NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2006

1 PRINCIPAL ACCOUNTING POLICIES

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the Company's financial statements

1.1 Basis of preparation

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of land and buildings and in accordance with applicable accounting standards. The Company has taken advantage of the exemption in Financial Reporting Standard No. 1 as a cash flow statement has been prepared for the Group. The Company is a wholly owned subsidiary of CLS Holdings plc and has taken advantage of the exemption in Financial Reporting Standard. No. 8 not to detail transactions with fellow Group undertakings as the financial statements of CLS Holdings plc are publicly available. The Company has received assurances from fellow group companies that sufficient funds will be made available to meet the Company's requirements for at least twelve months from the date of

1 2 Tangible fixed assets

Investment properties are revalued bi-annually. Completed investment properties are stated at their open market value. Investment properties in the course of development are stated at open market value in their existing state. Surpluses or deficits arising on revaluation are reflected in the revaluation reserve. Revaluation deficits in excess of the amount of prior revaluation surpluses are charged to the profit and loss account.

1.3 Depreciation

In accordance with Statement of Standard Accounting Practice 19 no depreciation is provided on completed freehold investment properties. The requirement of the Companies Act 1985 is to depreciate all properties, but that requirement conflicts with the generally accepted accounting principle set out in SSAP 19. The Directors consider that, as these properties are not held for consumption but for investment, to depreciate them would not give a true and fair view and that it is necessary to adopt SSAP 19 in order to give a true and fair view. Depreciation or amortisation is one of the many factors influencing a property valuation and if depreciation or amortisation might have been charged, it is not possible to identify or quantify this separately.

14 Turnover

Turnover comprises the total value of investment income and rents receivable under operating leases, including reverse premiums paid by tenants on surrender of leases and property-related services provided during the year excluding VAT and intra-group trading. Where there is a material rent free period and the amount is considered to be recoverable, the income is spread evenly over the period to the date of the first break. Rents received in advance are shown as deferred income in the balance sheet.

1 5 Deferred Taxation

Deferred taxation is recognised in respect of timing differences arising from differences in the treatment for accounts and tax purposes of transactions or events recognised in the financial statements except that

- Provision is not made in respect of property revaluation gains and losses
- Deferred tax assets are recognised only to the extent that suitable taxable profits are considered sufficiently

certain to arise which could be set against these assets when they reverse

Deferred tax is measured on a non-discounted basis at the tax rates that are expected to apply in the periods in which the timing differences reverse

16 Loan Costs

Issue costs relating to new loans are capitalised and amortised to follow the profile of the loan principal Unamortised amounts at the balance sheet date are deferred against the loan liability

17 Interest Rate Caps

The premium paid for interest rate caps used to hedge borrowings is held within debtors on the balance

15 POST BALANCE SHEET EVENTS

On 21 March 2007 the Chancellor proposed a reduction in the Corporation tax rate in the UK from 30 per cent effective from 1 April 2008. In accordance with UK GAAP provisions, the existing rate of 30 per cent is still used as a basis for the calculation of the deferred tax stated. An estimate of the financial effect of this change cannot be made due to the uncertain timing of the reversal or crystalisation of the deferred tax provisions.
