PRINCIPAL ACCOUNTING POLICIES

Basis of preparation

The financial statements have been prepared in accordance with applicable accounting standards and under the historical cost convention.

The principal accounting policies of the company have remained unchanged from the previous year and are set out below.

Turnover

Turnover is the total amount receivable by the company for goods supplied and for services provided, excluding VAT and trade discounts.

Depreciation

Depreciation is calculated to write down the cost less the estimated residual value of fixtures and fittings and motor vehicles by the reducing balance method, over their expected useful lives. Hire equipment and computer equipment are depreciated by equal annual instalments. The rates generally applicable are:

Fixtures and fittings	15%
Motor vehicles	25%
Hire equipment	33%
Computer equipment	25%

No depreciation is provided for on freehold land and buildings as it is the company's policy to maintain these assets in a continual state of sound repair. The useful economic lives of these assets are thus so long and residual values so high that any depreciation would not be material. Residual values are based on prices prevailing at the date of acquisition or subsequent valuation. Provision is made in the profit and loss account for any permanent diminution in value.

Stocks

Stocks are stated at the lower of cost and net realisable value.

Deferred taxation

Deferred taxation is provided for using the tax rates estimated to arise when the timing differences reverse and is accounted for to the extent that it is probable that a liability or asset will crystallise. Unprovided deferred tax is disclosed as a contingent liability.

Debit balances arising in respect of advance corporation tax on dividends payable or proposed are carried forward to the extent that they are expected to be recoverable.
