## Notes to the financial statements

For the year ended 31 March 2021

### 1. Accounting policies

The principal accounting policies are summarised below. They have all been applied consistently throughout the current and preceding year.

#### *a. General information and basis of accounting*

Gee Bee Limited (the company) is a company incorporated in the United Kingdom under the Companies Act. The address of the registered office is given on page 2. The nature of the company's operation and its principal activities are set out in the director's report on page 3.

These financial statements are presented in pounds sterling because that is the currency of the primary economic environment in which the company operates. The financial statements have been prepared in accordance with FRS 101 (Financial Reporting Standard 101) "Reduced Disclosure Framework" as issued by the Financial Reporting Council.

As permitted by FRS 101, the company has taken advantage of the disclosure exemptions available under that standard in relation to presentation of comparative information in respect of certain assets, IFRS financial instruments; presentation of a cash flow statement, standards not yet effective, impairment of assets and related party transactions.

Where relevant, equivalent disclosures have been given in the group accounts of Princes Limited. The group accounts of Princes Limited are available to the public and can be obtained as set out in note 7.

The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for the goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or liability, the company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement purposes in these financial statements is determined on such a basis, except for leasing transactions that are within the scope of IAS 17 and measurements that have some similarities to fair value but are not fair value, such as net realisable value in IAS 2 or value in use in IAS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can assess at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

#### *b. Accounting policies*

The principal accounting policies adopted are set out below.

##### **Fixed asset investments**

Fixed asset investments are stated at the lower of cost and net realisable value.

Changes in the Company's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Company's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to the owners of the Company.

## Notes to the financial statements (continued)

For the year ended 31 March 2021

### 1. Accounting policies (continued)

#### *b. Accounting policies (continued)*

##### **Loans and receivables**

Trade receivables, loans, and other receivables including, intercompany receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables'. Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

##### **Financial liabilities and equity**

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

##### **Other financial liabilities**

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

##### **Derecognition of financial liabilities**

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or they expire.

##### **Information regarding directors and employees**

The company had no employees during the current and preceding year. No emoluments were payable to the directors of the company during the current and preceding financial year.

### 2. Fixed asset investments
