## NOTES TO THE FINANCIAL STATEMENTS

YEAR ENDED 31 JANUARY 2010

---

### 1. Accounting policies

#### 1.1 Basis of accounting

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards. The accounts have been prepared on a basis other than that of a going concern as discussed on page 3 in the director's report.

#### 1.2 Cash flow statement

The director has taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is wholly owned and its parent publishes a consolidated cash flow statement.

#### 1.3 Taxation

Current tax is provided at amounts expected to be paid (or received) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future, or a right to pay less tax in the future, have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements. A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the reversal of underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on the tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is not discounted.

#### 1.4 Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
