THE BOARD OF DIRECTORS AND THEIR INTERESTS

Members of the Board of Directors during the year have been:

Directors serving between 1 April 2005 and 31 October 2005

Director: Nominated by:

Dr J P Tite (Chairman) GlaxoSmithKline

Dr M B Davies Medical Research Council

Dr M J Owen GlaxoSmithKline

Dr J R Stephenson Secretary of State for Health

Dr D J Yarrow Biotechnology and Biological Sciences Research Council

Directors serving from 1 November 2005

Prof B Greenwood Jointly nominated by the Institute for Animal Health

and the University of Oxford

Prof R A Weiss Institute for Animal Health
Prof M W Shirley Institute for Animal Health
Dr P Wells Institute for Animal Health

Dr J Almond Research Nominee, nominated by mutual agreement of

Oxford University and Institute for Animal Health

Dr K A Fleming University of Oxford Prof J Bell University of Oxford

Chief Executive Officer and Secretary

Chief Executive Officer Prof A Hill Secretary G Strickland

DIRECTORS AND TRUSTEES

The directors of the charitable company are its Trustees for the purpose of charity law and throughout this report are collectively referred to as the Trustees.

ANNUAL REPORT OF THE TRUSTEES AND DIRECTORS

(For the purposes of Section 45 of the Charities Act 1993 and Directors' Report for the purposes of Section 234 of the Companies Act 1985)

The Trustees have pleasure in submitting their annual report together with the accounts for the year ended 31 March 2006.

The financial statements have been prepared in accordance with the accounting policies set out in note 1 to the accounts and comply with the Charities Act 1993 and the Statement of Recommended Practice: Accounting and Reporting by Charities SORP 2005

STRUCTURE GOVERNANCE AND MANAGEMENT

The Edward Jenner Institute for Vaccine Research is a company limited by guarantee (registered number 3079818) and a registered charity (number 1051079). The Institute is governed by its Memorandum and Articles of Association and is registered with the Charity Commission.

The Edward Jenner Institute for Vaccine research was incorporated as a company limited by guarantee in July 1995 and registered as a charity in October 1995. Sited on the campus of the Institute for Animal Health at Compton, Berkshire the Institute was formed as collaboration between GlaxoSmithKline, the Medical Research Council; the Biotechnology and Biological Sciences Research Council; and the Secretary of State for Health. This collaboration provided funding for a ten year period up to the end of October 2005. Following the sponsors decision not to maintain any level of funding beyond October 2005 the Institute has undergone a number of fundamental changes with effect from 1 November 2005.

The major changes are

- Redrafted Memorandum and Articles of Association
- The four founder members of the Institute, GlaxoSmithKline, the Medical Research Council; the Biotechnology and Biological Sciences Research Council; and the Secretary of State for Health have been replaced by two members, the University of Oxford and the Institute for Animal Health.
- As a consequence of the change in membership the Board members nominated by the original members resigned and were replaced with new Board members nominated by the new members of the company. The Board of directors, serve as the Trustees of the Institute,
- The liability of the two members of the company- is limited by guarantee to a maximum of £10 each.

APPOINTMENT OF TRUSTEES

As set out in the Articles of Association, the chair of the Trustees is appointed jointly by the Institute for Animal Health and the University of Oxford. The Institute for Animal Health and the University of Oxford each appoint three Trustees and a further research nominee is appointed by whichever of the two members has the highest level of research activity in vaccinology. Each of the chairman and the research nominee hold office for a period of three years from the date of appointment and will be eligible for reappointment for one or more further terms of three years.

RECRUITMENT AND INDUCTION OF NEW TRUSTEES

Trustees are nominated by the members and are selected on the basis of their knowledge and eminence in the field of vaccinology. The Board formally approve all trustee nominations. All Trustees are provided with an induction pack containing Trustee contact details, a copy of the memorandum and articles of association, the last published accounts and the most up to date strategic plan. Baker Tilly are available to advise the Trustees and attend Board Meetings and provide advice to the Trustees on matters affecting them in their roles both as Trustees and Directors.

ORGANISATION

The Board of Trustees, which can have up to eight members, administers the charity. The Board meets quarterly and is advised on scientific matters by a Scientific Advisory Board. A Chief Executive is appointed by the Trustees to manage the day to day operation of the Institute.

