REPORT OF THE DIRECTORS

FOR THE YEAR ENDED 31 MARCH 2006

The directors present their report and the audited financial statements of the company for the year ended 31 March 2006.

PRINCIPAL ACTIVITY

The principal activity of the company is the development, construction and subsequent operation of electricity generation projects.

BUSINESS REVIEW AND FUTURE DEVELOPMENTS

During the year the company's four generating stations at four landfill gas sites owned by Biffa Waste Services Limited, a subsidiary of Biffa Plc, were operated successfully. The sites are:

Himley Wood, Dudley, West Midlands.

Howden Clough, Morley, Leeds.

Redhill, Surrey.

Welford, Portley Ford, Welford, Northampton.

The Non Fossil Purchasing Agency (NFPA) auctions the power on a competitive tender basis to licensed supply businesses for onward sale to customers.

The NFPA contracts were awarded to the company under the third round of the Government's Non Fossil Fuel Obligation through which a premium sale price is available.

The company will continue to operate its four generating stations until such time as reduced landfill gas volumes make this uneconomical to do.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 MARCH 2006

1 ACCOUNTING POLICIES

Basis of accounting

These financial statements are prepared on the going concern basis, under the historical cost convention, and in accordance with the Companies Act 1985 and applicable accounting standards in the United Kingdom. The principal accounting policies are set out below.

Turnover

Turnover represents income receivable from the generation of electricity, excluding Value Added Tax, in the ordinary course of business and is recognised when goods are provided.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less depreciation. The charge for depreciation is calculated to write off assets over the period of the associated NFPA agreements which run for fifteen years. Assets in the course of construction are not depreciated.

Taxation

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Provision is made in full for deferred tax liabilities that arise from timing differences where transactions or events that result in an obligation to pay more tax in the future have occurred by the balance sheet date. Deferred tax assets are recognised to the extent that it is considered more likely than not that they will be recoverable. Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets and liabilities are not discounted.

Cashflow statement

The company has adopted the provisions of FRS1, 'cashflow statements' and has taken advantage of the exemptions for small companies therein. Accordingly a cash flow statement has not been presented in these financial statements.
