URBAN SPLASH GROUP LIMITED

ACCOUNTING POLICIES *(continued)*

YEAR ENDED 30 SEPTEMBER 2015

Going concern

The financial statements have been prepared on a going concern basis.

The company is a subsidiary of Urban Splash Holdings Limited, which manages its working capital and funding on a pooled basis across certain companies within the Group. Based on the relationship between the company and the parent company, the directors of the company have sought and received an expression of the parent company's intention not to require repayment of the intercompany balances which are due from this company, and to continue to support the company for not less than 12 months from the date of signing of these financial statements. In relying on this parent company support, the directors of the company are cognisant of the following going concern disclosure which appears in the financial statements of Urban Splash Holdings Limited for the period ended 30 September 2015;

"The financial statements have been prepared on a going concern basis.

The group's business activities, together with the factors likely to affect its future development, performance and position, and its exposures to liquidity risk are set out in this Strategic Report on pages 4 to 7. The financial position of the group, its cash flows, liquidity position, borrowing facilities, objectives and details of its financial instruments and hedging activities are described in notes 18,19 and 27.

On 31 October 2014, the group's shareholders purchased the remaining bank debt including accrued interest from HSBC at which point, all of the group's legacy bank debt had been refinanced in full. Whilst on demand, the shareholders have indicated they do not intend to demand any repayments unless the group has significant forecast headroom.

As detailed in note 27, the group has £100.7 million of net debt as at 30 September 2015 which is provided through a number of secured facilities from banks, the group's shareholders and a private company. At 31 March 2016 total net debt, was £95.8 million.

The principal components of the group's funding at 31 March 2016 were as follows:

- an on-demand loan facility from the group's shareholders totalling £41 million including accrued interest;*
- a term bank loan facility totalling £10.2 million excluding accrued interest under a facility which expires on 31 October 2019;*
- an on-demand (with 6 week notice to demand) £55.8 million loan facility, excluding accrued interest, provided by a private company;*
- a term loan facility totalling £0.9 million, which is repayable in full on or before 14 December 2017, and;*
- £12.1 million of cash*

All of the group's debt is performing in line with the expectations of its lenders and where tested, loan covenants are met with clear headroom and are forecast to continue to be so for the foreseeable future. The group has no overdraft facility and meets its day to day working capital requirements through trading activities and cash flows generated from asset sales. The current cash flow forecasts indicate that no further facilities are required in the foreseeable future.

The directors have prepared financial projections for the foreseeable future which reflect the existing facilities currently being made available to the group, albeit the majority of these facilities are on demand as set out above.

Although the economic environment has improved significantly over the period, there remain a number of uncertainties for all companies in the sectors in which the group operates with regard to future market valuation movements, mortgage availability as a result of market regulation, rental demand and the

URBAN SPLASH GROUP LIMITED

ACCOUNTING POLICIES

Going concern (continued)

resultant impact on occupancy and the group's ability to realise assets via sale in the short term should a need arise.

In addition to the above, the directors remain focussed on working capital management and the management of operating costs to ensure that the day to day cash flow requirements of the business are controlled.

On the basis of the forecasts, existing cash resources and that the group's lenders have indicated that the current on-demand facilities will not be demanded for the foreseeable future, the directors consider that the group and the company will continue to be meet its working capital requirements and not require any additional facilities for the foreseeable future.

On this basis, the directors consider it appropriate to prepare the financial statements on the going concern basis."

Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

Deferred tax is not recognised when fixed assets are revalued unless by the balance sheet date there is a binding agreement to sell the revalued assets and the gain or loss expected to arise on sale has been recognised in the financial statements. Neither is deferred tax recognised when fixed assets are sold and it is more likely than not that the taxable gain will be rolled over, being charged to tax only if and when the replacement assets are sold.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

Bank borrowings

Interest-bearing bank loans and overdrafts are recorded at the proceeds received, net of direct issue costs. Finance charges, including premiums payable on settlement or redemption and direct issue costs, are accounted for on an accruals basis in the profit or loss account (or capitalised into work in progress or assets under construction as appropriate) using the effective interest method and are added to accruals to the extent they are not settled in the period in which they arise.

Investment in subsidiary undertaking

Fixed asset investments are shown at cost less provision for impairment.

5. TAXATION ON ORDINARY ACTIVITIES *(continued)*

(b) Factors that may affect future tax charges

Legislation to reduce the main rate of UK corporation tax to 20% was passed by parliament on 18 July 2013 to take effect from 1 April 2015. The reduction in the main rate had been substantively enacted at the balance sheet date and, therefore, the group's closing unrecognised deferred tax balances are measured at this rate.

The tax charge in future periods will be affected by the reduction in the corporation tax main rate to 19% from 1 April 2017 and to 18% from April 2018. It is not expected that the reduction will have a significant impact on the company's unrecognised deferred tax balances.

The deferred tax asset has increased to £1,470,567 (2014: £1,321,979) during the year and has not been recognised because, in the opinion of the directors, there will be no suitable taxable profits available in the foreseeable future.