RELATED PARTIES

As noted in the section 'Status and Organisation of the Institute' the two members of the Institute from 1 November 2005 are the Institute for Animal Health and the University of Oxford. As premier research led organisations with expertise in the field of vaccinology the members will submit grant proposals to the Institute. Currently grant proposals are considered by the Board but a Scientific Advisory Board with an independent membership will consider all applications once such a Board has been established. More information concerning the Scientific Advisory Board is contained in the section 'Grant Making Policy'.

In November 2005 under transitional arrangements, following the change in the Institute's membership and cessation of the funding arrangements with the original sponsors of the Institute, three year fellowships were granted to four senior members of the Institute by the University of Oxford. This arrangement was funded by the Institute along with a transitional three month grant to cover the salaries of eight other staff and some consumable costs. These arrangements retained a core body of staff to enable the Institute to continue in the short to medium term and to give the new Trustees time to prepare and execute a plan for the continuation and development of the Institute.

RISK MANAGEMENT

The Trustees have a risk management strategy which comprises

- An annual review of the risks the charity may face;
- The establishment of systems and procedures to mitigate those risks identified in the plan; and
- The implementation of procedures designed to minimise any potential impact on the charity should those risks materialise.

Key elements in the management of financial risk are

- The setting of a reserves policy by the Trustees and
- Setting parameters for the distribution of the investment portfolio between equity investments and fixed interest securities in order to achieve a balance between maximising returns and limiting the potential variability of investment returns.

Both the reserves policy and the investment portfolio parameters are reviewed annually.

OBJECTIVES AND ACTIVITIES

The aims of the Institute are to undertake research and development aimed at the creation, testing and deployment of new vaccines against diseases of humans and of livestock. The Institute will have a particular focus on vaccines of the developing world where the greatest needs exist for novel vaccines. This ambitious aim recognises that non-industrial researchers have a major role to play in the development and design of new vaccines.

This focus on both basic and translational research reflects and recognises both the scientific state of vaccinology and the potential and need for the non-commercial sector to make a greater contribution to vaccine development, particularly for diseases that are unattractive commercial targets for large vaccine companies.

The objectives for the year are shaped by these strategic aims with a view to establishing a research facilitating charity with a world reputation. In 2006/07 the emphasis will be on ensuring that a sound platform is built from which the Institute can develop.

Cornerstones of this platform include

- The retention of key staff as Jenner Fellows with small research groups employed by the University of Oxford for an initial three year term and funded by the Institute. These staff will continue the excellent research undertaken under the previous sponsorship arrangement and will provide a core body of research professionals with eminence in their fields working on Institute funded programs. These groups will continue their work at the Institute's Compton site.
- Commencement of the establishment of a Jenner Vaccinology Centre at the new Old Road Campus site currently under construction by the University of Oxford at Headington, Oxford. This site, when completed will facilitate the bringing together of a number of research groups engaged in world class vaccinology research into a one Oxford based research facility.
- The Institute will offer Jenner Investigator status to suitable persons. This status will confer the entitlement to an allowance for travel to conferences and other such expenses whilst raising the profile of the Institute through the use of the title 'Jenner Investigator' on papers written by Jenner Investigators
- A Scientific Advisory Board will be established with world eminent vaccinology
 professionals to advise the Board as to which research programs will achieve the
 greatest effect in advancing knowledge in the field of vaccinology.
- A rigorous program of cost control and review at the Compton site to ensure that the Institutes resources are used prudently

The achievement of these objectives will establish a sound base for the Institute and longer term objectives will include the establishment of new funding streams to enable the work of the Institute to continue and grow.

GRANT MAKING POLICY

The Trust invites applications for research grants from institutions by direct approach and by advertising in the specialist press.

Institutional applicants submit a summary of their proposals to the Trustees. Applications are reviewed against the scientific research criteria and the research objectives. During 2005 and 2006 these applications were considered by the Board of the Institute. The Institute plans to establish a Scientific Advisory Board (SAB) and when this SAB has been established applications will be reviewed by them at their biennial meetings. Members of the Institute Board will be able to attend all meetings of the SAB and the SAB will report back to the Institute Board.

Grants will be made to institutions that can demonstrate a track record of excellence in the field of vaccinology and can enable the Institute to achieve its objectives.

