Turnover

1.

Turnover represents the amount charged, net of value added tax, by the company as a wholesaler for goods provided to the company's retail subsidiary during the period.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Optical equipment - 14-25% on cost Fixtures and fittings - 14-25% on cost Computer equipment -33% on cost

Stocks

Stock is valued at the lower of cost and net realisable value. Cost is determined on an average cost basis. Net realisable value is based on estimated selling price allowing for all further costs of completion and disposal.

Deferred tax

Deferred tax is provided in full on timing differences which result in an obligation at the balance sheet date to pay more tax or a right to pay less tax, at a future date, at rates expected to apply when they crystallise based on current tax rates and law. Timing differences arise from the inclusion of items of income and expenditure in tax computations in periods different from those in which they are included in the financial statements. Deferred tax assets and liabilities are not discounted.

Hire purchase and leasing commitments

Assets obtained under hire purchase contracts or finance leases are capitalised in the balance sheet. Those held under hire purchase contracts are depreciated over their estimated useful lives. Those held under finance leases are depreciated over their estimated useful lives.

The interest element of these obligations is charged to the profit and loss account over the relevant period. The capital element of the future payments is treated as a liability.

Rentals paid under operating leases are charged to the profit and loss account on a straight line basis over the period of the lease.

Reverse premiums and similar incentives received to enter into operating lease agreements are released to the profit and loss account on a straight line basis until the first rent review date.

Pension costs

The company operates a defined contribution pension scheme. Contributions to the scheme are charged to the profit and loss account in the period in which they become payable.

Group accounts

The group is small sized and as a result the parent company has taken advantage of the exemption available not to prepare consolidated financial statements granted under Section 398 of the Companies Act 2006. Accordingly these financial statements present information about the company as an individual undertaking and not about its group.

Investments

Investments held as fixed assets are stated at cost less provision for any permanent diminution in value.
