Architectural Design & Planning Services Ltd
Notes to the Financial Statements
For the Year Ended 31st December, 2005

1 Accounting Policies

Accounting Convention

The financial statements have been prepared under the historical cost convention and in accordance with the financial reporting standard for smaller entities.

1.2 Turnover

Turnover comprises the invoiced value of goods and services supplied by the company, net of Value Added Tax and trade discounts

1.3 Tangible Fixed Assets and Depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of the fixed assets. Less their estimated residual value, over their expected useful lives on the following basis:

Motor Vehicles	25%	Per annum reducing balance basis
Fixtures & Fittings	25%	Per annum reducing balance basis
Office Equipment	20%	Per annum reducing balance basis

1.4 Leasing and hire purchase contracts

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible fixed assets. Assets acquired under finance leases are depreciated over the shorter of the lease term and their useful lives. Assets acquired under hire purchase contracts are depreciated over their useful lives. Finance leases are those where substantially all of the benefits and risks of ownership are assumed by the company. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce a constant periodic rate of charge on the net obligation outstanding in each period.

1.5 Stocks and work in progress

Stock and work in progress are valued at the lower cost and net realisable value after making due allowance for obsolete and slow-moving stocks. Cost includes all direct costs and an appropriate proportion of fixed and variable overheads.

1.6 Deferred Taxation

The charge for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised only to the extent that the directors consider that it is more likely than not that they will be against the reversal of deferred tax liabilities or other future taxable profits. Deferred taxation is measured on a non-discounted basis at the average tax rates that would apply when the timing differences are expected to reverse, based on tax rates and laws that have been enacted by the balance sheet date.

2 Turnover

In the year to 31st December, 2005, 0% of the company's annual turnover was derived from markets outside the United Kingdom.

The provision for deferred taxation is made up of accelerated capital allowances.

The company has applied the FRSSE (effective June 2002) for these financial statements. As a result, the accounting policy for deferred taxation has been changed and full provision has been made for timing differences arising from accelerated capital allowances, as opposed to the partial provision basis previously used. The application of the new policy has not resulted in any material change to figures reported in previous financial statements and therefore no prior year adjustment has been made. The effect of the change in policy on the current year's profits is not material.
