NOTES TO THE ABBREVIATED ACCOUNTS

YEAR ENDED 30 NOVEMBER 2006

1. ACCOUNTING POLICIES

Basis of accounting

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets, and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2005)

Turnover

The turnover shown in the profit and loss account represents amounts invoiced during the year, exclusive of Value Added Tax

Amortisation

Amortisation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows

Website

20% p a straight line basis

Fixed assets

All fixed assets are initially recorded at cost

Depreciation

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows

Fixtures & Fittings Motor Vehicles

15% p a reducing balance 25% p a reducing Balance

Investment properties

Investment properties are shown at their open market value. The surplus or deficit arising from the annual revaluation is transferred to the investment revaluation reserve unless a deficit, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year.

This is in accordance with the FRSSE which, unlike Schedule 4 to the Companies Act 1985, does not require depreciation of investment properties. Investment properties are held for their investment potential and not for use by the company and so their current value is of prime importance. The departure from the provisions of the Act is required in order to give a true and fair view.

Stocks

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items

1. ACCOUNTING POLICIES (continued)

Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more tax, with the following exceptions

Provision is made for tax on gains arising from the revaluation (and similar fair value adjustments) of fixed assets, and gains on disposal of fixed assets that have been rolled over into replacement assets, only to the extent that, at the balance sheet date, there is a binding agreement to dispose of the assets concerned. However, no provision is made where, on the basis of all available evidence at the balance sheet date, it is more likely than not that the taxable gain will be rolled over into replacement assets and charged to tax only where the replacement assets are sold

Deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date

Financial instruments

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