REVIEW OF THE DEVELOPMENT AND ACTIVITIES OF THE INSTITUTE DURING THE YEAR

Prior to the change of Trustees on 1st November 2005 the Edward Jenner Institute for Vaccine Research continued to actively pursue its research programmes on the Compton site as in previous years. Scientific productivity remained good and many grant applications for new funding support were submitted with some significant successes. A summary of the research achievements of the Edward Jenner Institute for Vaccine Research to 31st October 2005 has been prepared by Professor Peter Beverley and is available on request.

On October 31st the funding of the Institute by the previous members ended. In order to refocus the Institute before the remaining cash reserves were exhausted all of the Institute employees existing at that time became redundant. The Institute has shifted its focus from an organisation that carries out research using its own facilities and employees to a facilitating body, supporting vaccinology at a new Institute spanning Oxford University and the Institute for Animal Health.

Following the change of Trustees of the Edward Jenner Institute for Vaccine Research on November 1st 2005 a successful opening symposium on vaccinology was held at the Centre for Clinical Vaccinology and Tropical Medicine (CCVTM) in Oxford with a keynote address by Sir Gustav Nossall. This symposium provided an opportunity for selected overviews of vaccinology research and development activities by the University and Institute of Animal Health groups that now form part of the new Edward Jenner Institute for Vaccine Research.

Since then an active seminar programme has been supported by the Institute at its two major sites in Compton and at the CCVTM in Headington. In general Oxford-based scientists have spoken in Compton and vice-versa to enhance knowledge of vaccinology research activities on the other site.

In addition the Institute has supported more focused meetings on influenza vaccines and tuberculosis vaccines held respectively in Oxford and Compton

An application for a Edward Jenner Institute for Vaccine Research-cosponsored meeting on foot and mouth disease vaccines, to be held in India, has been submitted to the Wellcome Trust.

The University has agreed to provide new space in new high quality research

building for the Edward Jenner Institute for Vaccine Research headquarters at its Old Road campus site in Headington.

The cost of this will be about £5m and the charity will provide about 20% of this cost. Substantial funds towards the remaining cost of the vaccinology space in the building are being or have been raised. This presents an exciting opportunity for the new Institute to base its headquarters in purpose built space in one of the world's leading research universities, allowing considerable scope for enhancement of the field of vaccinology in the UK.

An outline plan for the use of the space vacated by former employees in the Jenner Building at Compton has been discussed by the interested parties and progress is being made towards implementation of this plan.

The charity has established a new Board of Trustees under the Chairmanship of Professor Brain Greenwood and the first Board meeting was held in January 2006. A Director of the Institute was appointed at that meeting. A management committee of the Institute has been formed comprising senior scientists active in vaccinology at the University and the Institute of Animal Health and a first meeting of this committee has been held.

Scientific progress on various vaccinology research areas continues to be made by all groups. Particularly promising progress has been made on tuberculosis vaccine development and phase II trials are in progress in South Africa with the MVA85A vaccine being developed by the university.

PLANS FOR FUTURE PERIODS

The need for greater investment in vaccinology in the UK and globally is increasingly recognised and advocated and is driven by several factors

- Increasing recognition that the horrendous burden of mortality from potentially vaccine-preventable diseases in poor countries is indefensible in an increasingly wealthy world
- Appreciation that a huge investment in basic sciences such as immunology and genomics has provided great opportunities for new vaccine development but relatively few products
- Increasing public concerns about the safety of widely used childhood vaccines in the UK and other developed countries
- Realisation that new pathogens such as SARS and new influenza strains will continue to emerge, that eradicated diseases such as smallpox may be re-introduced by bioterrorists, and that vaccination offers a major defence strategy
- Concern that adequate vaccines and vaccination policies have not been available or in place to safeguard livestock from epidemics such as foot and mouth disease
- Realisation that the commercial sector is unlikely to be able to undertake more than late stage development of vaccines that are needed for mainly developing country markets
- Excitement that therapeutic vaccination against chronic infections and auto-immune diseases may soon become feasible

Against this background Oxford University and the Institute for Animal Health have come together to co-found a new Institute that will build on their current strengths in vaccinology and the foundation laid by the former Board of the Edward Jenner Institute for Vaccine Research.

FINANCIAL RESULTS FOR THE YEAR

The net movement in funds for the year to 31 March 2006 was a deficit of £864,618 (2005 £3,592,261). The total value of fund balances at the 31 March 2006 was £3,451,633 (2005 £4,316,251).

INVESTMENT POLICY

Under the Memorandum and Articles of Association the Charity may invest monies not immediately required for its purposes in any way the Trustees wish.

The Investment Policy is that sufficient funds will be retained on short-term deposit to cover the designated funds and also any timing differences between receipts and expenditure for the following year. The remaining funds will be invested in such a way as balance the need to maximise growth whilst retaining sufficient liquidity to manage the ongoing cash requirements of the Institute. The Institute has engaged the services of an Independent Adviser to provide advice on suitable investments.

The portfolio has generated positive returns during the financial year, reflecting the performance of equity markets and at the same time fixed interest investments have preformed better than cash over the period. On an overall basis, the fund produced a total return 12.6%. For the financial year the FT All Gilt Index returned 7.4% and the FT All Share Index 28.0%.

A realignment of the portfolio took place during the year to lower the risk profile. Fixed interest investments remained short dated reflecting the needs of the fund, although this resulted in an element of underperformance as the best returns were seen from long dated stocks. Overseas equities were sold and stock specific risk in the UK was eliminated through investment in UK equity Exchange Traded Funds, rather than direct equity investments.UK equities matched index returns.

On an overall basis the year produced a satisfactory outcome. The asset mix is reviewed regularly to align investment objectives with the needs of the fund.

The Institute's investment policy and the performance of its investments against that policy are reviewed annually.

RESERVES POLICY

It is the policy of the Board that the balance on unrestricted funds is maintained at such a level as is deemed sufficient to enable the Institute to accommodate fluctuations in the timing of receipts and payments without exposing the Institute to undue financial risk.

From 1 November 2005 no further funding was received from the Institute's original sponsors, the previous funding arrangement having ended. One of the key tasks of the Trustees is to manage the remaining reserves whilst new sources of funding are identified.

Additionally the Institute is in a period of considerable uncertainty as it transitions from a body that carries out research itself to a facilitating body.

With the ending of the previous funding arrangements from 1 November 2005, reserves are needed to bridge the funding gaps between receiving funds through grants and donations and expenditure required to meet the charities objectives.

At the 31st March 2006, the actual reserves were £3,451,633 of which a balance of £2,082,883 was in unrestricted general reserves. This is close to the target figure for unrestricted reserves of £2,000,000.

At the 31st March 2006 the balance of funds in unrestricted designated reserves amounts to £1,368,750 a description of the items included herein is contained in note 7 to the financial statements.

The degree of adherence to and appropriateness of this policy is reviewed annually.

STATEMENT AS TO DISCLOSURE OF INFORMATION TO AUDITORS

The directors who were in office on the date of approval of these financial statements have confirmed, as far as they are aware, that there is no relevant audit information of which the auditors are unaware. Each of the directors have confirmed that they have taken all the steps that they ought to have taken as directors in order to make themselves aware of any relevant audit information and to establish that it has been communicated to the auditor.

The directors who were in office on the date of approval of these financial statements have confirmed, as far as they are aware, that there is no relevant audit information of which the auditors are unaware. Each of the directors have confirmed that they have taken all the steps that they ought to have taken as directors in order to make themselves aware of any relevant audit information and to establish that it has been communicated to the auditor.

TRUSTEES' RESPONSIBILITIES IN RELATION TO THE FINANCIAL STATEMENTS

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and United Kingdom Generally Accepted Accounting Practice. Company law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Institute and of the surplus or deficit of the Institute for that period. In preparing these statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Institute will continue in business.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Institute and to enable the directors to ensure that the financial statements comply with the Companies Act 1985. The directors are also responsible for safeguarding the assets of the Institute and hence for taking reasonable steps for prevention and detection of fraud and other irregularities.

In accordance with company law, as the company's directors, we certify that:

- so far as we are aware, there is no relevant audit information of which the company's auditors are unaware; and
- as the directors of the company we have taken all the steps that we ought to have taken in order to make ourselves aware of any relevant audit information and to establish that the charity's auditors are aware of that information

Auditors

A resolution will be proposed at the Annual General Meeting that Baker Tilly be appointed as auditors to the charity for the ensuing year.

By order of the Trustees

Brian Greenwood (Chairman)

BM. (removed.

Dated: 18 September 2006

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF THE EDWARD JENNER INSTITUTE FOR VACCINE RESEARCH

We have audited the financial statements on pages 13 to 24

This report is made solely to the charitable company's members, as a body, in accordance with section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the charitable company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the charitable company and the charitable company's members as a body, for our audit work, for this report, or for the opinions we have formed.

Respective responsibilities of trustees and auditors

The responsibilities of the trustees (who are also the directors of The Edward Jenner Institute for Vaccine Research Ltd for the purposes of company law) for preparing the Annual Report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) are set out in the Statement of Trustees' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985 and whether the Trustees'/Directors' Report is consistent with the financial statements. We also report to you if, in our opinion, the charitable company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding trustees' remuneration and other transactions is not disclosed.

Basis of audit opinion

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the trustees in the preparation of the financial statements, and of whether the accounting policies are appropriate to the charitable company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

In our opinion

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the charitable company's affairs as at 31 March 2006 and of its incoming resources and application of resources, including its income and expenditure, for the year then ended and have been properly prepared in accordance with the Companies Act 1985.
- the information given in the Trustees'/Directors' Report is consistent with the financial statements.

The notes on pages 17 to 24 form part of these financial statements.

NOTES TO THE ACCOUNTS

1 Accounting policies

(a) Accounting convention

The accounts have been prepared under the historical cost convention modified to include the revaluation of investments which are valued at market value. The accounts meet with the requirements of the Companies Act 1985 and have been prepared in accordance with the Statement of Recommended Practice: Accounting and Reporting by Charities (SORP 2005). The accounts comply with applicable accounting standards so far as these requirements are appropriate. Significant departures from applicable accounting standards are disclosed. The comparative figures have been restated for SORP 2005 compliance purposes. This has not altered the net assets position at 31 March 2005.

(b) Tangible Fixed assets

Fixed assets costing over £10,000 are depreciated to their estimated residual values by equal annual instalments over their expected useful lives as below. Items costing less than £10,000 are expensed in the year of purchase.

Leasehold land and buildings

over the term of the lease

Plant and machinery

3 - 10 years

No depreciation is provided on assets in course of construction, or works of art except in the event of permanent

diminution in value. (c) Investments

Investments are stated at market value as at the balance sheet date. The statement of financial activities includes the net gains and losses arising on revaluation and disposals throughout the year.

(d) Income

Income comprises grants received from sponsors and other funding agencies and miscellaneous income from other sources. Grants and other income received on account of activities to be undertaken or services to be provided in future periods are deferred.

(e) Restricted funds

Income received from sponsors and other funding agencies which is designated by the funder as to be applied for specific purposes is accounted for within restricted funds. Where that specific purpose is the provision of one or more fixed assets to be used in the general charitable activities of the Institute the restricted fund is subsequently reduced by transfers to unrestricted funds of amounts equivalent to any depreciation or amortisation charges over the expected useful life of the asset.

(f) Unrestricted and designated funds

Income received which is not designated by the sponsors or other funding agencies to be applied for specific purposes is accounted for within unrestricted funds. Funds committed by the trustees for a specific purpose which have not been expended at the end of an accounting period are accounted for within designated funds.

(g) Grants payable

Grants payable are charged in the year when the offer is conveyed to the recipient except in those cases where the offer is conditional, such grants being recognised as expenditure when the conditions attaching are fulfilled. Grants offered subject to conditions which have not been met at the year end are noted as a commitment but not accrued as expenditure.

(h) Charitable expenditure

Charitable expenditure comprises costs incurred directly or in support of scientific research whether undertaken at the Institute's own facilities or in other laboratories.

(i) Management and Support costs and Governance costs

Expenditure incurred on central management and administration of the Institute are reported as Support Costs in the Notes. Governance costs are costs incurred in the governance of the Institute and its assets and are primarily associated with statutory audit and legal fees.

(j) Value Added Tax

Expenditure includes any related irrecoverable Value Added Tax under each heading.

(k) Foreign currency transactions

Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rate ruling at the balance sheet date. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. (I) Leased assets

Rentals payable under operating leases are charged to the income and expenditure account and recognised in the statement of financial activities evenly over the lease term. Assets acquired under finance leases are capitalised as tangible assets and depreciated over their useful lives. Finance charges and interest are taken to income and expenditure account and the statement of financial activities in proportion to the remaining balance of capital repayments or net obligations outstanding.

NOTES TO THE ACCOUNTS (continued)

1 Accounting policies (continued)

(m) Reserves

The balance on unrestricted funds is maintained at such a level as to enable the Institute to accommodate fluctuations in the timing of receipts and payments without exposing the Institute to undue financial risk.

(n) Pensions

Employees of the Institute were entitled to join a defined contribution 'money purchase' scheme. The Institute's contribution is restricted to the commtributions disclosed in note 18. There were no outstanding contributions at the year end. From 1 November 2005 the Institute had no employees.

(o) Investment policy

The Institute's policy is to invest sufficient funds in such a way as to guarantee preservation of their capital value to cover any potential Iliabilities. Additional funds will be retained on short-term deposit to cover timing differences between receipts and expenditure. Remaining funds will be invested in such a way as to maximise growth.

Commitments resulting from grants awarded to these and other institutions:

Falling due for payment in year ending

31 March 2007

£278,394

These grants are to be wholly funded from future income.

6 Insurances

The Institute has entered a policy of insurance to indemnify trustees and officers against legal or other costs incurred as a consequence of their action or inaction as trustees or officers of the Institute. Premium and related costs inrespect of this policy totalling £2,100 (2005 £1,879) were paid by one of the Institute's sponsors.

NOTES TO THE ACCOUNTS (continued)

7 Designated funds

Designated funds comprise funds set aside to meet expenditure commitments and unencumbered revenues received from sources other than sponsors' contributions which have been set aside to provide facilities or supplement operating costs or meet any future liabilities of the Institute. The unexpended balance of designated funds is invested in temporary deposits and appears in the Balance Sheet under current assets and investments.

Transfers between funds are made up as follows:

		Transfers to/(from)	
	As at	Unrestricted	As at
	1 April 2005	General Fund	31 March 2006
	£	£	£
Designated:			
VAT Capital Goods Scheme	875,000	(656,250)	218,750
Severance Payment Provision	832,181	(832,181)	•
Old Road Campus, Oxford	-	1,000,000	1,000,000
Decommissioning provision	-	150,000	150,000
	1,707,181	(338,431)	1,368,750
	7,101,101	(000,101)	1,000,100

VAT Capital Goods Scheme

The Institute recovered £875,000 of input VAT arising from the construction of a purpose built research facility completed in August 1998. Under the VAT Capital Goods Scheme a proportion of this VAT is repayable to HM Revenue and Customs in the event that the facility ceased to be used for a charitable purpose the potential liability dimishes linearly to nil over a 10 year period. At the balance sheet date the building has been used for a charitable purpose for 7 years and 4 months

Severance Payment Provision

The restructuring plan for the Institute including the redundancy provision of the staff as the Institute transforms from an employing organisation to a facilitating one. Redundancy pay was settled in 2005-06 and there being no further requirement for a provision, the provision has been released.

Old Road Campus, Oxford

The Institute has committed £1m to provide space for a Jenner Institute at the Old Road Campus Site in Headington, Oxford. This is part of a £5m development being undertaken by the University of Oxford This presents an exciting opportunity for the new Institute to base its headquarters in purpose built space in one of the world's leading research universities, allowing considerable scope for enhancement of the field of vaccinology in the UK.

Decommissioning provision

The Institute owns a Gamma irradiation facility at the Compton site and whilst there no plans to decommission this facility a provision has been made against the cost of this work

18 Staff pensions

Employees are given the opportunity to participate in group personal pension plans. The Institute contributes towards personal pension plans established under the group scheme at fixed rates based on the employee's age and salary. The plans constitute defined contribution schemes and the Institute's liability is limited to the amount of the fixed contribution due each year.

NOTES TO THE ACCOUNTS (continued)

19 Related party transactions

The Institute has close working relationships with the Institute for Animal Health and the University of Oxford. Since the change in membership of the Institute on 1 November 2005 these bodies nominate the trustees. The Institute occupies premises at the Institute for Animal Health's Compton site. The following is a summary of purchases and recharges from these entities

	2006
	£
Institute for Animal Health	864,643
University of Oxford	388,086
	1,252,729

Comparatives are not provided as the Institute for Animal Health and the University of Oxford only became related parties during the course of 2005/06

20 Contingent liabilities

Under current VAT legislation a proportion of the VAT from which the Institute was relieved on the construction costs of the new laboratory is payable in the event that there is material business use of the building during the first ten years of its life.

This proportion is time related so that 7.5 years after the relief was granted the maximum potential liability is 25% of the original amount relieved

The estimated value of the VAT payable if this contingency is realised is £218,750. Funds have been designated in this amount and are held on deposit such that capital security and access without penalty are assured.

21 Capital commitments
